July 19.—Loose hay is coming freely to market and giving sharp competition to the old crop. Demand is well sustained and market active. The tone is easy at a decline of $2 in the leading grades. Clover is not in much demand. Quote: No. 1 timothy, $32.50@33; standard timothy, $31.50@32; light mixed, $31.50@32; No. 2 timothy, $30.50@31; No. 3 timothy, $25@28; No. 1 clover, $25@25 per ton.

DULUTH.

July 19.—Receipts of hay on this market during the last week were confined to 2 cars and business was reported merely nominal by dealers. Quotations weakened $2@3 on expectations of a slump in the market as soon as this season's big hay crop in this territory becomes available for the market. Quotations follow: No. 1 timothy, per ton, $26@27; No. 2 timothy, per ton, $24@25; No. 1 mixed timothy, per ton, $23@24; No. 2 mixed timothy, per ton, $20@23; No. 1 prairie, per ton, $25@26; No. 2 prairie, per ton, $22@24; No. 3 prairie, per ton, $18@20; No. 1 midland, per ton, $20@21; No. 2 midland, per ton, $10@12; rye straw, per ton, $9@10; oat straw, per ton $9@10.

PHILADELPHIA.

July 19.—Baled Hay and Straw—The market for hay continues dull and unsettled. No. 1 hay is scarce and if here would command a substantial premium over outside quotations. The supply here is made up of medium and low grades which are pressed for sale at low and irregular prices. Straw is quiet but steady under small stocks.

Timothy hay (according to location): No. 1, nominal; No. 2, $36@37; No. 3, $32@33. Clover mixed hay: light mixed, $36@37; lower grades, $31@35. Straw: No. 1 straight rye, $13@13.50; No. 2 straight rye, $12@12.50; No. 1 tangled rye, $12.50@13; No. 2 tangled rye, $11.50@12; No. 1 wheat straw, $11.50@12; No. 2 wheat straw, $10.50@11; No. 1 oat straw, $12@12.50; No. 2 oat straw, $11@11.50.

LOUISVILLE, KY.

July 19.—New hay began arriving on the market during the week, and while many consumers are not willing to accept new hay for fear of heating, it will fill the shortage. Old hay is moving slowly, while new hay is apparently of excellent quality and about $10 a ton cheaper.

Quotations are: Old hay—timothy No. 1, $27.50; No. 2, $36; No. 1 mixed, $34; No. 2, $32; No. 1 clover, $30; No. 2, $28; No. 1 alfalfa, $34; wheat and oat straw, $8.50; rye straw, 10.

New hay—No. 1 timothy, $28; No. 2, $26; No. 1 mixed, $25; No. 2, $23.

BOSTON.

July 19.—Local conditions in the hay market show no improvement. The demand continues slow and receivers find it difficult to make sales even when concessions from asking prices are made. Most receivers are willing to cut prices to some extent in order to induce the trade to operate, but buyers are holding off and only

meeting most pressing needs. Prices generally are considerably lower than last week with some of the lower grades offered at even lower prices. The city demand is practically at a standstill, with the demand from out-of-town points almost nothing. There has been considerable inquiry and correspondence between shippers and the trade regarding new hay, but up to the present time no local business has been placed, as prices quoted by shippers are too high to interest buyers here. No new hay has arrived yet and no quotations are available, but it is expected that shipments will commence by the end of the month. No. 1 timothy hay is nominally quoted at $40 per ton for large and small bales, but there is little of this grade available. No. 2 timothy ranges at $34@35. No. 1 Eastern is offered at $33@35 per ton with No. 2 eastern at $30@31. No. 3 hay is quoted about $28@29. For all grades of clover mixed hay a range of $28@30 is quoted. Fine hay ranges at $25@28 for poor to choice. Packing hay is quoted at $18@20 per ton. Receipts for the week ending July 19 were: local, 103 cars.

The straw market is held steady with a moderate demand. Choice rye straw is quoted at $16 per ton as an extreme price with oat straw at $12. Receipts for the week ending July 19 were: local 3 cars.

CINCINNATI.

July 22.—Dull and irregular conditions prevailed here most of the week due to the almost entire lack of shipping orders, poor quality of old hay, and the usual adjustment of old prices to the new crop basis. Early in the week $34.75 was realized for a car of new No. 1 timothy of cool and sweet quality, but prices looked bad the following day with a loss of $4 to $5 per ton, only to again advance to $31.50. Offerings of new were mostly warm or heating, and had to be liberally discounted to effect sales. The slight firmness at the close was due to active buying by large local feeding interests and was regarded as only temporary as no other improvement was noted in demand from other sources, while the movement is expected to be liberally increased. The reduced attendance of buyers, who were at the Detroit convention of the National Hay association, also contributed to the depressed conditions.

On Saturday the market again ruled firm, old timothy advancing to $38.50 and new to $34 per ton.

Old Hay—No. 1 timothy, strictly, $37.50@38.50; standard timothy, $36.50@37.50; No. 2 timothy, $34@36; No. 3 timothy $28@30; threshed timothy, $19@23; light clover mixed, $31.50@32.50; No. 1 clover mixed, $29@31; No. 2 clover mixed, $24@27; No. 1 clover, $24@25; No. 2 clover, $20@23; No. 1 local alfalfa, new, $27@29.

New Hay—No. 1 timothy, $33@34; standard timothy, $31@32; No. 2 timothy, $29@31; No. 3 timothy, $25@28; light clover mixed, $30@31; No. 1 clover mixed, $28@30; No. 2 clover mixed, $25@27; No. 1 clover, $22@24; No. 2 clover, $20@22.

NEW ORLEANS, LA.

July 19.—No. 1 timothy hay offered at $33.50, with $1 off if No. 2. Recent sales have been made at this basis. New Orleans weight and grades to govern. Some sections of Illinois asking $1 more for this grade. Texas prairie hay offered for shipment from $21@22.

ST. LOUIS.

July 19.—Receipts of hay during the past week have been moderate in amount and consist principally of medium grade timothy, with a scattering amount of new hay.

Timothy hay market continues to rule strong, with an active local demand for good No. 1 to choice timothy, either old or new, there being an excellent unsupplied demand for hay of this character. Medium grades are also in fair request, but low grades still continue dull and slow.

Light clover mixed hay, either old or new, is selling readily at full quotations. Heated or off grade hay is undesirable and difficult to sell.

Heavy clover mixed hay steady. Demand fair, offerings moderate and readily salable at quotations.

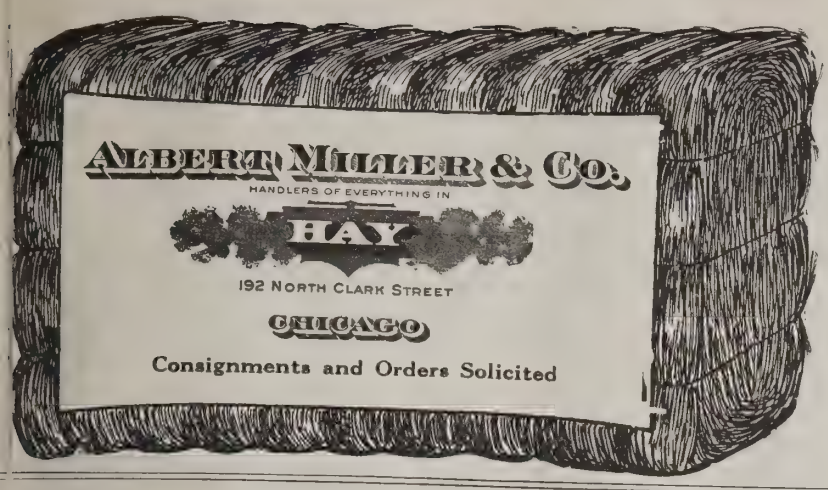
Pure clover hay continues in scant offering. The demand is good for good No. 1 bright new or old clover, but low grade clover hay that is musty or heated is difficult to place.

Alfalfa hay continues in very scant offering, practically no alfalfa coming in. The demand is urgent here for good No. 1 to choice, which would sell readily at quotations. The lower grades, especially hay that is dark colored or brown, are slow sale, there being little call for common hay.

Prairie hay market steady, offerings moderate, demand right good for Kansas or Oklahoma hay, but Iowa and Nebraska hay is in very liberal supply and rather slow sale.

Straw is scarce and wanted.

Timothy, old: No. 1, $38@40; standard $37@38; No. 2, $34@35; No. 3, $28@30; headed, $25@26; threshed, $18@20. New hay from $3 to $4 a ton lower than the above quotations. Light clover mixed: No. 1, $33@34; No. 2, $32@33. Heavy clover mixed; No. 1, $32@33; No. 2, $28@29. Clover hay: Choice, $27@28; No. 1, $25@26; No. 2, $20@24. Alfalfa hay: Choice, $35@36; No. 1, $33@34; standard, $31@32; No. 2, $25@26. Prairie hay: choice, $30@31; No. 1, $29@30; standard, $27@28; No. 2, $25@26. Straw, $10.



TAMPA, FLA.

July 18.—No. 1 timothy, new crop, is offered $38.50@39. Choice peagreen alfalfa, $35.50. The demand is fairly good, especially for alfalfa. Receipts, eighteen cars.

KANSAS CITY.

July 19.—Further declines in prairie hay have forced this variety down to a top of $20 a ton for choice in Kansas City, a decline of $4 to $5 a ton for the week. The choice grades of prairie were unchanged to 50c lower. Alfalfa displayed a strong demand with the cheaper grades selling at a decided advance of $1 to $3 a ton. Other changes included a decline of 50c to $1 a ton on timothy and clover mixed. The movement of hay to market increased sharply, the total amounting to 835 cars, compared with 442 cars last week and 1,000 cars a year ago. The increase was principally on prairie, with a slight gain in arrivals of alfalfa. Straw prices were quoted $1 higher.

Prairie—Choice, $20; No. 1, $18.50@

2, $16@18; No. 3, $8@15.50; packing $5.50@7.50.

idland prairie—No. 1,$14@16; No. 2, 13.50.

falfa—Choice, $28@28.50; No. 1, $26.50 50; standard, $21.50@26; No. 2, $17.50 ; No. 3, $14@17.

mothy—No. 1, $28@28.50; standard, 27.50; No. 2, $22.50@25.50; No. 3, $15.50

over mixed—Light, $27.50@28.50; No. 1, 27; No. 2, $18@24.50.

over—No. 1, $22@24; No. 2, $13@21.50.

raw, $10@11.

MILWAUKEE.

ly 19.—The local hay market is quiet practically no change in prices, which eased during the previous weeks. The crop is about exhausted but good urage is available for feeding purposes. new hay crop will be exceptionally y this season which will undoubtedly it in a lower range of prices and ent a shortage of supplies. Current ations are: Choice timothy hay, $28@ ; No. 1, $27@27.50; No. 2, $23@24.50; 1 clover, $15@17; light clover mixed, 24; red top and timothy mixed, $22@ stained timothy, $12@15; marsh feed- $10.50@11; packing, $9@10; rye straw, @10; oat straw, $9@9.50.

NEW YORK.

ly 18.—New York Hay Exchange re- the hay situation as follows:

	Hay tons	Straw tons
ipts for week.....	4,289	300
ipts last week.....	3,518	270
ipts Sept. 1 to date....199,492		12,668

e market has made a further decline our last report. The highest grades rge baled hay are still in light supply, there is a continued surplus of small which are being urged for sale at irregular prices. The gap between and small has reached unusual pro- ons; on even grades small bales are ently discounted $4@5 per ton under qualities in large bales, and on some e medium grades this discount is even er, in instances amounting to $6@8 on. The big gap in values is turning of the trade to small baled hay and endency from now on should be to- a lessening of the difference. Stocks y headed this way are reducing some- and there is a general report of r new invoices. But supply in sight ge and there is a large proportion of bales in the stock now rolling.

y few cars of strictly No. 1 hay in bales have arrived this week. In lyn rare sales have been reported up 0 rarely even higher. But on Man- n markets sales over $39 are excep- and average best large baled hay is asily placed over $37@38. The medium ower grades of large baled hay are lower than last week, these feeling ffect of the competition with small hay of even grade. Most sales of baled hay have ranged from $30 It has been very difficult at the attan markets to exceed $34 for the mall hay arriving, although in Brook- me business is reported higher. We me very good small hay selling at t. shed at $32 per ton, hay that on a market would be taken by some s as No. 1. On the medium and grades of small hay it is a go-as- lease market with no definite value. sales have ranged from $24 down to $21 and a number of cars of sound hay were secured at $19@21. At the lower asking prices the movement is better, though the feeling is still weak with a willingness to force sales. Clover and mixed hay drag at irregular prices.

Rye straw has lately been selling here at $12@13 but some shortage at the moment and we hear of sales up to $14. Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay.....	$37.00@39.50	$33.00@35.00
No. 2 hay.....	33.00@36.00	26.00@31.00
No. 3 hay.....	27.00@30.00	21.00@24.00
Shipping hay.....	22.00@26.00	19.00@21.00
No grade	18.00@21.00	15.00@18.00
Fancy light clover mixed hay	34.00@36.00	27.00@31.00
No. 1 clover mixed	30.00@31.00	24.00@26.00
No. 2 clover mixed	24.00@27.00	20.00@23.00
No. 1 rye straw...	13.00@14.00	.....
No. 1 oat straw...	10.00@11.00	.....

MONTREAL.

July 19.—A large portion of the hay in this province has been cut, and a good portion of it housed and stacked. Fine weather now is needed for the final ingathering of the crop, which bids fair to be an average one. On Monday last, in districts between St. Martine, Howick, Ormstown and Huntingdon were seen uncut some heavy fields of clover, and timothy and clover mixed, and some very fine areas of timothy. There were also in the same sections quite a few fields of light timothy. It is the opinion of dealers who have been through the principal hay districts of this province and Eastern Ontario that the crop will be a fair average one. Of course it remains to be seen in what condition the crop on the whole is harvested.

Since our last report prices have declined $2@3 per ton, sales of carlots of baled hay being reported at $29@30 for No. 2 grade timothy, $26@28 for No. 3 and under, and $23@25 for clover and clover mixed.

The Alberta hay crop is reported short, and it is believed that supplies will have to be imported from Ontario and Quebec.

The receipts of hay during the last week at Montreal were 3,705 bales, against 11,061 bales for the same week last year. A St. Hyacinthe man stated that there was no demand for carlots of hay as dealers here had all the supplies they needed, which they were buying to work off before the new crop came on the market, and prices ruled from $25 to $30 as to quality.—Trade Bulletin.

SAN FRANCISCO.

July 18.—Since the 4th of July, as is usually the case, receipts have commenced to increase very rapidly and no doubt the amount of hay received on this market from now on for the next two months will probably be considerably in excess of what they have been for some time past. To offset this increase in receipts business usually increases on account of large feeders laying in their winter supply at this time. Therefore, one generally balances the other as far as the market supply and demand goes. The market has been well supplied, at the same time receipts have moved without difficulty and although the new crop is on a basis considerably lower than old crop hay, yet it is bringing fair prices. No. 1 red oat and also wheat hay is now arriving and orders are being filled without delay. Last year at this time the Government was using in the neighborhood of 9,000 tons of hay per month for their various encampments. At this time, however, they are only using about 1,500 tons per month. As the Government purchases were the principal business last year it would naturally be figured that trade should be quite dull. The interior trade, however, has been very fair which has somewhat helped to offset the loss of Government business.

Alfalfa seems to be the best seller, much being moved to interior points.

Prices remain about the same as heretofore with our lower range of prices being the more popular and a downward tendency and feeling. We quote: Fancy wheat hay (light 5-wire bales), $17.50@18; No. 1 wheat or wheat and oat hay, $15@17; No. 2, $12@14; choice tame oat hay, $15@17; other, $12@14; wild oat hay, $10@12; barley hay, $11@13; alfalfa, $14@16; stock hay, $9@11; No. 1 barley straw, 50@80c per bale. Straw is nominal.

BALTIMORE.

July 19.—There is an undertone of more steadiness to the local hay market, following the drastic decline we have experienced in the past few weeks, and demand for the more desirable grades of timothy and light mixed hay shows improvement. Receipts are only moderate.

Straw of all descriptions is in ample supply and selling sparingly. Under these conditions there is not much strength to prices. Quotations follow for old hay:

Timothy—No. 1, $35; standard, $33@34; No. 2, $31@32; No. 3, $27@29.

Light clover mixed—No. 1, $30@31; No. 2, $29@30.

Clover mixed—No. 1, $29@30; No. 2, $25@28.

Clover, nominal—No. 1, $27; No. 2, $25; No. 3, $24.

Straw—No. 1 straight rye, $15@15.50; No. 2, $14@14.50; No. 1 tangled, $12.50@13.50; No. 1 wheat, $8@8.50; No. 1 oat, $11.50@12.

CHICAGO.

July 22.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending July 19, also the total receipts and shipments of hay from Jan. 1, 1919:

	July 19, 1919.	July 12, 1919.	July 20, 1918.
Total receipts	2,359	6,443	5,033
Total shipments ...	1,079	1,506	6,502
Recpts. since Jan. 1.	142,571	140,212	196,847
Shpts. since Jan. 1.	34,005	32,926	64,281

The enlarged receipts last week had no effect on prices, everything offered finding ready sale, and for most days the market was bare of timothy. Some new timothy has begun to arrive, most of it seemingly in good condition. Most of it comes in on eastern roads. The advice to the trade now is to get rid of all old timothy during this month or as quickly as possible. Monday's arrivals of 16 cars new timothy, 9 of old and 2 of new prairie were light for a Monday, but the demand for new timothy was rather slow, and the trade buy it in small quantities. Old timothy still in good demand with good kinds urgently needed and selling higher. Quote as follows:

Timothy—No. 1, $34@36; standard, $33@34; No. 2, $31@32; No. 3, $25@28; sample, $24@27; threshed, $15@20; new, $24@30.

Clover—No. 1 light, $31@32; No. 1 mixed, $23@25; Clover, $15@22.

Prairie—The occasional car arriving is meeting a ready sale at the quotations. Quote: Kansas and Okla., $22@28; Ia., Minn., Dak., $20@24.

Marsh hay, feeding, $15@18; packing, $12@13.

Straw—Rye and oat, $10@11; wheat, $7@8.

Auto Truck vs. the Horse.

Fred. M. Williams of W. D. Power & Co., New York, is not yet alarmed about the auto truck. At Detroit he said among others things: "You have now turned your attention to the farm and are endeavoring to substitute the tractor for the farm horse. With automobiles attaining a speed of 120 miles an hour, with railroad trains making the run from Chicago to New York in 18 hours, and aeroplanes crossing the Atlantic in 16 hours, it would almost seem as though the poor old horse has just about reached the finish of his sphere of usefulness. We hay men, however, believe that the automobile and truck have about reached the height of their efficiency, and from now on, whatever changes there may be in method of automobile vs. horse transportation, we are incined to believe that it is very apt to result in favor of the horse. The auto truck, generally speaking, is operated at a loss as compared with the horse. It may excel in long haul work, but for the short hauls, horse power is far more economical. The wonderful prosperity of the country during the last few years, especially during the world war, has resulted in extravagance and waste to an extent undreamed of in our history. When we have a reversal of conditions, which we are bound to have sooner or later, it undoubtedly will have a greater effect on the automobile industry than any other branch of trade. Automobiles, generally speaking, are regarded as the most expensive luxury of modern times."

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, July 21.—Speculative business in provisions is light and is expected to remain so, so long as uncertainty prevails. Investigation of the packing interests by the Government, labor troubles at the Stock Yards, weakness and decline in foreign exchange created a bearish feeling among professional speculators and lowered prices. Selling of the surplus holdings of the Government, which are offered to be disposed of July 27 to 28, were also depressing factors. The Government is offering 50,000,000 lbs. of frozen beef, 7,000,000 lbs. of pork, 838,000 lbs. of mutton and nearly 3,000,000 lbs. of poultry. Most of this is at the Seaboard. There is also considerable bacon to be sold.

Prices moved irregularly throughout the week with a decline of nearly 2c a pound in lard followed by a good recovery on support given by the packers and on profit-taking by shorts, but the close was at losses of $1.35@1.65, the latter on September and the former on July, as compared with the finish a week ago. Pork broke $2.70 for September from the high point of the week and closed almost $1 above the inside figure with a loss of $1.25. July pork was neglected and lost only 60c for the week. Shortribs at the low point were off $1.25 per 100 lbs. from the top figure on September and 90c on July, but the close was at losses of 50c on July and 85c on September.

Trading was largely in lard, packers selling all deliveries, particularly July, on the rallies, and giving the market support at times on the breaks. Cash demand was not so good, although a fair business was done. Leaf lard was $32 at the close and loose lard about 80c under July. Stocks increased 4,695,000 lbs. for the first two weeks of the month, being 38,823,000 lbs., against 37,867,000 lbs. last year and 51,466,000 lbs. two years ago. Shipments for the week were curtailed by a strike of seamen at all Atlantic ports, which has tied up ocean shipping. It is said that the make of lard is not so large, as considerable product has been going into the tanks of late, there being a better demand for it at more profitable prices than running it to the tank.

Deliveries on July contract were lighter, but for the first nineteen days of this month aggregated 5,500,000 lbs. There were deliveries of 250,000 lbs. of shortribs during the week.

Interest in shortribs was moderate and mostly speclative. Export business in all meats was fair and more demand existed for hams. Stocks of shortribs increased 612,000 lbs. for the first two weeks, and extra clears 499,000 lbs., but are small as compared with last year. In pork liquidation is a feature selling on stop orders, carrying prices down sharply at times.

Range of prices in June and previous and for the week follow:

			Close

Kansas City Provision Review.

KANSAS CITY, July 19.—A moderate to good demand prevailed for provision products on the Kansas City market this week, with prices following a downward trend. Lower prices for live hogs, labor difficulties and the critical foreign exchange situation comprised the important bearish market influences. Demand for fresh pork was good, including local and Eastern sales. Prices on loins were quoted down as much as 2c, boneless shoulders were off 1@2c, spareribs off 1c, with leaves showing a rise of ½c for the week. A good demand prevailed for lard, with prices displaying a strong tone. Dry salt and heavy smoked meats sold well. Liberal shipments were made to the South. Fancy hams and bacon were in fair demand, showing a slight decline. With packers' operations in Chicago restricted by a strike of workmen, Kansas City plants have been working to capacity in filling orders.

Summary of Live Stock Markets.

Highest prices on hogs at leading markets last week as compiled by the *Daily Drovers Journal* were as follows:

	Mon.	Tues.	Wed.	Thur.	Fri.	Sat.
Chi.	$23.00	$22.90	$22.80	$22.40	$22.40	$22.50
K. City	22.45	22.40	22.35	22.10	22.20	22.20
Omaha	22.15	22.00	21.80	21.80	21.75	21.90

LIVE STOCK IN AUSTRALIA.

Con.-Gen. Brittain, Sydney, says that recent published returns say that there are now in Australia 91,676,281 sheep and 11,040,391 cattle. Owing to the lack of tonnage, the frozen meat exported last year was a very small quantity, only 177,797 carcasses of mutton and 161,917 carcasses of lamb being shipped. The beef shipments totalled 1,407,421 quarters, or about 200,000 below the previous year. With the exception of about 8,000 quarters, the whole of the beef was exported from Queensland. The prospects for the coming season, however, are brighter as more vessels with refrigerating space are arriving. Wethers of the best quality sold as high as $13.92 each, and lambs of the best quality at $8.12. Prime bullocks sold as high as $168; cows, $122; steers, $105; calves, $60. The general opinion is that meat prices in 1919 and 1920 will be the highest ever recorded in Australia.

Minneapolis mills have begun purchasing 1919 wheat, the first car of which reached Minneapolis on July 7 from the Southwest.

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, July 21.—Labor troubles packing town multiplied rapidly week and there were comparatively packers who did not have a walkout strike or have several departments their houses closed. Notice was out at the close of the week to back shipments of live stock.

Packers were moderate buyers of live stock, which materially assis values, particularly toward the making a very unsatisfactory feel Top prices on hogs for the week $23, or the same as the previous w but at the close the best was $2 with 3,500 hogs unsold. Eastern s pers and packers of nearby po bought 3,000 hogs on Saturday, and ings for the week were 29,194 aga 8,750 last year. Packers' purchases the week were 126,500, compared 151,500 the previous week and 135 last year. The Armour interest 24,800, Swift 32,600, Morris 11,600, son 9,100. Prices averaged $20.85 the close Saturday against $22.3 week ago. Average for the week $21.85, or 10c under the previous w and compared with $18 last year. crage weight was 242 lbs., against ibs. the previous week and 244 lbs. year. Receipts at the seven mark were 444,000, against 530,000 the pr ous week and only 1,000 less than year. The twenty markets had 598, a decrease of 114,300 from the previ week.

An unsettled market for cattle isted during the week with a widen of the spread between good and under grades. Choice steers were light supply and good demand, clos 50c to $1 higher with the top for week $18.15, or $1 above the previ week, and only 30c under last ye Common and medium steers finished to $1.50 lower, grassers being in lead. Western range cattle are be liquidated, owing to drouth affect pastures, and the movement is u ually heavy for this time of the y Supplies at the seven markets w 225,000, against 155,000 the previ week and 277,000 last year.

Steers good enough to bring $15 above were in active demand, w those not up to that level were mo ate sale with a range of $12 to $14 with common grades $11 and bel There has been a good movement steers, cows and bulls for export, four shiploads have been sent over late. Average price of beef cattle the week was $16, against $15.10 previous week and $16.20 last y Cows and heifers closed $1 to $ lower with common lots in some stances off $3. Canners and cut were 50 to 75c lower. The bulk of to good grades sold at $9.25 to $1 with choice up to $13. Bulls calves lost 50 to 75c. Bulls ranged $8.75 and lower for common with bulk of the good class at $9 to $9 Canners and cutters were $5.75 to $6 Calves ranged at $18 to $18.25 for best. Stockers and feeder trade light, farmers being too busy with vest to pay much attention to ca Prices generally were $1 to $1.50 lo for the week, common light feeders ing at $7 to $8, a decline of around while common ranged down to $6.50

Feeders were the best buyers Western range sheep, Montana weth bringing $8 and thin Idaho yearli sold to killers at $11.50 to $12, aged wethers at $9.75 to $10.75 ewes at $9.25 to $9.75. Average sheep for the week was $9.80, an vance of 75c over the previous w and compared with $13.40 last year.

Fat lambs declined 75c to $1.25 f the high point of last week with top at $18.25 and the bulk of sales $17.25 to $18.25 with an average $17.75, a jump of 65c for the week, a loss of 50c from last year. Chic

e 104,591 for the week, a loss of
rly 5,000 from the previous week
n a gain of 22,000 over last year.
stimated receipts at Chicago for
week are: Cattle 65,000, hogs
000, sheep 85,000. Receipts last

p 67,485.

Kansas City Live Stock Market.

Sanders Sosland, Correspondent.

nsas City, July 19.—Irregularity
ked the changes in the trade in live
k in Kansas City this week. Receipts
ttle increased, as usual at this season,
the total was still behind a year ago.
sheep supply showed an increase,
dry weather offerings from Omaha
ded in the arrivals. Speculators sent
latter to this market. Hog arrivals
ed a small decrease. The trade in
p made the best display of strength,
g influenced by heavy buying of feed-
stock to be put on stubble fields in the
hwest.

the close of the week there was
dence that the Chicago strike was
fting the local market. Packers here
ed a desire to increase slaughterings,
their shipments of meat were enlarged,
g partly to the fact that orders usually
at Chicago were diverted to this
ket.

e arrivals of cattle were practically
le the total of the preceding week,
the movement was not unusual for
season. Prices of corn-fed steers,
h were very scarce, rose 50 cents.
the better grades of grassers held
ly and medium grades declined 15 to
nts. Top steers brought $16.75, and
top on Kansas wintered grassers was
0. Butcher stock predominated, and
cled 50 to 75 cents, with top cows up
1. Veal calves, owing to a record run,
ding 7,374 on Monday alone, the
st total in history for a day, fell $2 to
er hundredweight, closing with a top
4. They had sold up to $17.25 this
n. Stocker and feeder trade was
with the market about 25 cents lower.
y orders for cattle for slaughter
from the East.

er scoring a new record of $22.45, the
et for hogs fell back and closed 35 to
nts lower for the week. The market
down 60 cents at one time. A let-up
e shipping demand gave the packers
pportunity to depress prices. Mil-
kee has lately been taking many hogs
but the buying halted this week.
receded $1, with 50 to 60-pound
hts showing the greatest weakness.
an average of $22.14 on packers'
s Monday, the market closed with an
age of $21.64.

t lambs closed 15 to 25 cents up, and
sheep 50 cents to $1 higher. Lambs
up to $17. Feeding lambs were quoted
$15. and breeding ewes were as high
6. Increased range runs are expected.
and for oats was limited, with few
ed. Ewes were quoted up to $9.50 in
to packers, and wethers around $10.

Omaha Live Stock Market.

Bruce McCullough, Correspondent.

South Omaha, July 19.—Cattle receipts
of liberal proportion last week ow-
to the fact that thousands of western
ers are being shipped in at this time.
total was 31,000 head or nearly 9,000
than for the week previous. Offerings
orn fed beeves, however, have been
easing with a corresponding increase
the demand for them so that prices
advanced fully $1.00@1.25. Best
y beeves of the week brought $17.40
best yearlings $17.25. Bulk of the
to good 1,000 to 1,150 pound steers
at a spread of $15.75@16.75, the com-
to fair warmed up and short fed
s going from $15 down.

During the early part of the week there
a keen demand from both packers and
ers for the western cattle and prices
nced fully $1 on an average but later
advance was all lost and the close
very weak. Best rangers here dur-
the week brought $14.85 and the fair
ood kinds sold largely around $10.50
00.

siness in stockers and feeders is be-
ing to pick up and choice fleshy kinds
going at strong figures, $12@14, medium
common stuff as well as stock cattle
been in liberal supply and have sold
bout half dollar with trading largely
nd $8.50@10.50.

e run of hogs has dropped off a little
so has the demand for them. Prices
around 50@60c lower for the week but
packers and shipping buyers are still
ig hold freely and the movement has
reasonably active practically all week.
rs still show a marked preference for
light and butcher weight hogs and
sell at the top of the list while rough
packing grades are slow sellers at
m figures. The range of prices is
wide. With about 5,000 hogs here
y there was a reaction and prices
l 10@25c higher. Tops brought $21.90
the bulk of the trading was at $21.05
35.

r the past week the run of sheep was
st three times as heavy as a year ago
demand was broad and prices showed
little change as compared with a
previous. Labor trouble has slowed
he trade in feeder sheep but demand
the country is still broad and prices
nd half dollar lower than a week ago.
fat lambs bring $17.50 and best feeder
lambs are selling around $14@14.25. Yearlings are going at $10.25@11.25, wethers $10@10.75, and ewes $7@9.25.

St. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

National Stock Yards, July 19.—The cattle market continues a strong, active affair. It is around 50c higher for the week and is right at $2 higher than the low point early in the month at which time the advance began. Quality considered, prices are not far from the high point of the year. The advances have caused an increase in the movement of cattle to market, particularly from the corn belt sections. The top for the week on beef steers was $16.75. It was made on a string of Missouri beeves which had some quality and finish but could not be called choice or prime. Butcher yearlings were in demand, especially the good ones and good veals got up to $19. There has been somewhat of a lull in the movement of Texas and Oklahoma cattle. We anticipate a larger supply of them this coming week.

The hog market is very irregular. It is closing the week about steady with the bulk prices at the close of last week, although our top today is 10c higher than the top last Saturday. The quality of the hogs has been as irregular as the prices. We are receiving a fair number of finished heavy hogs, but there is a very generous supply of the medium and light kind. The market generally has been fairly active with slow trade apparent only on the common grades. The week's closing quotations are: Mixed and butchers, $22.15@22.75; good heavies, $22.65@22.75; rough $18@20.75; light, $22.15@22.60; pigs, $16.50@21.25; bulk, $22.15@22.60.

A very materially increasing volume of sheep and lambs has had the effect of advancing the market rather than lowering it but this condition is particularly noticeable on good lambs. They are 50c to 75c higher for the week while the medium and common kinds find slow sale and hardly hold to steady prices. Mutton sheep are scarce and are on a steady to strong basis. There is a most noticeable shortage of ewes in the receipts. This indicates to us that the producers are doing the same this year that they did last, namely, holding their she stuff back for breeding purposes. This means of course a continuation of increasing receipts.

Fort Worth Live Stock Market.

Roy C. Murphy, Correspondent.

Fort Worth, July 19.—Combined receipts of cattle and calves this week came close to the record for the Fort Worth yards. During the six-day period more than 50,000 cattle and calves were placed on the market. The greatest volume of business in 1918 was in September, when one week's total reached 48,386 head. A week in May, 1917, holds the yard's record—62,594 cattle and calves. Such voluminous receipts in July is something entirely out of the ordinary for Fort Worth.

There are several reasons for the week's performance. In the first place, the calf market was on the highest level in the history of the yards, $16 per cwt. for vealers appealing to the cattlemen. The cattle market was also an a relatively high basis, and thousands of steers and cows that had been held back on account of the recent downward trend of the market were turned loose. By the middle of June last year the movement of cake and grass steers to market was practically over and the shipping season for South Texas cattle was a thing of the past. This year conditions were unusual. The cake men did not send any of their cattle to market until late in June, and there are still thousands of South Texas grassers to come. This delayed movement is the result of bad markets. The cattlemen had plenty of grass and water and were in a position to hold for better prices. Therefore, the heavy runs from South Texas, the opening of the cake cattle season, and the starting of the season for West Texas cattle made it a three-way proposition and receipts registered higher than ever before known at this time of the year.

Local packers have been unable to kill here all of the cattle purchased on the market, and thousands of head have been shipped by Armour and Swift to other markets for slaughter. Some went to Chicago, some to Kansas City, a good many to St. Louis and St. Joseph, and even Denver has received a quota of the week's purchases. Some cattle were purchased by Morris, Wilson and Cudahy for shipment to other centers, and the week's purchases included a few choice steers for the New York Dressed Beef Company of New York City.

Taking into consideration the large volume of business, the market has held up remarkably well. Good fat steers are only 50 cents lower, with other kinds around 50 to 75 cents down. Cows are around 50 cents to $1.25 lower. Swift & Company broke the yard records for liberal purchases of either cattle or calves last Wednesday when 3,682 calves were secured.

Hogs sold on a higher market Monday, two cars bringing $22.50, a new top for these yards, and throughout the remainder of the week the trade held to a good, steady level, regardless of a bad break at other centers. Very few hogs are now coming to market. Armour & Company is shipping in several thousand each week, most of the directs coming from Sioux City. Pigs gained more strength this week, and on Friday a top of $19.75 was posted.

Sheep, lambs and goats sold to a good demand all week, prices showing strength on all kinds. Lambs ranged up to $15, whethers brought $9.50 and goats sold at $7.50.

Canadian Livestock Market.

Winnipeg, July 18.—There was an advancing market last week both in cattle and hogs, the former gaining 25c during the week, top quality steers bringing from $12@13.25 and select hogs bringing $23.50 at the close of the week. Prospects for the hog market are none too good, however, as it is believed that Winnipeg prices are too high in comparison with other markets. At Toronto hogs fed and watered were quotable at $24.50 and $23.50 f. o. b

Denver Live Stock Market.

Denver, July 19.—As compared with a week ago our market looks about 75c lower on the good classes of fat steers. Heavy grass steers are moving at $13.25@13.75; light steers, $12.50@13.50; cows and heifers are a good dollar lower. Cows carrying considerable flesh are selling at from $9.50@10.25. Canners are still going at prices about steady from $4.25@5; cutters around $6.50; bulls, $6.50@7.25.

A year ago it was nearly impossible to get steers too big and fleshy for the packers to be interested in them, but it seems as though the starting of this season they are after the lighter weight of cattle and not very keen for the big, heavyweight cattle.

New York Oats Market.

Oats receipts 793,600 bus. in New York last week. Although heavy the receipts had no perceptible effect upon market values, as they were expected in large volume and will probably continue liberal for an indefinite period. The action of the market was again influenced by the continuation of unfavorable crop reports, with the result that prices attained a new high level. The decline in foreign exchange was such as to prevent further export business, and at the moment prices are considerably out of line. Domestic dealers are now in a position where they must necessarily come into the local market for supplies and the demand from this source shows marked improvement.—*L. W. Forbell & Co., New York City.*

Live Stock Prices at Chicago.

Weekly average prices at Chicago for good native beef cattle, hogs and sheep, per 100 pounds, and weekly average weight of hogs (†highest average on record):

The Price Current-Grain Reporter

Exponent of Trade Interests in Grain, Hay, Crops, Provisions, Live Stock, Etc.

Vol. LXXXII. No. 5 Weekly | CHICAGO, JULY 30 1919 | $3.00 a Year. Single Copies 10 Cents

USINESS AND TRADE CONDITIONS

THE Treasury general statement of foreign trade in June was published on July 26, and compares as follows:

	June, 1919.	May, 1919.	June, 1918.
rts	$918,000,000	$606,000,000	$485,000,000
rts	293,000,000	329,000,000	260,000,000
ess exports	$625,000,000	$277,000,000	$225,000,000

rchandise trade in June during a series of years ompared as follows:

	Exports.	Imports.		Excess.
	$918,000,000	$293,000,000	Exp.	$625,000,000
	485,000,000	260,000,000	Exp.	225,000,000
	550,977,215	289,561,964	Exp.	270,415,251
	471,829,156	229,134,097	Exp.	242,695,359
	274,218,142	142,284,851	Exp.	131,933,291
	161,732,619	164,281,515	Imp.	2,548,896
	191,593,071	133,723,713	Exp.	60,869,358

r a series of years the country's merchandise has expanded as follows:

	Exports.	Imports.	Excess exp.
	$7,225,000,000	$3,096,000,000	$4,129,000,000
	5,928,000,000	2,446,000,000	3,482,000,000
	6,294,000,000	2,659,000,000	3,635,000,000
	4,333,698,000	2,197,984,000	2,135,713,000
	2,768,613,000	1,674,220,000	1,094,122,000
	2,364,626,000	1,894,160,000	470,457,000
	2,165,884,000	1,813,008,000	652,875,600

his record shows that June exports exceeded the est previous total for any one month in our his- by 200 million dollars; and is said to "fairly er" the Government. In view of the continued ln the price of exchange it might well do so. The ulties of financing so tremendous a business, n is all selling, with no return except in I. O. have apparently just broken in upon the Depart- of Commerce, who have in the past joined with erchants and manufacturers of the country in elief that all hope of future industrial prosperity is country depends upon the export trade alone. economists, who are also politicians, or have leanings, ever since, let us say, Mr. Clay in- d the shibboleth, "The American System," have ived that the wealth to be made in international is represented by excess of exports, not of im- ; and point out that since June 30, 1875, the s, or "balance," has always been of exports. this "balance" may mean many things, as for ple, the payment of interest and principal of borrowings; or it may mean more borrowings; may mean payment of travel expenses abroad. es not mean increase of domestic capital re- l for domestic use. In England, France, Ger- . Belgium and the Netherlands, on the other their "balance of trade," showing a prepon- ce of imports, indicated to them an appreciation alth because larger imports than exports mean r income of wealth than outgo. The "balance de" means therefore one thing on this side of ean and something exactly the opposite on the ean side of the Atlantic. Excess of exports in amounts meant much to us early in the war, e they meant paying our foreign debts. When debts were all paid, as they soon were, con- heavy exports in excess of imports meant abroad, Europe being no longer able to equalize count by payments either in money or in kind. this Government began making loans to the to pay for purchases here, we have been ex- g capital; and there are few of our legislators er great party, or the press at large, who seem lize that it is the values which come into a y and not those that go out that make a na- ch, and that wealth comes in the greatest vol- n form of products which are converted into or are used in creating it. It is from an ex- f imports, not of exports, as well as of home tion that capital is accumulated for investment ealth is increased.

The justification for continued enormous excess of exports at this time is not that it means the accumulation of greater domestic wealth directly, but that we may, as Sec'y Redfield said four years ago, "extend the hand of financial fellowship to the nations" in order to restore them to industrial life; so that the peoples of Europe may begin to pay their debts to us as during 1915-16 Americans paid their debts to Europeans.

The revenue estimated to be needed to revive European industry has been estimated at 2,000 million dollars; and as the Federal Reserve Board has made it clear that advances to this fund must be made not by bankers in the form of commercial credits but by the general public in the form of investments, the question occurs how can Americans not bankers feel that they will be protected when lending their money to Europe?

James S. Alexander, president of the National Bank of Commerce in New York on Friday last published a plan which attempts to answer this question. Assuming that "it is not a question whether we are able" to extend this financial aid, and recognizing that European government credits "are almost exhausted," Mr. Alexander proposes that, in the first place, further activity on the part of our Government in this work should at once cease and the burden be assumed by American business men. In order that the credit to be thus loaned be so organized that "the stronger countries cannot crowd out the weaker ones," to serve all purposes "a pool of Europe's needs should be met by a pool of America's resources," the latter being distributed through a "centralized credit organization," a great credit corporation which shall issue to American investors debentures representing the advances to European peoples; and thus "every debenture sold Americans would have behind it the pool of all the collateral supplied by Europe." By this plan, temporary in purpose, it is believed Europe could be safely supplied with reconstruction capital until her industries should so far have recovered themselves that trade could be resumed in normal conditions; after which the flow of capital to or from Europe would follow, as it did prior to August, 1914, the natural law of the demand for it.

The petulance of Senator Kenyon in the Senate on July 22, when he gave that body another installment of his evidence that the packers "are engaged in a country-wide propaganda to prevent the passage of the Kenyon and Kendricks bills to regulate their industry," quite justifies the rejoinder of the *Journal-Stockman* that, "Some of the people in Washington cannot get it out of their heads that they are divinely appointed to supervise and direct all that goes on in stock business," and inferentially that it is a sort of impiety (Kaiser William held to the same quality of his authority) that business men should take all possible precautions to protect their business against senatorial efforts to put its control into the hands of an irresponsible officer of the Government, even the Secretary of Agriculture, whose power in all such matters, in the last analysis, must be directed if not actually exercised not by himself but by some obscure clerk or cheap pussyfoot departmental employe, who should decide that in his opinion "the law had been violated," and pass the doom on to the Secretary for his O. K.

Mr. Kenyon is discovering that his purpose is not a popular one. The live stock exchanges generally protest against the passage of the bills. They believe, just as the more intelligent stock producers believe, that no man, no bureau, should be given such authority and drastic power over any industry. The ostensible reason for this legislation is found in recent recessions of cattle prices, which the St. Louis Live Stock Exchange says were the direct result of the agitation of the Trade Commission" and the Agricultural Department, which have not given the same publicity to the recent recovery of prices.

Mr. Kenyon and his friends assume this legislation will benefit the cattlemen. But Jos. Montague of San Angelo, Texas, at Kansas City, on July 22, said quite positively that, "Our cattlemen are opposed to Government control of facilities for marketing live stock. We have fought out our battles down there with natural conditions and won out: but we cannot go up against such conditions as would be brought out by Government control of public utilities and hope to hold our own." E. H. Grubb, one of the largest and best known stockmen in the Rocky Mountain country, a few days ago at Denver said: "There is not a bureau or department in Washington that does not know more about running the farmer and stockman's business than the farmer does himself. Every time I go to Washington I find paternalism more rampant than ever; and it has got so that they actually do not think there is any way to pass a law for the betterment of conditions in any industry without providing a bureau to administer the law. Congress passes a law and puts in all the stipulations that can be conceived, and then, for fear that they may have forgotten something, the lawmakers give some secretary authority to make rules and regulations that shall have the same effect as though they had enacted them into laws."

The *National Stockman and Farmer*, after recapitulating Ass't Sec'y Ousley's variant of the Federal Trade Commission's plan of control, says: In other words, this complicated [packing] business should be further complicated by Federal, state and municipal 'supervision'—a fair specimen of official logic. . . . Must the meddling hands of official incompetence be laid on this business—Federal, state and municipal hands? Let us have no more control whether disguised as supervision or as something else. The producer and the consumer will fare better if they throw into the sewer all such quack remedies for their present ills."

The Nebraska Live Stock Growers' Ass'n, recently in convention at Lincoln, went on record as opposed to the Kendrick bill, the Kenyon bill not then having been offered; and a member said: "It is the feeling here that one of these bills is Democratic and one Republican, presumably so ordered by the moving spirits to elicit support from both parties." Showing what has here been said before and what this has been written to impress on the reader, that the paternalism that is beginning to curse all American business, notably the packing industry and the grain trade, is not restricted to any one party, but is the motive behind the legislation of demagogues and the made-in-Germany type of statesmen of both parties.

THE "Co-operative Crop Reporting Service," begun some time ago in Wisconsin and put into operation on June 1 in Illinois, is now to be extended to Michigan, by a combination of the state crop reporting service hitherto directed by the Secretary of State with that of the Bureau of Crop Estimates. In addition to the reporters of the Bureau the coöperative service will have the reports of nearly 3,000 others now making reports to the Secretary of State who will collaborate with Field Agent W. H. Church for the production of a comprehensive state report, worked out in detail not heretofore possible

THE WHEAT HARVEST

WE HAVE editorially and in our market columns rather held more recently to the belief that this year's yield of wheat would be disappointing. Harvesting reports verify this, and crop experts have so persistently released figures on the reduced yields in specific counties and states that a situation now exists which, in spite of the reported disappointing yields, may still over emphasize the actual loss. The Eastern export trade, on whom buyers and foreign governments depend for advance information, are apparently fully convinced that the total spring and winter wheat crop of this country will hardly exceed 950,000,000 bus., and they are accordingly inquiring through their Southwestern connections as to the probability of producers demanding more than the Government minimum guaranty. Information from a well posted employee of the Food Administration, just returned from extended travels overseas. is that with the exception of Hungary, where good crops prevail, a serious shortage is everywhere prevalent. This and similar official Food Administration bullish news releases are offset by private reports to the effect that the export demands prior to February 1920, when new-crop Southern hemisphere wheat will be ready, will not be in excess of the surplus available from our crop. As this issue of THE PRICE CURRENT-GRAIN REPORTER goes to press, alarming reports are going out from private reports, Mr. Snow predicting that, with the continuance of probable growing and harvesting conditions, a winter wheat crop of only 750,000,000 bushels and suggesting for spring wheat a small crop of poor quality.

THE COST OF PRODUCTION

THERE can be no criticism of the perennial attempt to ascertain "the cost of producing wheat" or any other commodity. Indeed, the sooner farmers ascertain their own costs of operation and the costs' relations to their saleable products, and the sooner the grain dealer learns to the fraction of a mill what it costs to handle a bushel of grain through his elevator, the sooner will each be in a position to make a merchandising profit on his business. It is the absence of this information which will hereafter keep the farmer in the "poor white" class and the elevator man just a hanger-on in his occupation, not particularly useful to his patrons or to himself. The grain dealer who has not consulted the trained accountant in order to have his bookkeeping system gone over by a real expert to point out its deficiencies and to correct them and to start him right, is not doing his business or himself justice.

The ascertainment of cost, however, cannot be other than distinctly a personal equation. No two elevators will arrive at the same cost, any more than two farmers will show the same "cost." There is not alone the physical peculiarities of the farm or elevator to affect the cost of operation but the personality of the operator or farmer himself has its own peculiar effect. Neither of these factors of the computation can be set down as a constant one; wherefore, since to these must be added the factor of environment, which is as inconstant as men themselves, no computation based on many submitted data can be accepted as other than as a tentative criterion, although the cost arrived at in this way may be, as in the case of data re handling wheat, a fair statement of the average cost in the state submitting the data. If, therefore, a computation based on a great number of statements submitted shows a cost in excess of 8c per bushel for wheat, that average may be accepted as true, although for any individual elevator it might not be true at all—just as the average of several thousand statements of the growing condition of wheat in Kansas, say, would indicate the true condition for a whole state, but perhaps a false condition for any selected locality reporting.

Dealers, therefore, must not be misled by any such general showing of the cost of handling wheat into the belief that any particular figure of cost would be true as to each. Each should make his own calculation based on his own record and use it and not some other man's "cost" to reduce his own. A comparison of the factors used by others in one's own computation is advisable as a guide, but to that extent only can another person's cost be regarded as useful.

COMPLAINT ON FAIR PRICES

THE Indiana Federation of Farmers' Ass'ns has begun its "fight for a fair price for wheat," as Gen. Sec'y Taylor of Indianapolis chooses to call it. And he is quoted as having said that the figures compiled by Sec'y Riley as elevator operation costs "will not bear close inspection." Mr. Taylor in the hearing of this writer, on July 2, said distinctly that he then had in his possession no data whatever as to operation costs and was glad to have the data Mr. Riley then gave him. Whence this subsequent information, on the basis of which he thus summarily sets aside the results Mr. Riley in good faith and absolutely in the interest of truth compiled after months of hard work gathering the data?

"The scarcest thing in the business world," some one has said, "is exact information. Most men are mere guessers. And guessers are almost universally wrong. Men and concerns who are supplied with full and accurate knowledge of their branch of business are rare. These rare concerns are the ones which build up big, substantial business structures because they are in position to give their customers a helpful service not elsewhere obtainable. The same rule would apply to farmers as well. The world is woefully ignorant."

The farmers complained much when grain dealers did not take in margins 50% of the actual cost of handling grain through the elevator but made their money merchandising the grain. Farmers then complained because they saw that the competent elevator men made some money as merchants and the farmers guessed that the dealer's wealth (if he acquired it) came out of their pockets—the ignorant agitator holding an Equity promoter's job told them so and they wanted to believe it because it wasn't true. Farmers complain now because, having achieved their hearts' desire, a high fixed price, the grain dealer can no longer exercise his own judgment in buying and selling and so for the first time in the history of the grain trade he is compelled to charge farmers what it actually costs to handle grain. And in Indiana farmers are raising $200,000 to fight "straw men" their leaders are manufacturing out of the character of their guessing.

INSPECTING WHEAT

THE Grain Corporation Zone Agents have put out in circular form to all licensees notice that the Standard Rules for the grading of wheat and the taking of dockage will be enforced strictly and literally, the notice containing directions for the guidance of country buyers. We need not repeat them here or now. The rules by this time are familiar to every buyer of wheat; if they are not, the ignorant man is not among our readers.

But we can understand that some even of our own readers may be negligent in the matter of providing themselves with all the mechanical appliances necessary to use the rules and directions precisely. We cannot too strongly deprecate such neglect. It is bound to result in costly experience. In the first place, the farmer, in these days, when he has a hired and a volunteer adviser at his elbow, as well as his back, watching and criticising for him every deal he makes with anyone else but a farmer, is captious and easily disgruntled, and he has the Grain Corporation behind him. You can't afford to give him any excuse to make trouble, and he'll not be a farmer "in good standing" if he doesn't. In the second place, missing grade on a car or two of priced wheat means a money loss greater than the cost of a complete outfit including record books and fountain pen, when use of the apparatus would have saved a misgrading. Buy now and start right.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures fr various statistical exhibits appearing weekly in detail "The Price Current-Grain Reporter," these figures rep senting the past week, the preceding week and cor sponding time last year, here assembled for ready ref ence:

	July 26.	July 19.	July 27.

December	.82⅞-83	.82⅝-¾	.....

HANDLING YELLOW HARD WHEATS

IT HAS developed that a considerable proportion Illinois winter wheat is this year grading "Yello Hard" wheat and is being discounted in the te minal markets. Yet in the neighborhoods when that kind of wheat is coming, there is also a greate quantity of hard winter than yellow. Now, if deale who must handle this yellow wheat will read th grading rules (last two sections under subhea Class III) they will see that by resorting to th simple expedient of mixing their dark and the ye low receipts in proportions to make all hard, the will, so far as color is concerned, remove the li bility to loss of money on that account. There no great difficulty in doing this. A little care whe unloading from the wagons to loft the two colo into separate bins, and then in mixing the whe when loading, in order to conform to the "hard wi ter" rule, is all that is needed; and every elevato which habitually handles wheat should be in a pos tion to do this. If it is not, the owner is not doin himself justice as a grain merchant by this negle of his opportunities.

EDITORIALETTES

THE railroads are appealing to those who kno they will need fertilizers to buy now and ge them moved before they are actually neede and give the roads business when it is in place comparatively slow.

THE farmers of the Northwest, who most suffe from dockage in grading wheat, are just beginnin to find out that "there is only one way to beat th dockage game and that is to keep the dockage a home."

SHIPPERS will find the letter of A. E. Mann, Ger Agt. L. & N. R. R. Co. at St. Louis, in the Letter Bo of much importance to them. Read it.

REE DOLLARS a year in the United and Mexico; $4.00 a year for Canada, United Kingdom, the Continent of e, Australia, and other countries in the sal Postal Union. Less than a year at me rate. Single copy 10 cents.

TERS on subjects of interest to those d in the grain trade, news items, reports ops, grain movement, new grain firms, rain elevators, contemplated improve- and cars leaking grain in transit are ed.

ADVERTISING value of The Price t-Grain Reporter as a medium for ng the buying power of the grain eleva- en is unquestioned. The character and r of advertisements in its columns tell worth. If you would be classed with ading firms catering to the grain trade, your announcements in the trade's only ', which is always first to get the live, date news to its readers.

ERTISEMENTS of meritorious grain or machinery and supply houses and of sible grain firms who seek to serve dealers are solicited.

HICAGO, JULY 30, 1919.

GRAIN TRADE REVIEW

ne private reporters say that all of a bumper corn crop have van- as the result of a few days of vinds last week in some of the ng producing states. They say up to Thursday last rains would bly have saved the crop, but for hree last days of the week the was high and temperatures d 100°. This led to firing and deterioration. Our own reports, on conditions up to July 23-25, do confirm these alarming reports. ot in a few localities, nowhere in is, Indiana, Missouri and Kansas conditions at the middle of last indicative of disaster, although it be admitted that reports written e end of the week were less confi- of a crop than those written r.

Government August crop report ected, however, to show some re- n in the prospective yield, which given as 2,815,000,000 bus. in the returns; and while the par yield re rises steadily until October, the e may have more than offset this. possible damage to the corn crop any hopes of a materially lower for all foodstuffs for the next Any reduction in the corn yield aterially affect the price of meats, rought as it affects feeds has been ly increasing for some weeks past. ry area was first noted in Mon- some months ago, and spread into n North Dakota, and thence west- and southeastward to the corn Alberta has been badly hurt, as e northern section of the Pacific In fact, with the exception of otton Belt and New England the agricultural sections of the coun- e now involved.

what extent corn has been dam- annot be accurately determined as At this moment we believe the e is more anticipated than It is a matter of history, how- hat the yield is in direct propor- o the rainfall in July, and this esembles previous drought-affect- rs. The precipitation during July ut three times as valuable as that June or in August, as the burn- the tassel will prevent proper pollenization, and every day of continued dry and hot weather may reduce the prospective yield.

The world's price level on wheat and corn is rapidly being adjusted to that prevailing in the United States. It has always been said that the ownership of 10 per cent of a grain crop would be given control of the price, but the Government owns about 25 per cent of the world's crop and has set an arbitrary price on it of $2.26 basis, track Chicago, for the No. 1 grade. In consequence prices in Canada are affected and in Winnipeg are now nearly 20c above the guaranteed figure in this country, while in Argentina September sold at $2.26.

There has been a material change in the world's wheat situation as the result of a material reduction in the outlook in this country. Snow says that threshing returns from the winter wheat belt are now suggesting a yield of around 750,000,000 bus., or nearly 250,000,000 bus. less than the prospective crop early in the spring, and, of course, the condition of the spring wheat crop has been materially lowered by various causes of damage. Much of the wheat this year is expected to be light weight and quality generally unfavorable, although the dry, hot weather has somewhat improved the quality of Western wheat. Recent excessive rains in the East, however, caught some of the grain in the shock. There is no shortage of wheat in the United States, however, the exportable surplus probably being around 350,000,000 to 400,000,000 bus., or all Europe will call for before the Southern hemisphere begins to ship. The total crop for the country is probably around 950,000,000 bus. Canada has suffered heavy losses, some reports claiming only half a crop in southern Saskatchewan and in Alberta. Expectations are for a smaller acreage in Argentina and Australia this season, and the western European crops are rather short, although there are unofficial good reports from Russia. Financial conditions will probably determine the amount of wheat that Europe will take.

Added to the losses of corn and wheat in this country is a material reduction in the prospective oat crop, and also of rye and barley. Blight and hot weather cut down the yield of the three grains and threshing returns have been disappointing. Western Europe fodder grain crops are short this season on account of drought, and there will be no real surplus throughout the world for a year at least. In the Argentine rains have damaged the corn, and it is estimated that much of the crop is unfit for export.

Congressional action on the high cost of living is emphasized in Washington messages, but it is hard to determine in what way this "grandstand holler" will affect the situation. The economic unsoundness of the fixed wheat price is becoming more apparent, and the rush outwardly of all commodities cannot do other than keep prices up and force them to higher levels; while the Government's failure to sell its own unused reserves in the effort to prevent a fall in prices has aggravated the trouble at home and abroad and resulted in much waste of good food by reported decomposition and spoilage.

Grain Market Summary.

Primary receipts of wheat, corn and oats for the week follow:

	July 26, 1919.	July 19, 1919.	July 27, 1918
Wheat	15,363,000	7,701,000	12,713,000
Corn	2,489,000	3,100,000	5,498,000
Oats	5,702,000	5,000,000	6,108,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	23,554,000	24,119,000
Preceding week	15,801,000	21,474,000
Since July 1	57,238,000	68,973,000

Corn futures showed fair activity the past week, and the undertone was decidedly strong as the result of continued dry and hot weather over the belt, which caused some damage to the crop, but the claims of deterioration were not given circulation, and efforts were made to curtail trading to some extent. Rains would have had a decidedly beneficial effect, but extremely high temperatures Friday and Saturday, combined with lack of rain, led to considerable short covering and also local buying, and the close was at a net gain of 4¾c. Old crop deliveries were neglected, but gained 4⅝@5c. Cash grain sold at new high figures on the crop, with white and yellow at $2 and over.

Oats acted heavy the greater part of the week, and, while advancing to new high figures on the crop, early reacted sharply on hedging and profit-taking sales and closed with the near deliveries ¼@⅞c lower, July leading, while December gained ¼c. The week's range was only 2⅝@3¼, December leading. Part of the strength toward the last was derived from corn. Threshing returns were disappointing, but the price has advanced so much of late as to put domestic grain above a profit import basis with the United Kingdom. Domestic call showed some improvement.

Cash wheat values strengthened somewhat the past week, especially on hard winters, which were taken freely by millers. The reduction in the spring wheat prospects had some effect. Dark No. 2 hard at Kansas City sold as high as $2.65, or 48c above the basic figure in that market. Minneapolis millers were the buyers there, while Buffalo bought at Chicago. Bulk of the ordinary No. 1 and No. 2 hard here brought 1@2c over the basic figures, with fancy higher. No. 1 and No. 2 red sold at ½@1c over. Spring wheats in keen demand with as high as $3 paid at Minneapolis, and $2.69 at Chicago. Range of prices the past week follow:

	High.	Low.	Close July 26, 1919.	Close July 19, 1919.	Close July 27, 1918.
Corn—					
July	$1.96¾	$1.92	$1.95	$1.90	$1.55¾
Sept.	1.96½	1.92¼	1.95½	1.90⅞	1.56⅝
Dec.	1.67⅝	1.62	1.66¼	1.61½	.....
Oats—					
July	.82	.79⅜	.79⅞	.80¾	.76¼
Sept.	.82⅜	.79¼	.80¼	.80⅞	.69¾
Dec.	.84¾	.81½	.83	.82¾	...

GRAIN IMPORTS.

The following amounts of grain in bushels and flour in barrels were imported by the United States in May, 1918 and 1919, and during eleven months of the years named ending with May:

Grain	May 1918.	May 1919.	Ending with May, 1918.	Ending with May, 1919.
Corn	365,905	1,740,471	3,151,008	1,957,448
Oats	58,747	277,671	2,062,763	435,442
Wheat	1,267,878	1,527,748	25,954,788	9,225,130
Wh. flour	5,875	2,432	638,672	35,400
Corn from—				
Mexico	1,204	1,511	545	763
Arg'tina	353,519	361,736	1,613,119	1,706,929
Venez'la	2,635	3,230	.....	.....
Japan	.....	.....	99,802	120,321
Other	8,547	15,305	27,005	29,107

Wheat Stocks and Consumption.

Statement of the movement of wheat and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at July 1	2,942,000	226,000	4,289,000
P. receipts to July 26	26,887,000	28,828,000	9,078,000
P. shipments to July 26	5,534,000	7,624,000	5,781,000
P. stocks on July 26	7,866,000	6,080,000	1,559,000
P. consumpt'n to July 26	16,429,000	15,350,000	6,027,000

Corn Stocks and Consumption.

Statement of the movement of corn and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Nov. 1	4,117,000	174,000	849,000
P. receipts to July 26	145,796,000	232,885,000	195,822,000
P. shipments to July 26	88,207,000	119,549,000	105,918,000
P. stocks on July 26	2,811,000	8,363,000	823,000
P. consumpt'n to July 26	58,895,000	105,147,000	89,930,000

The first load of new grain this season was delivered at Walla Walla, Wash., on July 10, being barley from a nearby tract.

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to July 26, 1919, with comparisons with 1918:

	1918-19.	1917-18.
Chicago	5,017,000	4,007,000
Milwaukee	146,000	66,000
Minneapolis	3,256,000	2,137,000
Duluth	377,000	8,000
St. Louis	5,220,000	6,342,000
Toledo	871,000	826,000
Detroit	75,000	73,000
Kansas City	8,375,000	11,512,000
Peoria	264,000	216,000
Omaha	1,582,000	2,071,000
Indianapolis	1,704,000	1,570,000
Total	26,887,000	28,828,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	July 26, 1919.	July 19, 1919.	July 27, 1918
St. Louis	2,875,000	1,502,000	2,720,000
Kansas City	4,885,000	2,700,000	3,763,000
Omaha	1,231,000	269,000	910,000
Toledo	562,000	288,000	568,000
Detroit	37,000	24,000	52,000
Indianapolis	982,000	622,000	954,000
Peoria	209,000	42,000	178,000
Chicago	3,476,000	1,336,000	3,120,000
Milwaukee	29,000	40,000	53,000
Minneapolis	1,016,000	762,000	395,000
Duluth	61,000	116,000	.....
Total	15,363,000	7,701,000	12,713,000

World's Wheat Exports.

Exports of wheat last week compared with previous week and year ago specially reported for this paper by George Broomhall's service:

	July 26, 1919.	July 19, 1919.	July 27, 1918.
American	4,187,000	7,977,000	3,949,000
Indian	.....	.....	340,000
Argentine	3,890,000	2,510,000	7,567,000
Australian	1,576,000	1,945,000	860,000
Others	70,000	112,000	30,000
Total	9,723,000	12,544,000	12,746,000

Exports of wheat since Aug. 1, commencement of European crop year, compared for three seasons:

	1918-19.	1917-18.	1916-17.
American	364,136,000	236,111,000	346,451,000
Indian	5,099,000	14,060,000	34,580,000
Argentine	81,993,000	84,374,000	59,183,000
Australian	73,574,000	38,583,000	50,914,000
Others	4,230,000	3,396,000	10,286,000
Total	529,032,000	376,524,000	501,414,000

THE AUSTRALIAN WHEAT SITUATION

The Conduct of the Australian Wheat Trade During the War—Progress of Bulk Handling Reform—The Failure of the Bag Storage Method—Enormous Waste by Breakage and Vermin

It was quite apparent during the war, on perusing press items and in reading the graphic accounts of some of the notable battles, that the joining of allied interests and the closer communion of our armies was one of the many outstanding features of the four-year struggle that will have lasting benefits. As a part of the detailed movements of our Allies, much space in the American press was given to the valor and accomplishments of the Australian forces, to the men from the Antipodes, who more than proved the traditions of their parent country, and must have recalled to the great wheat handlers of the world commercial business transactions, always recognizing Australia as a surplus producing nation. THE PRICE CURRENT-GRAIN REPORTER has devoted much space both before and during the war to the Australian wheat situation, but is now privileged to submit data which might, if space permitted, be greatly elaborated but which will we hope prove interesting in its present form because we know it is authoritative on the present situation there.

The conduct of grain trade affairs in Australia is under the supervision of their states, under which plan it will doubtless continue, for Federal control seems unlikely. In fact, public utilities, railroads and all possible civic work are like grain handling, managed on government account, a factor which is of vital importance in considering the success at some time at least of the well-planned efforts of those interested in the future of Australian farm production, to install bulk handling rather than bag handling throughout this great wheat producing country.

In truth, the various governments, as they have succeeded each other, sometimes after a very short trial period, have not disproved the bulk handling method, although details thereof, if developed at all under a certain regime, might be reversed in their minutiae by the succeeding government, politics and finances, always basic factors in anything, have not lost their power in determining the progress of grain production, storage and exportation from the Australian states.

Under the bag handling plan, the financing of their great grain crops has been in the hands of less than a dozen big grain companies who have had a big job and whose co-operation and assistance has been sought and fostered by the jute interests, also enjoying a profitable monopoly and leaving nothing unturned for its maintenance. Those who contemplate and urge the change from bag to bulk handling grain have the practice of years to overcome and this is by no means a minor consideration to those who understand the British mind with its one-track purpose and its reverence for the ways of the fathers.

There are four wheat raising states in Australia. Of these South Australia took the first definite step, following a long investigation of the subject, towards installing bulk handling systems at country and terminal points. The states of New South Wales and Victoria, which have had royal commissions working for the past 15 years, more or less spasmodically, however, in considering the possible advantage of bulk handling wheat, were influenced from time to time by the political parties and the attitude of the governments which happened to be in power at the moment. Victoria sent a royal commission to the United States and Canada; received expert technical advice from Geo. Burrell of the Burrell Engineering & Construction Co., whose report, by the way, was unfortunately tabled; so that that investigation apparently came to naught. West Australia secured with much expense and real serious effort similar reports; and in defense for these efforts and in view of the circumstances prevailing there, it must be recognized that obstacles of moment may have quite naturally deferred the adoption of a grain handling system which had not only been so successfully conducted in other countries but should have been wholeheartedly accepted without serious opposition in Australia.

However, four years ago the John S. Metcalf Co. of Chicago, Montreal and England, undoubtedly more fully acquainted with the Australian mind than any other engineering interest, were retained by South Australia and Victoria to investigate and report on the development of bulk handling plans as they should be formulated. South Australia, although it approved of this work and in spite of the fact that plans have been drawn, most unfortunately changed its government just when things were going nicely and the succeeding government voted that no further moneys should be spent for this work during the war, as the cost was quite an item, estimated at £1,000,000 for four terminal elevators and sixty country houses.

New South Wales in the past three years, in spite of the war expenditures, with high priced labor, materials, etc., has completed through the operati of local contractors 7,000,000 bus. storage, designed, constructed and pervised by the John S. Metcalf and when the next crop, due Janu 1920, is finished, a total storage ca ity of 11,000,000 bus. will be avail at country points in this state. Sydney terminal elevator on Glebe land, designed for 6,500,000 bus., is being rushed to the completion fo 500,000 bus. Early in May the pou of concrete with fine progress thro out was a great sight and pleasure those who have given so many year this work. The completion of this crete storage by January, 1920, temporary facilities for conve wheat into the storage, will provi first step in terminal storage and dling facilities for the export sur wheat of New South Wales. The w ing house for this enormous elev will be finished the following y when Sydney will be ready to ha all bulk cargoes with the maximun ficiency.

SYDNEY TERMINAL ELEVATOR YARDS, N. S. W.
Note grain cars: Only 60 real box cars operated on N. S. W. Railways.

The country wheat storage facil now under construction in New S Wales are storage bins only; with porary legs for filling, emptying turning over, which are, however, satisfactory for the present. They so placed that they will function erly until the turn over to the house which will be built is poss probably for the 1920-1921 crop.

This detail towards completing country facilities of the state, like things, however, depends on finances; but in the meanwhile farming and wheat handling pe have very excellent storage facil which should, however, be supplem ed by complete working house facil to realize the full value of bulk dling. These country elevators are cidedly interesting, as indicated several photographs shown equipped with enormous tanks, different from the American pra where many grades and varieties it desirable to construct just as m and small tanks as is possible. country storage is termed "Emer cy," made imperative by the se losses caused by the mice plague.

We also illustrate the costly re cf this practice where very many mous wheat stacks collapsed, s quently to the mouse plague. roofing fell in and the rains soake grain so that during the heat of following summer weevil developed the total loss was severe. The pr concrete storage in New South W may therefore quite rightly be te "Emergency," when it is realized thousands of bags were burned t rid of the awful stench and hun of thousands of tons of wheat wer stroyed in this and other ways, o value partially saved through feeding to cattle. This local de

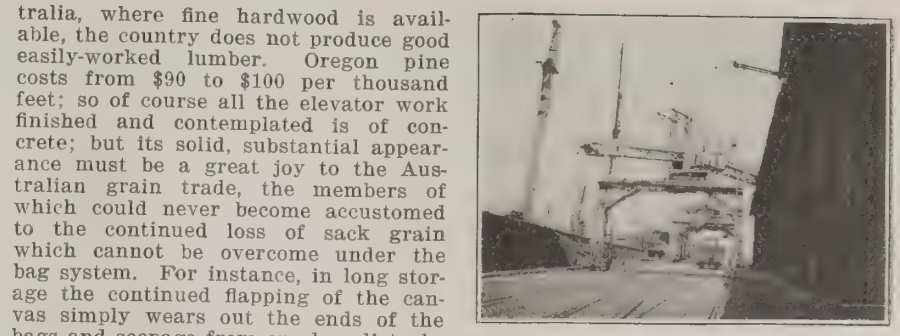
uring this time that the mice t prevailed which has done more ny other one agency to forward option of the bulk handling of in Australia.

our purpose in submitting this nal account of the Australian situation to duly recognize the us efforts of the various state ments towards conserving in essible degree the full value of wheat for the benefits of their s and to give the world the surpected. The state of West Aus- for instance, where the political on was possibly more than un- chaotic, did not fail in a single e, as one government succeeded r, to approve a bulk handling m as a part of their policy, k of time to execute such plans ted carrying through the sincere and good intention of each gov- t to do what they realized must e for the handling of their great

APSED WHEAT STACK—THE MICE PLAGUE

harvesting machinery will be lost. These header machines are wonderful affairs, doing all the work in the field to the final bagging of the wheat; and yet although a certain small percentage of this machine equipment might have to be discarded, it is known by the farm machinery trade that the life of such equipment is short under any circumstances and that the great advantages, in countless ways, of the bulk handling grain system offset a thousand to one any small loss to the individual farmer that would result from scrapping present equipment.



The Victorian government, after considering this subject quite thoroughly, felt that their peculiar conditions justified designing their own country elevator plans. They did this, contemplating grain storage bins only, and made two requests for tenders, resulting in bids missing by 75 per cent the price at which the same work under not radically different conditions was being handled in New South Wales. Victorian draftsmen are now working on plans for a terminal elevator, but the outcome of this program will certainly be that elevator experts will ultimately be called in for the designing and supervision of the terminal and country grain handling plans of the state. Another great sum of money will be charged up to experience, but in the final analysis Victoria will be just as well represented with adequate bulk handling systems as the other states.

It is quite generally known that lumber prices in the wheat raising districts in Australia are prohibitive, because with the exception of West Australia, where fine hardwood is available, the country does not produce good easily-worked lumber. Oregon pine costs from $90 to $100 per thousand feet; so of course all the elevator work finished and contemplated is of concrete; but its solid, substantial appearance must be a great joy to the Australian grain trade, the members of which could never become accustomed to the continued loss of sack grain which cannot be overcome under the bag system. For instance, in long storage the continued flapping of the canvas simply wears out the ends of the bags and seepage from one bag disturbs another and finally the outside tiers give way entirely. It is interesting also to note that in spite of this apparent total loss in a stack, which was caused by the mice plague, as shown in photograph here, thousands of bag interiors when reached show perfectly good hard wheat. This is due to the fact that the caking over of the top and sides, following repeated rains and baking process, protects the inner wheat. The removal of this shell of caked wheat calls for the use of pick and shovel.

The ways of the common, ordinary garden variety of field mice call for close study for their elimination and the reduction of damage through their ravages during the mice plague year. They scamper in between the piled bags, nibble a little here and a little there; but the awful loss resultant is not through grain consumed but is due to the undermining of the stacks and the consequent collapse. A government chemist, one of many, employed to reduce this mice spoilage, made a great discovery and as a result in the year following the mice plague installed a system that is now quite generally used and which has proved a complete protection against mice. His simple discovery was to apply his knowledge that mice go out to play every night and more particularly that they must have a good sized front yard to play in. He therefore built an unbroken corrugated iron fence entirely surrounding and close up to the stack of wheat, placing several runways from the bags on to the top of the fence. A second iron fence was then erected, converging at several place to pits filled with water and poison gas; and it was immediately discovered, in using this mice round-up, that men with shovels must be employed at the pits to shovel out the dead mice. We illustrate with this article the results of four nights' work at one stack.

In considering the installation of bulk handling grain systems, we naturally recognize the dismantling of bag handling plants, which are not at all important in the aggregate. One of these is illustrated here, showing the traveling gantry at Perth, West Australia. It is operated by electricity and is located on the dock side of the receiving warehouse. A similar installation at Darling, Ireland, Sydney, and a limited number of mechanical pilers operating at the terminals are practically the only equipment required for the bag handling method. The country wagons so familiar to all who have read anything of Australian life, with their 15 tons of bagged wheat, and the little wheat cars or trams will quite willingly be discarded into the limbo of forgotten days when the railroads of the states build a suitable number of regular box cars and handle grain in bulk in the very near future. These cars are now being built in New South Wales, but in that state only. They are not an immediate necessary part of the system of bulk handling for Victoria, South Australia and West Australia, where the drier climate permits of the safe carriage of wheat in the usual 15-ton cars, provided adequate tarpaulin protection is provided against casual rains.

An important issue, the rapid development of which in the United States in recent years must also favorably appeal to the Australian grain trade, is the opportunity for more definitely and satisfactorily grading wheat. Under the bagged method there were two grades, "F. A. Q." and "Not F. A. Q." This means that the farmers' wheat is either "full average quality" or not; and you can picture the "holler" that would go up among American farmers if their grain was graded this way. As a matter of fact, with only two or three kinds of wheat in any one vicinity in Australia, the country storage in large units is desirable, a condition not paralleled in our country, as mentioned above. The continuance of Gov-

TERMINAL BAG LOADING SYSTEM

N. S. W. GOVERNMENT ELEVATORS 300,000-bushel plant at The Rock—Start of moving forms May 17, 1918, using theingenious trewhella jack, finally satisfactory, but bent rods were all too frequent inits early use

HALF MILLION MICE WEIGHING EIGHT TONS.

ernment operation in Australia eliminates country competition and for a time it is self evident that bulk storage must be provided on an enormous scale at comparatively few points. Such elevators now completed have provided wagon hoppers, four wide, to facilitate quick unloading.

There has been some complaint, always inevitable, about the pool system, but when facts are known this government plan has given more than 95% of the farmers of Australia three or four times as much for their wheat as would

N. S. W. GOVERNMENT ELEVATORS.
300,000-Bushel Plant, the Rock, Completed Plant December, 1918.

have been received otherwise. The *modus operandi* of this pooling system has proven as additionally attractive to the bulk handling system in the important feature of furnishing negotiable certificates to farmers. Prior to the establishment of the government pool during the war, the great wheat dealers of Australia issued to the farmers receipts for the grain that went into their bags on a rather indefinite basis, partly explained when we recognize the high prices of bags (at a shilling each) and the natural desire of the farmer to

FIRST BOX CARS IN AUSTRALIA.
Two of 60 box freight cars constructed by the N. S. W. Government Railways for bulk grain and general merchandise, November, 1918.

cram every possible pound into the bag, a practice not always conducive to receipts for full weight as tendered by the dealers. The latter furthermore under the old plan had first call on the purchase of such wheat as was stored on their ground.

Many interesting side lights of practice entirely unfamiliar to the American farmer enter into this bag method of handling Australian wheat. In the first place, the bags are called "Chapman corn sacks," and in the early days great variance in the weight of wheat contained gradually worked out the present plan, lived up to with surprising exactness, of putting 180 pounds of wheat into each sack. The country and terminal labor unions urge their members in "lumping" filled sacks to sit down and rest if the particular farmers' wheat being stacked has been loaded too heavily. These wheat lumpers earn $5 a day in the terminals and practically as much in the country, and when you consider that the toting of 180-pound bags up the climbing stair of wheat bags to a height of 20 tiers is part of their day's work, we can truthfully say that they earn the $5. When wheat stack space is limited, or for other reasons the buyer is willing to chance storing higher than 20 bags, he is likely to find his judgment is rather expensive. Long practice has proven that about 20 bags is the highest stacking safely possible because the life of the stack is contingent on the bursting pressure of the bottom page.

During the past year wheat stacks have been rebagged, particularly any that are two years old. Since the armistice shipments to England have been rushed forward and their entire purchase of the crops of 1915, 1916 and 1917 will be practically entirely exported before any of the American crop of 1919 is available for export.

The present year, therefore, will eliminate what has been a very trying experience for our Australian friends. Like other good results from calamitous affairs, a decided impetus has been given the bulk handling of Australian grain under war conditions. It has been proven so much easier to turn over bulk grain than to unsack, spread out and recondition bagged grain, together with the endless other advantages of the bulk handling system, the success of which might have been contingent for many, many years to come on the financial and political status of Australian states that it has during the war made rapid strides and will from now on save much time and anxiety for the grain trade of Australia and provide a more dependable source of information as to the probable exports to be expected from year to year by wheat importing countries.

NO FUTURE CONTRACTS.

Rep. French of Idaho has become a link in the endless chain of those who expect to bring El Dorado to the farmer and the consumer by prohibiting the making of contracts for future delivery grain, etc. He would make speculation a felony, carrying a penalty of not less than six months nor more than three years in the penitentiary. His bill provides "that any person or body of persons buying or selling futures of any article or articles pertaining to necessities of life, who, either in his individual capacity or as an officer, agent or employer of a corporation or member of a partnership, shall store any such article or articles for the purposes of cornering the market or affecting the market price thereof, or for the purpose of limiting the supply thereof to the public, whether temporarily or otherwise, shall be deemed guilty of a felony and punished by imprisonment in the penitentiary for not less than six months nor more than three years." Thus again we have the sure evidences of the immortality of bunk.

A. S. & W. Crop Report.

The crop report of the American Steel & Wire Co., dated June 26, said in part: This week's crop conditions are more optimistic than last week's. This is especially true of corn. Cotton has improved greatly in the South. The wheat crop in the far Northwest is turning out better than anticipated, although the drought areas in this section are very extensive. There was some damage to small grains and hay in the Eastern States. The spring wheat belt has been seriously injured by too much water, rust, blight and hot weather.

FROM WASHINGTON

Self-Defense by Owners of Packing Houses Is Resented by Members of Congress.—Proponents of the Sentimental Economic Philosophy—New Bills.

By JOHN GLEISSNER.

The Federal Trade Commission has undertaken an investigation of the methods used by packers in buying cattle and hogs, in response to a resolution of the Senate introduced by Senator Harris of Georgia. The resolution directs that especial attention be given to alleged discrimination which would operate to the disadvantage of Southern livestock producers. This is the first definite action against the packers since the introduction of the Kenyon and Kendrick bills and the publication of the report of the Federal Trade Commission charging the packers with endeavoring to gain control of the Nation's foodstuffs, although there has been much talk in the Senate.

Senator Kendrick has charged that the packers are carrying on a nation-wide propaganda to prevent passage of regulatory legislation. And now comes William Kent, former congressman from California, and now a member of the Tariff Commission, who announces the formation of a national marketing committee to prevent what he believes is an effort of the packers to stop agitation for the Kenyon bill through this propaganda. Kent said an effort will be made to "create enlightened public opinion concerning waste and unnecessary expense in handling and distributing farm products, and to promote and foster proper marketing agencies, standardization of agricultural products, proper warehouse systems, expert marketing services in various states, and uniformity in methods by states in inaugurating investigation and demonstration work in marketing."

CEREAL PRICE ADVANCES.

In the six years between April 1913 and April 1919 flour increased in retail price 118 per cent, according to figures obtained by the Department of Labor from the principal cities of the country. This is a greater percentage of increase than for any other commodity except lard, which increased 123 per cent. Four other commodities registered more than 100 per cent rise. They are: Bacon, 114 per cent; potatoes, 107 per cent; ham and corn meal, 100 per cent each. The average retail price of flour on April 15, 1919, was 7.2 cents per pound in the principal cities. This was an increase of 9 per cent in a year, and an increase of 6 per cent in a month. Flour prices were lowest in Kansas City and Omaha and other cities near the grain-producing and milling areas. They were higher in seaboard manufacturing cities where flour or grain must be transported longer distances. The average price of a pound of corn meal on April 15 was 6 cents, a decline of 16 per cent in a year, and an increase of 2 per cent in a month.

TO FIGHT GRAIN PESTS.

The Department of Agriculture is taking steps to protect grain growers against flag smut, take-all and other plant diseases. Liberal funds become available with the passage of the Department of Agriculture appropriation act to carry out the war on diseases. The appropriation for the investigation of black rust and stripe rust is $100,000 and for the destruction of barberry bushes and other vegetation on which the spores of this disease originate, $150,000. Fifty thousand dollars is appropriated to meet the emergency caused by flag smut, take-all, helminthosporium and other soil and seed infecting diseases. Hessian flies and chinch bugs come in for their share of attention. Provisions are made for a special investigation of these pests, for which $147,060 is provided. The European corn borer, which has become established in Massachusetts and other states near by, will be made the subject of an immediate and thorough attack. Funds for this are $250,000.

Farmers' coöperative associations similar bodies would be exempt the provisions of the Federal anti laws under terms of a bill introd by Representative Hersman, Calif Senator Capper, Kansas, has a si bill pending in the Senate. Fear anti-trust laws is said to be curta activities of many of the coöper societies.

The Bureau of Markets will sen perts to Kansas to help in the ap tion of new inspection standards. action of the Department follow urgent telegraphic request from Henry J. Allen, who also asks re of low-grade standards. He ch that in many places country b were overestimating low-grade w and as a consequence were suff losses of from 15 to 25 cents a b

Many farmers of central Kansa reported as this year using elect to thresh their wheat. Power is nished by two large plants on the S Hill River, 25 miles apart, whic connected and supply scores of vi and farms. The company has equ large motor trucks with electric m and these travel about to the va farms connected with the power A dollar an hour is charged for th of the machinery and the services attendant. Power is extra. The c for the first ten kilowatt hours cents per kilowatt, ranging dow five cents a kilowatt for all hours 500. Half time is charged when farmer is compelled to stop his ma ery because of a breakdown. C are frequently run a mile to farm directly connected with the lines. farmers use the machinery for gri feed and chopping ensilage and in farm operations. Farmers say el ity is much cheaper and reduces g the danger from fire, which alwa isted when the old steam power en were used. Here are some figure nished by the company of the s operations: 980 bushels, 12 hours rent $19.70, equipment $12, total $ cost 2.6 cents a bushel. 930 bu 13½ hours, current $12.10, equi $13.50, total $25.60; cost 2.7 ce bushel. 1,209 bushels, 14½ hours rent $15.20, equipment $14.50, $29.70; cost 2.4 cents a bushel.

IMPORT AND EXPORT PR

Following are the import and prices of below mentioned commo on dates named, as averaged b Bureau of Foreign and Domestic merce, import prices being valu foreign markets and export prices at the time of exportation:

IMPORT PRICES.

	May, 1918.	Aug., 1918.	Nov., 1918.	Feb., 1919.
Rice, lbs....	$0.040	$0.047	$0.068	$0.050

A solid train load of peanut o first on record, was recently sh from Seattle consigned to Cincinn finers. The oil totaled 240,000 gal was all from Asia.

ANTI-DUST CAMPAIGN.

An appropriation of $50,000 made by the United States Grain Corporation at the suggestion of Wheat Director Barnes, to conduct an active grain dust explosion campaign during the coming year in grain mills and elevators, has been announced. At the request of Mr. Barnes, Dr. D. H. Price and Mr. Geo. W. Brown of the Bureau of Chemistry have been detailed to cover the entire field of safety for grain and flour storage in the interests of the Grain Corporation.

During nearly two years ending July 1, in which the Corporation handled almost $2,000,000,000 worth of foodstuffs bought in America and sold abroad, it suffered not a dollar in fire loss. So strongly did Mr. Barnes feel that this record of his organization was due to the efficiency of the Bureau of Chemistry in its investigation into the causes and prevention of fires that he has asked the Department of Agriculture to detail several of its experts for the continuation of the work. A staff under the leadership of Dr. Price and Mr. Brown will cover the safety field for the grain industry. In coöperation with them will work the National Board of Fire Underwriters, which, through its inspection force, contributed greatly to the Grain Corporation's freedom from fire loss.

For its own protection the Grain Corporation believes that there must be a more complete understanding throughout the country of explosions and their prevention to protect its own stocks scattered broadly throughout the country and it is intended to carry on a widespread educational and preventive campaign which will be followed with great interest.

While it is not a matter of common knowledge that grain dust, and flour itself when mixed in cetrain proportions of air and exposed to a spark, explodes like gasoline in a cylinder, many of the most destructive elevator and mill fires of the past have been traced in their origin to this ignition of explosive dust. Large armies might have been maintained for several months with the food destroyed in some of these fires.

According to figures supplied by the Department of Agriculture, dust explosions caused the destruction of four of the largest grain and cereal plants in the country between March, 1916, and October, 1917, in the United States and Canada. These disasters caused the death of twenty-four persons, injuries to thirty-eight and damage to the extent of $6,000,000. Among these accidents was an explosion and elevator fire in which enough grain was destroyed to supply bread rations for 200,000 soldiers for a year.

Demonstrations of the explosive quality of what appears to be harmless dust will be given under the auspices of the Grain Corporation experts in various parts of the country together with practical illustrations of preventive measures. Some of the safety-first rules advocated by Dr. Price and Mr. Brown in the grain dust prevention work follow: (1) Construct the plant of fireproof materials; (2) keep the plant clean and as free as possible from accumulations of dust; (2) install an efficient dust collecting system; (4) prevent the use and production of flames and sparks of any kind; (5) prohibit smoking and carrying of matches; (6) install some improved system of protection against fire.

The Grain Corporation in its fire-prevention work will also instruct the employes of mills and elevators in the necessity for precaution. One carelessly lighted cigarette has frequently caused loss mounting into millions in grain elevators. Any kind of dusts containing carbon explodes under favorable conditions, and among these are grain dust and flour dust. Consequently dust accumulations on beams, machines, pulleys or floors in elevators and mills are to be guarded against. Open flames, smoking and friction in machinery, as well as enemies of life, grain and property are also to be exposed in Mr. Barnes' campaign to protect the grain industry against fire loss.

A GOOD BUSINESS HOME.

We illustrate herewith the plant of the Farmers' Grain & Seed Co., at Mantador, N. Dak. This is a typical country elevator of the Northwest, well equipped in every particular, and enjoying a good business. The management is patriotic and flies Old Glory from the masthead of the elevator.

The cupola is well lighted, which makes the watching of the machinery, elevator head and distributing spouts easy. Lower down is the dust house, which is directly over the driveway. Back of that is the office building, well equipped with modern office appliances.

The company is in shape to handle business in a businesslike way. It will be noted from the appearance of the picture that the plant is kept up in A-1 condition and the grounds around the elevator itself are kept free from dry grass, rubbish, etc., which in itself is commendable. The company enjoys a good business and is under able management.

ELEVATOR OF FARMERS GRAIN & SEED CO., MANTADOR, N. D.

CANADIAN PROFITEERS.

H. H. Stevens of Vancouver, M. P., recently made an attack upon the Grain Growers' Grain Co. of Canada, charging excessive profits and "overages" at their elevator at Port William. These profits, he said, for the season 1916-17 amounted to 187 per cent of the capital stock of $100,000. He demanded therefore that the elevator operators as a class be compelled to return to the government of the Dominion $15,000,000 in excess of legitimate earnings. T. A. Crerar, ex-Minister of Agriculture and head of the company attacked, denied the charges. He said the actual profits of the elevator ranged from 15 per cent in 1912-13 and 30.01 in 1915-16 to 23.25 per cent in the season of 1916-17. He also asserted that the charges in the Grain Growers' elevators were less than the profis made by the government elevator at Port William.

The "overages" of the company, he said, amounted to 357,000 bus. in the past five years, with shortages of 3,800 bus. The profits of the elevator from "overages" should be handed over to the Dominion Exchequer and should if possible be distributed to their rightful owners, otherwise they would be taken by the state without compensation to the owners. In case of the Grain Growers' Grain Co. and the Saskatchewan Elevator Co. the profits from the "overages" benefited the farmers who were shareholders of those companies. The suggestion of Mr. Stevens, that in the proposed bill to force a turnover of profits, the proposal that "overages" not exceeding half of 1 per cent should be allowed the elevators, had come from the Grain Growers' Grain Co. was denied. On the contrary, it was stated that this company would be content to have it cut in half or it might be taken away altogether.

Cereal Trading Company in Italy.

It is reported to the Department of Commerce that an Italian trading company is being formed for the importation into that country of cereals after the resumption of private importation of foodstuffs. This new company will be capitalized at 30,000,000 lire, of which 20,000,000 lire will be furnished by the Banca Commerciale Italiana and 10,000,000 lire by the Credito Italiano. While the new corporation is organized for the special purpose of dealing in grain, it will conduct a general import and export business, seeking to balance cereal importations into Italy by the exportation of Italian products to such foreign grain-producing countries as Australia, Argentina, Roumania, the Ukraine, and the United States.

This is encouraging in view of the fact that during the war all importations and distribution of cereals and foods had been controlled by the government. It was thought such a condition might be continued indefinitely.

Attack on Commodity Rates.

A hearing has been in progress in Chicago before an agent of the Interstate Commerce Commission on the initiative of the Director General of Railroads upon the question of readjusting commodity rates in C. F. A. territory. Should the desired readjustment be granted by the Commerce Commission, rates on hay and straw would probably be advanced practically 25 to 30 per cent.

Broomhall cabled July 25 that the corn crop in the Danube district is very favorable.

TREND OF FARM PRICES.

The level of prices paid producers of the United States for the principal crops increased about 1.0 per cent during June; in the past 10 years the price level decreased about 0.4 per cent during June. On July 1 the index figure of prices was about 13.7 per cent higher than a year ago, 7.0 per cent higher than two years ago, and 84.0 per cent higher than the average of the past 10 years on July 1.

The prices of meat animals—hogs, cattle, sheep, and chickens—to producers of the United States decreased 2.4 per cent from May 15 to June 15; in the past nine years prices decreased in like period 0.7 per cent. On June 15 the index figure of prices for these meat animals was about 10.0 per cent higher than a year ago, 27.8 per cent higher than two years ago, and 83.1 per cent higher than the average of the past nine years on June 15.

Following are details of prices paid to farmers, compared quarterly on dates indicated, as reported by the Bureau of Crop Estimates:

	1918			1919	
	June 15.	Sept. 15.	Dec. 15.	Mar. 15.	June 15.
Hogs	$15.37	$17.50	$15.82	$16.13	$17.80
Beef, cattle.	10.40	9.63	9.28	10.34	10.20

George W. Rohm of Rockville has been elected president of the Indiana Millers' Ass'n.

NEW WELLER DRYER AND COOLER BOOK.

Bulletin Z-101, just issued, is the latest contribution of the Weller Manufacturing Company to the elevator and milling industries. It is a book illustrating the Rotary and Continuous Dryers and Coolers built by this big organization and now available for the grain industries.

But this book is much more than a mere catalog of illustrations and specifications. Each individual device is explained in detail, together with the reasons leading to its design and building. All of this is particularly interesting information.

For many years the Weller Manufacturing Company has been making dryers, coolers, cookers and roasters for widely varying purposes. Consequently the product as shown in this new book is the result of long experience of

THE WELLER CONTINUOUS DRYER AN D COOLER WITH BITUMINOUS OR ANTHRACITE COAL FURNACE.

their own engineering department and the combined results and knowledge from tests and actual operations of some of the most noted engineers, designers and operators of elevators and mills of every size in almost every part of the country.

THE WELLER CONTINUOUS DRYER AND COOLER WITH BITUMINOUS OR ANTHRACITE COAL FURNACE.

Among the many devices for drying, cooling, and conditioning grains, the Weller Continuous Dryer and Cooler as illustrated should be of particular interest. This dryer and cooler is made under the original Cass patents, Lorin L. Cass of Weston, Ohio, having worked out the fundamental principles, later developed to its present state of perfection by the Weller Manufacturing Company. It is so designed and built that it is most flexible in its adaptability to the requirements of the grain trade in the small country house and mill or in the largest terminal houses and mills. Wherever moisture is to be taken out of grain, the Weller Continuous Grain Dryer and Cooler will remove it for a great deal less money than is represented by the increased value of the grain.

The standard Weller Continuous Grain Dryer and Cooler is operated on hot air obtained practically direct from a coal fire. However, it may be arranged if desired to operate with steam coils for heating the air. For the hot air, specially designed furnaces, one for burning ordinary bituminous coal and the other for anthracite coal, are provided dependent of course upon the cost and ease of the coal supply in any given locality.

This hot air type of dryer is particularly desirable for economy of operation and obviating the possibility of freeze-ups in cold weather. Operating on anthracite coal, this dryer will dry from 150 to 175 bushels of grain under ordinary conditions with 100 pounds of coal. Using bituminous coal will naturally call for from 50 to 100 per cent more coal according to the heat units. Assuming the larger amounts of 200 pounds of bituminous coal at $6.00 per ton means a cost for fuel of 40 cents to dry 150 bushels of grain, or two and one-fifth cents per bushel.

OPERATION.

Where either a bituminous coal furnace or a steam heating coal is used, the air is drawn through the cooler, then passed through a fan and directly into the heating furnace. Where anthracite coal is used the fan is placed on the other side of the furnace and the air is drawn through the cooler, and by means of a "Y" connection, fitted with proper regulating valves, hot air is also drawn directly from the fire.

The effect of the hot fumes directly from an anthracite fire is extremely beneficial to grain which has started to sweat, the gases purifying and sweetening the grain in a manner entirely different from any other process.

A thermostat control is provided to check the heat at 250 degrees Fahrenheit, and by means of suitable dampers regulates it so that this temperature is the maximum which can pass through the grain under ordinary conditions.

CAPACITY.

The capacity of the Weller Continuous Dryer and Cooler naturally depends upon the amount of moisture in the grain to be removed. In some cases the capacity may run as low as 50 bushels per hour per section of dryer. Again it will extract 3% to 10% moisture from 200 to 350 bushels per hour.

CONSTRUCTION.

Every part of the Weller Grain Dryer is built of steel. All portions coming in contact with the grain are heavily galvanized to prevent corrosion.

Every Dryer is erected in the Weller Manufacturing Company plant, complete, before shipment, thus insuring the absolute maximum of ease in erection and minimum of difficulty.

TRADE MENTION.

Voris & Co., of Stewardson, Ill., have opened up in Memphis. This indicates, as recently printed herein, something of the growth of the Memphis market in grain, hay and feed. The hay plugging system which is successfully operating on two lines, the Frisco and the Rock Island, is a great benefit to country shippers and a quick method of making sales to the local trade. The I. C. has promised similar hay plugging facilities.

M. J. Young is back at his old desk with the Philip Smith Mfg. Co., Sidney, Ohio, having spent a year or more in France. Those who have experienced his convincing sales argument in the past may now expect them to be assisted with "honest to goodness" war stories and we would not be surprised to learn that the Sidney line of machines has been further introduced in the grain and milling industry of our Allies abroad.

The Maroa Mfg. Co., Maroa, Ill., sold a wheat loader to Frank Littler, Dewey Bros. Co., East Monroe, O., who writes THE PRICE CURRENT-GRAIN REPORTER, "It certainly is a dandy and can load 250 bus. per hour. It at the same time blows the dust out of the wheat and helps to cool it." Occasional trade items regarding Maroa activities and a sincere, hard-working force in their office doing everything to help the grain trade make and conserve money makes this recommendation from Ohio particularly acceptable to us and them.

The W. J. Savage Co., Inc., Knoxville, Tenn., has recently secured many large orders for feed grinding and mixing equipment, among which was an order for 99 feeders from the American Mlg. Co. of Peoria and 50 feeders for the Security Mill & Feed Co. of Knoxville, Tenn., which has now under construction what is estimated to be the largest feed mixing plant in the South. The Savage Co. will supply the entire feed mixing equipment for this concern.

The S. M. Brooks Advertising Agency, 816 Boyle Bldg., Little Rock, Ark., is a nationally recognized agency reporting a steady growth in their business. They are closely studying merchandising conditions in feedstuffs, helping to popularize Southern feeds and to assist their Southern friends who import surplus stocks of grain, hay, flour and feed from Northern markets as well. Little Rock's location is ideal for such service, and S. M. Brooks, directing the activities of the agency, is convinced that the present season will see a great boom to business in general and a particularly profitable trade for readers of THE PRICE CURRENT-GRAIN REPORTER.

Logan & Bryan announce that the have opened a branch office at Atlanti City, N. J., located in the Riddle Buil ing, on the Board Walk, at Pennsy vania and Mansion Avenues. This offic is fully equipped with all the facilitie for handling business in the leadin markets for their clients and friend visiting this famous resort.

Announcement is made of the oper ing of a Chicago district office at 131 Marquette Bldg., Chicago, by the S K Industries, Inc. This office is in charg of J. B. Castino, who will promote th engineering and sales service of th S K F Laboratories, the Atlas Ball Co Hess-Bright Mfg. Co. and the S K Ball Bearing Co.

John W. Greenfield, whose resign tion of position with the Dewey Bros Blanchester, O., has been mentione herein, has bought a feed and grain bus ness at Wilmington, O., a railroad cente 40 miles from Cleveland. Mr. Greenfiel began his training for business wit the Dewey Bros. as office boy and ha gone through the stages of retail offi manager, assistant and correspondei in the wholesale department, manage of the flour sales department and ma ager of the feed department. He thoroughly trained in every depar ment of the business he is going in and his friends predict that he wi succeed splendidly.

At the annual meeting of Turne Hudnut Co., of Peoria, the followin officers were elected: V. P. Turne president; H. G. Herget, N. R. Moor W. H. Perrine, and H. A. Rumsey, vic presidents; Geo. Hornish, secretar R. S. Turner, treasurer. R. S. Turn and J. D. Canty (the latter for mar years in the Rumsey, Moore & Co. o ganization) will pay particular atte tion to receiving business. The cu tomers of Rumsey, Moore & Co. Peoria will thus see that their interes will be looked after by the same pe ple when they ship to Turner-Hudn Company.

Separators for Baltimore.

The Invincible Grain Cleaner Co., S ver Creek, N. Y., are now building a li of receiving separators to be used in t Northern Central Elevator under co struction at Baltimore, Md.

The line consists of ten No. 15 a one No. 12 Invincible Compound-Sha Double Receiving Separators, each ha ing a capacity of 3,000 bushels per ho medium cleaning. They are of wo construction, covered with sheet ste and painted bright red. They will operated in pairs, each pair bei coupled and driven in the center. special conveyor system is being fu nished to feed the machines and anoth to take care of the screenings.

The selection of Invincible Cleaners handle the grain in what is to be one the largest terminal elevators in t world, is a recommendation for the I vincible product, of which other man facturers may well feel envious.

New Travelers Out.

Simons, Day & Co., with main offic in the Postal Telegraph Bldg., Chica have put out two new traveling me W. H. Cunnington and Ed Blage. Bo had traveled previously for Chica houses with connections in other ma kets, and in continuing their work wi Illinois trade it is the belief of t grain department of Simons, Day & C that good results will follow. Gen ally speaking and in view of freque changes in the personnel of the gra solicitors of the United States, it is sa to say "there will be something doi this year." The enterprise and bu ness-getting ability of these men c volves after all, as so frequently sisted in this paper, on the commissi service of the terminal market hou receiving the grain. This angle of the work is possibly not as prominent as might be, considering its importan but this year's large crop of whe with unfortunately an enormous to nage of light weight, doubtful quali milling grades, will prove in a ve short time to country grain shippe

YOU NEED THESE SIEVES

BLIGHTED WHEAT

ARE YOU READY?

SHRIVELED—BLIGHTED—IMMATURE WHEAT

Makes the Use of

Standard SEEDBURO (Trade Mark)

DOCKAGE SIEVES NECESSARY

ALL IMPORTANT—PREPARE NOW

By ordering a set at once. These Dockage Sieves Are for Wheat and Oats, Government Specifications

They are made throughout of aluminum, 13 inches in diameter telescoping, only two pieces of metal are used, thereby making the sides seamless. The bottom perforations are of aluminum, which makes the construction strong, light weight and will not rust. Set consists of:

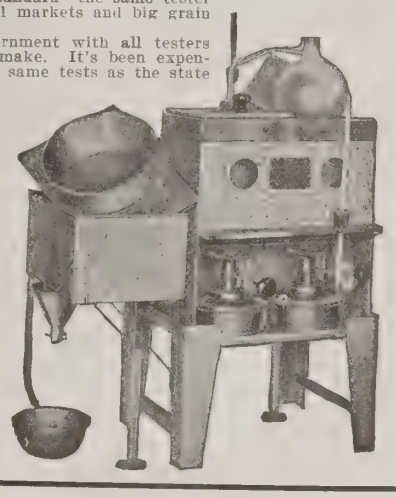
—Scalper Sieve, round perforations, 12/64 inch.
—Buckwheat Sieve, triangle perforations, 8/64 inch.
—Fine Seed Sieve, round perforations, 1/12 inch
—Chess Sieve, slot perforations, 4½/64x½ inch.
—Solid Bottom Pan.
Price $8.00 for complete set.

You will also need our SPECIAL "FOUR-IN-ONE" SCALE No. 14, Effectively used in connection with grain sieves

This scale, designed and manufactured by us, is a small, complete office scale for weighing samples for moisture test and for determining test weights per bushel, dockages, weights for mailing samples, etc.

This "Four-in-One" Agate Bearing Scale is the most complete, compact, accurate and adaptable scale made satisfying these many needs.

Quick breaking and guaranteed accurate. Will do the work of four ordinary scales designed especially to satisfy any one of the above needs and at the small price of one. Used by thousands of country shippers, receivers and grain men everywhere.



Price with weight per bu. cup, $23.00.

When you buy a moisture tester you want the **Standard**—the **same** tester that the Government inspection departments, terminal markets and big grain shippers use.

That one is **SEEDBURO.** We supply the Government with **all** testers used by them. Don't take chances with any other make. It's been expensive for some who have tried it and failed to get the same tests as the state terminal markets who use our **standard** Testers.

The SEEDBURO (Trade Mark) Official Brown Duvel Moisture Tester (for whole or ground grains) is the only standard tester approved by the Government. It is being used by Government supervision offices, Grain Inspection Departments, Mills and Elevators from coast to coast. Made in sizes of 1-2-4-6 tests at a time, heated by alcohol, gas or electricity.

ether they have good or bad terminal rket connections. Dockage is to be important item, and irrespective of use of moisture testers and other ding equipment in country elevators, seems to us doubly important this r that your commission house uld be wisely selected.

Richeson and the Hibernia Bank.

Tilliam Lyle Richeson, of the W. L. neson Co., Inc., has been elected to board of directors of the Hibernia k & Trust Company of New Or- s.

ossibly no man in the South is bet- known in the grain business than Mr. Richeson. Since 1917 he has manager of the New Orleans office he Wheat Export Co., Inc., the gi- ic organization of national scope h is the official buying agent for allied government. It is worthy of that during Mr. Richeson's regime ead of the New Orleans office of Wheat Export Co., Inc., this agency lled for transshipment to the allied tries at war the stupendous quan- of some 2,000,000 tons of grain and foodstuffs, establishing for the of New Orleans a reputation both handling tonnage and dispatching ners which gave it place among the nost ports of the world.

. Richeson has been a resident of Orleans since 1897. Previous to time he had some twelve years' ience in grain elevator operation . Louis and Kansas City. On June 19, Mr. Richeson announced the ation of his own company, this any having become actively opera- on July 1.

the growth of the port of New ns, and with especial reference to novement of all grains into New ns and out of the port for export, Richeson has played a prominent, ntial and continually active part. e fostering of projects looking to the development and modernization of the port's facilities, Mr. Richeson has contributed largely. As an example may be mentioned the magnificent Public Grain Elevator, in the conception and completion of which Mr. Richeson's practical knowledge and advice proved of invaluable assistance.

Mr. Richeson's election to the board of directors of the Hibernia Bank & Trust Company will add to that institution a very definite element of strength, and will render that institution even more prominent than heretofore as the grain financing bank of the South.

Corn Crop at Critical Heat Stage.

The 1919 corn crop after a marvelous rally has reached July 25 with probably a condition of 87 per cent, a high condition. A crop of three billions may result. In consulting the former corn lore we find many thrilling items. The critical corn time is given as from July 15 to Aug. 15. Favorable weather is always necessary for 10 days following the blossoming period. If the rains are heavy at the blossoming period the yield is above normal; if below normal, the yield is below normal. On Aug. 14, 1916, Decatur claimed "rains for three days revived corn and barren stalks put out shoots." Ohio lip lore shows that a warm and wet July means a record Ohio corn crop. A cool and wet July means a fair crop. A warm and dry July means a moderate to small crop. This report takes no cognizance of a prior very wet period. In 1919 the corn belt is reinforced by the very wet months of May and much of June. The wonderful crop of 1912 was grown on a dry June. July brought excess rains and during August it rained daily in some sections. Based on the experience of 1916, when the corn crop endured a drastic 60-day July and August hot spell and yet yielded 2,583 millions, the 1919 crop can endure a two weeks' hot spell if fair August rains arrive and yet run 2,800 millions. The 1916 corn history is the nearest guide to 1919. The 1916 crop was planted during an excessively rainy period—tremendous downpours up to June 28. The first 14 days of the blazing heat hot spell rescured the late growth. After which, owing to large soil moisture content, the crop fought off one of the longest (60 days) heat spells ever known and ran 2,583 millions. Condition of the 1916 corn crop on July 25, 1916, was evidently not above 71 to 75 per cent. The 1919 corn crop started high at 86.7 per cent and probably retains a condition of around 87, an exceedingly high percentage.

During the past ten days parts of northwestern Kansas, Nebraska, Missouri, Indiana, Ohio and southern Illinois have received rains. Professors Bowman and Crossley maintain that the August corn belt precipitation affects the yield even more closely than the total seasonal rainfall.

This evidence leaves the chance of a record or small corn crop to the rains of August. Excess heat kills corn, for the reason that the regular intake of oxygen, nitrogen, carbon, etc., is prevented. Thus on a situation like the present, the plant has been regularly reinforced by perfect air conditions.—*Joseph Wild.*

It is reported by the State Fire Marshal of Kansas that his inspectors have found in several cases that wheat fields and wheat stacks have been deliberately burned by their owners in order to collect the insurance. The insurance of based on the value of good wheat, whereas the yield in such cases was known to be poor and some times hardly worth threshing.

Toledo received the first car of new rye on July 23. It graded No. 2, tested 55 lbs., and was shipped from Michigan.

Corn Condition.

A close study of crop and weather conditions warrants the belief that the corn crop is still in good condition, speaking for the crop as a unit. While dry and abnormally high temperatures have prevailed for some time, there was an abundance of moisture last spring. In fact, rains during planting season were in many instances so copious that complaints of delayed planting were numerous. Favorable climatic conditions and sufficient subsoil moisture have advanced the crop to a perfect stand. However, it is admitted by experts and close observers that this condition will not prevail much longer, unless important sections of the corn belt are favored with heavy rains. Some deterioration is beginning to show in Indiana, while Kansas, Missouri and Illinois are in urgent need of rain. The critical crop period is here and the market is naturally very susceptible. In order to prevent a maintenance of current high levels it is imperative that the prospective yield, as indicated by the Government report, be garnered. The relative position of America's supply and demand is a very strong one and last season's crop is barely able to supply our home requirements, which have been confined to strictest economy. On the other hand, the demand for the new crop is likely to be large, as it will come into empty bins, and it will take accumulation at primary centers to restore the balance wheel, which is likely to be a matter of months.—*Simons, Day & Co., Chicago.*

The Government license of the Osceola Mill & Elev. Co., of Minneapolis, has been revoked by the Grain Corporation on the allegation that the company had failed to turn over its excess profits to the Food Administration. The company has mills in Wisconsin, Minnesota and North Dakota.

The Letter Box

Will Make Repairs.

Price Current-Grain Reporter: There are no new firms at this place and no new building going on. We expect to make some repairs and will purchase a car loader and feed mill.—*C. V. McKee, Shreve, Ohio, R. D. F. No.* 1.

Change of Office Location.

Price Current-Grain Reporter: This is to advise that we have moved our office from Live Stock Exchange Bldg. to Rooms 521-523 Board of Trade Bldg. We would be glad if you would insert this in your REPORTER.—*The Grain Products Co., Wichita, Kans.*

Oats and Wheat Poor.

Price Current-Grain Reporter: Our oats crop here is very light in weight and the yield is way down as compared with last year. The weather is very dry and if continued much longer, a big local feed trade will result. The wheat yield is down and about one-fourth must be used for feed.—*Union Grain & Feed Co., Anderson, Ind.*

Should Release Wheat Control.

Price Current-Grain Reporter: We think it of most vital importance that the Government release control of both wheat and the railroads and that the grain shippers should be furnished with better cars for bulk shipments and more promptness on orders.—*Rothdrum Grain & Supply Co., Rothdrum, Idaho.*

Motors Used—Grain Crops.

Price Current-Grain Reporter: The Farmers' Co-operative Grain Co. of our city recently installed one motor for their elevator and another for their grain cleaner. We have installed an electric motor for our elevator. Wheat is testing from 54 to 60 per bu., and is making from 7 to 20 bu. per acre.

Oats are good. Corn needs rain, but at present looks fine.—*Octavia Lumber & Grain Co., M. B. Jordan, mgr., Cordova, Nebr.*

Overloading Cars.

Price Current-Grain Reporter: The enclosed communication from General Agent Mann of the L. & N. Railroad covers a subject that not only affects the L. & N. R. R. but all the railroads handling grain and all the shippers loading it.

I, therefore, thought it might be well for you to publish this letter in your next issue, or, at any rate, the substance of it.—*Chas. Rippin, St. Louis, July 25.*

ENCLOSURE.

Mr. Chas. Rippin, Merchants Exchange, St. Louis, Mo.: Recently we have been receiving numerous cars of grain in East St. Louis that are overloaded, necessitating a transfer of the cars in order to lighten the loads. This morning we received 19 such cars, and it is a hard matter for us to secure sufficient empties to accomplish the transfer and to get the cars out in a reasonable time. Under the Master Car Builders' Loading Rules, cars of the various capacities should be loaded as follows:

Cars of 60,000 lbs. capacity must not be loaded to exceed 66,000 lbs.

Cars of 70,000 lbs. capacity must not be loaded to exceed 77,000 lbs.

Cars of 80,000 lbs. capacity may be loaded so that the total weight of the car and the lading does not exceed 132,000 lbs.

Cars of 100,000 lbs. capacity may be loaded so that the total weight of the car and the lading does not exceed 161,000 lbs.

The majority of the overloaded cars reaching us originate beyond St. Louis, but we occasionally have one loaded in St. Louis proper.

My object in writing you is to ask your assistance in reducing the number of cars that reach our line loaded too heavy to transport. It is true that practically all of the overloaded cars are coming from beyond, but I thought perhaps receivers, members of your organization, would interest themselves in the matter and endeavor to have their customers load cars properly. If they will do so I think it would be of great benefit to them, as it would result in a much faster movement of their grain through the St. Louis and East St. Louis terminals.

Will appreciate very much information as to what steps you take in the matter. Yours truly, A. ET. MANN,
General Agent L. & N. R. R. Co.

Diversion Privilege for Hay.

Mr. J. Vining Taylor, Sec.-Treas., National Hay Ass'n, Winchester, Ind.—Dear Sir: What, if anything, has been done in an effort to get back our diversion privileges? Under the old plan, where we could divert more than one time, we could start tramps to Kansas City, go on to St. Louis, on to Memphis, on to Birmingham, on to Mobile and on to New Orleans. Or we could have tramps moving to different points, but now with only one diversion privilege, it is necessary to have a cautious number of tramps only and mostly moving to Kansas City, really unsafe to have unsold cars headed for any other destination.

It seems to us that we should get this privilege back. Are you working on it? What can we do to help?—*The Wood Brokerage Co.*

The above came to us as a carbon copy for our information. We pass it on. Nothing so far as we know has been done, and traffic experts here think perhaps nothing can be done now to extend the present privilege as to hay. But that may be supposition only.—EDS.

Crop Conditions in France.

Price Current-Grain Reporter: Since my last market report conditions of the various crops over here have unfortunately not improved; on the contrary, owing to the continual drought, the plants have suffered, especially the spring crops, and notwithstanding the recent rains, the outlook is still unfavorable.

The *Journal Officiel* has just published a statement about the situation of crops on May 1, 1919, which shows the following figures:

ACREAGE SOWN.

	Acres. 1919.	Acres. 1918.
Winter wheat	10,985,151	11,231,594
Spring wheat	791,814	695,770
Total	11,776,965	11,927,364
Meteil*	211,353	214,985
Rye	1,862,122	1,942,371
Winter barley	267,200	262,072
Spring barley	926,711	1,134,197
Total	1,193,911	1,396,269
Winter oats	1,721,047	1,721,763
Spring oats	5,125,728	5,505,734
Total	6,846,775	7,227,497

*Mixed grains.

STATE OF CROPS.

	May 1, 1919.	May 1 1918.
Winter wheat	63	74
Spring wheat	62	71
Meteil	70	64
Rye	66	63
Winter barley	66	72
Spring barley	64	72
Winter oats	64	72
Spring oats	65	72

100 = very good, 80 = good, 60 = fairly good, 50 = passable.

The above figures show that the acreage is ever so much inferior to that of last year, which constitutes already a very serious drawback; but still worse, the general condition of the plants is by far less promising than the previous year. This may be attributed to the excessive moisture of last winter. Since the government report has been issued, conditions have become still worse as previously stated, through lack of rain.

Private estimates conclude that we shall have to import something like about 129,000,000 bushels of wheat.

It is generally believed that wheat and flour will be still imported and controlled by the government, but the other cereals are now free and the *Journal Officiel* of June 18 contained a new decree permitting the import of cereals, except wheat, meslin and also wheat flour. The pre-war duties on cereals have been re-established, but it is thought that the maximum prices will be still applied.

No doubt you remember that those prices have been fixed for the coming crop, per hundred kilos taken on the farms, as follows:

	Francs.
Wheat	73
Rye	53
Oats	53
Maize	53
Barley	53

The import duties per hundred kilos (according to extraction) are as follows:

	Francs.
Wheat	7
Flour	11 to 16
Rye	3
Oats	3
Maize	3
Barley	3

If maximum prices are maintained, imports will be very difficult, as, for instance, this price for domestic oats is fixed at fcs. 53; but up till now there has been a belief that the above price will not be applied to foreign oats. In many quarters it is thought that all those maximum prices will disappear with the next crop; as a fact, some No. 2 white clipped oats, 38 lbs and 36 lbs., have been bought for July and August shipment from 58 fcs. to 61 fcs. (according to quality and time of shipment) per 100 kilos c.i.f. Havre. For a quotation free on railroad car France, all paid, the following charges would have to be considered:

	Francs.	Cent.
Import duty	3	..
Unloading expenses, etc.	2	..
Costs for putting on railroad, etc.	1	..
Freight to the interior	1	50
Total	7	50

Therefore, the net cost price, without any profit to the importer, is from 65.50 to 68.50 francs, which means a much higher price than the one fixed for domestic oats.—*A. Ravaud, Paris, France.*

Going Back to Corn.

Price Current-Grain Reporter: Indications are that the acreage of wheat in this section in 1920 will show a material decrease compared to that now being harvested. Old King Corn will come into his own again in this country, where he has ruled for so many years.

Cars are scarce on all railroads; local elevators are fast filling up with wheat; one burst open on Friday; farmers are in many cases providing temporary storage on the land where grown so that threshers can proceed with their work. With a continuance of this ideal harvest weather for another week, the winter wheat crop will mostly find itself under roof somewhere. As the season progresses and the berry thoroughly dries and cures out, one notices wheat grading somewhat better now than did the earlier shipments.

Corn growers report that great cracks are appearing in the soil in their fields, caused by hot, dry weather, and go about with pretty long faces. There is no doubt that good rains are greatly needed to promote the corn crop at this time, when the ears are being formed and the plant is putting forth its greatest energy of the season. People who have traveled throughout central Illinois during the past few days tell us that corn growing on light soils, or that which was not properly cultivated, is going backward in condition daily, but that the great majority of the fields do not as yet show positive damage.

Very few oats threshed here yet—the cream of wheat takes precedence. Growers not keen to contract largely ahead of delivery. Sentiment generally here is that oats are fully worth present prices.—*H. I. Baldwin & Co., Decatur, Ill.*

The first car of 1919 wheat reached New Orleans on July 17 from Leonard, Okla., and was sent to R. J. Barr, exporter. The grain was out only five days, a remarkable trip.

GRAIN SHIPPING CONTROL.

The Director General of Railroads h issued the following regulations a plicable to all grain loading on lines, including both federal and n federal controlled roads, to control t movement of grain to and between p mary markets, and in order to av congestion and delay to cars, such sh ments will be handled under so-cal "blanket" permits and individual p mits.

Permits will be issued by Grain C trol Committees which will be est lished at the following primary m kets: Chicago, Milwaukee, Minne olis (including St. Paul), Duluth (cluding Superior), Omaha (includ Council Bluffs), St. Louis (includ East St. Louis), Kansas City, St. seph, Wichita, Fort Worth, Peoria, troit, Toledo, Cleveland, Buffalo (cluding Black Rock), Cincinnati, In anapolis.

A blanket permit is an allotment a railroad of a definite number of c of grain that will be accepted daily a specified market.

An individual permit is one iss directly to a shipper authorizing loading of a given number of c within a specified time.

BLANKET PERMITS will be issued—

1. To all railroads leading fr country stations to primary markets

2. A railroad not reaching a prim market will make application to Gr Control Committee for permits, sh ing routing desired, and the road livering to the primary market have its allotment of cars adjusted cordingly. Copies of such permits be transmitted to line over which sh ments are routed to primary mark as authority for acceptance and m ment.

It is understood that Grain Con Committees will exercise the utm discretion in allotting shipments railroads to secure equitable loading between roads.

INDIVIDUAL PERMITS will be issue

1. For all shipments between mary markets, or

2. From primary markets to ports, and

3. For all grain shipments from co try stations to seaports, whether mestic or export.

Such ports are—Buffalo, Bost Portland, Me., New York. Philadelp Baltimore, Norfolk, Newport Ne New Orleans and Galveston. Perm for shipments to these points will issued by the Traffic Control Mana at each place except Buffalo, wher Grain Control Committee will be ganized, as shown above.

Loading records will be maintai by each road, and reports made d by wire to Regional Director and Gr Control Committee involved, showi

1. Cars of different kinds of gr loaded for each market on blanket mit.

2. Cars of different kinds of gr loaded for each market on indivi permit.

3. Roads serving primary mark will report daily to Grain Control C mittees number of cars of grain ceived from connections, separated roads, for such markets.

4. Grain Control Committees report daily to Regional Direct number of cars allotted to each within their jurisdiction.

5. Each road will carefully su vise its daily loading in order that in excess of the number covered permits may not be loaded.

All concerned will be advised t the date on which the foregoing r lations are to become effective.

Quality of New Oats.

C. H. Gibson of W. P. Anderso Co., an oats handler of many years' perience, declares the new oats now riving actually show less moisture t old oats and generally are so near year's weight and quality, while taining less moisture, that it is alm impossible to distinguish the new f the old.

BARLEY MARKETS.

ILWAUKEE.—The local barley market rm and higher for the week, prices ıncing 12@15c during the period, ıg to the unfavorable showing of new crop much of which being t weight. The demand here is good all descriptions are salable, parlarly heavy grades. Receipts for week were 307 cars, against 202 cars eek ago and 19 cars in 1918. Curquotations are: Good to choice, 48) lb. test, is quotable at $1.40@1.42; ht, $1.42@1.44; fair to good, 45 to 47 est, $1.38@1.40; low, 41 to 44 lb. $1.34@1.38; feed, $1.32@1.38. Iowa ed $1.33@1.43, for light to fancy; consin, $1.35@1.44; Minnesota, $1.33 2; Dakota, $1.33@1.42; feed and ted, $1.32@1.38.

ULUTH.—Operations in barley was a re here during the last week. Con-ed demand from the East was re-ed and the heavy receipts were ly absorbed. As a result of liberal nents to Buffalo, barley supplies in levators here are being held down ıall proportions, the aggregate now ling at 560,000 bushels. Receipts ıg the week aggregate 266 cars as st a goose egg during the same d last year. Quotations were ad-ed 8c to from $1.20 to $1.30.

FFALO.—Barley dealers had no le in finding buyers for spot malt-r feeding and at considerable ad-over last week. A liberal nt for shipment was also taken. Dealers quoted the market for feed to fancy malting at $1.38 to $1.47, track, or store, Buffalo.

KANSAS CITY.—Offerings for the week were only three cars, and they were readily taken for shipment and by local feed manufacturers. Prices advanced 1@2c, to $1.23@1.25 for No. 3 and $1.20 @1.22 for No. 4. Ground barley was quoted about 15c higher, at $3@3.10 per cwt., in sacks. Handlers complained as to the demand, saying the request for hog feeding had diminished and that wheat shorts, though strong, were underselling barley feeds. The Kansas crop report showed a reduction of 2,111,000 bus. in the yield since the June estimate. The yield now is figured at 14,555,000 bus., which is still much larger than last year. Harvest is over, but no new grain has been moved. Stocks of barley in Kansas City are down to 2,000 bus., against 99,000 a year ago.

PORTLAND.—The barley market last week was very active with advancing prices. The *Commercial Review* says: "We have a crop of about 12,000,000 bus., but how much of this will pass as Standard A cannot be now forecasted, drought and hot winds having caused a deterioration of quality." The trade moreover are looking for higher prices, as stocks both here and on the Sound are small. Prices this week are quoted for Standard A at $56.50, feed quality $52.50 per ton.

SAN FRANCISCO.—Barley prices are advancing steadily, although without any particular excitement. The early barley of the state is in fair condition, but the later sowings suffered some from drought. Higher prices are being asked for the spot and the market for the future is strongly speculative. Spot trading for the moment is at a standstill with the feed range quotations at $3.07½@3.12½ per cental. The December future sold up to $3.14½. Bids for May were recorded at $3.25¼ and $3.27½ asked.

CHICAGO.—The market all week was an ideal one for sellers. Everyone wanted barley. Maltsters were in the market for the better qualities, as were also the industries, and, as the feed qualities without black oats were very scarce, the feed dealers had to compete with the maltsters and the pearlers to get any grain at all, in view of the light offerings of all good qualities. There were some black oats mixtures on the market, but these, of course, were slow sale. Offerings generally were light. Prices advanced from the first of the week to the end and on Monday of this week a price of $1.45 was made, being the high of the season. The advance on Monday was from 3@5c, with sales reported of 35 cars over a range of $1.35@1.45. Futures also sold higher, July opening at $1.29 and closed at the top price of $1.29½; September sold up to $1.31¾, but closed at $1.30½; September new sold down to $1.39, but closed at $1.40, with the December closing at the top price of $1.44¾. Exports from Atlantic ports were again heavy, amounting to 2,195,000 bus., compared to 1,426,000 a year ago.

MINNEAPOLIS.—A strong shipping demand for barley forced the market sharply higher in the past week. Dwindling receipts stimulated the bidding. A car of new South Dakota barley was received. It tested 40 lbs. to the bushel and sold at $1.22. Offerings of new crop barley to arrive are light.

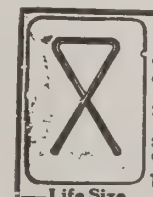
Cash barley sold on Monday as high as $1.45, being a record price for last year's crop.

Andy Anderson of Hobart, Okla., has invented a binder attachment which makes it possible to cut with a binder sickle and down wheat as well as tangled grain.

BROOM CORN.

Rains during the past fortnight have materially improved the condition of broom corn in the Southwest and from the Lindsay district in particular reports are very encouraging as the acreage is generally thought to be larger than in 1918 while usually throughout the Southwest the contrary is the fact. Marketing conditions in southwestern Kansas and adjacent territory has been slow, farmers showing no particular desire to let go their holdings. Prices show no particular change. In the Wichita market quite a few cars of old corn have been sold at a range of $85@115 with some self working from central Oklahoma at $125@150. There has been also a reported increase of receipts from South Texas and of self working grades at $125@250. Interest, however, is generally settling in the Lindsay market, but prices on the new crop have not of course as yet been fixed. Warehouse stocks are held at $75 @250, the bulk of holdings at $100@200. In central Illinois growing conditions are reported good with early fields heading out. The best estimates on acreage run from 40@60 per cent of last year. A fair volume of sales are reported at prices ranging from $125@200.

The Why of High Prices.



Sentiment is often "father to the wish" which at present is for a lowering of the "high cost of living," and has powerful effect, temporarily at least. From our viewpoint, however, the foreigners must and will have our goods, especially food. With crops of small grains none too large and corn alone promising any abundance, we can see nothing but a high average of food values until those now dependent upon us start producing their own requirements.—*Adolph Kempner Co., Chicago.*

Crop Reports

Compiled by GEO. A. WELLS

The small grain crops have suffered materially throughout the Northwest Pacific Coast States of Washington, Oregon, Idaho and Utah, where it is the opinion of the grain trade that the final returns will not be more than 50 to 60 per cent of an average crop and the state of Montana, also southern Alberta and southern Saskatchewan, will suffer almost a total failure of grain crops.

The spring wheat and oat crops have suffered considerable depreciation throughout the central surplus producing states and the Government report of Aug. 1 will undoubtedly show a considerable reduction in the total estimates of these crops in verification of the growth condition reports of our correspondents as compiled below. The growth condition of corn, however, has been well maintained and the month of July has been favorable, although the reports indicate that rain was needed in some localities.

SOIL CONDITION: According to the reports of our correspondents, a considerable portion of each of the states of Indiana, Illinois, Missouri, Iowa, Nebraska, Kansas and Oklahoma are now "too dry," the states of Ohio, Minnesota, North Dakota and South Dakota being almost entirely "favorable."

TEMPERATURE: The prevailing temperature during the previous two weeks as reported by correspondents is almost entirely "favorable" for the general growth of farm crops throughout the corn belt except in Kansas, Nebraska and in Minnesota and the Dakotas the prevailing condition seems to have been "too hot" and the condition has been detrimental to the maturing of spring wheat and oats in those states.

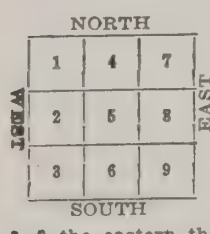
HARVESTING: Harvesting is practically completed except in the spring wheat states of Minnesota and the Dakotas and is in progress and will be finished within a few days in those states.

SPRING WHEAT: The percentage growth condition of spring wheat as reported by our correspondents indicates that the crop is very uneven and that the depreciation in the growth condition as compared with July 1 has been considerable and on account of the variation in the reports we have decided not to publish the average percentage of such reports and to simply state the condition as above.

OATS: The growth condition of oats as reported by our correspondents is as follows: Ohio, 81; Indiana, 76; Illinois, 73; Missouri, 76; Iowa, 82; Minnesota, 78; North Dakota, 77; South Dakota, 79; Nebraska, 84; Kansas, 89.

The flat average of the above reports is 79 as compared with the flat average of our report July 1 of 91 and the Government report of July 1 of 88. The Government report of July 1 estimated a total crop production of oats of 1,403,128,000 bushels. The depreciation indicated by the reports of our correspondents would apparently reduce the total crop production to about 1,250,000,000 bushels. The five-year average of the oat crop production is 1,331,287,000 bushels.

CORN: The growth condition of corn as reported by our correspondents is as follows: Ohio, 92; Indiana, 90; Illinois, 90; Missouri, 81; Iowa, 96; Nebraska, 93; Kansas, 89, and Oklahoma, 89.



The flat average of these reports is 90 as compared with our report of July 1 of 85 and the Government report of July 1 of 87, thus indicating an improvement in the corn crop prospect and which seems to be confirmed by the general reports as to soil condition, etc.

ACREAGE OF CORN: The reduction in the acreage of corn as compared with last year has been somewhat of a surprise to the grain trade and our compilation of July 1 was criticized particularly in regard to the Kansas crop, our previous report showing 71 as compared with previous year based at 100 and as you will note by the compilation below the report is now 70, and this is exactly the percentage estimated by the Government July 1.

The percentages as now reported by our correspondents for each of the states are as follows: Ohio, 93; Indiana, 93; Illinois, 87; Missouri, 67; Iowa, 90; Nebraska, 84; Kansas, 70, and Oklahoma, 88.

LOCATION KEY.

Explanation.—In order to give the reader an intelligent an idea of the districts from which all crop and local trade condition reports are received, they are numbered to correspond with divisions shown in the accompanying diagram, the numbers 1, 2 and 3 representing the western one-third of the state from north to south; 4, 5 and 6 in central third, and 7, 8, 9 the eastern third. Figures indicating these locations will appear in all crop reports, in letters referring to trade situations in beans, feed, hay, etc. Each state will be treated as a square body.

GENERAL REPORTS.

The general reports as to corn crop prospects, and particularly in regard to any unfavorable critical conditions affecting the corn crop as given below, are self-explanatory:

OHIO.

Rockford (1): We had a fine Saturday that will make bushels of corn. Corn looks fine.

Lima (1): Corn two weeks behind, but present conditions very favorable.

Agosta (5): Corn progressing nicely, growth about normal. Fly and bugs caused serious damage to spring wheat. Winter wheat yielding 20 to 30 bus., mostly No. 3 and 4.

Ansonia (2): Had a fine rain. These rains will make lots of corn. Threshing about one-third done.

Bryan (1): Weather is still quite dry, but corn that was planted early and has been well cultivated is doing fine and our chances for corn here are much better on the whole than last year. Some fields will not make any corn at all. Most of good fields of corn in tassel.

Greenville (2): Prospect for corn fair. No unfavorable report to make. Think yield of oats will be light, also light weight.

Springfield (2): Corn coming along in good shape.

Blanchester (3): Corn planted later than usual, but now looking excellent.

Portsmouth (6): Too much rain for wheat. Just right for corn. Wheat will have to be dried and threshing returns disappointing.

Upper Sandusky (4): No very unfavorable conditions have appeared yet. There is some fear of chinch bugs, but it may not be serious.

Xenia (3): Corn prospects are normal at the present time.

Eaton (2): Conditions fair.

Middletown (3): Wheat threshing in full swing. Growing corn doing fine.

Camden (2): Copious rains the past few days have maintained the excellent prospect for corn. Wheat threshing 50% complete; yields continue disappointing.

Circleville (6): Corn prospects fine—100%.

INDIANA.

Vincennes (3): Corn prospects not very good, very late and weedy on account of rainy weather.

Rensselaer (1): Corn suffering right now from drought which will cut crop greatly unless rains come in next few days.

Rushville (8): Our corn is all right.

Lawrenceburg (9): Corn coming all right so far.

Monticello (1): Oats are light yield, light weight. Corn has made splendid growth. While a little late prospect unusually good.

Shelbyville (5): Oats ready to thresh. Most corn good; some poor spots.

Tipton (5): Corn prospects good. Some parts of county a little short on rain.

South Whitley (7): Just a little dry for corn here in our immediate vicinity, but it looks fairly well and with seasonable weather from now on ought to have a fair crop.

Waveland (2): It has been too dry and hot. Corn needs rain at once. Will suffer seriously if continues dry. Will begin to thresh oats next week.

Princeton (3): Corn crop is rather late. Corn that has been well cultivated is in fine condition. The late planted or poorly cultivated 40 to 50% of a crop. Danger from drought and frost.

Angola (7): Corn crop promise is good. Some sections have had plenty of rain, while some are quite dry. No damage by insects, worms or bugs.

Decatur (7): Corn prospects good.

Jasper (3): Corn now suffering some. If we get rain within the next few days will be in time yet to make good crop.

Winchester (8): Corn looking good.

Marion (5): Corn almost perfect.

Wabash (4): Corn crop progressing favorably as far as weather is concerned. Some complaint as to chinch bugs, however, not serious yet.

ILLINOIS.

Sidell (8): Spring wheat about half crop, damaged by blight, very poor quality. Winter wheat about 20 bu. per acre, fair quality only. Corn has made excellent growth but needs rain.

Wenona (4): Cutting of spring wheat and oats are completed here and winter wheat threshing has begun. Corn acreage here about 90% normal.

Vermont (2): Corn is looking fine now but must have rain or crop will be cut materially.

Earlville (4): Spring wheat one-half a crop. Corn is all tasseling out and a good stand.

Tuscola (8): Corn shooting and tasseling. Very hot and dry. Corn will be badly damaged if no rain this week.

Freeport (4): Corn is at least two to three weeks ahead of a year ago and prospects for a bumper crop were never better. Stands shoulder high and a deep green color.

Odell (7): Wheat and oats nearly all cut. Some winter wheat threshed and also oats.

Ashton (4): Corn condition excellent. Rains needed for the earing stage. Slight damage by wind and hail.

Lostant (4): Corn never looked better at this time of year. All we need is a good rain first part of August to make a good crop.

Eureka (1): Do not consider corn injured yet, but is needing rain now.

Belleville (3): Prospects for corn are good. Have a very fine stand, some fields 11 ft. high but need rain in a few days.

Mt. Pulaski (5): Need rain for corn. Spring wheat and oats all cut and few jobs threshed. Yield disappointing.

Decatur (5): Corn tasseling and shooting silks weedy. Should have an inch of rain this week, will suffer after this week if no rain. Wheat threshing 25 to 30 bu.

Mattoon (8): Corn situation is good.

Marshall (8): Corn small and late. Wheat yield disappointing, from 20 to 60% short of former estimates.

Rantoul (5): Too hot and dry for corn, need rain.

Mt. Carroll (4): Corn doing fine. Good color, growth and stand. Tasseling. Many fields in perfect condition.

Highland (6): Oats harvest completed. no surplus here, probably not enough for local use. Corn prospects now indicate 75% of a crop. Early corn which it was possible to work promises well but not very much of this kind.

Rockport (2): Corn looks fine. The only fault there is is lots of weedy corn. We are having fine weather for corn, also for threshing.

Princeton (4): Corn is not suffering for rain but will be in a very short time.

MISSOURI.

Chillicothe (1): Corn planted late owing to frequent rains at planting time. It has made rapid growth and 50% of it is in tassel.

Salisbury (4): Corn will make good with one more good rain. It now has good color and growth. Acreage small.

Marionville (3): With plenty of moisture will harvest 100% in quality. Corn is beginning to need rain.

Carrollton (2): Corn is looking very fine and with occasional showers through August will make good yield.

Elsberry (8): Too dry for corn. The early and late corn needs moisture to do much good must come in a few days.

Bethany (1): Wheat making about 12 bu., average test 49 to 59.

Corning (1): Corn is doing well at this time. Some late corn and we will need a late fall for it to mature.

Harrisonville (1): Our hay crop is fine.

Columbia (5): Corn crop fine.

Higginsville (1): Fine prospect for corn.

Lamar (3): Corn crop will soon begin to need rain. Early planting is now tasseling. Later planting considerable acreage abandoned account season, too wet to cultivate.

Clinton (1): Corn is very spotted. Acreage small. Need lots of rain to make a crop.

IOWA.

Avoca (3): Corn acreage about 95%. Corn prospects are fine.

Hamlin (2): Spring wheat is no good, it is not worth threshing. Too much rain and hot weather in June. Corn looks fine.

Henderson (3): Corn prospect was never better in this vicinity.

Coburg (3): Corn prospects as compared with last year are better with more subsoil moisture to draw from and looking fine.

Onawa (2): Corn prospects perfect excepting on the lowlands, which are completely ruined by the excessive rains in June.

Corydon (6): July 9 a severe rain. Wind and hail storm crossed our county and greatly damaged all crops through a strip from two to six miles wide.

Sibley (1): Chances are for 70 to 75% of a corn crop here. Oats are going to go 60 to 65% of a normal crop.

Gilbert (5): No abandoned corn acreage this year and the corn is nearly two weeks early with the best prospect at present ever known. Will need one more good shower to finish it.

Glidden (2): Corn prospects are excellent now, with seasonable showers wi make a fine crop.

Whitten (4): Corn crop was never be ter and finest prospect for years. Abou three weeks ahead of normal.

Clemons (5): Our corn is damaged on half by the hail storm and the oats ar very badly damaged, some will not be cu Wheat and oats will be light in weight.

Washington (8): Corn crop is good bu a good rain would be a great benefit to i

Hull (1): Crop of oats, corn barle good; wheat poor.

Lowden (8): Corn in excellent conditio but some spots can be found in every fie where poor stand. Corn needs rain badl to make a good yield. Spring wheat cro will be poor quality and small yield. Oa not up to average nor near quality quantity of 1918 crop.

Oakville (9): Corn is doing well.

Williamsburg (8): All small grain cu Threshing beginning today.

Spencer (1): New oats coming in no Good color and weight.

Keokuk (9): No rain for some week Corn needing rain badly. Hot sun blaste wheat and cut oats short.

Kirkman (2): Condition for corn cou not be better and fields look fine. Whe and oats are poor, especially wheat. Son will not be cut.

Moulton (6): Wheat crop is badly dam aged. Oats light. Corn doing fine.

Tama (5): Prospects for corn on 85 acreage. One lot of oats threshed yielde 54 bu.

South English (9): Corn is in fine co dition and ahead of average growth. Whe yield 10 to 20 bus., quality poor to good.

Allison (4): Need rain for the co crop. Hot days near the noon hour. Co has commenced to curl. Will prove ve serious on corn if we do not have rain near future.

Harrisburg (3): Corn crop in this te ritory is very promising. Will undoubted make 100% crop of sound corn.

Osceola (6): Crop prospects have gain materially since last report. However, cu tivation has been neglected account ha vesting small grain crops.

MINNESOTA.

Prior Lake (6): Spring wheat bad damaged in places. Not more than ha crop expected.

Henderson (6): Corn prospects are go except on low spots and that will n make any corn.

Minnesota (3): Wheat and oats are b ing harvested now. Wheat will make le than half crop. Oats will be light. Co is going to be our best crop.

London (6): Corn crop prospects a good so far. It is ahead of last year. Co looks to be our best crop.

Wells (6): Corn is making very rap growth the past ten days. Lots of it ta seled.

Donnelly (2): Our corn crop looks ve favorable now.

Grand Meadow (9): Corn ten days ahe of last year. Wheat poor, blight and rus

Eden Prairie (6): They are cuttin grain. Wheat poor. Corn good. Lots moisture and hot.

Warren (1): Some black rust on whea

Franklin (6): Corn good for this time.

Albert Lea (6): Corn prospect was nev better. Fully ten days ahead of average.

NORTH DAKOTA.

Fargo (8): Corn crop O. K. Whe badly rusted and crop cut down one-ha by this cause in last ten days.

St. Thomas (7): Spring wheat ha ripened too fast. Hot weather killed a the stools, this leaves wheat very thi Think the sample will be fair to good. Oa a pretty good crop.

Monango (9): Some damage (5%) do to wheat by grasshoppers and some bla rust on wheat.

Langdon (7): All crops except corn hav deteriorated 20 to 25% in the past mont on account of drought and hot wind Think average will be about 75% of norma

Lakota (7): Some signs of rust an blight but had no rust weather.

Drayton (7): Early wheat and barl good. All flax looking well. Considerab rust but favorable weather for grains present.

Voss (7): Fine weather for corn. Oa going to be good.

SOUTH DAKOTA.

Yankton (9): Growth condition of co is fully up to normal. Some fields are tassel and shooting ears which is a litt unusual for this time of year. Oats wi be an average crop while wheat is pra tically a failure. This will hold good ov the greater portion of South Dakota. Th locality will not raise over five bushels the acre and the quality will be very low.

Beresford (9): Corn condition excellen Oats only fair. Some badly rusted. Whe poor quality and yield. Some fields worth less.

Hurley (9): Corn in the higher land O. K. Corn on wet land improving great past week.

Bridgewater (8): Spring wheat near all harvested, also oats. Spring whe will yield from 2 to 10 bu., quality poor.

Canton (9): Wheat about worthles Oats 70% crop. Corn from nothing 100%. Where cultivated is good. Larg acreage poor or nothing.

Brentford (7): Corn crop is very favo able at present time.

Aberdeen (7): Weather somewhat co for corn crop.

Clark (7): Corn at this time is well ahea and prospects good. Spring wheat won be over 40% of crop.

Armour (9): Favorable weather fro

now on will make a splendid corn crop. Wheat damaged from 25 to 50%.

Dell Rapids (8): Corn looks like a bumper crop here. Fully three weeks ahead of normal.

Flandreau (8): Corn crop is a flattering prospect. In growth ten days ahead of normal and healthy and vigorous. Most pieces clear from weeds. While some impairment of stand by cut worms earlier, it should average 85% normal stand. No unfavorable conditions.

Miller (5): Harvest is now on. There is much fine corn and an unusually large number of field either late, weedy or both.

NEBRASKA.

Winnetoon (7): Corn is in good shape and we have had two good rains within the past three days.

Nebraska City (9): Corn about week ahead of averaged years. Will need rain this week to keep condition to 90%.

Fairmont (9): All cut, some threshing 85% acreage on corn crop. Our corn needs rain very much. This seems to be local condition as rains are reported all around.

Ashland (9): Corn very uneven but average growth better than normal. Need rains very badly. Tasseling.

Beatrice (9): Corn is beginning to tassel and will need rain badly soon.

Neligh (7): Spring wheat crop seriously damaged by rust. Most fields being cut for feed.

Roseland (9): Good prospects for corn now. Plenty of moisture. Wheat testing 50 to 56. Yield about 10 bu. average.

Superior (9): Corn looks fine but is needing rain badly.

Superior (9): Corn now needs rain. No damage yet but at critical stage. Wheat yields very disappointing, quality good.

Orleans (6): Rain of two inches July 13 and two and seven tenths inches July 20 makes favorable outlook.

Belden (7): Corn at present in perfect condition. Wheat complete failure.

Pierce (7): Fall wheat not very good. Spring wheat a failure. Oats crop light yield and poor quality. At present corn crop looks very promising.

Harvard (9): Crops prospects are fine, however, we should have rain soon or the corn will suffer from lack of sufficient moisture.

Swanton (9): Early corn needs rain badly. Corn doing very well. Weather cool.

KANSAS.

Madison (9): Wheat averaging 10 to 30 bu. to the acre. Testing 47 to 58 lbs. to bu. Grain No. 2 and 3. None Grade No. 1 yet. Threshing in full blast. Corn propects good.

Seneca (7): Corn needs a good rain now. Unless we have it soon corn will suffer very materially.

Athol (4): Soil in good condition.

Clay Center (4): Corn is three weeks late. Rather thin on ground. Harvest was completed July 15 with fair conditions. We should have 75% of a corn crop.

Mahaska (4): Corn holding its own very well but must have rain soon as it is starting to tassel. Wheat yield about 60% of expectations.

Ashland (3): Grasshoppers are injuring crop some and now that the wheat harvest is practically over will doubtless get worse.

Lyon (5): Corn generally in good condition.

Wakeeney (2): Have a very small acreage of corn this year as most of the ground was planted to wheat, oats and barley. What corn we have is in excellent condition.

Osage City (8): Corn crop prospects are excellent but the acreage is so small that there won't be enough for home consumption.

Wellington (6): Corn not doing much good. Been too hot and dry.

Oswego (9): Corn looking good.

Waldo (5): Corn standing hot dry weather in good shape. Hoppers doing material damage to crop. Wheat poor in both yield and quality, considerable not harvested.

Plainville (4): Corn doing fairly. Oats cut.

Junction City (7): Corn excellent. 10% improvement since last report.

Hoxie (1): Corn is in very best of condition at present. Plenty of moisture and weather favorable.

Alta Vista (8): Corn crop looks good.

Belleville (4): Getting very dry for corn. Corn is very uneven. Poor stand and weedy. Very poor prospect.

Hillsboro (5): Needing rain for corn badly and the crop will be a failure if we do not have rain inside of two weeks.

Logan (4): Corn conditions are fine at this time.

Uniontown (9): Few fields of excellent prospect for corn. Some fields very grassy and weedy. Some just planted.

OKLAHOMA.

Miami (7): Corn somewhat uneven but never had a better stand. Dry weather, however, will quickly damage as sufficient cultivation could not be done because of wet weather. No mulch on the ground.

Altus (3): Corn making splendid finish. Largely now in well matured condition.

Geary (2): Growing corn in good condition. Will require good rain in next week or ten days to insure yield up to present prospect.

Cordell (2): Prospeces for corn encouraging, especially in bottoms.

Marshall (5) Weather too dry for corn, yield will be cut 35%. Wheat threshing 75% done. Yield about 6 bu. per acre less than expected.

Enid (4): Corn prospects good, tasseled and silking.

Enid (4): Corn prospects pretty good. A general rain would insure a good crop of corn.

El Reno (5): Had ample rain in western part and southern parts of state, assuring corn crop there.

GENERAL CROP CONDITIONS.

The composite condition of all crops of the United States on July 1 was about 2.4 per cent above their ten-year average condition on that date, as compared with a condition 4.7 per cent above average on June 1, indicating some decline in crop prospects during the past month. Final yields per acre of crops last year were about 2.4 per cent below average. This year's total acreage in cultivated crops is about 0.6 per cent greater than last year.

The growing condition of the various crops on July 1, expressed in percentage of their 10-year averages (not the normal) on July 1, was as follows:

Timothy hay	114.8	Rice	101.1
Millet	113.2	Potatoes	100.6
Clover hay	111.7	Alfalfa hay	100.3
Pasture	111.2	Field peas	100.1
Kafir, etc.	111.1	Rye	98.2
W. wheat	110.6	Sp. wheat	96.9
Hay (all)	110.6	Peanuts	93.6
Sweet potatoes	105.6	Sugar beets	87.8
Barley	103.3	Cotton	87.2
Corn	103.2	Flax	87.0
Oats	103.0		
Field beans	102.2	Avge. all	102.4

Combined condition of all crops by states (100 = average) and change during June:

Me.	99.0	— 1.5	W. D.	103.3	+ 4.1
N. H.	112.7	+ 5.5	S. D.	108.6	+ 6.9
Vt.	113.0	+ 8.2	Neb.	109.6	— 3.3
Mass.	102.4	— 7.1	Kan.	114.4	— 5.9
R. I.	101.3	— 5.2	Ky.	99.9	—10.6
Conn.	102.7	— 3.4	Tenn.	94.0	+ .2
N. Y.	105.4	— 1.5	Ala.	88.3	—11.7
N. J.	99.2	— 6.2	Miss.	83.3	— 9.7
Pa.	105.3	— 2.8	La.	88.7	— 3.1
Del.	98.8	—11.8	Tex.	104.3	+ 3.3
Md.	99.0	—10.7	Okla.	111.9	+ 7.5
Va.	102.3	—12.3	Ark.	89.8	— .3
W. Va.	106.2	— 3.8	Mont.	46.7	—34.7
N. Car.	101.8	— 2.7	Wyo.	76.6	—16.0
S. Car.	100.2	— 2.6	Colo.	93.6	— 3.7
Ga.	93.6	—10.0	N. M.	111.5	— 3.5
Fla.	96.3	— 8.5	Ariz.	103.4	— 1.7
Ohio	106.8	— 6.0	Utah	97.2	+ 4.3
Ind.	104.1	— 6.5	Nev.	96.5	— 3.8
Ill.	105.8	— 6.9	Ida.	80.8	—16.6
Mich.	104.6	+ .8	Wash.	93.5	—10.2
Wis.	(110..	+ 7.0	Ore.	98.7	— 4.1
Minn.	108.2	+ 6.2	Cal.	101.8	— 3.2
Iowa	105.2	— 3.7	U. S.	102.4	— 2.3
Mo.	103.3	— 9.7			

The total production of important products this year, compared with last year, is estimated as follows: Corn, 109 per cent; wheat, 126.6 per cent; oats, 91.2 per cent; barley, 90.1 per cent; rye, 113.9 per cent; white potatoes, 97.7 per cent; sweet potatoes, 118.1 per cent; tobacco, 108.4 per cent; flaxseed, 90.2 per cent; rice, 105.1 per cent; hay (all), 127.9 per cent; sugar beets, 122.8 per cent; cotton, 91.2 per cent; apples, 91.6 per cent; peaches, 146.5 per cent; broom corn, 97.4 per cent; kafirs, 186 per cent; beans, 70.5 per cent; peanuts, 102 per cent; hops, 167.8 per cent.

PRICES.

The level of prices paid producers of the United States for the principal crops increased about 1 per cent during June; in the past ten years the price level decreased about .4 per cent during June. On July 1 the index figure of prices was about 13.7 per cent higher than a year ago, 7 per cent higher than two years ago, and 84 per cent higher than the average of the past ten years on July 1.

The prices of meat animals—hogs, cattle, sheep and chickens—to producers of the United States decreased 2.4 per cent from May 15 to June 15; in the past nine years prices decreased in like period .7 per cent. On June 15 the index figure of prices for these meat animals was about 10 per cent higher than a year ago, 27.8 per cent higher than two years ago, and 83.1 per cent higher than the average of the past nine years on June 15.

It is reported in shipping circles in New York that practically nothing is now being done among grain shippers as a large amount of cereals that have been going across during the past three months has filled up all immediate needs on the other side.

Cotton Statistics for Week.

The following shows the statistical position of cotton figured up to Saturday morning by the *Financial Chronicle:*

	July 25, 1919. Bales.	July 18, 1919. Bales.	July 26, 1918. Bales.
Port receipts	105,721	109,144	30,841
Since Aug. 1	5,959,457	5,853,736	5,780,342
Port stocks	1,255,863	1,180,985	993,641

N. Y. stocks	90,106	90,267	121,209
N. O. stocks	382,211	357,242	325,869
On shipb'd waiting clearance	228,810	171,586	41,479

Wheat Price and Fertilizer.

While no Governmental guarantee of the price of wheat for the year 1920 has been considered, crop officials of the Ohio Experimental Station believe that the price will be high enough to justify taking extra fertility precautions in producing the future crop.

Specialists point out that crop rotation, drainage, liming and fertilizing are more important than ever to bring about necessary fertility conditions that may have been dropped during the war period.

Tests at the Ohio Experiment Station in liming wheat shows a gain of several bushels to the acre for liming on manured and fertilized land. In fertilizing wheat, an extra four bushels an acre has been secured for every 100 pounds of acid phosphate used.

Grain Corporation Wheat Report.

The Grain Corporation has begun publishing statistics of the movement of wheat and wheat products, which will appear weekly on Wednesdays for a subsequent date. Summarized for the week ending July 11 the data are as follows:

	1919.	1918.
Receipts from farms, bus.	17,493,000	22,771,000
Stocks in mills and elevators	40,961,000	28,732,000
Increase forthe week	3,863,000	11,001,000
Flour made, week, bbls.	1,396,000	1,198,000
Barrels made June 27 to July 11	2,539,000	2,703,000

Corn in Primary Markets.

Receipts of corn in eleven primary grain markets from Nov. 1, 1918, to July 26, with comparisons with 1917:

	1918-19.	1917-18.
Chicago	50,269,000	73,106,000
Milwaukee	4,379,000	10,374,000
Minneapolis	5,930,000	14,095,000
Duluth	25,000	163,000
St. Louis	17,226,000	21,063,000
Toledo	1,017,000	2,096,000
Detroit	1,403,000	3,216,000
Kansas City	15,273,000	27,300,000
Peoria	16,619,000	27,899,000
Omaha	19,414,000	38,044,000
Indianapolis	13,941,000	15,529,000
Total	145,496,000	232,885,000

Receipts of corn the past week at primary markets, compared with the preceding week and corresponding week last year:

	July 26, 1919.	July 19, 1919.	July 27, 1918.
Chicago	985,000	1,312,000	2,506,000
Milwaukee	208,000	148,000	274,000
Minneapolis	127,000	145,000	141,000
Duluth	.....	.....	.....
St. Louis	155,000	337,000	236,000
Toledo	8,000	19,000	134,000
Detroit	15,000	33,000	61,000
Kansas City	148,000	176,000	443,000
Peoria	194,000	205,000	396,000
Omaha	451,000	429,000	948,000
Indianapolis	198,000	296,000	359,000
Total	2,489,000	3,100,000	5,498,000

A sample of Texas new white corn was marketed in Kansas City on July 22 fully matured.

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range in cash prices for grain as mentioned in the leading markets of the country for the week ending July 26:

CORN—	CHICAGO.	ST. LOUIS.	KAN. CITY.	OMAHA.	MILWAUKEE.	PEORIA.
No. 2 mixed	193½@199	200 @204	193 @198	188 @193	196 @199	194 @198
No. 3 mixed	192½@196½	198 @199	191 @196	187 @192	193 @197	.....
No. 2 yellow	195½@201	202 @205	195 @200	191 @194	196 @200	196½@200½

News of the Terminal Markets

OMAHA.

Leigh Leslie, Correspondent.

The movement of new wheat to this market has assumed very considerable proportions. Three hundred cars were reported in Saturday. The market in this cereal has ruled strong throughout the week, with prices higher at the close than at the beginning of the week.

Reports from out in the state indicate that the corn crop, while needing rain, is still in good condition. Spot corn in this market has sold at extraordinarily high prices this week, particularly the white, which has commanded a big premium over the yellow and mixed. No. 1 white sold Saturday at $2.07, the No. 2 white at $2.05 to $2.06, and the No. 3 white at $2.04, while No. 1 yellow brought only $1.94, the No. 2 yellow $1.93 to $1.94, and the No. 3 yellow $1.92.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

Receipts of shelled corn continue very light, but the demand is not giving much encouragement. Quotations are unchanged by local dealers and prices are based entirely upon the figures prevailing in western markets. No. 2 yellow sells at $2.07@2.09 a bushel. Mixed corn is selling 2 cents a bushel under yellow grades.

Quotations on oats have advanced somewhat despite the fact that receipts are ample and demand is light. The increase in price is due to the advances on the western board. It is anticipated that if the western market should continue strong that there will be a still better market here. No. 1 white is quoted around 87¼@87½ cents a bushel, with No. 2 white at 86½@87.

During the past week considerable inquiry has developed in the local market for eastern yellow ear corn. The market for ear corn has been almost wiped out, but there are now some signs of a revival, especially in the grade mentioned above. Demand for ear corn is restricted on account of the extreme prices, but no regular quotations are given by the local exchange.

BOSTON.

R. S. Wallace Correspondent.

Exports of grain for the week ending July 26th were 75,708 bus. of barley.

Stocks of grain in regular elevators July 21st were: Wheat, 33,586 bus.; oats, 86,465 bus.; rye, 14,772 bus.; barley, 620,667 bushels.

The following were visitors on 'Change during the past week: J. V. Davis, Minneapolis, Minn.; John W. Cox, Coronada, Calif.; N. C. Anderson, Philadelphia, Pa.; J. G. Moses, London, England; W. P. Anderson, Chicago, Ill., and H. C. Moon, Tecumseh, Mich.

Corn higher with fairly good offerings and demand slow with higher prices curtailing consumption. Prices being quoted as follows: No. 2 yellow corn, $2.17 to $2.18 per bushel; No. 3 yellow corn, $2.16 to $2.17 per bushel. Receipts for the week ending July 26th, were, none.

Good offerings reported on oats during the past week with a slow demand. Prices ruling higher and quoted as follows: Fancy 40/42 lbs. clipped white oats, 93½c to 94c per bushel; fancy, 38/40 clipped white oats, 93c to 93½c per bushel; regular 38/40 lbs. clipped white, 92c to 92½c per bushel; regular 36/38 lbs. clipped white oats, 91½c to 92c per bushel. Receipts for the week ending July 26th were 347,150 bushels.

SIOUX CITY, IA.

Paul Larson, Correspondent.

J. C. Mullaney, secretary of the Board of Trade, is on a two weeks' vacation.

Mr. Scott, of the Scott-George Grain Co., of Denver, was a visitor on the floor the first of the week.

G. P. Marble, of Chicago, will take charge of the grain soliciting of this territory for the Taylor & Bournique Co.

The Mariner Terminal Elevator Co. started on the construction of their half million bushel elevator the first of the week.

F. Strohdahme, of Wagner, S. Dak., was a visitor on the floor the last of the week. He states that the wheat crop in that section is 50 per cent below normal, but the corn is in excellent condition.

D. Webster, vice-president of the McCaull-Webster Elev. Co., returned the last of the week from an inspection tour through the Aberdeen territory and reports that crop conditions are better there than they are here, wheat is of good color and will average from 6 to 10 bushels per acre.

There has not been any new spring wheat in on this market as yet, but there is considerable of it being threshed but of very poor quality, the test weight per bushel runs from 45 lbs. to 54 lbs., most of it running around 48, so the wheat crop in this section of the country is about a failure.

CAIRO, ILL.

J. E. Clancy, Correspondent.

The Delta Elevator, opened by the Magee Lynch Grain Co., has shut down for repairs and will be ready for business about the 5th of August.

Hay receipts are increasing. There is an active demand for prompt shipment and stocks are small. New timothy is selling at $26 to $30. Alfalfa from $26.50 to $30.

The reports of wheat threshed in this vicinity are disappointing in both quality and quantity. A very small percentage of wheat grading better than No. 3 white, while the yield averages five bushels less per acre than last year.

The first cars of new oats were received at this market on the 26th. One graded No. 2 white, tested 29 lbs. and the moisture content was 9.3 per cent. The other car graded No. 4 white, weighed 25 lbs. and tested 12.4 per cent moisture.

The car shortage is being keenly felt at this market. The demand for oats is greater than ever before at this time of the year, but dealers are unable to accept orders as cars are not available for loading. Judging from reports from central Illinois the receipts of oats will not be very large for some time as available cars will all be used for loading wheat and the movement of oats will be later than usual.

NASHVILLE.

John Leiper, Correspondent.

The Victor Chemical Works, of Chicago, will build a large branch manufacturing plant in Nashville. Announcement to this effect was made by President August Koch, who was here last week.

Receipts of grain at Nashville last week amounted to 349 cars, movement of wheat causing heavy increase. Stocks at Nashville at the end of the week were: Flour, 16,000 bbls., increase 5,500; wheat, 443,000 bus., increase 417,500; corn, 39,000 bus., decrease 13,000; oats, 138,000 bus., increase 11,000.

While prices continue to rise, demand for corn meal is light. Southeastern corn mills quote bolted meal, sacked, f. o. b. Ohio River points, per 100 lbs., $4.70; plain meal, $4.50. Southeastern mills, with capacity of 156,000 bus., reported production last week of 25,049 bus., or 16 per cent of capacity. This compared with 25,536 bus. and 18.1 per cent of capacity of mills reporting the preceding week.

Flour mills in the southeast are transacting a large volume of business, and many of the large mills are now running full capacity. Prices for soft winter flour, basis 24 lbs. cotton, are: High grade patents, $11.15; standard, $10.75; 100 per cent, $10.35. Southeastern mills with capacity of 229,890 bbls., reported output last week of 140,508 bbls. on 61 per cent of capacity, which compared with 60.9 per cent of capacity for the same week last year.

Grain prices were strong last week. There was increased movement of wheat, though movement continues disappointing. Threshing is still in progress. Supplies of corn and oats are light, with quiet demand for corn and oats fairly active. Qutations: Wheat—No. 2 red, local, $2.20@2.25. Corn—No. 2 white, $2.15@2.18; No. 3 white, $2.10@2.15; No. 3 mixed, $2.05@2.10. Oats—No. 2 white, 97@89c; No. 3 white, 86@88c; Tennessee Burt, 85c; new red oats, about same as white. Some new red oats are coming from Oklahoma.

MILWAUKEE.

E. E. Meyer, Correspondent.

The first car of new Wisconsin rye appeared on the local market Thursday. The lot was sold at $1.58.

Milwaukee flour mills produced 12,000 barrels of wheat flour or 67 per cent of capacity this week. The rye flour production was 4,820 barrels.

Samples of new grain appearing indicate a crop much inferior to that of a year ago. Barley, wheat, rye and oats all have much light weight stuff, showing the ravages of heat, drought and insects. Corn alone is in excellent condition.

Shipments of grain from Milwaukee for the past week were 129,330 bus. oats, 63,550 bus. corn, 147,070 bus. barley, 17,202 bus. wheat, 23,950 bus. rye; total, 381,102 bus., against 980,850 bus. the preceding week and 774,049 bus. a year ago.

Grain receipts at Milwaukee for the week ending July 26 were 307 cars barley, 157 cars corn, 367 cars oats, 32 cars wheat, 26 cars rye, 3 cars flax; total, 892 cars, against 625 cars the week before, 647 cars a year ago and 320 cars in 1917.

In cash grain unfavorable crop news and disappointing yields resulted in higher markets during the past week, barley advanced 12@15c for this period, corn 5@8c, wheat 20@30c, rye 3c, while oats declined ¾c. The movement is fair and the demand good. Corn crop reports continue favorable, though rain would be beneficial.

Visitors registering at the Milwaukee Chamber of Commerce during the past week included the following: L. C. Hanson, Baldwin, Wis.; O. B. Kaross, Wausau, Wis.; M. B. Monlin, London, England; T. E. Hutchison, New York, N. Y.; H. A. Ollendorf, Phil A. Grau, T. N. Sholin, Chicago, Ill.; G. Manthey, Antigo, A. J. Pick, West Bend, Wis.; Harry Berger, Tucson, Ariz.; C. W. Gerstenberg, R. Keitel, Chicago, Ill.; M. Eichman, Gregory, S. D.; R. J. Weschler, Oxley, W. Va.; H. S. Allen, Pittsburgh, Pa.; H. R. Emerson, M. E. Smith, W. F. Comeford, Harry Meyer, Chicago, Ill.; D. A. McDonald, Minneapolis, Minn.; F. Riege, Horicon, Wis.; H. H. Towns, L. W. Leonard, Chicago, Ill.; C. E. Hansen, New York, N. Y.; N. E. Davis, Genoa Jct., C. H. Fintel, Genesee, Geo. W. Roberts, Hortonville, Wis.; E. A. Hardaker, Minneapolis, Minn.

DETROIT, MICH.

John Barr, Correspondent.

Very little doing in barley. Steady at $2.30@2.40 per cwt. for cash No. 3.

L. L. Winters, of Hulbard, Warren & Chandler, was a visitor on 'Change last week.

Harry B. Simmons, of F. J. Simmons & Co., is spending a vacation at Charlevoix, Michigan.

Alex. McLaughlin, of McLaughlin Bros., Chicago, was calling on friends in the grain trade here last week.

Shippers of rye have not been able to secure permits for several days and business is at a standstill. The market is nominal at $1.60 for cash No. 2.

Beans are in active demand and firm. Immediate and prompt shipment are quoted at $7.65 per cwt.

Wheat receipts are increasing, but the market remains quiet. Millers report a dull and firm flour market. All classes of millfeed are firm and in active demand.

Offerings of oats have been small all week and the market is firm. A little shipping was done, but trade was nearly all for local consumption. Quote: Cash No. 2 white, 84½c; No. 3 white, 84c; No. 4 white, 83c.

Corn dealers are all students of the weather map and and pay little attention to anything else. It is a firm market because of local scarcity as much as owing to the general condition of bullishness resulting from dry weather. Receipts are very small and demand is not heavy. Quote: No. 3 mixed, $2; No. 3 yellow, $2.04; No. 4 yellow, $2.02; No. 5 yellow, $1.99; No. 6 yellow, $1.96; No. 3 white, $2.07.

INDIANAPOLIS, IND.

Myron R. Green, Correspondent.

Three stacks of wheat on the farm of Louis Berger burned in a fire believed to have been of incendiary origin. The loss is about $1.000.

J. Howard Roop, former chief chemist of feeding stuffs in the state chemist's department of Purdue University, has accepted a place as chief chemist of the Noblesville Milling Company.

The barn of Henry Marr, of Columbus, Ind., filled with new hay, corn and oats, was destroyed by fire, with a loss of about $8.000. The flames resulted from spontaneous combustion. There was very little insurance.

Fire of unknown origin destroyed the barn of Frank Custer, near Darlington, Ind. Several tons of hay and 1,600 bushels of corn were lost. Custer had only about $1,000 insurance and places his loss at about $6,000.

A two-story concrete barn filled with ninety tons of hay, sheaf oats from forty acres and a large quantity of shredded fodder, was struck by lightning and set on fire. Mr. Edward Harmon, the owner, estimates his loss at about $30,000.

Among the out-of-town grain dealers in the city during the last week were: William Nading, Shelbyville, Ind.; C. B. Jenkins, Noblesville, Ind.; A. E. Betts, Frankfort, Ind.; J. F. Russell, Greensburg, Ind., and J. P. Allen, Sullivan, Ind.

Three hundred bushels of wheat were destroyed by a fire which started from the exhaust of a motor truck that was being loaded with wheat. The straw stack was set on fire and the flames spread to the wheat. The grain belongs to J. P. Maddox, of Madison, Ind.

About 5,000 bushels of the infected wheat in Tippecanoe, Porter, and Laporte counties has been threshed and disinfected, Frank N. Wallace, state entomologist announced. Mr. Wallace said he expects the yield of the quarantined fields to reach about 25,000 bushels. The wheat is being shipped to New York.

According to a report received at the Federation of Farmers' Associations, millers at Anderson are paying $2.16 a bushel for N.o 1 wheat, an advance of 4 cents over the price paid under the government guarantee by most millers in the state. The Anderson millers are paying $2.13 for No. 2 and $2.09 for No. 3 wheat.

UNION TRUST COMPANY
CHICAGO
A BANK OF STRENGTH AND CHARACTER

THE B/L BANK OF CHICAGO

With the prospects of bumper crops, the strain of financing on the banks of the country is greater than ever before.

We solicit inquiries regarding facilities for IMMEDIATE CREDIT and DIRECT COLLECTION at MINIMUM COST of Bill of Lading items on all receiving points in the United States and Canada.

Such an arrangement provides the simplest and most convenient, as well as economical, method of crop financing.

UNION TRUST COMPANY CHICAGO

STRICTLY A COMMERCIAL BANK
Member Federal Reserve System

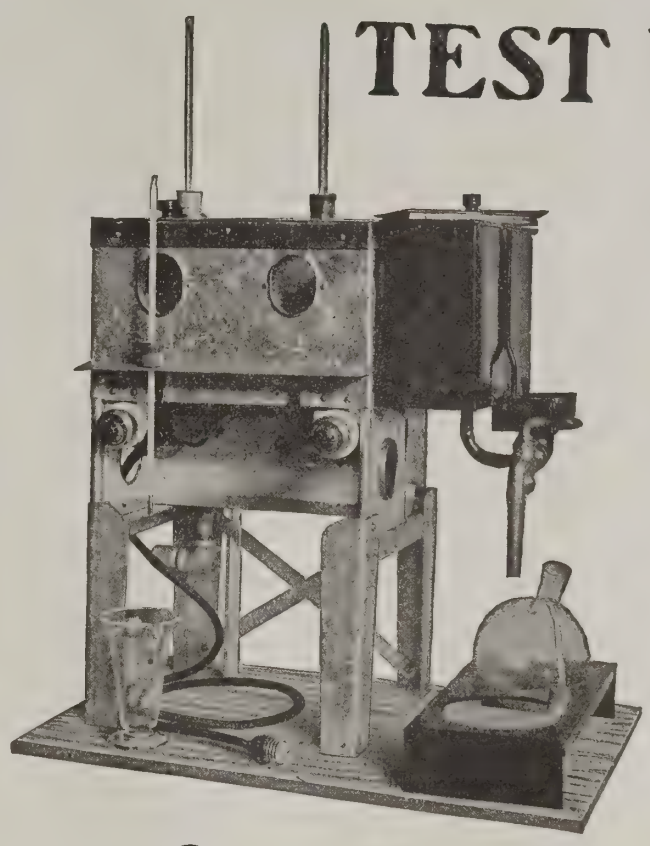
Ralph L. Cline has begun the operation of a new elevator at Connersville, Ind. where he is widely and favorably known Mr. Kline was recently discharged from the army, and has seen service on the firing line during the heaviest part of the American offensives. He expects to remain permanently in the grain business.

Thomas Brose, surviving partner of the firm of Brose & Arnold, has been ordered by the probate court to sell the Brose & Arnold mill at public auction August 4. The mill is valued at about $40,000 and is running. Mr. Arnold's share, which is two-thirds, will be turned over to the administrator of his estate. The mill will be sold as it stands, with supplies and equipment and the business and good will of the company.

NEW YORK.

J. M. Nugent, Correspondent.

Trading in the market for corn good was again very quiet. The mill prices were firm, based on cost of cash corn from the West, but there was still more or less meal and grits obtainable on re-sales at concessions under mill figures.



The following gentlemen visited the floor of the Produce Exchange during the past week: W. P. Anderson, A. Sullivan and C. G. Houston, all of Chicago. Also, C. S. Coleman of Philadelphia, D. F. Dixon of New Orleans, and A. G. Van Waveren of Holland.

R. F. Bausman, who acted as flour buyer for the Grain Corporation last season has recently resigned his position and F. O. Seaver, of the local flour firm of Dawson and Seaver, who acted as Mr. Bausman's assistant last season, has been appointed to fill the position.

There has been no appreciable change in the situation in cash corn in this market, the undertone still remaining very firm, with only a moderate trade passing. Offers continue of limited proportions. Quotations as follows: No. 2 yellow $2.16½; No. 3 yellow, $2.15½; No. 2 white $2.24½; No. 3 white, $2.23½; No. 2 mixed $2.11½; No. 3 mixed, $2.13½.

Domestic demand for oats keeps about steady, but the foreign inquiry has been lacking and no business of moment was consummated during the week. Labor difficulties in the port of New York, due to marine strikes, and the chaotic state of the foreign exchange market serve as restraining influences upon export business. However, it is generally believed there will be some improvement in the foreign demand within the near future. No. 2 whites were quoted at 91c; No. 2 white 90½c; No. 3 white, 90c; and No. 4 white 89½c.

Prices for flour experienced very sharp advances during the past week, some mills raising their quotations from fifty to seventy-five cents per barrel over those of the week previous. The advance was due to the pronounced strength in the wheat position. Cash wheat in Minneapolis advanced about 25c per bushel, while in the Southwest it was said that Spring wheat millers were bidding high premiums for No. 1 dark wheat and that offers were scarce. The upturn in prices resulted in a falling-off in business, however, as local consumers were not willing to pay the prices asked. They appeared quite willing to buy at the old level and even slightly higher, but found mills very firm and not inclined to make even small concessions. The trade here is getting very particular about the quality of flour, owing no doubt to numerous reports received from the winter wheat belt regarding the condition of the new wheat. In most cases samples were required, or at least some guarantees. Spring wheat flours were in demand as the new crop is moving very slowly and

MEMPHIS.

George Williamson, Correspondent.

There has been a distinct improvement in is territory in prospects for the cotton op, although lateness is still a feature d it will take continued ideal weather to stify expectations of more than a mod- ate yield. There is now no complaint at assy fields and the weevil is doing, but tle harm, although this was very much ared earlier.

Preparations are being made to resume ading on call in cotton seed products at e Merchants' Exchange, this having en voluntarily stopped when the govern- ent took charge of that industry at the eaking out of the war. Application has en made for a clearing association ough which settlements may be made d providing for ample margin protec- n. Trading is expected to start about gust 15.

Big prices are being paid for farm lands this territory, reflecting the high prices vailing for all farm products. In Missis- pi about 40 miles below this city, a hly improved place has just been sold at ttle over $225 an acre, the deal involving ut $750,000. Another large deal a few s ago further south in the delta in- ved $1,150,000. Values in Arkansas, just oss the river from here are not quite t high, but $150 to $200 an acre are get- g common. The success attending rais- of livestock is one reason for these h prices.

rain people are finding summer busi- s satisfactory. They get reports from territory that grain crop prospects fairly good, but they do not think ugh will be produced to affect business. ring the past few days demand for oats not kept the pace it started a while k, but it is because accumulated orders e been filled and consumers are now osed to take their time. There is little g in corn, but prices are climbing. call Saturday cash 2 white corn ught a bid of $2.08, while cash 2 yellow $2.05 bid and the only offer was $2.20. ne loaded out at the elevator was red at $2.15. Oats are steady, but a le under what they were a few days due largely to local conditions. Cash hite sold at 83, while August delivery 82b and 83½ asked. More activity ails in red oats and some business is g done as offers increase. A small lot ash 4 red sold at 74 bulk and 77 ed. Texas 3 in transit were 87b and 81 d; 2 red Oklahoma offered at 81 and 3 9.

ST. LOUIS.

lliam H. Hurley, of W. H. Hurley n Co., of Clinton, Mo., is an applicant membership in the Merchants Ex- ge.

esident E. C. Andrews, of the Mer- ts Exchange, has returned from his vacation looking much improved as esult of his trip.

e strike of the grain shovelers in the elevators, which was announced last was of short duration, as they were ed their demands, and returned to at once.

tertz & Watson are so well pleased the success of their Cairo private branch house that they now are pre- to open other private wire houses ssouri cities.

wheat crop of Audrain county, Mis- is pouring in to the local mills in r quantities than ever before. Every available has been secured to rush in to the elevators as soon as it is d.

W. Mackie, Federal manager of the sippi River section of the Railway istration, announced Thursday that st of the 40 new barges for use on Mississippi River will arrive in St. in about a week.

ces to St. Louis grain men from ort, Mo., say that the first new which was threshed in that vicinity 61 lbs. per bushel, and sold for $2.15 shel. The wheat in this locality is out unusually fine.

nan A. Bryant says that his busi- s now so large that the Western has installed a special wire direct office. As Mr. Bryant is a telegraph or, he will have no trouble in send- d receiving his own messages.

Rotty & Co., who have been in the d hay business in St. Louis for over rs, suffered a loss of several thou- of dollars last week when their was destroyed by fire. They had stocks of oats and hay on hand, were completely destroyed.

Schuake, county agent at Larned, and others have written grateful to St. Louis thanking this city for mpt response to their appeals for hands. They say that the men Louis were the first to arrive, and a great assistance in saving their crop.

H. Lang, second vice president of tin Corporation, addressed a meet- he grain interests and the board of s of the Merchants Exchange day and discussed the regulations for handling the new crops. Plans for expediting the loading and unloading of cars were also discussed.

When the officials of the Corn Products Refining Co., of Granite City, Ill., learned that their employes had voted to go out on a strike, in sympathy with the employes at the Argo plant, they at once instituted a lockout of the entire force, which will probably continue until the price of corn takes a material drop.

Judge D. T. Waddux, of Richmond, Mo., has resigned as president of the Ray county branch of the Farmers' Educational and Co-operative Union, and O. H. White has been elected to succeed him. Judge J. W. Smithey, of Camden, Mo., was elected vice-president, and Charles Derstler was chosen as secretary-treasurer.

All of the truck owners of this city are operating machines at top speed. One cent per bushel per mile is the standard paid by farmers who do not own trucks. Audrain will have a record wheat crop. The yield per acre is unusually good and the farmers are rushing to take advantage of the high prices paid for grain.

The Cloverdale stock farm near Oran, in Scott county, Missouri, holds the record yield for wheat, so far reported this season. Two thousand and eighty bushels of wheat were harvested on 61 acres, being six pounds more than 34 bushels per acre, far above the average this year. The land was plowed the first week in August, 1918, double-disked twice, rolled twice and dragged once. The wheat was sown the second week in October.

A bill appropriating $300,000 for the completion of the municipal dock at the foot of North Market street has been favorably reported to and passed by the board of aldermen, and work on the additions will probably soon begin, as all but one of the members of the board voted in favor of the bill, and the action of the committee was unanimous. According to the city's consulting engineer the completion of these docks will enable freight to be loaded into barges at a much less expense than freight can be handled at the docks in New Orleans.

DULUTH, MINN.

S. J. Schulte, Correspondent.

W. D. Jones, manager of the Hallet & Carey Co.'s Duluth office, is spending a vacation at a northern Wisconsin summer resort point.

Benjamin Stockman, manager of the Duluth-Superior Milling Co., is expected to arrive home within a few days after an extended visit to his old home in Scotland.

Business in rye was a feature on the Duluth market during the last week. Receipts were on a fairly liberal scale, running up to 28 cars a day, and a good eastern inquiry was experienced. Supplies of rye still remaining in the elevators at Duluth and Superior now aggregate about 1,225,000 bushels, and it is expected that the bulk of that grain will be loaded out for the East within the next two weeks. Spot No. 2 rye closed on Saturday at $1.60½, or an advance of 2c from the week before.

W. L. Zimmerman, manager of the Farmers' Elevator Co. at Beach, N. D., who was a recent visitor on the Board of Trade here, asserted that the crops are practically a failure over North Dakota from Minot and Bismarck west, and the outlook is against growers even getting their seed back at some points. The quantity of flaxseed sown in that territory is limited, he asserted, as farmers did not succeed in seeding as the ground was so dry at the time. The changed crop situation in the territory is illustrated in the statement that in one season the Farmers' Elevator Co. at Beach, N. D., received 1,200,000 bushels of grain. Mr. Zimmerman asserted that he doubted if it would pay to even open his house this season.

Duluth grain interests have put up a strong protest against changes in the rates lineup, as recommended by the Western Freight Traffic Commission. In a hearing held at Washington last week, members of a Duluth committee objected to the proposed reduction of 1 cent a 100 pounds in the grain rate from Chicago to Buffalo. They insisted that the present differential of 4.5 cents in the Chicago rate to Duluth is too large and that any increase in the spread would result in cutting off the movement of a large tonnage of grain to this market, entailing severe losses upon the various trade interests here. It was contended that the northern lake route is the logical one for much of the territory. The matter was taken under advisement

by the Railroad Administration and division of public service.

Elevator men and commission houses at this point have received such discouraging reports from correspondents during the last ten days regarding the deterioration of wheat and other grains over the Northwest, that they fear that the tonnage handled during the fall and winter months will show a falling off of several million bushels. It is also assumed that the grain will average up light owing to the crops having been forced to maturity over wide areas in Minnesota and North Dakota as a result of hot and dry weather conditions. As an example of the tenor of the report it was mentioned by a local operator that he had a wire to the effect that wheat west of Bismarck, N. D., will not average up any better than 4 bushels an acre; that rye might make 7 bushels, and that there would be practically no flaxseed harvested over that territory.

BALTIMORE.

Robert C. Neu, Correspondent.

H. Laberge, one of the largest Canadian hay shippers, with headquarters at Montreal, was a visitor in Baltimore last week.

Vinton Perin, of Perin Bros., corn millers of Cincinnati, Ohio, was a visitor on the floor of the Baltimore Chamber of Commerce last week.

New wheat is now arriving in liberal quantity in the Baltimore market, and for the better grades premiums of as much as a cent per bushel over Government prices are being paid.

The tendency of the local hay market is higher, previous accumulations of old hay having been worked down and wet weather having interfered with the gathering and movement of the new crop.

Donald K. Belt, president of the Belt Seed Company, with warehouses at Cheapside, Pratt and Calvert Streets, this city, has made application for membership in the Baltimore Chamber of Commerce.

The attention of the hay trade is directed to the fact that the movement of all hay requiring warehouse delivery is still under embargo, and it therefore requires permits to move same to Baltimore.

The United States Grain Corporation on July 24 advised the Baltimore grain trade that, until further notice, applications for permits will be received for a small amount of wheat covering shipments from all points.

Messages in code or cipher in plain language will now be accepted for Holland and code addresses may also be used, with signatures not necessary, according to a notification posted on 'Change here last week by the Western Union Telegraph Company.

The Locust Point elevators of the Baltimore & Ohio Railroad Co. in this city, established a new record for handling grain on July 23, when they unloaded 123 cars of wheat, or 164,080 bushels, in exactly 9½ working hours. Score another achievement for Superintendent J. A. Peterson!

The Baltimore delegation to the recent annual convention of the National Hay Association in Detroit returned home last week full of praise for the all-round success of the meetings, from a business standpoint, and with pleasant recollections of the manner in which the entertainment features were provided.

A number of Baltimore grain men returned last week from their swing around the Western Circuit. We have with us again Eugene H. Beer, John J. Snyder, Oscar M. Gibson, Harry E. Elgert, and Henry A. Lederer and all of their firms with which these gentlemen are connected are busy as a natural result of this personal touch.

The receipts of new water-borne wheat in the Baltimore market so far this season amount to 330,000 bushels, as against 400,000 bushels arrived up to the corresponding time last year. Continued wet weather last week retarded the movement of wheat considerably, and reports from nearby sections are to the effect that some wheat is sprouting in the fields.

Miss Kate Bartol, since March, 1911, stenographer and billing clerk in the office of the Secretary of the Baltimore Chamber of Commerce, and who in this span of years has taken stenographic notes in arbitration cases before various committees, involving thousands of dollars, recorded the proceedings of all directors' meetings, and by her uniformly obliging disposition has endeared herself to many of the individual members of the Chamber, has tendered her resignation to take effect Aug. 15. Miss Bartol will give up the commercial line to heed what has been as a call to her for a year or more past to administer to the sick and afflicted, expecting to enter the Church Home and Infirmary of this city, as a nurse, after Aug. 15. Endowed with a patient disposition and a sympathetic nature, she will doubtless prove as successful a nurse as she has shown herself to be an office assistant, and the well wishes of her associates and friends will follow her in her new field of usefulness.

BUFFALO.

E. Bangasser, Correspondent.

Rye was unsalable at $1.70 for No. 2 on track, through billed and 4c over Chicago August in store. There is quite a stock of rye in store here.

C. W. Murphy of this city recently appointed local agent of the Shippers' Navigation Co. Barge Canal line, has assumed his new duties at the offices of the company, 935 Ellicott Square.

Oats were picked up at strong prices last week, but the buyers of early in the week were sellers later and the market closed easy at 1 to 1½c decline. Closing: No. 1 white, 87¼c; No. 2 white, 86¾c; No. 3 white, 85¾c; No. 4 white, 84¾c on track, through billed. There was some good buying of oats for lake shipment and considerable confidence in the better grades of old oats.

The corn borer is said to be at work in this state and to prevent the spread of this new danger no corn can be shipped out of the infected districts. Some of the green corn sent to Buffalo from southern points a month ago contained a worm which ruined it for table purposes. Market men are wondering if the worm was any relation to the borer now operating in the north.

With not enough corn on the market to meet the demand receivers had things about their own way and buyers in need of stocks were forced to pay the big premium over the western shipment offerings. There was an advance for the week of 4½c up to today's closing when buyers withdrew from the market and sellers having a few cars on the way concluded to shade 1c to 2c, but without interesting buyers. There were offerings of No. 1 yellow at $2.13½; No. 2 yellow, $2.13; No. 3 yellow, $2.12; No. 2 mixed $2.10@2.11 on track, through billed.

Inspections for the week: Wheat, No. 2 red, 22 cars; No. 3 red, 42 cars; No. 4 red, 8 cars; No. 5 red, 1 car; sample red, 1 car; No. 2 mixed, 3 cars; No. 3 mixed, 7 cars; No. 5 mixed, 1 car; sample mixed, 3 cars; No. 1 hard winter, 8 cars; No. 2 hard winter, 9 cars; No. 3 hard winter, 1 car; No. 2 hard, 5 cars; sample hard, 1 car; No. 3 northern, 1 car; No. 3 amber durum, 1 car; No. 2 dark hard winter, 2 cars. Corn: No. 2 mixed, 7 cars; No. 3 mixed, 3 cars; No. 1 yellow, 18 cars; No. 2 yellow, 42 cars; No. 3 yellow, 5 cars; No. 6 yellow, 9 cars; sample, 6 cars; No. 1 white, 2 cars; No. 2 white, 6 cars; No. 3 white, 2 cars; sample milo, 1 car. Oats: No. 1 white, 6 cars; No. 2 white, 37 cars; No. 3 white, 24 cars; No. 4 white, 4 cars; No. 2 white, clipped, 2 cars; sample oats, 1 car. Rye No. 1, 1 car; No. 2, 4 cars.

SPOKANE, WASH.

J. B. Jones, Correspondent.

Reports vary as to the amount of damage done by the hot spell recently. But farmers expect an average crop from spring grain.

Winter wheat was too far advanced to suffer any, since cutting has commenced in a few places and another week will see the harvest in full blast.

At Odessa, Wash., the first new wheat of the season was brought to town by Henry Ils, when he delivered five sacks to the Odessa Union Warehouse Company. It was of the Jones Fife variety and tested 58.

The Walla Walla district will be more than normal this year according to John W. Langdon, president of the commercial club, who has inspected crops over the entire district. Prospects in Umatilla county were never so good, he said, and Walla Walla county prospects are also good.

Around Pullman, Wash., fall wheat is fast ripening under the hot weather and a trip through this part of the Palouse country proves that the yield will be far above that of the last two years. Some farmers are complaining of slight burning of the crops, but the condition is not yet a serious one. Spring wheat will make a fair yield.

As a part of the grain improvement plans adopted by the county farm bureau a series of meetings were held at which Professor R. K. Bonnett of the University of Idaho will give demonstrations in the grading and will explain the reasons for grain grading and system in use. The following meetings were arranged: July 22, Athol (Idaho); July 24, Farmers' Union Hall, Rathdrum Prairie (Idaho); School house, Worley, (Idaho). These meetings were held in the afternoon as good light is necessary in the grain grading work.

P. J. Sweeney, chief grain inspector for Washington, has estimated that the 1919 Washington wheat crop would be below 42,000,000 bushels, according to an Associated Press dispatch from Tacoma. Mr. Sweeney has just completed a tour through eastern Washington and stated that because of the dry weather the crop will be under that figure. The federal government's estimate of the crop is 57,000,000 bushels. G. I. Toess, president of the Centennial Mill Company, stated that his opinion of the wheat crop for Washington this year will not exceed 40,000,000 bushels. J. K. Smith, president of the Sperry Mill Company believes that the wheat crop will go 45,000,000 and probably more.

The recent extreme heat in the Palouse country has ripened the grain rapidly. Already a few farmers are cutting early pieces of 40-fold wheat, and it is believed that threshing will begin before the end of the month. Like last year, it is believed that the threshing season will be long, as the fall wheat is exceptionally early, while much of the spring grain is late, and, in case of rain between now and the end of the present month, will grow and develop well for some weeks. Last year it was necessary for threshing machine men to double back in many cases to thresh the spring grain after they had made the rounds of their territory and cleaned up fall grain. Notwithstanding that little rain has fallen since May, the grain is holding its color and shows but little damage. The nights have been cool and there is usually a heavy dew in the mornings, which is of great benefit to the crops.

TOLEDO.

Carl Bryant, Correspondent.

Lieut. Fred Camper of S. W. Flower Co., and Lieut. Siva Bender of Southworth & Co. returned this week after many months of military service abroad.

New rye was received in Toledo market Wednesday consigned to Rosenbaum Brothers and coming from southern Michigan. It inspected No. 2, weighing 55 lbs. The car reached here the same date as did the first receipts last year.

J. F. Zahm & Co. received the first car of new crop oats Saturday. It graded No. 2 white, moisture 10.8 per cent and weighed 31 lbs. The car originated at a point in central Indiana. Last year the first car was received July 30.

Oliver Randolph, inventor of the Randolph grain drier, reports the completion and installation this week of three 3,000 bus. capacity driers at the following points: Home Mill & Grain Co., Mt. Vernon, Ind.; The Junction Grain Co., Petersburg, Ill.; The South Solon Co-operative Grain & Live Stock Co., South Solon, O.

The Raymond P. Lipe Co. have disposed of their hay transfer warehouse at St. Albans, Vt., to A. N. Deringer, a former employe, who has entered the hay business. The firm's New England trade will henceforth be taken care of by grading at original point of shipment instead of at transfer warehouses, thereby avoiding the excessive cost of regrading hay in transit and also giving their customers quicker service.

Although the demand for empty cars for the movement of grain in all parts of the country is at its height Toledo dealers have been able to accomplish a great deal in helping shippers to this market to secure their share of the available empties. The Produce Exchange has appointed a traffic committee and a scarcity of cars at any particular station is systematically handled with the carriers and in most cases prompt relief is the result. Shippers wishing to take advantage of this service can have particulars from their Toledo receiver.

The old "welcome" sign stood out in bold letters Friday when John Fangboner of Fremont, O., and Earl Leas of Waterloo, Ind., both steadfast boosters of the Toledo market, made their appearance on 'Change. Hardly had they reached the floor when "those famous songsters" broke out with their fascinating and contagious melodies and the two visitors were paraded from "pillar to post." They made "inspections" at the various offices and were recipients of some of the generosity they themselves manifested during the hay convention at Detroit a few weeks ago.

Toledo wheat receipts showed a big increase this week at 522 cars. Grading was as follows: No. 1, 24; No. 2, 199; No. 3, 269; No. 4, 21; No. 5, 3; Sample, 6. Corn and oats inspections were smaller and competitive bidding for these grains on the sample tables was particularly active. No. 2 yellow corn sold at $1.99 to $1.99¼; No. 2 white oats at 81⅝ to 82c; No. 3 white oats, 80⅞ to 81½. A car of No. 2 rye sold Saturday at $1.62. Sample grade musty rye brought $1.52. Barley market dull, quotable at $1.32 for No. 2. Week's receipts: Wheat, 522 cars; corn, 8; oats, 19; rye, 8; barley, 2.

Managers and stockholders of co-operative elevators in the vicinity of Genoa, O., held their regular monthly meeting at that place Monday evening, July 21. About fifty were present, including the usual delegation from Toledo market. A splendid musical program was a feature of the meeting. Charlie Latschaw, organizer and state secretary, gave an interesting and instructive talk. The dealers were much concerned about the small percentage of wheat grading Nos. 1 and 2 at terminal markets this year. Inquiries brought out that the lower grading is because of light weight berries instea any high moisture content. The de went on record as favoring a narrowi the discount for No. 3 wheat, pointin the loss to farmers who pay the sam seed and labor as it would cost the harvest No. 1 quality. Those atte from Toledo were: Harry DeVore, Cummings, Charles Keilholtz, Joe Str er, George Woodman, Charles Mollett, ver Randolph, Clarence Schaaf and Bryant.

ST. JOSEPH, MO.

W. H. Moore, Correspondent.

E. L. Farmer, of the E. L. Fa Brekerage Co., Little Rock, Arkansas, a visitor in St. Joseph this week.

E. A. Gumbert, of the St. Joseph H Grain Co., has gone back on the roa is now traveling in southern Kansas.

Marshal Bruce, manager of the ridge Grain Co., is making an ext business trip in the western territory

This class of wheat will no doub come more popular as the season vances, because the mills are finding it tests higher in gluten than in f years and that the yellow cast is c by excessive rains during the ripening son.

Receipts of wheat to St. Joseph fo past week have been about 20 per in excess of last year, which increa contributed to the extreme premiums vailing on the better grades of hard as well as the increased efforts of th firms and the advent of many new firms. While dark hard and hard ties of wheat are in best demand major portion of the arrivals con of yellow hard wheat, which is selli 2c to 5c below the Government minim

The following visitors registered o Exchange during the week: Mr. Kansas City, Mo.; Lew Teare, Craig. J. T. Pollins, Highland, Kans.; Brech, Lincoln, Nebr.; W. C. Bacon, land, Kans.; F. J. Sullivan, Ham Iowa; Wm. Well, Hopkins, Mo.; Evans, Highland, Kans.; J. R. Lee, rinda, Ia.; G. C. Clary, Clearmont, M Dye, Virgil, Kans.; W. Burk, D Kans.; Henry Anderson, Tarkio, Mo W. Sandusky, Halls, Mo.; P. J. Matt Yonkers, N. Y.

Cash Markets.

Wheat—Soft red winter wheat is ing at 2c to 5c below the Government imum and the quality coming int market is better than the quality hard varieties. While a large perc of the hard wheat is going to no and eastern mills, all soft wheat is mostly for local consumption. No quotations: No. 1 dark hard, $2.45 No. 2 dark hard, $2.40@2.56; No. 3 hard, $2.35@2.47; No. 4 dark hard, @2.33; No. 5 dark hard, $2.18@2.26; hard, $2.25@2.40; No. 2 hard, $2.23 No. 3 hard, $2.15@2.26; No. 4 hard, 2.22; No. 5 hard, $2.08@2.16; No. 1 hard, $2.19@2.21; No. 2 yellow hard, 2.20; No. 3 yellow hard, $2.16@2.19; yellow hard, $2.13@2.16; No. 5 yellow $2.07@2.12; No. 1 red, $2.19@2.20; red, $2.16½@2.19; No. 3 red, $2.14 No. 4 red, $2.12@2.14; No. 5 red, $2.09

Corn—Corn receipts very light; th mand was in excess of the supply e the advanced price. Nominal quot No. 2 yellow, $1.99@2; No. 3 yellow, 1.98; No. 4 yellow, $1.93@1.95; No. low, $1.91@1.92; No. 2 white, $2.08 No. 3 white, $2.05@2.07; No. 4 whit 2.03; No. 5 white, $1.95@1.99; No. 2 $1.97@1.99; No. 3 mixed, $1.96@1.97; mixed, $1.93@1.95; No. 5 mixed, $1.91

Oats—Oats receipts continue light an excellent demand. A large perc of the arrivals being new oats whi selling at a slight decline under th crop. Nominal quotations: No. 2 82@82½c; No. 3 white, 81@82c; mixed, 76@77c; No. 3 mixed, 75½ No. 2 red, 76@77c; No. 3 red, 74½@

NEW ORLEANS, LA.

Thos. C. Robinson, Corresponde

J. H. Edwards, of the Board of R Federal Grain Supervision, Chicag spent several days in our city duri past week.

Bulk No. 3 white oats has been at 76½c delivered. Some few sale been made at a little less money. oats quoted at 94½c to 92½c del The demand for oats is only fair a ferings are as free as wanted. Son cars of Texas oats have arrived, and the oats have showed stained and oration, the kernel of the oats do appear to be damaged to any Clipped oats showed up decidedly than the natural No. 3 oats.

Trading on corn during the past has been very limited; the high seemed to affect the buying spirit. No. 3 white corn has been offered a as $2.14 and No. 3 yellow at $2. bushel delivered. Owing to our

marine troubles, exports to Cuba have been stopped and trading in this direction has been at a standstill. It looks as if old crop corn will sell considerably high, due to the fact that the South has raised very little corn and the crop is about a failure.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports for the week ending July 25 were 76,000 bus. wheat and 38,306 bus. barley.

Thomas A. Sieber, chief clerk at the Commercial Exchange, has gone on a vacation.

Hubert J. Horan, president of the Flour Club, has taken a cottage for the summer at Forrestdale, Pa.

William B. Scattergood, of S. F. Scattergood & Co., has purchased a cottage at Ocean City, where he and his family are spending the summer.

Charles A. Wenza, former grain broker of this city and who recently returned from over the seas, is now connected with the feed department of Hales, Edwards & Co., Chicago.

Owen J. Breen, formerly engaged in the grain brokersage business on 'Change and who recently returned from naval service, has made connection with the house of Samuel Bell's Sons, flour merchants of this city.

The first opportunity that has been afforded to make small percel shipments direct from this port to Hamburg, Germany, will be offered by the sailing of the steamship Birchleaf, which will arrive here this week.

Receipts for the week ending July 25 were 400 bbls. and 6,048,234 lbs. of flour 1 sacks; 928,935 bus. wheat; 6,960 bus. corn; 368,809 bus. oats; 13,709 bus. rye; 93,893 bus. barley; 27,500 bus. malt and 200 tons of feed.

Andrew Jackson, a prominent grain importer of Glasgow, Scotland; J. B. Deaven, secretary and treasurer of the American Milling Company, Peoria, Ill.; Wilson Goke, representative of the Combs Milling Company, Colwater, Mich.; Stuart Hyde, miller, Milwaukee, Wis.; Herman F. Wright, general manager of the Wisconsin Milling Co., Menomonee, Wis.; D. C. Whitney, New York City; E. H. Keene, Parksburg, Pa.; F. C. Allen, Trenton, N. J.; T. T. Lowe, Dover, Del., and O. H. Hoffer, Harrisburg, Pa., were visitors at the Commercial Exchange.

The recent heavy rains which continued for a week past have played havoc with the farmers in this section of the country. The wheat has been so badly damaged that it is not thought more than a half crop can be realized, and in some sections is reported as a total loss, being hardly fit for hog or poultry feed. When the rain came many of the farmers had their grain still standing in shocks, being unable to get sufficient help to get it into their barns and thresh it, while in some other cases the wheat had not been cut yet. The result is that the grain is badly sprouted, and in many cases the sprouts are six to eight inches long. Fears are entertained for the early hay crop also, which it is believed has been damaged more or less, while potatoes, tomatoes, cabbage,. beans, and other vegetables have been badly damaged, and large quantities are rotting on the ground.

LOUISVILLE, KY.

A. M. Williams, Correspondent.

The Central Milling Co., Broadhead, Ky., capital $20,000, has been incorporated by Sam Laws, Hugh McBee and W. G. McBee.

The Kentucky Public Elevator Co. has been receiving and handling a considerable amount of wheat during the past few days, and has also been handling a fair volume of oats tonnage. Corn is in light movement.

Tom Chivington, manager for the Southern Milling Co., left Louisville on Saturday evening for New York City, where he will spend about four days on business. The company boasts the finest corn mill in the South.

Wheat has been moving in so freely that some of the mills are overstocked, and have curtailed railroad shipments, but are taking all the wagon and truck wheat arriving. The latter is moving in unusually freely this season.

Oats are in fair demand at higher prices, the market being three cents higher than last week. There is a very fair demand for feeding purposes due to the high cost of corn. No. 2 white oats are quoted at 87c; No. 3 white, 85½c; No. 2 mixed, 83c; No. 2 rye, $1.60.

AFFIR CORN
MILO MAIZE GRAIN
B. C. CHRISTOPHER & CO.
KANSAS CITY, MO.

Sebastian Zorn, head of the grain house of S. Zorn & Co., as president of the Louisville Water Co., has just completed a big municipal swimming pool at the waterworks at a cost of $150,000, and thrown it open in time for the public to take advantage of the present hot weather.

Kentucky farmers are buying clover and timothy seed for fall planting, and it is reported that wheat acreage will probably be reduced this year. Corn is reported to be doing better, due to good weather. High winds and rain recently did considerable damage to corn in the Indianapolis district.

The demand for corn during the past week has been light, there being some milling demand but very little feeding demand and lighter buying on the part of millers at present figures. No. 3 white corn is quoted at $2.17 a bushel; yellow, $2.05; No. 4 white, $2.14; yellow, $2.03; No. 3 mixed, $2.04.

Wheat mills are working full time and are fifteen days behind on shipping instructions, and have about thirty days' business in front of them, there being a big demand for flour in the South. Millers claim that rock bottom was reached at the first of the crop year. There was a twenty-five cents a barrel advance on flour this week, with short patent now selling at $11 a barrel in carlots, cotton. Corn products are in fair demand, but high prices are reducing movement.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Sales as follows: 2 yellow, $1.98@2.00; local, $2.00½; destination weights, 6 mixed, $1.91½; sample, $1.75@1.87.

Oats receipts—9 cars with only fair demand and market quoted ½@1c lower than Friday, No. 2 white selling 79½@80½c, 3 white at 80c.

Wheat receipts—14 cars, demand slow and limited, No. 2 hard selling $2.22½; 3 hard, $2.19½ destination weights; No. 2 red, $2.18; 3 red, $2.16.

Rain in this district needed very bad and several reports of damage from surrounding towns and a few more days of the hot, dry weather will put corn in very bad shape.

Corn receipts at Peoria continue light. The total receipts for Saturday were 13 cars and market advanced 1½@2½ cents with only limited demand. The greater portion of the best corn was sold to go to other points. Demand from local industries very slow.

Car shortage in this district has showed no improvement the past week and grain cars for handling the wheat crop is causing concern for the farmers and country dealers. A large per cent of the country elevators are full to their capacity and farmers are obliged to bin their wheat on the farm. Harry D. Page, regional director for the railroad administration at this point, states that it is expected enough grain cars to take care of the crop in this district will be available before another week. Several cars are expected to arrive within a few days to relieve the situation.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

Ray Barrett, formerly with William Dalrymple Co., just returned from overseas today.

The Winifred (Mont.) Mill and Elevator Co. has been incorporated with capital stock of $150,000.

The Pacific Elevator Co. is building an addition to its Hopkins elevator and will add 30,000 bushels to the capacity.

The Fisher elevator at Porter, Minn., has been purchased by F. J. Speight and will be opened for business next month.

Heavy pressure of winter wheat offerings from the Southwest resulted in a decline of several cents in local quotations today.

Ben Block, of the Block-Maloney Co., passed through Minneapolis today with his son. They were bound for Winnipeg and Banff.

Frank C. Tenney, of The Tenney Co., returned today from a crop inspection trip through North Dakota. He found considerable damage.

Sound-proof telephones that were developed in the trenches of Europe will be installed on the trading floor of the Minneapolis Chamber of Commerce.

The Marfield Gain Co. received the first car of new spring wheat this year from Waterville, Minn., and sold it to the Washburn-Crosby Co. The wheat tested 56½ lbs. to the bushel and graded No. 3 northern spring. It contained 13.7 moisture and was damaged 7 per cent by blight. The car sold at $2.70. First bids were around $2.50.

BURLAP BAGS
Bosworth Bag Company
MEMPHIS, TENN.

Owing to the lack of demand for short term bonds the Montana Terminal Elevator issue has been neglected. An attempt will be made to change the form of the bonds and further bids will be asked for.

Representatives of milling and elevator interests in the Northwest met in Minneapolis Saturday to protest against the proposed grain rate increases and abolition of transit privileges in the Minneapolis market.

Cash Wheat—The cash wheat market is extremely strong where old crop spring offerings are concerned and today some No. 1 northern sold at $3 per bushel. Offerings of choice old crop wheat are very light and continue to shrink. Millers are still laying away all they can get for future mixing. A car of new spring wheat was received today from Waterville, Minn., and graded No. 3 northern. It weighed but 56½ pounds to the bushel and sold at $2.70. Owing to the big receipts of winter wheat Southwest and heavier pressure of offerings from that direction local prices were off several cents at the close today. No. 1 dark northern quoted at $3.02@3.04, No. 1 northern at $2.90@3, No. 1 hard winter wheat at $2.40@2.46, soft Iowa around $2.30.

Corn—Receipts have been fair lately, but the shipping demand was good and prices held firm in tone. White corn sold today at $2 and No. 3 yellow at $1.88@1.91. Lower grades sold down to $1.45.

Oats—The demand for choice oats is good and heavy oats with transit sell readily. Medium grades in fair to good demand and low grades rather quiet. Elevator companies are buying No. 3 white at ½@1c under September and No. 4 white at 1½@5c under. Offerings to arrive are increasing every day and trading has been fairly liberal at 1@2c under September.

Rye—Mill buyers are in the market for choice rye and pay ½c under September for what they can use. Elevator buyers pay 1c for the ordinary offerings. Receipts of new rye picking up right along. Most of the new rye received so far has shown fair quality. No. 3 sells at 1c less than No. 2.

CINCINNATI, O.

George Mosbacker, Correspondent.

Flour prices were advanced 40c per barrel here the past week.

Will Stueve, of Henry W. Brown & Co., received the first car of new rye of the season, grading No. 3, for which he realized $1.58 per bushel.

Charles Joerg, in charge of the hay department of the Dorsel Grain Co., has returned from a six weeks' business trip to Ohio and Indiana hay producing sections.

Total receipts of wheat the past week were 528 cars, against 416 for the corresponding week last year. Only 1 car graded No. 1, 162 cars No. 2, 260 cars No. 3, 83 cars No. 4, 20 cars No. 5 and 2 of sample. Corn 42 cars, ear corn 4, oats 43, rye 1 and hay 142 cars.

George Wirth, whose keen foresight of market conditions and complete assistance rendered the De Molet Grain Co. in increasing the efficiency of the hay service of the firm, has received recognition from Mr. De Molet by promotion to the active management of the hay department.

Edward F. Dennis, former hay inspector of the Chamber of Commerce, who has connected himself with The Van Leunen Co. and who has a wide acquaintance among hay shippers, will devote his entire time for the next two months in traveling among shippers in Ohio, Indiana, Illinois and Michigan. Charles E. Van Leunen, whose entire business career has been associated with local hay trading, will handle all cars consigned to the firm at the plugging yards.

The Public Utilities Commission of Ohio reports grain shippers as complaining of inability to secure cars, and expects the complainants to multiply during the coming weeks. The stabilized price has encouraged the movement of wheat as soon as it is harvested and threshed, whereas in former times it was marketed less freely in expectation of higher prices. The commission is checking up on the complaints as rapidly as possible and is seeking every means to keep the car shortage from becoming acute.

Returns received by the Chamber of Commerce on the questionnaire sent out recently to ascertain the amount of storage space which local concerns could utilize in a new river-and-rail terminal warehouse are very encouraging. The utilization of the former city water works pumping station as the chief structure of the warehouse scheme is under consideration. So far a demand for not less than 325,000 square feet of storage space has been indicated by the industries approached. The United States Grain Corporation is also seeking storage facilities here for grain shipments, and has requested the Chamber of Commerce and Grain and Hay Exchange to list all such properties in the city.

Governor James M. Cox has begun a drastic inquiry into food profiteering, and an investigation of the high prices is to be made in every one of the 88 counties of the state. The grain trade is not likely to be affected, and it is probable that the prosecuting attorneys in the various counties will confine their operations to the fruit and vegetable, produce and cold storage interests that obviously require attention. Evidence of the unlawful practices in the traffic of foodstuffs have been brought to the attention of the governor by the dramatic attacks of local newspapers and by the grand jury which has been investigating the subject here for several weeks. Grain men have recently become well educated regarding laws, and are disposed to keep within the restrictions.

Cash Markets.

Wheat—There was little or no rain to interrupt threshing operations or the marketing of wheat throughout this section the past week and the market, as anticipated, witnessed one of the largest movements for a single week ever recorded in its history. The demand was urgent at all times with millers, elevator and shipping interests sharply competing for every kind available, with the former showing a willingness to meet the premiums asked for good, heavy, milling quality. Prices were slightly below the government guaranteed basis early in the week, but the desire of al interests to accumulate supplies soon advanced values above the basic. The quality of the arrivals showed an increased percentage of lower grades, which created a decided firmness for No. 2 red and indications of higher prices in the next week. Bidding to the country was active, but the bulk of the movement was consigned grain. Offerings of smutty sold as readily as the better quality, while inferior and damaged was quickly absorbed by feed mixers and elevators. A scarcity of the No. 1 and No. 2 grade is generally expected by the trade. No. 1 red winter, track, $2.25½@2.26½; No. 2 red winter, track, $2.23@2.24; No. 3 red winter, track, $2.21@2.22½; low grades as to quality, $2@2.21.

Corn—The local corn situation was strong, with new high records for the crop established for all kinds. The milling demand for white and yellow was more urgent, and daily offerings only partially supplied the requirements. Very high temperatures prevailed here throughout the week, and though seriously dry conditions are reported from some sections to the trade, the crop situation remains fairly satisfactory. Ear corn of good sound quality continues scarce and firm. No. 2 white, $2.15@2.16; No. 3 white, $2.14@2.15; No. 4 white, $2.11@2.13; No. 5 white, $2.08@2.10; No. 6 white, $2.06@2.08; No. 1 yellow, $2.09@2.10; No. 2 yellow, $2.06@2.08; No. 3 yellow, $2.04@2.06; No. 4 yellow, $2.02@2.04; No. 5 yellow, $2@2.02; No. 6 yellow, $1.98@2; No. 1 mixed, $2.06@2.08; No. 2 mixed, $2.04@2.06; No. 3 mixed, $2.02@2.04; No. 4 mixed, $2@2.02; No. 5 mixed, $1.98@2; No. 6 mixed, $1.96@1.98.

Oats—There was an improved demand for oats during the week, but trading was of small volume due to the light movement. The market was firm, and prices about 1c above closing quotations of a week ago. Elevators mainly took what was offered, though an occasional car was taken by feed dealers. No. 2 white, 85@85½c; No. 3 white, 84½@85c; No. 4 white, 83½@84½c; No. 2 mixed, 82@82½c; No. 3 mixed, 81@82c; No. 4 mixed, 79@81c.

July 29.—The comparatively small movement of both old and new hay was a sustaining factor to slightly higher prices for good, choice, timothy and mixed the past week, but low grades of old and new in heating condition was dull and neglected. The demand was somewhat limited and mainly of a local character, as shipping orders were restricted by the relatively higher prices prevailing here. Old timothy fully maintained its premium at $39, but the tendency to decline to the new crop basis was more apparent at the close. Timothy constituted the bulk of the movement, and mixed as a result gained strength and a higher quotation. Very little clover was offered and prices were nominal. The situation is largely dependent upon cars and the preference shown to wheat is likely to create a shortage which will hold the hay market to a firm basis.

Shippers are advised to bale all new hay loosely, in medium bales of about 80 to 110 lbs., and small or perpetual bales of 70 to 90 lbs., in two-wire bales, as buyers in this market show a decided preference for small bales, and are in many instances obliged to discount the larger or five-wire offerings. It is also important at this time to stand bales of new hay on end when loading, as the danger of heating in transit is considerably lessened. New Hay—No. 1 timothy, $32@33; standard timothy, $31.50@32; No. 2 timothy, $30.50@31.50; No. 3 timothy, $26.50@29.50; light clover mixed, $31@32.50; No. 1 clover-mixed, $29@31; No. 2 clover-mixed, $26@28; No. 1 clover, $22@24; No. 2 clover, $20@22; No. 1 local alfalfa new, $26@28; standard alfalfa, $25@26; No. 2 local alfalfa, $23@25.

KANSAS CITY.

T. J. Tanner, Correspondent.

B. B. Babcock, of Cathcart & Co., Winnipeg, spent a day at the Kansas City Board of Trade this week.

July deliveries of corn on contracts in Kansas City have amounted to 175,000 bus. thus far; oats, 20,000 bus.

Old breweries in Kansas City are being turned into flour mills and ice manufacturing plants since prohibition went into effect, but some are still making beer.

Kansas City dealers see little chance for corn shipments to Texas from now on, in view of the big crop there, which was assured by recent heavy rains. New white corn is said to be moving from Brownsville to El Paso.

Wheat receipts here July 28 were 1,425 cars, equal to one million nine hundred and twenty-three thousand bushels, breaking

all previous records. At an average of $2.20 a bushel, the arrivals represented a value of $4,230,600.

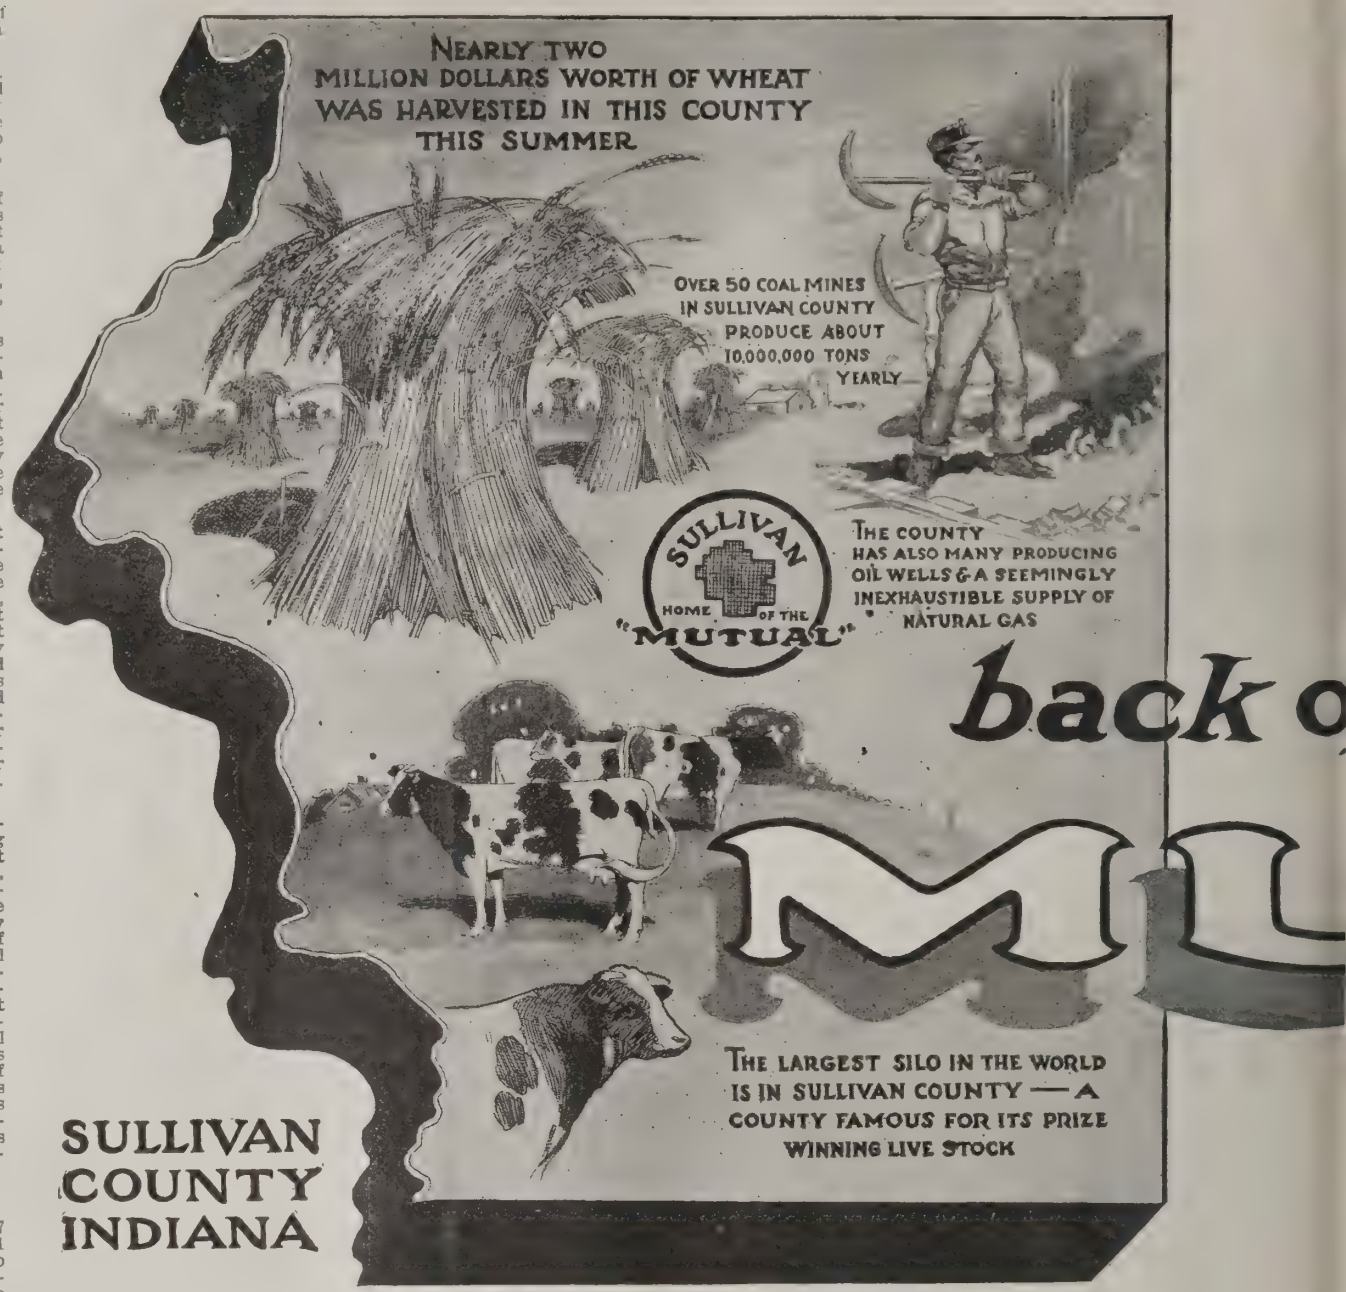
Letters from German grain importers, soliciting offers of wheat, rye, corn and barley, have been received by Kansas City exporting houses. The letters, which are from Hamburg, evidently are feelers to learn the attitude of American shippers, especially as regards credit.

The Associated Mill & Elevator Co., of which H. C. Nunn is president, has bought a site in the East Bottoms district of Kansas City on which the erection of a 2,000-bbl. flour mill is planned. About $650,000 is to be invested in the plant, which may be in operation by January 1, 1920.

The Logan Bros. Grain Co. contemplates a reinforcement of its cash grain department by placing R. H. Sturtevant on the trading floor of the Board of Trade. Mr. Sturtevant has made application for membership in the exchange. He bought the certificate of C. P. Moss, now in the soap manufacturing business but formerly of the Moss Grain Co. The price of the membership was $13,500, including the transfer fee.

The moisture element in new wheat having ceased to be a factor in determining quality and value, D. F. Piazzek, zone agent in Kansas City, has abolished the schedule of discounts on lower grades, which he issued July 10. Though wheat has generally sold above the Government basis for all grades, some of the country elevator men and millers were accused of using Piazzek's schedule as a means for holding prices down on wagon-load offerings. Hereafter the schedule will apply only to the three top grades. Other kinds, when purchased by the Grain Corporation, will be taken by sample, on their merits. No. 2 wheat will be 3c under No. 1 and No. 3 7c under.

While the car situation in the Southwest is holding up well under the big wheat movement, there is some complaint of inadequate switching in Kansas City, and the Kansas City Grain Inspection Department is not able to locate and sample cars promptly. A protest regarding slow sampling was sent to Governor Allen, of Kansas, this week by the W. H. Marshall Commission Co. One reason for the shortage of samplers is the withdrawal of several men from the inspection department by Governor Allen for the purpose of conducting a traveling grain grading school in Kansas, with the assistance of experts from the United States Department of Agriculture. Governor Allen is doing this for the benefit of the farmers. Dealers here think he should show an equal interest in the welfare of country shippers and prevent demurrage bills from piling up.



Cash Grain Markets.

Wheat—Receipts for the week, 3,917 cars, against 2,342 a week ago and 2,781 a year ago. The arrivals were equal to 5,287,950 bus. A larger movement is expected during the coming week, as the weather has been favorable for threshing and the prices ruling are a strong inducement to marketing direct from the field. Harvesting was completed in northwestern Kansas, the region in which the crop included spring wheat. Kansas City dealers generally agreed with the new estimate of 159,000,000 bus. on the Kansas crop, which is 70,000,000 bus. less than the June forecast of the State Board of Agriculture. There was a rapid expansion in the milling demand here for both local and shipping accounts, with increasing flour trade as the basis. The market was in an abnormal state as to prices of the dark qualities of hard wheat, owing to the fact that Wichita and Hutchinson dealers have sold these kinds short to northwestern and eastern mills for July delivery and were compelled to substitute inferior qualities at a discount. It is said that less than 6 per cent of the Kansas crop is dark wheat. The longs were thus given an opportunity to squeeze the short sellers, and No. 1 dark hard was forced up to 2.68, or 48c over the federal guarantee level. All kinds of wheat except yellow hard and the red and mixed varieties went up surprisingly, but there was a halt in the latter part of the week on signs that the shortage had been satisfied, and prices broke 5@15c. At the close No. 1 hard was quoted, according to quality, from $2.21 to $2.60; No. 2, $2.18@2 58; No. 3, $2.14@2.40; No. 4, $2.10@2.30; No. 5, $2.05@2.12. Generally these prices are unchanged to 13c higher than on the previous Saturday. Red wheat, which had been taken freely by elevator men during the preceding week at prices about on the Government basis, to be turned into an export grade and tendered to the Grain Corporation, advanced only 2c or 3c, but it got beyond the level at which the storage people could handle it. This premium was reduced later, so that elevator men had hopes of getting in again. There was a good milling demand for red wheat, the discount on which gives flour from that grain a big advantage over hard wheat flour. At the close red wheat was 1@2c higher than a week ago, with No. 1 at $2.19@2.20; No. 2, $2.17@2.19; No. 3, $2.14@2.15; No. 4, $2.12 @2.14; No. 5, $2.09. Stocks of wheat in Kansas City increased 1,470,000 bus., to 2,284,000 bus., against 1,935,000 last year. Much of the wheat that went into store was bought to arrive a week or more ago.

Corn—Receipts, 123 cars, against 135 a week ago and 342 in 1918. In view of speculative excitement over the crop situation and a keen milling demand for the better grades, the cash market ruled very strong and No. 1 white sold as high as $2.10, the top since November, 1917. There was a moderate feeding and chop manufacturing request, but the offerings were inadequate or reflected by the weekly decrease of 42,000 bus. in stocks. Kansas City has 249,000 bus. in store, against 891,000 a year ago. Corn prices closed with net weekly gains of 4@10c, with No. 2 white at $2.07@2.09; No. 3, $2.05; No. 2 yellow, $2; No. 3, $1.96@1.98; No. 2 mixed, $1.96½@1.98; No. 3, $1.94@1.96. While the week brought a return of high temperatures and some hot winds, there were few complaints as to actual crop damage. The week ended with belief prevalent that rain must come immediately to break the drought of the last 15 days or more. Data collected and published in the Kansas crop report showed a condition of 79.7 per cent. on July 19, an improvement of 4.3 per cent over June 21, suggesting a yield of 87,000,000 bus., but this has been lowered since. Deterioration is going on in Missouri, Nebraska and Iowa, also. The crop in each of these states is at the critical stage of tasseling and silking. Further south it is more advanced, and Texas is declared to have secured its big crop. One of the optimistic features of the southwestern situation is that so much hay and other feeds are in sight as to ameliorate the possibility of a corn shortage.

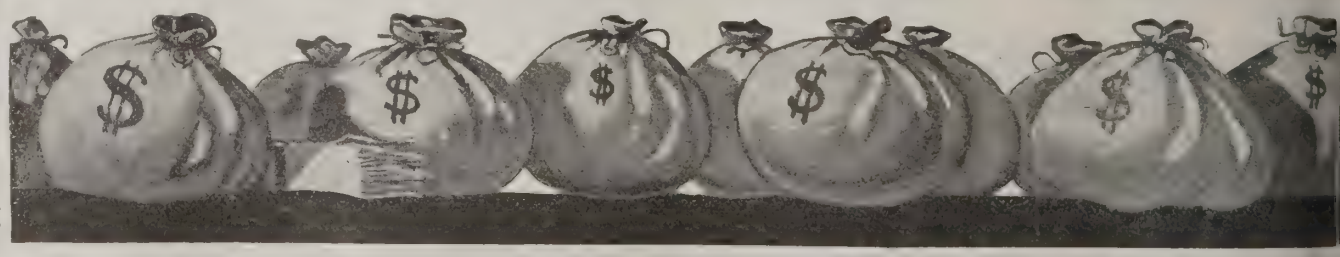
Oats—Receipts, 128 cars, against 108 a week ago and 175 a year ago. In the ferings there was a large percentage new oats, mostly of the red and mi varieties, showing medium quality. mand for white oats was excellent, w shipments going to Texas and other sou ern states, including Virginia. The So has common oats of its own. Eleva men here were among the buyers, as flected by an increase of 54,000 bus. stocks, to 770,000 bus. Prices of wh oats advanced 2½c, to 81½@82c for No and 81c for No. 3. Red oats closed at 7 76c for No. 2 and 74½@75c for No. which was unchanged to 2½c up. Mi rose 2@4c, No. 2 being quoted at 75@ and No. 3 at 74@75c. The Kansas c report reduced the yeld in that state fr 52,416,847 bus. to 49,776,000 bus.

Kafir and Milo—Receipts, 30 ca against 16 a week previous and 3 last ye

OVER 500 well-to-do citizens of Sullivan County, Indiana, became stock holders in the Mutual Truck Company, partly for personal profit; but largely because they became convinced that by making Sullivan the home of

"America's Greatest Truck"

are being satisfied with a small return (9%) on their investment, they could build up so large a volume of business that their community would, in time, become the home of America's Greatest Truck *Company.*



These wealthy farmers, stock raisers, coal mine owners, oil and natural gas producers, merchants, public officials and protessional men stand squarely back of u ample capital to build any number of Mutual that our customers will demand.

A new plant, with a capacity of producing 10 day, has just been completed and is in operation.

Our advertising and sales plan is based up intensive and scientific analysis of haulage prob each of many industries; and upon rendering a vidual service to each of our customers that will out of the ordinary.

We will sell our trucks, either complete with or chassis only.

Sizes 2-ton—3½-ton— 5-ton. All over-powere sized and under-priced. *Study specifications on n*

A Whole Rich County ...'s Only Industry:

MUTUAL

...MERICA'S GREATEST TRUCK"

...holly from units and parts that have proved themselves to be *the Masterpieces* of the truck industry.

...ifications 2-Ton Mutual
...ice—Chassis—$3,375.00

—Wisconsin UAU four-cylinder 4¼ Rating, on bore only, 29 h. p. Actual lculating both bore and stroke, 39)00 rpm. Most other high priced 2- ; use 4 x 5½ motors rated at 25.6 h. p. ı was selected, because an exhaustive all makes convinced us that it was 's Greatest Truck Motor".

—Hele-Shaw—Universal No. 5 with grooved plates running in oil. Re- for its smooth, regular pick-up and grip; its ease of operation and wear- ing life. Costs us two to three times s clutches used on most other high on trucks.

al—Spicer—Highest priced and y acknowledged to be the best. nts in the shaft and one in the clutch.

ission—Fuller, Model G-5, mounted 4 speed forward and reverse. How r trucks offer *four* speeds?

Frame—Parish & Bingham Pressed Steel—6 1/16 in. channel, with 3 in. flange, pressed from ¼ in. alloy steel. We could build our own from structural steel at half the cost.

Springs—Mather Chrome Vanadium Steel. Best and cost most.

Radiator—Perfex—Cast type, three-point suspension, of our design.

Steering Gear—Ross—with 20 in. wheel. The costliest and most highly perfected type of the most famous maker.

Magneto—Bosch, ZR4, waterproof, and dustproof; with impulse starter.

Carburetor—Stromberg "M"—Latest type.

Cab—Weather-tite, whose equal no other truck maker will furnish for less than $175 extra—is a part of our regular equipment.

Castings—Electric steel at vital points where others use malleables.

Governor—Duplex (not Simplex) type, controlling both engine speed and road speed independently from each other.

Rear Axle—Worm drive 2½ ton size, ball bearing. Highest priced axle put on a 2-ton truck.

Front Axle—Sheldon, ball bearing steering knuckle type.

Wheels—Smith Metal Wheels, for solid tires and Dayton Steel Wheels for pneumatic tires; furnished as regular equipment, tho they cost us 55% more than the best wood wheels.

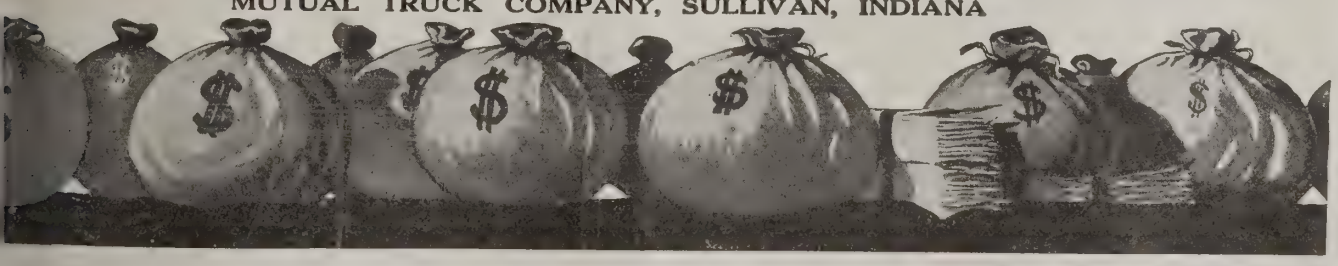
Tires—Firestone or Goodyear. 36 x 4 front and 36 x 8 rear, solid tires. Pneumatic tires are furnished at a reasonable extra charge.

Bushings—Bound Brook Oilless, thruout. Eliminating oil and grease cups, and insuring constant lubrication.

Gas Tank—25-gallon capacity.

Reserve Lubricating Oil Tank—2½-gallon with indicator and feed valve on dash. No other truck has this important feature.

h class trucks have *some* of the above super-specifications but no other truck in America offers all of them, or corresponding parts of equal merit or equal r 3½ ton and 5 ton trucks are equally noteworthy ranking with the 5 and 7 ton trucks of other makes in power, loading space and general dimensions.



MUTUAL TRUCK COMPANY, SULLIVAN, INDIANA

More for the Money

Compare the specifications given below, item for item, with those of any or all other good trucks, and ask the salesmen of the other makes how much *extra* they would charge for substituting "Mutual" specifications for their own—including electric lights, weather-tite cab, steel wheels, over-size engine, double-control governor, etc.

Any and every analysis of this kind will prove our statement that the Mutual gives more *value* per dollar of cost than any other truck.

CHICAGO.

The membership of John J. Mulvihill has been posted for transfer.

It is reported that the Grain Corporation took 250,000 bus. of wheat from local elevator interests early last week.

Weather reports with continued drought and consequent damage are important alike in their real and suggested bearing to both future and cash grain traders .

Among new rulings of the Chicago Board of Trade is the one prohibiting groups of brokers formed under the new brokerage rule from trading between themselves.

Car shortage is reported to be quite acute throughout Illinois and it is said that some Illinois elevators will be forced to close down shortly unless cars are furnished to move the wheat.

The Consolidated Stock Exchange has raised commission rates, characteristic of similar action among other organizations and a part of the bullish view of everything that is expressed in dollars.

Railroads east of Chicago report increases in general merchandise and steel and as a consequence some car shortage but not to compare with Western roads where shortage complaints of insufficient cars are heard.

The Witherspoon-Englar Co., 53 West Jackson boulevard, Chicago, has secured the general contract for the erection of the 1,000,000-bu. grain elevator to be built for the Chicago & Northwestern Ry. Co. The site is at 123rd street and the Calumet river. Previous mention of this big undertaking has been made in these columns.

The visible supply of oats at Chicago is heavy for this time of the year, accountable perhaps to the desire of elevators to load up before the wheat movement becomes so heavy as to make car shortage and congestion a certainty. It is said that Chicago is relatively the highest oats market in the country which is another reason why that cereal is arriving in such volume.

W. P. Anderson on returning from an Eastern trip reports a more hopeful attitude of dealers for an improved demand, offsetting what has been a very poor domestic situation. Prices along the Atlantic seaboard are considered high with the exception of rye which exporters feel is the lowest on the list. The serious tie-up due to strikes has curtailed exports, a condition that has partly been remedied and if the entire settlement is made this week as expected generous overseas shipments of feedstuffs are anticipated.

Pickell Talks to the Board.

J. Ralph Pickell, with J. Rosenbaum Grain Co., on July 24 delivered an address, entitled "Overseas in a Sack Suit," to members of the Chicago Board of Trade, being an impressionistic review of his four months in Europe, following the signing of the armistice. The address in the main was a summary of his sightseeing with side lights on commercial conditions in England, France and Spain.

Touching the general economic condition in Europe, he said: "I can see only depression in Europe for many weary months to come. The situation is more serious because of universal high price of food. Not that there is any world scarcity; for with the crops which are now being harvested and supplies already in hand, there is food enough and to spare with the one exception of meat."

Mr. Pickell was inclined to believe that American official control of breadstuffs, which of course under the circumstances of the case can hardly be now discontinued, is at the root of a great deal of the European difficulty in the handling of the food question. Naturally with Americans controlling wheat, it is impossible for private firms and individuals in foreign countries to enter into competition with Americans or to successfully buy from Americans, "so that by our continued control we have forced allied and neutral countries to retain their official bureaus, thereby incurring the enmity of international business and retarding readjustment the world around."

The speaker said that "supplies of wheat are more than adequate to meet every demand. European requirements will be less this year than the highest figures of pre-war times. I repeat: the demand for wheat will be less in Europe than the highest figure of pre-war times." The general proposition which Mr. Pickell here emphasized conforms to the frequent statements of Broomhall of Liverpool, the great European authority, on the same subject. Mr. Pickell says that Spain will export 10,000,000 to 20,000,000 bus. of wheat; a part of the Balkan country is self-sustaining and can even export a small quantity; the most pessimistic reports from India indicate sufficient wheat for home consumption; and Russia will export from the Black Sea district 25,000,000 to 50,000,000 bus. and also considerable rye from the north.

Guaranteed Wheat Prices.

The prices of wheat in the various countries fixed or guaranteed to the producer by their respective governments for the years 1918 and 1919, as reported by the Bureau of Markets, are as shown on the table below. Where prices were fixed for the different grades of wheat, the average of these prices is shown as the fixed price for that country.

Country.	Price.	Country.	Price.
Algeria	$2.36	Italy	$1.33
Argentine	*1.56	Morocco	1.58
Australia	1.44	Netherlands	3.23
Austria-Hung'y	2.21	Portugal	3.85
Brazil	2.65	Spain	3.96
Belgium	2.15	Sweden	2.95
Canada	2.245	Switzerland	3.25
Denmark	1.97	Tunis	3.25
Egypt	2.67	United Kindom.	†2.28
France	3.94	United States.	‖2.395
Germany	2.10		

*No guaranteed price was made by the Argentine Government to the producers, but a fixed minimum price for export wheat was established at $1.55 per bushel.

†The British Government, under provisions of the "Corn Production Act," which became effective on Aug. 21, 1917, fixed the minimum price of wheat to producers at $1.65 per bushel, the maximum sale price for home-grown wheat at $2.28 per bushel and the maximum for imported wheat at $2.40 per bushel. The minimum sale price for 1919 has been fixed at $2.16 per bushel.

‖No. 1 northern spring wheat at New York.

Argentina Grain Up.

Wheat and corn rose to new high records at Buenos Aires on July 23. Wheat advanced to 19 pesos a hundred kilos ($9.17 per 220.46 lbs.), an increase of 2 pesos during the day, and corn rose to 11 pesos a hundred kilos ($5.31 per 220.46 lbs.), an increase of 1 peso over the opening quotation.

DOCKAGE SIEVES.

The importance of standard dockage sieves is especially manifest at this time. Their use, where the grain is immature, shriveled or blighted is necessary.

The sieves manufactured by the Seed Trade Reporting Bureau, Postal Telegraph Bldg., Chicago, are of the same high quality as the other "Seedbur" grain grading devices, being of the highest class workmanship and manufactured in strict compliance with the Government specifications. The material used is the best 20-gauge aluminum, which has been adopted after many experiments as the most serviceable commensurate with light weight and strength. Made throughout of No. 20 gauge aluminum, 13 in. in diameter, telescoping, only two pieces of metal are used in constructing each sieve, thereby making the sides seamless. The bottom perforations are of aluminum, which makes the construction strong, light weight and will not rust.

The No. 10 set consists of 4 sieves and bottom pan as follows: (A) Scalper Sieve, round perforations 12/64 in.; (B) Buckwheat Sieve, triangle perforations 8/64 in.: (C) Fine Seed Sieve, round perforations 1/12 in.; (D) Chess Sieve, slot perforations 4½/64x½ in.; (E) Solid Bottom Pan. (F) If desired, a slightly smaller perforation than 4½/64x½ can be furnished for removing chess; this is .064x⅜ slot. This size can be used in conjunction with other sieves. The price is the same as above sizes. Unless otherwise specified,

NEST OF SIEVES.

the 4⅜/64x½ slot will be furnished on all orders for complete sets, but the .064x⅜ sieve may be substituted if desired or ordered in addition.

A complete set of flat sieves consists of 2 sieves, 3x16 and 16x16 wire mesh, with bottom pan, constructed of tin, 13 in. diameter.

The Seed Trade Reporting Bureau's Catalogue No. 621, containing Government standards for wheat, oats and corn will be sent gladly to any one desiring same.

The demoralization of foreign exchange is being referred to in banking channels of the first magnitude as extremely complicating the matter of providing credit for European nations to make purchases here. It is delaying affairs materially. Sooner or later, however, Europe must buy here, the only market.—*Logan & Bryan.*

Outside Live Stock Markets.

Choice cattle advanced, but with the big supply of Western range cattle at Missouri River markets, values were greatly depressed. Closing prices follow:

In southeastern Missouri considerable small grain was lost in the field owing to standing water and wet soil. June weather in that state was the most unfavorable, according to the State Report, since 1915, and the grain failed to fill as expected and the quality of the berry has been injured. Threshing is tough and there is much trash coming through in the effort to save the grain from going through the spout. Straw is very heavy.

The cable July 15 reports that the Buenos Aires corn and flaxseed markets despite the fall in prices in the United States were unusually firm, and on t 14th prices of both corn and flax ro This firmness is due to a heavy expo demand and to the fact that vesse are beginning to arrive regularly nc that the strike of dock hands has mo or less stopped.

TAKE ALL WHEAT DISEASE.

By C. G. WOODBURY,[1]
Director Purdue University Exp. Station. Indiana.

The Botany Department of the Experiment Station has been making a careful investigation of the "take-all" wheat disease which recently made its appearance in this state. Dr. E. B. Mains and Dr. M. W. Gardner have spent much time examining infected fields and have been in daily touch with county agents and interested farmers in all parts of the state. They attended also both the conferences of pathologists of the neighboring states and the Federal department, where all known facts about the disease were brought together for analysis and discussion. The following is a brief summary of their report made in the light of our present knowledge of the disease:

FIELD APPEARANCE OF "TAKE-ALL."—In the field the disease appears in more or less circular patches varying in size from 5 to 50 feet in diameter. These are conspicuous because of the marked stunting of the plants, which are often only a few inches high when healthy plants are knee high. In heavily infected fields most of the plants are stunted or dead, with only an occasional normal plant, giving the field a very ragged appearance. The diseased plants are characterized by a dark brown discoloration and soft rotting of the leaf sheaths. As the disease progresses this rotting penetrates to the stem and finally causes the latter to rot off at the crown. Such plants tend to send out more shoots. This results in a thick rosette of short shoots. The diseased plants usually also have a darker green color than the healthy ones. Many plants in diseased areas are killed and the remaining diseased plants seldom head.

WHERE IT IS.—The disease has been found in Illinois and Indiana. In Illinois about 700 acres of wheat out of 4,000 acres which had been surveyed around Granite City has the disease. The disease is so severe in that locality that many fields are wiped out by it. In Indiana "Take-all" has been located in LaPorte, Porter, Jasper and Tippecanoe Counties. In Tippecanoe and Jasper Counties the trouble has so far been found in but a few fields. LaPorte and Porter Counties report it rather wildly distributed.

WHAT TO DO ABOUT IT.—From data at hand at the present time concerning this disease the following recommendations are made:

1. Fields which are heavily or generally infected should be plowed up at once and planted to corn or soy beans.
2. Where the disease is restricted to a few small spots in the field these should be cut over a week or ten days before harvest with a scythe and after the cut wheat is dry burn over the area, if it can be done without danger to the standing grain. Otherwise the infected areas and the wheat for a rod or more surrounding should be left uncut at harvest and burned over as soon as possible afterward. Do not allow stock in the field until this is done.
3. Since the straw from infected fields is a good carrier of the disease, such straw should not be spread or allowed to reach the manure heap.
4. The grain from infected fields should not be used for seed nor so disposed of that it may become mixed with other wheat for seed purposes.
5. All fields having the disease should be put into grass, alfalfa or other legumes as soon as possible and left for about four years.
6. Do not plant wheat, rye, barley or oats upon infected soil. Corn, alfalfa, clover, soy beans and pasture grass can probably be grown.
7. It will aid greatly in combatting this disease if you will report any suspected occurrence in your locality. We will endeavor to send men to localities where the disease is reported and any coöperation which you may be able to furnish them will greatly aid in this work.

FOR THE FUTURE.—Arrangements are being made to determine as rapidly and as thoroughly as possible the extent of the distribution and the severity of this disease in Indiana. Intensive studies are being pushed to obtain all possible information about this new and dangerous trouble in the shortest possible time. The foregoing recommendations represent the results of the study already made and the best judgment of our own pathologists and of the Federal department as to the immediate steps to take.

[1]The purchase of all the wheat grown in Illinois in the infested districts of Madison County and those of Indiana by the Government, in order to prevent the spread of this serious disease, has given new interest to a subject that now the crop is harvested is likely to be neglected until another season. The paper came to our hands through the kind thoughtfulness of Mr. Leslie G. Gates, president of the Chicago Board of Trade. It was written some weeks prior to the harvest.

Snow's July Report.

B. W. Snow, Bartlett-Frazier crop expert, says: "I have sufficient thrashing returns from all parts of the winter wheat belt to show that the yield per acre is falling decidedly below the indication on July 1. Rust, blight, headscab and poor filling on account of hot weather at the critical period are noted from Ohio to Kansas. If present returns, which represent practically one-half of the territory, are supported by results elsewhere the winter wheat crop may fall as low as 750,000,000 bus. Rust and hot weather have also reduced the spring wheat prospect to a point where only a small crop of poor quality can be expected. July, the critical month for corn, has been marked by dry weather and high temperature and the crop has been materially injured. Oats yields are also proving disappointing, as compared with the expectations of a month ago."

Gov. Allen of Kansas has addressed a communication to Julius Barnes, Wheat Director, asking that the lower price of wheat be raised, claiming that the present Government regulations for grading wheat are working an injustice to the farmer. The Governor anticipates that "at least half of the Kansas crop is going to grade below No. 3 and that the new schedule of discounts of these lower grades takes anywhere from 12@20c a bu. off that allowed for No. 1. These regulations therefore," he says, "give the Government as wheat buyer an unreasonable profit on wheat we have produced."

The prospect for a grain crop this season in Montana, says Sec'y Stockett, "is disappointing, but not discouraging. The unfavorable condition is due to lack of moisture running over two dry seasons and an open winter, the present season starting without the backing of the usual storage or subsoil moisture. This constitutes three dry seasons with the indications that the crop will be lighter than the two former years."

ARGENTINE EXPORTS.

Consul Robertson, Buenos Aires, reports exports of wheat from Argentina during the first four months of 1919, as showing a marked decrease compared with shipments during the corresponding period since 1914, according to figures published in the *Review of the River Plate* for May 9, 1919. The table below gives the export figures for certain products during the four-month period from 1914 to 1919 (grain in tons, flour in quarters, mutton in carcasses):

	First 4 months of—			
Articles.	1916.	1917.	1918.	1919.

Strong's Double Indexed Car Index
Is a record book designed to afford ready reference to the entry or record of any car number. Facing pages 11x14½ inches of heavy ledger paper are each ruled into five columns, those on the left-hand page being numbered 0, 1, 2, 3 and 4; while columns on the right-hand page are numbered 5, 6, 7, 8 and 9. Each column is ruled into three distinct divisions with the following sub-headings: "Initial," "Car No." and "Index."
The marginal index figure represents the right hand or unit figure of the number entered; and the column heading the second or tens figure. So that the required number can always be instantly found if properly entered.
ORDER FORM 20 contains 36 pages, bound in heavy canvas covers, with spaces for registering 9,000 cars. Price, $1.50.
ORDER FORM 22 contains 68 pages, bound in art canvas covers, with spaces for registering 17,000 cars. Price, $2.50.

Corn at the Critical Stage.

The weather is the all-absorbing topic this week; the Atlantic and Pacific coasts have had plenty of rain, but the great Central Valley is dry, with no immediate prospect of a change. Fortunately, it has kept cool, with no excessive temperatures over the corn belt; humidity is low and it is ideal for the wheat and oats harvest. There seems to be ample subsoil moisture and we doubt if any harm has as yet been done to corn. However, it is at a critical stage and we must have general rains soon to prevent a serious curtailment in what promises to be a record crop. The trade are exceedingly nervous. The December has had a good advance. Many think the price discounts the situation. The market is very sensitive and sharp price changes are to be expected; a general rain would certainly cause a decided break. The cash demand is not urgent except for white corn, but receipts are so light that cash prices are kept at decided premiums over the July. Our advices indicate considerable old corn in the country. Feeders who are finding cattle feeding unprofitable will have considerable old corn to sell. —*W. H. Perrine & Co., Chicago.*

Is Russia Planting?

In spite of war and closed ports, the London *Daily Mail* says that Russia enjoyed during the past two or three years, and is now enjoying, an unprecedented agricultural boom. Co-operative societies in Siberia and in the west of the government have obtained control of important railways, and peasants have plowed up and are now plowing up many virgin acres. "We tru contemporary is well informed,' the London *Grain and Seed Re* "but the report seems to us to be too optimistic. The present un conditions are hardly calculated courage an agricultural boom Russia is a large country and farming districts may be prospe

Corn and wheat prices in Arg advanced rapidly last week appe under the control of attempts eign interests to purchase in qu Considerable deterioration of th crop of corn is reported owing longed rains.

ntral Iowa cattle feeders are holding off until the growing crop of corn is made.

The "Why" of Cattle.

The action of the cattle market really demonstrates that the packers have about as much to do with the rise and fall of live stock prices as they have to do with the ebb and flow of the tide, and if Congress knew as much about live stock and packing house affairs as they pretend to know, and would give a little closer observation to the conditions that bring about advances in live stock, we would not have this uncalled-for agitation going on constantly. It should not take a lifetime to thresh out why prices are high. The fact of the matter is, supply and demand regulates the prices and that has never been disputed by practical business men. We would take the cattle market as above mentioned as an example. Agitation in April stampeded the cattle raisers into shipping their cattle. They were looking for a tremendous break that would never have come except through their own action. They filled every live stock market in the country with unfinished cattle and good cattle broke down to $14.25 per 100. Every cooler in the country was overloaded with beef that could not find a market, owing to its plentifulness. We said then that it was only a matter of time when cattle would come back to original prices. After they had sold all their cattle, a scarcity set in and on July 22 cattle sold at $19.40 which in April sold at $14.25, and they sold absolutely on a demand basis. If we would give more attention to facts and less attention to agitation these conditions would never be brought about. They asked $18.65 on July 23 for best cattle, and $20 is predicted for good cattle within the next six weeks.—*W. G. Press & Co., Chicago.*

Cheaper White Rye Flour.

The winter grades of rye flour just now are costing less and the darker grades more in proportion to the cost of the grain used than is generally the case. This situation, we believe, cannot continue indefinitely; for it is due on the one hand to the fact that rye grain is selling at a discount of over 30c under corn; while on the other hand the very high current price for corn has fixed record-breaking prices for all feedstuffs, which include rye feed, rye middling and rye reddog.

The grinding of new rye, which is in excellent milling condition, will commence here July 28.—*Blodgett-Holmes Co., Janesville, Wis.*

Testing Kansas Wheat.

TOPEKA, July 26.—Tests of low-grade Kansas grain, of which there is an unusually large amount this year, are being made at the State Agricultural College at the request of the state grain inspection department. Tests include actual milling and analyses of content. It is hoped the results will furnish a basis for the revision of Federal low-grade grain standards, which, it is charged, discriminate against Kansas farmers.

Dissolution of Partnership.

The partnership existing between M. W. Randels and Mrs. Mattie Grubb under the firm name of Randels & Grubb of Enid, Okla., has been dissolved, Mrs. Grubb withdrawing from the firm. Mr. Randels will assume all obligations of the firm and solicits the continued cordial relations heretofore existing with the trade. Southwestern operations are this year most interesting with considerable doubt prevailing to the last minute on Kansas and Oklahoma winter wheat, placing responsibility on the good advice of such firms as the above right on the ground, realizing that it is through such information to their trade that good business is to be created and maintained.

The Board of Grain Supervisors for Canada has given notice that all wheat of the 1918 crop must be in the terminal elevators before Aug. 15 in order to realize the price.

By a new ruling of the Commissioner of Internal Revenue the tax on freight charges will be applied on the amount paid at the time the property is unloaded at terminals and there will be no readjustment on the tax based on proportions to the home transit points. On grain moving via Chicago, for example, this ruling affects shipments from Illinois stations from which through rates apply.

Damage resulting from "take all" and flag smut in Illinois as reported by Field Agent Fessenden has not been extensive but the threat for the future caused by their presence is serious.

ZWEIG IN CASH GRAIN.

During the past many years none ve been classed more fixed apparent- in the regular in and out affairs of Chicago Board of Trade than Harry Zweig, who has been identified with cash grain business of the J. Robaum Grain Co. for 18 years. You er can tell, however, what the exience earned in such work leads to; l it therefore seems only the natural ng that he has organized a firm of own, Harry A. Zweig & Co., 305 La Salle St. Announcement is made

HARRY A. ZWEIG.

he trade of the connections that been arranged for in markets cing well with Chicago and the firm solicits consignments and ral cash grain business, in the dence that the service rendered be adequate and satisfactory. Mr. g's attendance at grain conven- and ability to mix well with the but above all, a knowledge of how grain should be handled, starts off with the right foot. There are many men associated with the ois grain trade who do not know ry, but for those in other territory oing to Chicago, or basing cash operations on Chicago's facilities, urther introduce him by means of photograph and join his many ds wishing him success in the new are.

Use Old Bill of Lading Pending Court's Decision.

ix Thelen, Director, Division of ic Service, Railroad Administra- has written the New York Board rade and Transportation Freight ic Bureau upon the attitude of the oad Administration with reference e use of the old forms of bills of g, in view of the injunction re- y issued against the new form, ef- e Sept. 8. Mr. Thelen says:

understand that informal sugges- has been made to the Interstate nerce Commission to extend the ef- e date of this order until Jan. 1, If the Commission looks with upon this suggestion, the entire tion would be clarified and the ers could continue to use their old s until the courts have an oppor- y to reach a conclusion in this mat- or until the further order of the state Commerce Commission. In neantime I assume that the ship- will continue to use the old forms."

Lees Summit, Mo.—Noel & Kimball have taken charge of the Lees Summit Mill.

Marshfield, Mo.—Hubbard Minor bought the W. L. & M. P. Long Milling business located in Marshfield.

Kansas City, Mo.—H. D. Lee announces that a large flour mill is being planned for Kansas City by the Lee Merc. Co.

Mountain Grove, Mo.—D. W. McEwen has leased the Archer elevator in which an electric motor is being installed.

Carthage, Mo.—The McDaniel Milling Co. has filed an affidavit for record showing that it has reduced its stock from $100,000 to $68,000.

Eldorado Springs, Mo.—The Farmers Co-operative Elevator Co. has taken charge of the Rodabaugh Elevator. O. W. Cline is the new manager.

Carrollton, Mo.—The Farmers Union has taken over the Wiggins Elevator at Carrollton, Mo., the farmers' organization being incorporated for $12,000.

New Hampton, Mo.—The Farmers Grain, Produce & Mercantile Co. has been incorporated with a capital of $40,000. Incorporators: F. O. Peasley, Merrell R. Klein and John H. Scott.

Armstrong, Mo.—The Glasgow Milling Co. has sold the elevator in this city to L. McCorkle of Clifton Hill and Mr. McCorkle in turn sold a half interest in the elevator to L. F. Fife and J. E. Walkup.

Waco, Mo.—The Waco Co-operative Elevator Co. has been chartered with a capital stock of $20,000 by A. G. Anderson of Carl Junction, John Beckman of Weir-Kans., Thos. N. Lofton of Waco and others.

Mexico, Mo.—Lester Miller, secretary of the Audrian County Farmer's Club, has announced that the $35,000 stock company being organized among farmers to erect a concrete elevator has progressed so far as to assure its success. Work on the elevator will start in September and it will have a capacity of 25,000 bushels.

MONTANA.

Belt, Mont.—The Belt Farmers Mill & Elevator Co. has filed articles of incorporation.

Coburg, Mont.—The Equity Co-operative elevator and coal shed caught fire in some unknown manner and burned to the ground causing a loss of $13,000.

Laurel, Mont.—Preliminary arrangements have just been completed between the J. W. Denio Milling Co. of Sheridan, Wyo., and the Laurel Mlg. Co. for the lease of the Laurel Mill to take effect immediately.

NEBRASKA.

Powell, Nebr.—Ralph Butler has purchased an elevator here and will take charge.

Riverdale, Nebr.—The Farmers Co-operative Elevator Co. has been incorporated with a capital stock of $25,000 by O. G. Knox and others.

Beatrice, Nebr.—The Pease Grain, Seed & Coal Co. of Beatrice is planning to erect a large warehouse and factory building in Beatrice. The building will be of brick construction, 85x60 and will be three stories high.

NORTH DAKOTA.

Belfield, N. D.—W. C. Goble has taken over the D. Coutts elevator.

Tuttle, N. D.—Geo. Elliott is the new manager of the Farmers Elevator Co. at this place.

Shields, N. D.—The Farmers Elevator Co. has been incorporated with a capital stock of $25,000 by W. L. Belden, Mike Brown and Herbert Roberts.

Enderlin, N. D.—The Enderlin Farmers Elevator Co. held their annual meeting recently. Besides paying off a small indebtedness the stockholders voted a $5,000 working fund to be laid aside, after paying 10 per cent on the stock. Fred Oehlke was elected president; E. C. Fernow, vice-president; James Walsh, treasurer. Ward Galbreath, secretary.

OHIO.

West Sonora, O.—H. A. Kleppinger has taken over the West Sonora elevator here.

Richwood, O.—The Richwood Grain Co. has increased its capital from $15,000 to $25,000.

Field Seeds

In Wayne County, Ia., not as large a yield of timothy is expected as common.

Lucas County, Ia., reports a large acreage of timothy seed saved; none, however, has been as yet threshed.

A sample of new clover seed was received in Toledo from Illinois on July 22 and graded N. E. G., shrunken, dirty, priced tentatively at $25.

The Iowa Weather Bulletin says that more than the usual acreage of tiomthy is being cut or reserved for seed and a large crop of the latter is expected.

A conference of representatives of the Crop Improvement Associations of Minnesota, Wisconsin, Michigan and the Dakotas was recently held at the University Farm at St. Paul with a view to standardizing varieties and qualities of seed in the Northwest. J. W. Nicolson of Michigan was appointed to report on standards at a second meeting of the conference to be held in Chicago during the International Livestock Show. It is expected for this show a large seed exhibit will be prepared under the direction of R. A. Moore, agronomist of Wisconsin.

A large Idaho seed firm writes C. A. King & Co. that it has been very dry in that neighborhood, but that they expect as much red clover seed this year as last and a little more alsike. Timothy and white clover seed will be very short. Another in the same state reports alsike crop twice as large as last year, but timothy scarce. The redtop yield will be reduced. A third dealer in the state reports only one-third of a crop of red alsike and timothy, but the alsike crop large. An Ontario firm writes same parties that alsike is only three-fifths of a crop in that province, red almost a total failure and practically no timothy saved for seed.

Detroit Seed Prices.

Quote seed prices July 26 at Detroit as follows: Clover seed—Cash, $29, October $30; timothy seed, $5.50.

FLAXSEED IMPORTS.

The following amounts of flaxseed or linseed in bushels were imported by the United States in May, 1918 and 1919, and during the eleven months of the years named ending with May:

	May		11 months	
	1918.	1919.	1918.	1919.
Flaxseed	2,023,522	1,907,705	12,148,769	7,407,720
Imported from Canada	992,959	269,316	5,352,823	1,239,609
Argentina	1,030,176	1,637,315	6,363,806	6,030,866
Other	387	1,074	432,140	137,245

Toledo Seed Market.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy seed for the week ending July 26:

	Range for wk. High.	Low.	Close, July 26.	Close, July 19.
Clover—				
Cash	$29.00	$28.25	$28.25	$29.00
October	31.09	29.55	30.50	30.85
December	29.50	28.40	29.25	29.00
Alsike—				
Cash	24.50	23.75	24.50	23.75
October	24.75	24.00	24.75	24.00
December	25.00	24.00	24.75	24.00
Timothy—				
Cash, old	5.52½	5.30	5.30	5.52
Cash, new	5.52½	5.30	5.30	5.52
September	6.10	5.75	5.80	6.10
October	5.80	5.60	5.65	5.80
December	5.85	5.62½	5.70	5.85
March	6.05	5.90	5.90	6.10

St. Louis Seed Market.

ST. LOUIS, Mo., July 26.—Some spot seed is offering, and there have been a number of sales to arrive, but most of the spot seed is of poor quality, and sellers of future are asking more than buyers are willing to pay. The few sales that have been made do not properly reflect values of good seed, and prices are nominally as follows: Timothy, fair to choice, $11 to $13 per 100 lbs..; clover, $34 to $41; golden millet, $4.25 to $5.25, Siberian, $2.60 to $2.75, white, $2.60; red top, $12 to $13; sunflower seed, choice old, $17 per 100 lbs.; sorghum cane seed, $2.50 to $2.60 per 100 lbs.

Louisville Seed Market.

LOUISVILLE, KY., July 26.—Kentucky farmers have weakened slightly and are quoting some small lots of bluegrass seed at $1.50 a bushel, which would go to show that the Winchester pool has not been especially successful. The demand is still light, however, as jobbers and retailers are not buying, but cleaners are taking all the $1.50 and $1.60 seed they can get. Farmers are asking $1.75 and $2 in many instances.

Orchard grass seed is still largely in the shock, as wheat is getting first attention, threshers passing on without touching orchard grass. Such little lots as have changed hands have brought around $3 a bushel for country run of threshed seed.

Demand for timothy and red clover is somewhat better for fall sowing, but demand as a whole is quiet. Louisville dealers plan the largest exhibits on record at the State Fair in September, at least six planning to show.

CHICAGO SEEDS MOVEMENT.

Following is a report of the receipts and shipments of grass seeds at Chicago for the months and weeks named in 1919 and 1918, in pounds (000 omitted):

Kansas City Seed Market.

KANSAS CITY.—Aside from the interest in blue grass seed, there were no developments of immediate importance in the seed trade during the week. Blue grass seed has begun to move freely, especially from western Missouri, to this market. Nearly all is coming in the rough state and much on purchases to arrive. Local seed houses have their cleaning machinery in operation. They describe the seed quality as "fair," though country advices generally dwell on the excellence of this year's crop. Seed in the rough is quoted at $1.40@1.80 per bushel of 14 lbs., or $10@13 per cwt. Cleaned seed is worth $18.50@20 per cwt.

Some time must elapse before anything definite can be stated regarding the new crop of alfalfa seed. Thus far the interest in alfalfa has been cen in hay. Central Missouri reports three crops of hay have been cu that two additional cuttings are le unless present dry weather cont The Kansas July report says the so cutting will make 1,158,600 tons cellent hay, the yield running abu ton to the acre. Army worms c the loss of one cutting in portio southwestern Kansas, and grasshop were also effective. A few instan fields being plowed up are annou The present seed interest here is fined to the distribution of old su for planting in August. Dealers give a price range of $11@18 per on seed from first hands, but very is moving from the country.

As to timothy and clover seed i Southwest dealers profess a la definite knowledge on the new c It is likely that there will be a supply of timothy seed, but th fields of clover, from which seed come, are limited.

No official figures except the Ge ment June estimates have been su ted on the Southwestern acrea sorghum grains, and the Federal

pertained chiefly to the kafirs. The Kansas state report for July speaks optimistically as to the growth, but admits the probability of a reduced acreage. As to the acreage of cane and millet for forage purposes there may be an increase.

Seeds in Kansas City are quoted generally as follows, as from first hands:

Alfalfa—Per cwt., $11@18.

Timothy—Per cwt., $9@10.50.

Blue grass—Per cwt., rough $10@13; per bushel, $1.40@1.80.

Chicago Seed Market.

The timothy market developed a little more strength during the middle of last week, but on the last day an easier undertone to the market was noticeable. Country lots of choice seed were quotable $10@10.75 for fair to good seed with choice qualities going at $11@11.25. The clover market lost considerable of the advance gained during the previous week and contract prime on Saturday was nominally $47. Country lots were quotable $35@38 for fair to good seed. The millets were firm in tone with golden quotable $3.50@5; white at $2.75@3. Quotations follow for the week on timothy futures and clover contract prime:

Tim.—	July.	Sept.	October.	
July 21...	$12.70A	$13.50A	$12.50B	
July 22...	12.40A	13.50A	12.75B	$13.00A
July 23...		13.60A	12.75	
July 24...	12.75A	13.50A		12.75A
July 25...	12.75A	13.50A	12.25B	12.70A
July 26...	12.65A	13.45A	12.25B	12.70A

Clover, contract prime.

July 21	$48.20	July 24	$47.90
July 22	47.90	July 25	47.00
July 23	47.90	July 26	47.00

Duluth Flaxseed Market.

DULUTH, July 26.—A fresh wave of bullishness developed in the flaxseed market during the last week and under the spur of urgent bidding, quotations were advanced all the way up to 32 cents during the six days' operations. Advices received by specialists in the trade regarding the crop outlook for the present season were of a still more discouraging nature in that it is predicted by experts who make inspection trips over the flax-producing areas in the Northwest that in addition to the disaster in Montana from a farming standpoint, growers over wide areas of eastern North Dakota will not have sufficient returns from their flax fields this season to even get their seed back. It is even said that yields in other parts of North Dakota will fall below early expectations. On account of late developments it is taken for granted that the next Government crop report will place the season's yield at far below the figure set in the July make-up.

Under the present crop conditions and with limited supplies of flaxseed being carried in stocks at the various points, it is fully recognized by experts in the trade that quotations might climb to further extraordinarily high levels in the event of a burst of excited buying any time. That is a possibility that the conservative element is endeavoring to guard against. It is recognized that present prices are burdened from a consumptive standpoint and every effort is being made to eliminate the speculative element as far as possible at this stage. It may be mentioned that strength at Winnipeg, where a short interest is said to have been caught napping, and the readiness Buenos Aires has displayed in following up the American markets have been further bullish factors of late.

Flaxseed receipts at Duluth elevators last week aggregated 47,292 bushels and shipments were 100,634 bushels, leaving stocks in the elevators at the end of the week of 98,000 bushels.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track	$6.12-14	$5.96	$4.73
To arrive	6.11	5.86	4.71
July	6.11	5.96	4.73
September	6.11	5.88	4.76
October	6.00	5.89	4.70
November	5.96	5.63	4.64
December	5.82	5.50	....

SEED SITUATION.

ALSIKE SHORT.

DETROIT.—We find that alsike in Michigan, especially the southern part, will not be 50 per cent of last year's crop.—*Caughrey-Jossman Co., Detroit.*

OUTLOOK FOR SEED POOR.

MONTANA (9).—The outlook for seeds in eastern Montana is not very good on account of dry weather. The scramble has been for winter hay and farmers would not let grass stand for seed. We will therefore have very little seed of any kind to offer.—*W. H. Newcome, Miles City, Mont.*

EASTERN IOWA SEED CROPS.

IOWA (8).—We look for a little larger quantity of timothy threshing than common for this season. We hear of many instances where farmers could not harvest the crop of hay on account of shortage of help, who are going to thresh for seed. However, we are not a timothy-producing territory and usually ship in more or less seed and will ship in some this season.

Near as we can learn, the matter of producing clover seed is too early to forecast. We look for little, if any, production.

We look for a fair demand for timothy for fall seeding and a better demand for red clover.

Stocks of old timothy are light and clover entirely exhausted.

It might be of interest to say that we are building a seed house at our plant at Grand Mound, Ia. The building will be extensive enough to handle all field seeds in carlots or more. We are equipping the plant with up-to-date cleaning machinery.—*F. Mueller & Son, per J. F. Mueller, Calamus, Ia.*

MISSOURI SEED CROP.

ST. JOSEPH, MO.—Interest is now centered in new crop seeds. There has been a good yield of Kentucky bluegrass in Missouri. When cleaned up, we look for considerable variation in natural weight; some of it will be heavy and others light.

Timothy promises a good yield considering the restricted acreage; and quality likely to be good. It is too early to say much about alfalfa and red clover. It is not likely that much, if any, new-crop alfalfa seed will reach market in time for fall sowing from either Kansas or Nebraska. There will doubtless be early shipments from Texas and Arizona. The weather here has been dry and warm all month; very favorable for timothy and clover, but beginning to be detrimental to corn, which is suffering now from lack of moisture.—*Mitchelhill Seed Co.*

Special Louisiana Seed Report.

LOUISVILLE, KY.—The conditions in the trade generally are very quiet. Most seed crops are not yet coming to market but we anticipate a very active August business in the general seed line. We have had quite a heavy demand for rye for seeding purposes, some of the shipments to us showing very excellent qualities. General tendency this season on all kind of seed will be for a higher level than ever known before.—*National Seed Co., per J. Wm. Jefferson, Pres., Louisville, Ky.*

New Clover Seed.

Samples of new clover of mammoth variety from Illinois were shown at Toledo last week. It was very shrunken. The first arrivals last year were Aug. 16. Many large dealers have ignored the market, awaiting crop outcome. We look for fluctuations, and suggest having orders here in advance to take advantage of extremes.

Alsike offerings increased this week. The yields are mostly good, ranging from 2½ to 8 bushels per acre. Will be pleased to have a card from you as to how it is running in your section.—*Southworth & Co., Toledo.*

Evansville View of Seed Market.

Our correspondent at Evansville, Ind., after survey of the trade writes on present conditions in the seed trade:

ALSIKE.—Samples receieved from the new crop in Indiana, Ohio and Illinois seed are exceptionally beautiful. Samples from Michigan are not so attractive. I understand the out-turn per acre in all sections is exceptionally good.

CLOVER.—It is yet too early to tell anything about the probable crop, but rain is needed in this section.

ALFALFA.—Demand for alfalfa for early August seeding is very heavy and I am inclined to think all the available old stocks will be used before the new crop is harvested.

TIMOTHY.—Local and carload demand very good. Crop is reported very short in the Illinois territory this year, occasioned by short acreage.

REDTOP.—It is reported that this year's hay is very heavy, compared with last year. The acreage is somewhat reduced in some sections, but according to reports, the seed is not well filled and the cleaners estimate this year's crop will not be any greater than last year, if as large.

ORCHARD GRASS.—New samples have been received in this market, but the seed is very dark in color and light in weight. There are no reports of trades having been made on new crop, and I am unable to quote.

BLUEGRASS.—There has been a very active market on blue during the past few weeks and I understand many trades have been made on both the shipped and recleaned seed.

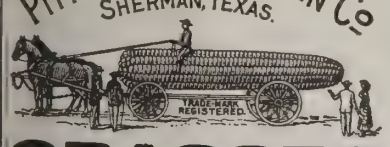
Clover Seed Still Advancing.

Clover seed made another new high record last week, the October reaching $31. There were no new features. Some samples of clover were received in Toledo from Illinois. The reports from that state, also Indiana, Ohio and Michigan, are about the same as they have been—mostly unfavorable. Wisconsin and some of the other states are talking a little more favorably.

Trading in futures was not very heavy.

Alsike ruled firm during the past week, the strength being due entirely to the advance in red clover, because crop reports have been coming rather favorable, although some farmers are awfully slow in getting their alsike threshed. There is lots of it in the fields awaiting the thresher and a wet spell would not only damage the quality but might ruin the seed if the rain lasted any length of time. Many reports from Ohio and Indiana speak of a very good yield. The quality in some cases is very nice.—*J. F. Zahm & Co.*

Clover in Winter Wheat.



About 27.5 per cent of the harvested winter wheat acreage of 1918 in the United States had clover seed sown into it. It is believed that the total acreage seeded to clover seed in 1918 was around 13,000,000 acres. The usual amount sown per acre averages about 9.8 pounds when sown in grain. The percentage of the wheat crop seeded to clover in different states is as follows: New Jersey, 95 per cent of the winter wheat acreage was seeded to clover, New York 81, Michigan 79, Ohio 76, Maryland 73, Delaware 70, Indiana 64, Pennsylvania 62, West Virginia 51, Wisconsin 51, Kentucky 48, Illinois 42, Tennessee 40, Virginia 38, Idaho 32, Missouri 31, Arkansas 24, Iowa 23, Oregon 8, Nebraska and Washington 3, Kansas and California 2.—*Mo. Clip Sheet.*

Minneapolis Flaxseed Market.

MINNEAPOLIS, July 28.—The flaxseed market has narrowed down considerably, as the decline in bids here resulted in the movement being diverted to Duluth, where buyers are still bidding on the basis of the July future for seed to apply on July contracts. Local crushers have laid by enough seed to keep them going for some time and they are unable to take any more oil orders at present, owing to the fact that their capacity for the time being has been sold out. Only scattered offers for shipment inside of 60 days are made.

The crop situation is unfavorable. Scattered rains helped part of the North Dakota crop only. Considerable of the state needs rain to keep the plants progressing. Minnesota reports are fair, but parts of South Dakota have been very dry recently. No. 1 seed on spot and to arrive sells at Duluth September price to 3c under.

Floods in Argentina.

Up to the present, hopes of importing countries have been centered in the Argentine, where there appears to be a large surplus, but according to latest cable advices from our agent prospects point to further deterioration in the new crop corn in the southern grower. Rainfall during the past fortnight has been extensive and floods have caused material damage in many sections. It is said 50 per cent of corn crop will be unfit for shipment. It might, in fact, bring the Argentine market more on a parity with the U. S. and it would not be surprising to see some foreign inquiries in America if prices in America should react somewhat.—*Geo. Broomhall, Liverpool, July* 19.

ALFALFA NEWS.

The second cutting of alfalfa was well under way ten days ago in Mills Co., Ia.

The second cutting of alfalfa was being made in Potawattamie Co., Ia., last week.

Baker, Ore., is buying alfalfa hay. The first crop is stacked and quoted at $18@20.

The portable alfalfa mill owned by Powers & Reynolds is now operating in San Joaquin Co., Cal.

Farmers are hauling a fair grade of mixed alfalfa and timothy hay to Rapid City, S. D., getting $20 a ton.

A stockman from Moorhead, Ia., reports that "alfalfa is growing so fast it takes all our time to cut it."

Dairymen of Lewis and Clark Co., Mont., are buying alfalfa hay from Idaho, paying $21@22 laid down at Helena.

A heavy crop of both prairie and alfalfa hay was reported from Pomona, Kans. Two cuttings have been made of alfalfa.

The alfalfa acreage in Kentucky is reported considerably increased this year. The first cutting ran about 1½ tons per acre.

The first crop of alfalfa in Brown Co., Nebr., is reported harvested in good condition and the second crop also is fine hay but less abundant.

Oklahoma City reports hay balers busy all over that county with the second and third cuttings ready, both of which are better than the first.

The first cutting of alfalfa in Utah was about equal to normal, but very little hay has been cut since. Prices are now at almost exorbitant prices.

It is reported there is considerable alfalfa hay available in the Black Hills of North Dakota, but farmers object to paying freight to deliver it where needed.

The Commissioner of Agriculture of Idaho has published the official grades of alfalfa for that state, being the standard grades used by the National Hay Ass'n.

The first cutting of alfalfa in Sweetgrass County, Mont., is reported as a record breaker both as to quantity and quality, and the second crop is coming on beautifully.

Spokane reports a stronger feeling in the alfalfa market, dealers reporting a good demand from the country for winter feeding. Prices are firm, with an upward tendency.

Mabton, Wash., reports alfalfa moving to coast points; growers, however, are not offering hay very freely, expecting higher prices, and No. 1 hay is already scarce at $21@22.

Alfalfa in Madison Co., Nebr., is reported the best in recent years. The second crop ran from 1½ to 1¾ tons to the acre. Last year five cuttings were made on some lands.

Idaho Falls reports alfalfa held at $20@25 in the stack and no shipments will be made this year, and if the winter is at all severe feeders will have to buy from the outside. Only one cutting has been made so far.

Yakima, Wash., reports the second cutting of alfalfa under way with the quality much improved. Offerings of hay at $15@20 f.o.b. shipping point based on quality and percentage of cheat. No. 1 alfalfa held at $22@23.

Although the army worm worked in the second crop of alfalfa in Merrick Co., Nebr., the crop is coming on much better than expected and what should be a third cutting is expected to run as well as the first, which was one of the best ever raised in the county.

The state dairy commissioner of Idaho says that a thousand tons of alfalfa hay will probably be shipped to Helena from Boise by dairymen of Lewis and Clark County. This hay can be laid down at Helena at from $21 @22 provided the Government grants the proposed half rate on feed shipments into the state.

The second cutting of alfalfa, according to the Kansas report last week, although delayed in many localities because of army worms, will probably yield all told 1,158,600 tons of hay of excellent quality or an average of a little under a ton to the acre. Inquiries as to damage by the army worms disclose the fact that a loss of one cutting for the season was sustained in numerous places; that the plants in some fields have been permanently injured and that limited areas in scattered localities will be plowed up.

The second crop of alfalfa is large in Custer Co., Nebr., and ready to cut about a week ago. In Flat Co., Neb it is reported not much wild hay is le but alfala is the best crop in years. T first cutting yielded about two tons the acre and the second was rea about a week ago and was nearly large and even of better quality.

CLIMAX SUPERFINE BRAND.

You know there are lots of wise birds in this world, ranging from the owl down. We have made quite a study of birds because the scarecrows in the fields and the particular preference for certain seeds and crops evidenced by certain birds help us in our seed business.

Our friends above, an eagle and a crow, sitting on a fence overlooking a broad field of fine timothy, are sizing up the situation.

The crow says to the eagle, "You may be the king of birds, but look at the crop that Small's Woodpecker Brand produced."

Now, as a buyer of seeds, we ask you frankly whether you are willing to parallel your good judgment and seed selection ability with the crow? If you agree with him, ask your dealer for Small's Woodpecker Brand of timothy seed.

Beans and Potatoes

The bean crop in Michigan is slow ıd very much in need of rain.

Both early and late potatoes have ffered serious setbacks from lack of in in Iowa.

The potato shipping season in the rkansas Valley closed about July 10, e season being one of the best on ıcord.

Late potatoes seem to be growing mewhat better in Michigan but the rly crop is drying up, says the Michi- n Weather & Crop Bulletin.

Public warehouse men, track buyers, ain dealers and brokers are now com- lled to take out state licenses in Mon- na and file bond in sums ranging ɔm $10,000 to $100,000.

G. A. Nahstoll, who has been con- ıcted with the Bureau of Markets at ıshington since its organization and ɔviously was with the Grand Junction uit Growers' Ass'n, has become a ımber of the firm of Chase, Rupp & hstoll Produce Co. at Delta, Colo., olesale fruit and produce merchants.

BEAN SITUATION.

SMALL BEAN ACREAGE.

MICHIGAN (2).—We have the small- acreage we have had in many years. ere are only a few pieces of beans ound here, but what few there is, ey are looking good. We understand ut upon close examination that the ns are only setting from two to four a pod. There will be less beans to p from our territory than we have l for years.—*D. Mansfield & Co., per Mansfield, Remus, Mich.*

GOOD DEMAND FOR BEANS.

MICHIGAN (8).—The heaviest stocks beans have been held in the Thumb, ere usually the highest prices are be- paid to the grower. Within the ut week or ten days we have had a y heavy demand and the prices have anced very materially. At these ancing prices visible stocks have ctically been exhausted. Growers still holding a few for more money, if the price to the trade advances $8.50 or $9 we believe the entire ks in this part of the state could cleaned up by the last of August.—*n C. Liken & Co., Sebewaing, Mich.*

EAN AND POTATO PRICES.

Quotations follow for lots of good lity and condition beans and pota- s, sacked, per cwt., unless otherwise ed, as of July 26:

ns—

uffalo—Marrows, $10@10.50; mediums, $7.50@8; pea beans, $7.50@8; wh. kid- ney, $11@11.50; red kidney, $11@11.50.

icago—Prices firmer. Pea beans, hand- picked, ch. to fancy, $7.75@8.25; fair to good, $6.50@7; brown Swedish, $6.50@7; red kidneys, $11@11.50.

ncinnati—Navies, marrowfats, $12.50@ 12.75; red kidneys, $12.50; limas, $10@ 10.50; pintos, $7.50.

nver—Pintos, paid to jobbers, $4.25@ 4.50; navies, $6.50@8.50; limas, $9@10.

troit—H.-p. pea beans, $7.65@7.80.

nneapolis—Navies, $8; soy beans, $5; brown beans, fcy., $6; limas, $11.

ntreal—The market for beans is firm, a car of handpicked being sold at $4.85 at the beginning of the week, but ear lots of Ontario handpicked are worth $5.00 today. Three pound pickers have sold at $4.75 and Quebec beans are steady at $3.75 to $4.00.—Trade Bulletin.

w York—Calif. limas, $9.50; pinks, 7.25; ch. marrows, $11.50@11.75; fair, 10.50@11.25; ch. pea beans, $7.75@8; ma. wh. Calif. $7.50@7.75; red kidney, 12.75@13; wh. kidney, ch., $11.75@ 2.25.

n Francisco—Limas, $9; lge. wh., $5.75; ma. wh., $6.50; black eyes, $4.50; pinks, 5.60; red Mexican, $4.75; cranberries, 5.75; red kidneys, $11.50; teparies, 2.50.

Louis—Quote c. lts.—ch. h.-p. Mich., 8; prime ma.-p., $7.75; orders and small ots higher; pinto beans, $6 per cwt. rom store—Scotch peas, 7½c per lb.; plit peas, green, at 15c, and yellow at ½c per lb. Per cwt.: Calif. black eyes, 5.50; ch. limas, $10; Calif. pinks, $7.75; white, $8.—Market Reporter.

Peas	208,250	235,906	— 27,656
Mixed grains	877,240	921,826	— 44,586
Hay & clover	10,472,700	10,544,625	— 71,925
Alfalfa	192,480	196,423	— 3,983
Potatoes	692,900	735,192	— 42,292

The Department of Plant Pathology, University Farm, St. Paul, Minn., reports that very recently several representatives of leading grain firms of Minneapolis and St. Paul had brought to the Department diseased heads of wheat, requesting information as to the nature of the disease. This was pronounced to be wheat scab, which is found to be very prevalent in the Northwest, especially in Minnesota, where the Marquis wheat has been more severely affected than any other variety.

Feedstuffs

The Saunders Produce & Feed Co. has been incorporated at Ashland, Ky., with a capital stock of $10,000.

C. W. Marlin has moved his wholesale flour and feed business into a new building at Trenton, Mo. He will confine his business entirely to the wholesale grade and cover the entire northwest Missouri territory.

New York Feed Dealers at Jamestown.

A meeting of the Mutual Millers & Feed Dealers Ass'n of Western New York and Northwestern Pennsylvania was held a few days ago at Jamestown, N. Y. The morning session was addressed by Geo. A. Chapman of the Quaker Oats Co., who was followed by Sec'y Brown of the American Feed Mfrs.' Ass'n. Other talks were made by Geo. H. Strong and Frank C. Jones, treasurer and secretary, respectively, of the Eastern Federation of Feed Dealers. The afternoon session was held on a steamboat making a circuit of Chautauqua Lake. The feature of the closing session was an address by Prof. E. S. Savage of the feed department of Cornell University, the subject being "The Service a Farmer Expects from a Feed Dealer."

Cottonseed Feed Prices Higher.

KANSAS CITY, July 26.—A better inquiry is noticeable in the market for cottonseed cake and meal in Kansas City. But jobbers and crushers are not interested in the inquiries, having practically no cake or meal to offer for immediate shipment. What little cake is held in the trade is quoted around $80 a ton for 41 per cent protein, basis Kansas City. The rebound in cattle prices, making summer feeding of cake more profitable, accounts for the inquiries from graziers for cake.

Bids are being sought for new crop cake and meal for fall delivery, but buyers are not eager to take hold at present quotations. The market is quoted around $80 a ton for 41 per cent cake for October, November and December shipment, $75 for 38.5 per cent and $70 for 36 per cent, these prices f. o. b. mills.

English Cake Market.

A trade contributor to the London *Grain and Seed Reporter* under date July 4 said as to feed concentrates:

LINSEED CAKES.—We regret that instead of the trade being able to offer more freely, the crushers here and elsewhere have had to withdraw altogether from the market and the seed they have in hand will have to be set apart for cakes to be made and stored for contracts for autumn and winter months. Foreign makes still command much higher prices than these nominally ruling here; it is therefore very difficult to bring about business.

COTTON CAKES.—Any offerings are held for prices which are much beyond their intrinsic value, and these, buyers very reluctantly pay, but the supplies being so very small all cakes are disposed of as offered. There has just been another arrival of Egyptian cotton cakes; it is uncertain when these will be taken out of the ship, and from past experience nothing will be done until the cakes are ready for delivery.

Other varieties are equally scarce and firm as to prices.

Australian Mill Feed Situation.

Flouring mills in Melbourne, Victoria, have cut down running time to one 8-hour shift owing to lack of government orders. There is plenty of flour but the reduced output has created a crisis in mill feeds, which as a source of embarrassment for poultry and pig feeders and also for dairy farmers, will be accentuated as a consequence of the partial shutting down of the mills. It is now proposed by the millers that the mills should grind wheat on behalf of the government, and the flour produced will be held by the authorities for shipment when the outlet and tonnage are available. It is claimed that wheat keeps better in the form of flour than in the form of grain, and, furthermore, there would be less loss from other causes. With regard to the bran and feeds produced, the millers would be prepared to pay the government a stipulated sum for every ton of flour produced, so that the government would get a monetary return which otherwise would not be the case were the wheat not ground.

FEED MARKETS.

MEMPHIS.

Memphis, July 26.—Activity in feeds is confined almost entirely to the mixed varieties, for there are limited supplies of the others. Those who have any cottonseed meal left have been obtaining $76 a ton for 7 per cent, but sales have been small. Good demand has been reported for 20 per cent cotton seed meal feed and it has been selling around $55 a ton. Mixed feed makers are all running nearly to capacity and still all of them are reported behind in filling orders. They are still turning out the oats feeds largely because of the relative cheapness of that grain compared with corn. Mill feeds have continued scarce and advanced several dollars a ton. The big demand for balanced hog feeds has caused good demand for shorts, peanut meal and cotton seed meal.

NEW YORK.

New York, July 26.—Mill feed advanced during the week on light offers from the mills and on evidences that the mills were securing sufficient demand in the West to absorb the greater portion of their output. The inquiry was slow here as buyers are looking for increased offers of new feed and are, consequently, taking only small amounts to fill their most urgent needs. City bran was quoted at $45; middlings, $55, and red dog $67 per ton, while Western mills wanted $46.50 for bran, $56.50 for middlings and $68 for red dog.

BALTIMORE.

Baltimore, July 26.—All lines of feedstuffs have tightened up considerably in the local market during the past week and as prices advanced the offerings, if anything, became lighter. There is a fair demand here for bran and middlings, and Western advices are firmer. Quotations are: Western spring bran, per ton, in 100-lb. sacks, $45@46; Western middlings, per ton, in 100-lb. sacks, $52@53; city mills' winter wheat bran, per ton, in 100-lb. sacks, $58; brown middlings, per ton, in 100-lb. sacks $58; white middlings, per ton, in 80-lb. sacks, $65@68.

MONTREAL.

Montreal, July 25.—The market is quiet and unchanged, sales being reported at $41@42, and shorts at $43@44. Mixed grain moullie has sold at $64@65, and mixed moullie at $48@50 per ton. Dairy feed has sold at $49@50 per ton.—Trade Bulletin.

CHICAGO.

Chicago, July 26.—The mill feed supply is not equal to the demand which is very strong. Prices are higher, sacked bran quotable $43; middlings, $56. Cottonseed meal stocks are light and the market is firm and higher, quotable at $82.50.

PITTSBURGH.

Pittsburgh, July 26.—There is very little to the feed market at present, with arrivals light and demand even lighter. Only 7 cars of all kinds of feed were bulletined at the exchange during the last period, the bulk of this supply being white middlings. There is some bran but scarcity in this grade of feed keeps prices high and the demand light. Quotations on feed supplies range from $34 to $50@55 a ton, according to conditions.

ST. LOUIS.

St. Louis, Mo., July 26.—According to well posted feed dealers there is the most urgent demand ever known in this market for feeds, and prices have broken all previous records. Offerings are light, and are quickly taken. Prices are as follows: Bran, $41.00@43.00; middlings, gray, $58.00@60.00; brown, $55.00@56.00; mixed feed, $49.00@50.00; hominy feed, $73.00; barley feed, $60.00@61.00; oats feed, $24.00@25.00 per ton.

PHILADELPHIA.

Philadelphia, July 26.—The market for feed stuffs is strong and higher again under a good, active demand and light offerings, prices showing an advancing tendency. The following quotations are for carlots to arrive and in 100 lb. sacks: Winter bran, per ton, $48@49; spring bran, $47.50@48.50; standard wheat middlings, $58.50@59.50; flour middlings, $63.50@65; red dog, $68@69.50; shorts, $60@61.50; low grade flour, $71@72.50; rye middlings, $55@56; fine yellow hominy, $76.50@77.50; fine white hominy, $77.50@78.50; reground oats feed, $32.50@33.50; cotton seed meal, 36% protein, $80@82.50; cotton seed meal, 41% protein, $85@87.50; cotton seed feed, 20% protein, $62@64.50.

Nashville.

Nashville, Tenn., July 28.—The feed situation is strong. Flour mills are sold ahead some weeks on wheat bran and shorts, and there is excellent demand for other ground feeds. Quotations: wheat bran, 100-lb. bags, per ton, $42.70; shorts $56.70; horse and mule feed, $52@65; dairy feed, $53@65; hog feed, $64.

DULUTH.

Duluth, July 26.—The feeds market is marking time here at present. Operators are buying only from hand to mouth awaiting a lineup after the harvesting of the new season's crops. Millfeeds are scarce as the mills are operating at a low basis owing to the difficulty being experienced in obtaining supplies of wheat to keep them running at any substantial proportion of their capacities. Quotations are firm and unchanged through, the list as follows:

Bran, per ton, $38; ground oats, per ton $48.25; No. 1 ground feed, per ton, $62.50 No. 2 ground feed, per ton, $58.75; No. ground feed, per ton, $55.25; shorts, per ton $48; red dog, per ton, $60; Boston mixed per ton, $44; cracked corn, per ton, $69.25 rye feed, $38.

MILWAUKEE.

Milwaukee, July 26.—The mill feed market is stronger and additional sharp advances are noted in quotations this week A strong demand has developed both for immediate and deferred shipment, buyers taking stocks for two or three months ahead. The present production is seasonably light so that the demand exceeds the supply and prices continue firm to higher Current quotations are: Bran, per ton, $4@42.50; standard middlings, $53@54; flour middlings, $58@59; red dog, $63@64; hominy feed, $76.50; rye feed, $51; old process oil meal, $86.50; cotton seed meal, $86@93 brewers' dried grains, $59; gluten feed August, $65, all in 100-lb. sacks.

BOSTON.

Boston, July 26.—The market is higher on all grades of wheat feeds with offerings light and a good demand reported. Jobbers willing to hold of limited amounts at present prices. The following prices were quoted at the close: Bran, spring sacked, $47.00 per ton; bran, winter sacked, $48.00; middlings, sacked, $57.00 to $61.00; mixed feed, sacked, $55.00 to $59.00 gluten feed, sacked, $72.12; red dog, sacked $68.00; second clear, sacked, $71.00; stock feed, sacked, $68.50; oat hulls, reground sacked, $31.00; hominy feed, sacked, $77.40 cottonseed meal, sacked, $80.00. Receipts for the week ending July 26 were: 115 tons

NEW ORLEANS, LA.

New Orleans, La., July 26.—During the past three days bran has advanced 15c per hundred, while some sellers are willing to entertain trading at $2.15 to $2.16 per hundred, tagged, and are now indicating from $2.25 to $2.30, tagged, delivered New Orleans, for August and September shipment their option. Shorts are hardly obtainable. Prices on gray range from $3.00 to $3.05 per hundred, tagged, delivered; brown shorts about 10 to 15c per hundred less.

RICE
RICE BRAN RICE POLISH
RICKERT'S RICE MILLS
NEW ORLEANS, LA.

LOUISVILLE, KY.

.ouisville, Ky., July 27.—There is a good nand for millfeed, but supplies are low, lls are oversold and not quoting, and vement in a jobbing way is light. There also a big demand for hog, poultry and nufactured stock feeds.
acked quotations are—Bran, $45.50 per ; mixed feed, $50.50; brown middlings, ; gray, $60; hominy feed meal, $73.

MINNEAPOLIS.

linneapolis, July 26.—Owing to the ex nely sharp demand and light offerings feed prices are bulging again. Mills sold out and have nothing much to offor immediate shipment. Numerous inies for fresh supplies have been reed by wire in the last week. Shipping ctions are good and the output of the s is put in transit promptly. Heavier les are in the best demand, but all ies are readily taken. Brokers say they get almost any price for the feed they to offer. Quotations in carload lots, b. Minneapolis, in 100-pound sacks: n, $40@41; standard middlings, $50@51; middlings, $55@56; red dog, $61.50@63; nd barley, $55@56; rye middlings, $49

Montana Stock to Be Moved.

rrangements have been made to nsfer several thousand head of cattle sheep from Montana to pastures in nesota, as a solution of the prob- of furnishing pasturage to Western hers and also to those seeking feedırrangements. It is reported that al shipments consist of 7,000 sheep h are now en route to the district h of Cloquet, Minn., and another of) to Algier. Other shipments are ected to follow. It is proposed to g into use the burned-over lands of se Lake section, and also cut-over ons and other pasture land in the hern part of the state.

LFALFA IN SOUTHWEST.

By Sanders Sosland.

uality of the alfalfa from the sec- crop already received in Kansas is the best on record for this cut- ' declared F. F. Bushmeyer of E. uce & Co. "The hay was more uni- in color and more leafy than the ge second cutting of the plant. tless this condition resulted from lentiful supply of moisture in the during the growth of this crop and ery favorable weather during the ıg period. It is probable that farmave held back much of their cheapades of alfalfa, and this is also true her varieties of hay, taking adge of the present range of prices iling on the better grades. There broad demand for hay, with ship- s being made to a wide and scatterritory."
alfa millers of the South, South- nd the East are expected to play portant part in the alfalfa market ear. With corn and other whole s and grain feeds at near record , and no bright prospect for any il declines for some months, al- meal and mixed feeds will meet ı broader demand. Already there is inquiry from mills for good quality ı.
t lack of cars is affecting the nent af alfalfa and other varieties to market is the general report by market interests returning visits in Kansas, Missouri, Oklaand other Southwestern states. shippers in Kansas are complainer the scarcity of cars for movheir hay to market," declared J. North of the Midwest Hay Co., an extended trade tour of South- ı Kansas. "There are large quanof hay to be moved to market, s only recently having completed second cutting of alfalfa. Many ıxious to take advantage of the ling range of prices, and are makmands upon the railroad agents s. But in a majority of instances, is being given preference in the t movement, the carriers even tering difficulty in meeting the ments of the grain shippers. It bable that within the next few the receipts of hay in Kansas ill begin to reflect the scarcity s at interior shipping points of outhwest. Railroads are using ar suitable for loading grain in wheat to terminal points."

Alfalfa Department

St. Louis Alfalfa Market.

St. Louis, Mo., July 26.—In sympathy with other feeds, alfalfa feeds are strong, but with the exception of meal, prices show little change. They are as follows: Molasses grain mixed horse feed, choice, $61; No. 1, $52; No. 2, $48 per ton; straight alfalfa molasses feed, choice, $45; No. 1 $42; No. 2, $39 per ton; alfalfa meal, choice, $41; No. 1, $40; No. 2, $34 per ton.

Alfalfa hay is firm and in good demand, but low grades are slow of sale at a heavy discount. Offerings are practically all new hay. Quotations are: No. 1, $35 to $36; No. 2, $30 to $32; choice, $36 to $37.

Alfalfa Prices.

The Bureau of Markets reporting on alfalfa prices throughout the country has the following as of July 26:

Southern.—Atlantic—Ch. alf., $38 del., No. 1, $36@37. Augusta—Stks.-rcts.-dmd. gd., bulk coming from Okla.-New Mex., ch. alf., $37; No. 1, $34. Savannah—Stks. fr., rcts. gd., dmd. lgt., bulk arrivals from Kans.-Ariz.; No. 1 alf., $35.50. Macon—Stks.-rcts. lgt., dmd. fr., bulk arrivals from Kans. City-Okla., ch. alf., $35; No. 1, $33. Pensacola—Ch. alf., $33.50; No. 1, $33. Jacksonville—Alf. ample stks., rcts. mod., dmd. lgt., bulk from Kans.-Okla. ch. alf., $34; No. 1 alf., $33. Meridian—No. 1 alf., $35. Vicksburg—Stks. alf. sma., dmd. lgt., arrivals mostly from New Mex. ch. alf., $31. Birmingham—Stks. gd., rcts. dmd. gd., bulk from New Mex., ch. alf., $37; No. 1, $35.50. Greensboro—Ch. alf., $38. Wilmington—No dmd. for alf.

Improved Demand for Alfalfa Meal.

Kansas City, July 26. — Improvement was evident in the alfalfa meal trade in Kansas City this week. Buyers displayed more eagerness for supplies, and purchases were made on a higher level, at an advance of $1 to $3 a ton over a week ago. Mills offered only small supplies, being restricted in their activity by difficulty in obtaining hay in the country. Sales were made to St. Louis territory, and to far Southeast and East.

Prices on alfalfa meal in Kansas City, in carlots, new sacks, per ton, closed as follows: Choice, $38@40; No. 1, $35.50 @37.50; No. 2, $32@34; brown, $28@30.

High prices for corn and oats and other grain feeds, including bran and shorts, are stimulating demand for alfalfa molasses and alfalfa grain molasses feeds. Hog fatteners are among the heavy buyers. Small sales were made to the East, but the bulk of orders were in territory west of the Mississippi river. A rise of $1 to $2 was quoted. No. 1 alfalfa molasses feed closed at $41@42; No. 2, $38@39; brown, $35.50@37; alfalfa grain molasses feed, $48@60.

THE ALFALFA SITUATION.

ALFALFA SHORT.

Idaho (9).—There is not enough hay here for local requirements.—*Idaho Alfalfa Milling Co., Shelley, Idaho.*

SOUTHERN COLORADO ALFALFA.

Trinidad, Colo.—The first crop alfalfa was put up in good shape; the second is being harvested now under fair weather conditions with average yield. The native vega is in good shape and will be harvested in the near future. Very little alfalfa has moved to out points as yet.—*Bancroft-Marty F. & P. Co., Trinidad, Colo.*

ALFALFA SHOULD BE STORED.

Weather in the alfalfa hay section, the past few weeks, has been ideal for putting up hay. The market for alfalfa hay is now on a basis with mill feeds, in fact, lower than bran. In our judgment, alfalfa should be bought and stored at present values.—*Nelson Grain Co., Kansas City, by E. L. Barr.*

ALFALFA RECEIPTS LARGER AND BETTER.

Kansas City.—Receipts of alfalfa hay have been larger this week, and quality much improved, being the best on the crop so far. Some really excellent hay has arrived—very dry and high colored. The demand has been sufficient to take care of all arrivals and the market today (July 26) is strong. Those in touch with the country advise us that farmers are reluctant sellers and many are refusing to contract their alfalfa, as they want higher prices than the present market affords.

There is a good demand for all grades of alfalfa meal and we can easily dispose of our full output. Meal prices have advanced quite sharply this week.—*Missouri River Alfalfa Milling Co., Kansas City, Mo.*

Alfalfa in the Pacific States.

The recent crop report of the American Steel & Wire Co. gives the following data as to hay in the Pacific States. In Santa Barbara, Cal., and adjoining counties the hay crop is above normal and much better than was expected. In the Sacramento Valley the alfalfa will be above normal, dry farmers having had two cuttings and some will cut a good third. Irrigated lands are doing well. The third cutting has been made and the fourth is nearly ready. In central and western Washington the hay crop was in progress two weeks ago, the crop being very satisfactory; oats and clover being especially fine. In eastern Washington and northern Idaho pastures have been drying up noticeably and the problem of transferring herds is now on. In western Oregon a large percentage of the hay crop has been baled. In Utah and southern Idaho alfalfa is only in fair condition for lack of water.

Hay Department

Pastures and hay are reported very fine in the Elkhorn Valley of Nebraska.

Recent weather has been favorable in Wyoming for haying, but the crop is very poor.

Grass in the Sand Hills of Nebraska is reported the best seen in the country for several years.

LaBette County, Kans., reports a heavy crop of prairie hay. The hay is running over a ton to the acre.

Pasture and water have become so scarce in parts of Montana and Wyoming that stockmen are advertising to move their herds eastward.

Twin Falls, Ida., reports hay scarce in that neighborhood, due to the fact that large tracts of alfalfa were plowed last season to make room for wheat.

Hay and pastures are reported to be in extra fine condition in Burt County, Ia., but it is expected that as many cattle will be fed this coming winter as were fed last year.

It is reported from Butte County, S. D., that the ranchers will have to buy hay, there being no wild hay at all, and contracts are now being made at $20 per ton in the stack.

The annual hay harvest in Woodson County, Kans., is on and farmers will have plenty of help to put up the crop. This is one of the largest hay counties in Kansas and the crop is fine.

Yields of prairie hay in Kansas, according to the state report, averaged 1.17 tons per acre, the total production being estimated at 1,186,000 tons, compared with 694,000 tons a year ago.

The Kelso Feed & Fuel Co., Kelso, Wash., has just begun the construction of a new warehouse 30x60 feet adjoining its present warehouse and when completed will be used for the storage of hay.

Walworth and other southeastern counties of Wisconsin are credited with one of the biggest hay crops, clover and timothy mixed, in their history. June weather alone, it is said, added 50,000 tons of hay to the Wisconsin crop.

Well posted hay men in Intermountain country covering Utah, Idaho and western Wyoming estimate only 60 per cent of a normal hay crop this year. In some sections not over 10 per cent will be harvested.

There is reported to be plenty of hay in Boone County, Ia., the acreage being about as usual, but the yield per acre will be heavier than last year. Little hay, however, is offered for sale. Most of it will be fed.

L. H. Haigh has moved to Wapakoneta, Ohio, where he will engage in the hay and feed business, representing S. W. Kemp & Co., of Spencerville, Ohio. Mr. Haigh was formerly in the same business at Van Wert, representing S. W. Kemp & Co.

On July 18 Federal officers at Phoenix, Ariz., arrested Vernon Peters of Tempe, Alfred J. Peters and J. M. Jaggers of Masa, hay dealers, on allegations of false grading of hay and conspiracy to defraud the United States Government in connection with shipments of hay to army camps.

One of the finest hay crops ever grown in St. Louis County, Minn., has been grown and farm hands and teams are necessary to make the crop. Hundreds of meadows in the county are laden with a splendid crop, many of them yielding two to two and a half tons to the acre, both wild and native grasses. The quality, too, was never better.

The Raymond P. Lipe Co., Toledo, has disposed of its St. Albans, Vt., hay transfer house to A. N. Deringer, formerly in the employ of this firm, who contemplates entering the hay business. This warehouse was built for the purpose of taking care of the trade in the New England States, but the Raymond P. Lipe Co. now expects to take care of its trade in the New England States by the grading of hay at original point of shipment instead of at a transfer warehouse, thereby avoiding the excessive cost of regrading hay in transit. This will also give their customers quicker service.

Suggestion to Hay Makers.

C. M. Rice of the Nebraska Hay Co., Omaha, visited Chicago trade on the return trip from the Detroit National Hay Convention. He displayed with justifiable pride a gold watch given him as the best membership getter of the Association. He was also chairman of state vice-presidents last year. In commenting on the Western hay crop, fully covered in this column each week, he added, however, the very good thought that farmers would make more money by being less in a rush to market new hay. It should be kept in the stack longer, in order to insure its heating less after it is baled.

Hay in the North Pacific States.

Spokane, Wash., reports new timothy arriving in that market. Seattle reports the Sound hay crop heavy and of good quality, but prices are moving upwards. Great Falls, Mont., reports good inquiry for hay, but not much trading as yet, owing to uncertainty of the feeding demand. At Dayton, Ore., the clover hay crop is reported good as compared with last year and baling now is in progress; growers are holding for $15 in the stack and buyers are not disposed to pay. At Emmet, Ida., the hay crop is reported shorter than last year and unless prices get too high for stockmen there will not be as much hay shipped as last year. Sheridan, Mont., reports that hay will be short in that section. Stevensville, Mont., reports haying under way two weeks ago, but no hay being offered by growers.

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

Congratulations are still being received by C. D. Carlisle on his election to the first vice-presidency of the National Hay Association. In the last few days Mr. Carlisle has received letters of congratulation from citizens of Kansas City and also from hay trade interests in Kansas.

One Kansas City dealer summarizes the prairie situation as follows: "Continued wet weather may affect the color of the crop adversely, but a large yield is already assured. The weather is ideal for harvesting hay in Kansas, but the entire state is in need of moisture. Prairie has made heavy growth, and the fields already harvested ha turned unusually liberal yields."

"Prairie is making the best cr years in Kansas," said John Potu Gueda Springs, Kas., while visiti the Kansas City market. "I belie crop, which I have just finished cu is the best in 20 years. I am jus esting my second alfalfa crop, ow delay due to army worm ravages first two cuttings of alfalfa will a combined yield of two and or tons to the acre."

More normal supply conditio being reflected in the hay trade b arrangement of prices for the v varieties to a level which is a di equal to the differences in feeding a No longer does prairie hay sell premium or more than $10 a ton alfalfa, nor is timothy commanc higher level, as was the case duri period of acute shortage in the and spring months. Alfalfa n selling around $27 a ton for grade, prairie is quoted at a top and $25 to $25.50 is the figure pa No. 1 timothy and clover mixed falfa normally commands a s higher premium than now prevail the other varieties, and the o is held in market circles that th mal difference will soon be witn One of the anomalous features hay trade in the past crop year w unusual position of prices. But the result of an extreme shortag not the indifference of buyers. T decline of more than $20 a ton in within a very short time demons the abnormal position of the wil Alfalfa, on the other hand, follo slow downward tendency.

Will the Southwest yet escape this year? This query is being more generally among the hay tra terests in Kansas City. Not weeks ago dealers were noping cessation of the rainy weather there is general hope for mo "Heavy rains fell over much of the ern half of Kansas, but in the E half it was almost rainless an ground is beginning to get very d cept in a few localities which re rain in the preceding week," sa weekly weather and crop bulletin Kansas State Board of Agricu "The second crop of alfalfa is d cut, but the third crop is makin good growth. Pastures are still i

ondition and need a soaking rain." The Missouri report says: "A large amount of hay of excellent quality is being cut and stacked, the weather being ideal for this work. In Buchanan county a third crop of alfalfa is nearly ready for cutting. Pastures as a rule continue good, but are turning brown in central and southeastern sections. Good rains would be highly beneficial." In Nebraska, "haying continues and the yield is good." The weekly report says "Pastures and grasses are in good condition."

OMAHA HAY NOTES.

J. A. Pederson, Correspondent.

M. J. Hyland of the Omaha Hay Co., left for the East to spend his vacation, last week.

C. M. Rice of the Nebraska Hay Co., arrived home this week from the National Hay Convention and reports that he had a pleasant trip.

O. B. Nelson of Great Falls, Montana, was a visitor on the hay market this week looking over the different kinds of hay.

Hay Markets

MEMPHIS.

July 26.—Receipts of hay are still large one result is lower prices. The large portion continues to be alfalfa, although the timothy and clover mixed is coming. The latter is relatively steadier than the other. Demand has been somewhat filled and in spite of the firmness in grains recessions have had to be made to keep stocks from piling up. For the week receipts were about 200 cars. Most of this came in two roads. Quotations: Choice alfalfa, $31; No. 1, $28; No. 2, $21 and $24 asked. Timothy, No. 1, $29.50 to $31 asked; No. 2, $26 bid.

PITTSBURGH.

July 26.—Hay has had a slight advance during the past few days with the best timothy in good demand at the higher prices. This market is about bare of all grades and arrivals are being placed at top prices. The receipts continue light with 600 tons registered for the period against 1,188 tons a year ago. On account of the extreme scarcity of old grades a few sales of good new timothy arriving here are sold at from $38 to $39 a ton. It is expected, however, that lower prices will prevail as soon as new hay starts to move freely. Demand is for present needs only. The straw market is slightly improved, owing to light arrivals and prices are being steady around $11@11.50 for oats; $10@11 for wheat and $11@11.50 for rye.

ST. LOUIS.

July 26.—Receipts of hay are light, and the market is very firm, as there is a good demand for the better grades, but low grades are difficult to dispose of. Choice new hay now sells as well as old. Clover hay is steady, with a fair demand, and moderate offerings. Good clover hay is in demand and wanted. Good prairie hay would sell but offerings are of poor quality, and the market is easier. Track prices are as follows: Timothy, No. 1, old, $37@39, New, $35; Standard, old, $35@36, new, $31@32. No. 2, old, $32@33, new, $27@29; No. 3, $30, new, $26@28, headed, $28@29; new, $27; threshed, $18@21. Light Clover-Mixed, new, $31@32, old, up to $33 for No. 1, old, $29@30, new, $27@29. Heavy Clover-Mixed, No. 1, old, $29@30, new, $27@29. No. 2, old, $26@27, new, $25@26. Prairie hay, choice, $28@29, No. 1, $26@27; No. 2, $24@25. Alfalfa hay, choice, $36@37, No. 1, $34@36, standard, $33@34, No. 2, $28. Prairie, choice, Kansas, old, $26@27, new, $24@26, No. 1, $24@25, standard, $23, No. 2, $18@20 per ton on track. Timothy, scarce and wanted, $9.50@10 per ton.

PHILADELPHIA.

July 26.—Baled Hay and Straw—As reported there is scarcely any No. 1 timothy hay here and for this description there is a fair demand, and any offerings would command a premium over quotations. The supply is made up of the lower grades which move slowly at inside prices. Straw is a shade higher under light supplies but trade is very quiet. No. 1 timothy hay (according to location), No. 1, $34; No. 2, $36@37; No. 3, $32@33. Mixed Hay—Light mixed, $36@37; No. 2 grades, $31@35. Straw—No. 1 straight rye, $13.50@14; No. 2 straight rye, $12.50@13. No. 1 tangled rye, $13@13.50; No. 2 tangled rye, $12@12.50; No. 1 wheat straw, $12.50; No. 2 wheat straw, $11@11.50; No. 1 oat straw, $12@12.50; No. 2 oat straw, $11@11.50.

OMAHA.

July 26, 1919.—Receipts of both Prairie and alfalfa light. While the demand is not causing the market to decline on prairie hay, alfalfa is higher. Choice Upland Prairie Hay, $21@23; No. 2 Upland Prairie Hay, $16@20; No. 3 Upland Prairie Hay, $9@14; No. 1 Midland, $20@22; No. 2 Midland Prairie Hay, $16@19; No. 1 Lowland Prairie Hay, $15@18; No. 2 Lowland Prairie Hay, $12@14; No. 3 Lowland Prairie Hay, $8@10; Choice Alfalfa, $26.50@27; No. 1 Alfalfa, $25.50@26; Standard Alfalfa, $21.50@25; No. 2 Alfalfa, $17.50@21; No. 3 Alfalfa, $14@17. Oat Straw, $8@9; Wheat Straw, $7@8.

OMAHA, NEB.

July 26.—Hay is firmer and in good demand. There is a decrease in offerings here and dealers have trouble satisfying the wants of their customers. Quote: No. 1 timothy, $32.50@33; standard timothy and light mixed, $31.50@32; No. 2 timothy, $30.50@31; No. 3 timothy, $25@28; No. 1 clover, $28@30 per ton.

DULUTH.

July 26.—Trading in hay has been of a limited nature of late as a result of offerings of loose hay from points near at hand and from the vacant lots and tracts in close vicinity to this city. Dealers reported practically no demand and receipts during the six days were confined to just three cars. The crop is heavy and lower prices are looked for. Quotations were nominally unchanged as follows: No. 1 timothy, per ton, $26@27; No. 2 timothy, per ton, $24@25; No. 1 mixed timothy, per ton, $23@24; No. 2 mixed timothy, per ton, $20@23; No. 1 prairie, per ton, $25@26; No. 2 prairie, per ton, $22@24; No. 3 prairie, per ton, $18@20; No. 1 midland, per ton, $20@21; No. 2 midland, per ton, $10@12; rye straw, per ton, $9@10; oat straw, per ton, $9@10.

MILWAUKEE.

July 26.—The local hay market continues steady with prices firm at last week's quotations. The present level will probably hold until the splendid, big new crop starts moving onto the market. Weather conditions for the bumper crop continue favorable. Current quotations are: Choice timothy hay, $28@28.50; No. 1, $27@27.50; No. 2, $23@24.50; new timothy, $26@28; No. 1 clover, $20@21; light clover mixed, $22@24; red top and timothy mixed, $22@24; stained timothy, $12@15; marsh feeding, $10.50@11; packing, $9@10; rye straw, $9.50@10; oat straw, $9@9.50.

BOSTON.

July 26.—Receipts of hay were light during the past week, but the demand ruled slow and there is now an accumulation at all the railroad terminals and outside points, especially of hay that will grade No. 2 or poorer. Prices have been materially reduced the past week, but receivers have been anxious to save storage charges and sales have been made even below the prices now quoted. Buyers are slow about purchasing and are taking the smallest amount of hay possible to carry them along until new hay comes on the market. Up to the present time the amount of new hay arriving here has been practically nothing, although there has been more or less inquiry from the trade. The condition of the hay arriving in other markets is reported as not encouraging, much of it being heated and unsound. There is a small amount of old No. 1 timothy hay offering, the market ranging at $38 to $40 per ton. No. 2 timothy is lower at $32 to $34. No. 1 Eastern ranges at $31 to $34 with No. 2 Eastern at $28 to $30; No. 3 grades about $26 to $28. Clover mixed takes a wide range at $26 to $30 with fine hay held at $23 to $25 for poor to choice. Packing hay is lower, being quoted at $17 to $19. Receipts for the week ending July 26th were: Local, 52 cars.

The straw market is quiet with offerings equal to the demand. Choice rye straw is quoted at $16 per ton as an extreme price, with oat straw easy at $12. Receipts for the week ending July 26th were: Local, 1 car.

NEW ORLEANS.

July 26.—The West, as yet, has not started to move hay with freedom, and, in consequence, receipts here are not very heavy. No. 1 timothy quoted, $33.50; No. 1, $32.50 and No. 3, $31.50. Texas prairie hay offered from $20 to $22 per ton delivered. Alfalfa hay quoted about $28 to $29 for No. 1.

BUFFALO.

July 26.—No demand here and with new about ready to be marketed prices are very unsettled. Old No. 1 is quoted at $32; No. 2, $30 and No. 3, $28. Farmers who were asking $45 for loose hay are unable to get above $25. Some fine new hay has been secured this year. No offerings of straw.

LOUISVILLE, KY.

July 27.—Old hay is now very scarce, and there is practically no movement as supplies are not to be had. New hay is moving better, but dealers are still afraid of it. Prices on old hay are not quoted any longer, and new hay prices have advanced $5 a ton to striking distance of old hay prices as on last quotation.

Quotations, car lots, baled—No. 1 timothy, $33 a ton; No. 2, $31.50; No. 1 mixed, $31; No. 2, $28; No. 1 clover, $24; No. 2, $22; No. 1 alfalfa, $27.50.

ST. JOSEPH.

July 28.—Receipts for the week have increased considerably, especially in the prairie division; however, with the heavy receipts a general steady tone prevails in the trading and a good clearance at prices about 50c lower.

Heavy receipts of tame hay on the market had a tendency to lower prices from $1 to $2 per ton. Indications, however, point to a steady tone the coming week. The demand seems to be increasing and consumers are taking a hold at the prevailing market prices. The continued warm weather will no doubt cause a heavier demand. We are, however, not looking for any material changes in prices. Nominal quotations:

Prairie—Choice, $19.50@20; No. 1, $18@19; No. 2, $16@18; No. 3, $10@15. Midland—No. 1, $14@15; No. 2, $10@13. Alfalfa—Choice, $26.50@27; No. 1, $25.50@26; standard, $22@25; No. 2, $17@20; No. 3, $11@16.50. Timothy—No. 1, $25@25.50; standard, $23@24; No. 2, $21@22.50. Clover light mixed—No. 1, $24.50@25; No. 2, $21@22. Clover—No. 1, $20@21; No. 2, $15@20. Straw, $8.50@9.

KANSAS CITY.

July 26.—Declines of $1 to $1.50 a ton in the better grades of alfalfa, a loss of 50c to $3 a ton on clover mixed and timothy, and a loss of 50c to $1 on clover constituted the price changes on the hay market in Kansas City this week. There was a sharp increase in receipts with arrivals passing the 1,000 mark for the first time in many months. The total receipts were 1,053 cars, compared with 835 cars last week and 452 a year ago. Prairie and timothy showed the largest gain. An eager demand prevailed for alfalfa, with heavy sales being made in the Southwest and East. Lower grades of alfalfa held steady.

Prairie—Choice, $20; No. 1, $18.50@19.50; No. 2, $16@18; No. 3, $8@15.50; packing hay, $5.50@7.50.

Midland prairie——No. 1, $14@19; No. 2, $8@13.50.

Alfalfa—Choice, $26.50@27; No. 1, $25.50@26; standard, $21.50@25; No. 2, $17.50@21; No. 3, $14@17.

Timothy—No. 1, $25@25.50; standard, $23@24.50; No. 2, $21@22.50; No. 3, $15@20.50.

Clover mixed—Light, $25@25.50; No. 1, $23@24.50; No. 2, $17@22.50.

Clover—No. 1, $21@23; No. 2, $13@20.50. Straw, $10@11.

BALTIMORE.

July 26.—The tendency of the general hay market is firmer under a cleaning up of previous accumulations of old hay and only limited receipts of new, the recent spell of wet weather having interfered with the gathering and the movement of

new hay. Demand is fair for the better qualities of timothy and light mixed, and new crop, where it arrives in good order, would sell well up to the price of old hay. Of course, common, low grade, and bad order stuff is still hard to move.

Straw of all descriptions is selling sparingly, in consequence of which the arrivals are ample for present trade requirements. Quotations follow :

Timothy—No. 1, $35@36; standard, $33@34; No. 2, $31@32; No. 3, $27@29.

Light clover mixed—No. 1, $30@31; No. 2, $29@30.

Clover mixed—No. 1, $29@30; No. 2, $25@28.

Clover, nominal—No. 1, $27; No. 2, $25; No. 3, $24.

Straw—No. 1 straight rye, $15@15.50; No. 1 tangled rye, $12.50@13.50; No. 1 wheat, $8@8.50; No. 1 oat, $11.50@12.

NEW YORK.

July 25.—The New York Hay Exchange reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week.....	3,918	240
Receipts last week.....	4,289	300
Receipts Sept. 1 to date....203,410		12,908

Trade has been fair all the week but very little if any improvement in prices was noted until just at the close when values have advanced irregularly $1@2 a ton. There is still the same wide divergence in values of large and small bales, due to the heavy proportion of small baled hay in the receipts, and while there is tendency for prices to draw closer together this has not been reflected as yet in reported sales. Offerings at 33rd St. have been ample for all requirements and there is plenty of hay in sight for this market. New invoices are running off very materially, due to the embargoes, and no river barge has come forward this week. Catskill line boats arrive regularly carrying new hay which is selling largely at $18@19.

Very little No. 1 hay is moving forward and $40 is generally regarded as top though we hear of one sale up to $41, with $37 about top for small bales. Medium and low grades have worked out at all sorts of prices, and it has been only possible to cover the bulk of sales reported in our table of quotations as an index of current values. No. 2 timothy in large bales is selling mostly in range of $35@37, occasionally up to $38 at the close, and we hear of one or two sales of No. 3 today up to $32 with rare business in shipping up to $28. Small bales are still averaging about $5@6 under large though this great difference in values should gradually disappear; our outside quotations on small bales are generally regarded as extreme at the moment though the tendency is stronger and they are justified by reported sales. Scarcely any demand for clover mixed hay at this season of year and it is very slow sale at uncertain prices. A good deal of inferior and damaged hay arrives, showing every degree of inferiority, and this sells at all sorts of prices as to quality.

Rye straw steady and without change; recent carlot business mostly at $13 with jobbing sales up to $14, and oat straw has had sale at $11. Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay.....	$39.00@40.00	$35.00@37.00
No. 2 hay.....	35.00@38.00	28.00@32.00

MONTREAL.

July 25.—There has been a steadier feeling in the baled hay trade since our last report, as the old hay is becoming scarce and this is the class that buyers want and will require for some time, as the new hay will not be fit for baling yet. And as the old crop is pretty well exhausted, what is left is more sought for and prices have a steadier trend. Sales of old crop are reported all the way from $20 to $28 per ton, the quality of course running from poor to ordinary, the average of sales being about $25 per ton . A lot of new hay was brought into the market from the Richelieu district, the seller expecting to receive $40 per ton, but after offering it around he had to accept $25. Considerable hay has been housed, but quite a lot is uncut and on cock in the fields as the season is late.

The receipts of hay during the last week at Montreal were 1,590 bales, against 10,279 bales for the same week last year. The receipts for week ending July 23 were the smallest for that period for many a y showing how close the crop has been up. If country dealers are receiving hay they are not sending it here as not wanted. What hay is selling ranges from $20 to $28 as to quality, average sales being about $25.—T Bulletin.

SAN FRANCISCO.

July 24.—The demand for hay has fair, with the result that receipts been moved without any material culty. Choice quality red oat and w hay has met with quite a good den during the week and although most o arrivals have been of a No. 1 quality, there has been a few cars of the ch

ariety. The country demand has been airly active and considerable hay has ioved in this direction. There has been ery little demand for export, and with ie exception of a call from the Govern- ient for about 1,500 tons of hay and lfalfa there has been nothing particularly iteresting. Some sales of round lots have een reported as having been made in the ountry. Especially is this so as regards lfalfa, which market has taken on con- derable strength and is quoted higher.

CHICAGO.

July 29.—The following is a statement of .e receipts and shipments of hay in tons the Chicago market for the week ending ly 26, also the total receipts and ship- ents of hay from Jan. 1, 1919:

	July 26, 1919.	July 19, 1919.	July 27, 1918.
otal receipts.....	2,089	2,359	5,848
otal shipments.....	293	1,079	533
ecpts. since Jan. 1.	144,660	142,571	202,695
ipts. since Jan. 1.	34,298	34,005	64,814

There has been a good demand for every- ing offered, timothy being strong in de- and and price, but prairie showed signs weakness during the week. Arrivals on onday were very small, only 17 cars of w and 6 of old timothy and 16 of prai- . Everything was sold at the top for e past week with good hay at an ad- nce. Quote Monday as follows:

Timothy—No. 1, $35@37; standard, $33@ ; No. 2, $31@32; No. 3, $25@28; sample,)@27; threshing, $15@20; new, $26@32.
Clover—No. 1 light, $31@32; No. 1 clover xed, $23@25; clover, $15@22.
Prairie—Kansas and Oklahoma, $22@28; va, Minnesota and Dakota, $20@24.
Marsh hay—Feeding, $15@18; packing, @13.
Straw—Rye and oat, $11@12; wheat, $9 0.

Grass and hay are reported very fine d big crops in sight in Cherry unty, Neb. Wild hay will yield about average crop and growers are offer- to contract now for hay within 30 les of the railroad at $30 per ton.

The best grass in many years is re- rted from Harrison County, Mo.

Rock County, Neb., one of the best y sections of the United States so imated, has a light yield this year, the hay is of the most excellent lity, the yield being estimated at over 75 to 80 per cent of the usual p.

Prairie hay in the Pine Ridge Reser- ion country is reported to be fine.

stockman from Ottawa County, a., reports the prairie hay crop in t county as the best in several years, ging over a ton to the acre. The nty is also well supplied with kafir, e and feeds with pastures in good dition.

stockman from Grant County, Neb., orts the hay crop in the Sand Hills year as one of the heaviest ever duced; however, not very much of hay is being baled and probably very little of it will be offered for sale, being used for winter feeding.

The hay crop in Price County, Wis., is reported the heaviest in years. White clover is quite abundant.

St. Louis County, Minn., reports one of the largest hay crops in its history and for the first time in some years the local markets will be more than provided for and no hay will be required to be imported.

The hay crop of Payette Co., Ida., is reported heavy and about two-thirds cut a week ago.

The hay crop in Franklin Co., Ia., is reported good.

Hay is reported good in both yield and quality in Lee Co., Ia.

The hay crop in San Bernardino Co., Cal., has been made and in most cases the crop runs heavier than expected. There is an especially fine crop of oat hay and also of alfalfa. In spite of the large cut, the prices remain high.

A short hay crop is reported from Madison Co., Nebr.

Wild hay in Dundy Co., Nebr., is said to be good, with pastures never in better condition than at present.

It is reported from North Park, Colo., that the hay crop is fully one-third short of normal, which suggests an early movement of cattle.

Wild hay and pastures in Merrick Co., Nebr., are reported good, but damage reported to second crop of alfalfa from army worms.

Four Cent Bread Nonsense.

North Dakota is the largest spring wheat producer. Some politicians there are talking about four-cent bread. They are in control and talk about building municipal elevators and mills. Then they are going to establish bakeries in Chicago and sell bread at four cents. Newspapers publish such talk and create discontent. Four-cent bread is impossible unless farmers sell their wheat at less than pre-war prices. They cannot afford to do so. The people may pay some taxes to help make good the shortages created, but they would soon realize that municipal ownership dreams do not lead to four-cent bread. —*C. A. King & Co., Toledo.*

Corn rates from Argentina to the continent were recently reported firm at $1.19 per bu. to France.

STATE NEWS.

[Concluded from page 37.]

Dewey, Okla.—Harry Stead has completed the building of the grain elevator adjacent to his feed store.

Maplewood, O.—The Farmers Grain Co. has been incorporated with a capital stock of $20,000 by F. A. Weis and others.

Manchester, Okla.—The State Line Grain Co. has been chartered with a capital stock of $15,000 by Guy R. Meyer, J. M. Finn and P. E. Burnet.

Boise City, Okla.—The Prairie Roller Mills has been chartered with $15,000 capital by A. V. Ralston, C. E. Ralston and L. D. Ralston of Boise City.

Wapakoneta, O.—At a meeting of the directors of the Wapakoneta Grain Co., Wm. Taylor was elected president; Louis Nuss, vice-president; Harry L. Crawford, secretary and Jos. Hartaed, treasurer.

OREGON.

Vale, Ore.—The Vale Milling & Elevator Co. has been organized with Warren Armington as manager.

Eugene, Ore.—Kerr, Gifford & Co. of Portland have taken over the plant of the Eugene Mill & Elevator Co. at Eugene, Ore. The capacity of the mill will be doubled.

Salem, Ore.—Articles of incorporation have been filed by the Collins Flour Mills. Incorporators are H. M. Collins, R. M. Crommelin and V. R. Myrick. Capital stock is $300,000.

PENNSYLVANIA.

Galeton, Pa.—Owlett & White have purchased a building and will operate a large buckwheat flouring mill. They expect to install bins that will accommodate from 12,000 to 15,000 bushels of grain.

SOUTH DAKOTA.

Wallace, S. D.—A. T. Faehn has resigned as manager of the Wallace Farmers Elevator Co.

Faulkton, S. D.—Contract has been let by the Faulkton Farmers Elevator Co. for a new elevator to be completed by Sept. 1.

Roscoe, S. D.—Thirty-eight prominent farmers of Roscoe have paid in over $7,000 for the new elevator which will be erected in this town. Work will commence at once.

Foley, S. D. (Mail to Watertown.)—The Farmers Elevator Co. elected the following officers: H. Evanson, president; W. A. Dean, vice-president; W. Siepp, secretary; J. W. Cook, Ed. Vetter, H. Zech and others directors.

TEXAS.

Abilene, Tex.—E. F. Ballard of Dallas is planning to erect a modern flour mill in Abilene.

Waco, Tex.—The Waco Grain Exchange has been incorporated by T. P. Duncan and C. C. Edwards.

Taylor, Tex.—Gottlieb Grain Co. has been chartered with a capital stock of $1,000 by J. G. Gottlieb, C. O. Daliet and Dan Moody.

Belton, Tex.—The mill plant and elevator of the Belton Mill & Grain Co. were destroyed by fire recently. Origin of fire is unknown. Insurance estimated at about one-half of the loss.

Cleburne, Tex.—Morgan Peacock announces that his company's new flour mill in the southeastern part of the city on the T. & B. V. right-of-way is practically completed and will be in operation by the first of August.

Dallas, Tex.—Establishment in Dallas of a cotton and grain brokerage concern with a personal responsibility of the firm members of $300,000 has been announced. The firm, composed of W. F. Hull and M. C. Hull of Cumby, who are moving to Dallas and C. M. Reid, will be known as W. F. Hull & Co. The location of the business will be 1003 Main st.

WASHINGTON.

Mabton, Wash.—The elevator at this place with a capacity of 75,000 bushels has been opened. J. A. Sampson of Pullman is manager.

Mt. Vernon, Wash.—The Fisher Flour Mills of Seattle are enlarging their oat meal plant at Mt. Vernon, Wash. New machinery is being installed and a rearrangement of the mill is under way.

Palouse, Wash.—At the annual meeting of the stockholders of the Palouse Milling Co. July 15, a dividend of 4 per cent was declared, making 12 per cent paid in the 18 months since the company was organized. A. L. Hill was elected president; A. J. Webster, vice-president; J. E. Turnbow, secretary; N. B. Hunsperger, treasurer.

WISCONSIN.

Oconto, Wis.—Work is being pushed on the completion of the grist mill which will be operated on Huron avenue. The stock is held by local and community members.

Casco, Wis.—The Casco Milling & Elevator Co., Casco, Kewaunee Co., has amended its articles of incorporation whereby the capital stock is increased from $25,000 to $40,000.

Kewaunee, Wis.—The W. F. Glandt Co. has been incorporated with $40,000 to deal in farm and dairy products. The incorporators are W. F. Lloyd, W., Selma M., and Ertel C. Glandt.

Black River Falls, Wis.—The Riverside Mill & Elevator Co. has been incorporated with $50,000 capital stock to do a general milling business. J. F. Dunn, P. W. Dickey and Louise L. Dunn are the incorporators.

Plymouth, Wis.—Charles Lee and George Pfeiffer, step-son and son of the late Gottlieb Pfeiffer, are continuing the milling business conducted by the deceased for seventeen years until his death on July 2. At that time negotiations were under way to turn over the business to Mr. Lee.

Visible Grain Supply.

The following table shows the stock of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons, as compiled by the secretary of the Chicago Board of Trade for the week ending July 26, 1919 (000 omitted):

The wheat movement is lax on account of scarcity of cars in the winter wheat section.

Hard wheat is reported in good demand at St. Louis at 1c premium over Government basis.

The minimum export price for Argentine wheat is $1.55 per bu. Buenos Aires.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, July 28.—Higher prices for hogs and cured product with a moderate trade featured the provision market last week. There were indications of packers selling on the hard spots, and shorts covering, while on the breaks the buying support came apparently from packers. There is little investment trading in the market and the interest is kept alive by a belief on the part of speculators that provisions are great sale on bulges. Prices covered a liberal range with the most interest in lard and ribs. Lard advanced $1.15 for July, $1.12½ for September and October over the previous week's close and finished at good reductions from the top with gains of 65 to 85c. Short ribs at their best were up $1.17½ for July and 77½c for September with the finish at a good reaction from the high point with gains of 60 to 95c. Pork lost 30c of its advance of $1.35 for September, which was the most active trading month, and closed with a gain of $1.05, while July, which was neglected, closed $1.60 higher for the week.

Supplies of hogs were materially smaller than the previous week, but indications are that the run will be somewhat larger from now on, the hogs having been held back by fear of labor trouble at the Stock Yards. There is no certainty, however, that the workers in the packing houses will be satisfied with anything for any length of time, as there is a spirit of unrest, due to constant work of labor agitators.

Export trade generally was moderate, although claims from some quarters were of a good business. Shipments, while liberal from Chicago, were restricted at the seaboard by the seamen strike. Some people in the trade are in close touch with the foreign situation, particularly in the English markets, say that there are good supplies there and that stocks taken into store some time ago have not been sold. The trade is looking to Germany for a big business and while much of it has been supplied for the time being, there are indications that buying will be of liberal volume in the near future, owing to an exhaustion of supplies. A packer discussing the foreign trade said they were selling all they could under the existing shipping and foreign exchange conditions.

It is understood that less lard is being made by Chicago packers, as many cuts that have been tanked of late are now bringing more money in the open market than through tanking operations. Stocks of lard, however, are liberal. Stocks of short ribs are not large and a few lots taken in on May delivery have not been picked out. Pickled meats are having a fair trade for the season. A syndicate recently bought 40 carloads of hams that have been held by the government at Norfolk, Va., for a long time, paying 20c a pound without any guarantee from the government as to condition of product. It is said that a liberal percentage of the hams are so strong that the only thing that can be done with them is to put them in the fertilizing tank.

Fresh pork trade was fair and pork loins were unsettled. Hog prices advanced to $23.50, the highest known, with a moderate reaction from the top. Packing hogs, however, did not bring the extreme figure. There is a limited supply of light bacon hogs.

Kansas City Provision Review.

KANSAS CITY, July 26.—Irregularity marked the trade in provisions in Kansas City this week. Weather conditions were unfavorable to a broad demand, and packers and other provisions interests reported a restricted trade. In the East, supplies were considerably above requirements of consumers, and prices followed a sharply downward course on fresh meats. The market was quoted as much as 1c higher for the week, prices following a sympathetic course with the live hog trade. A fair local demand prevailed for fresh pork, though the East was a light buyer. Dry salt and heavy smoked meat shared a broader outlet with prices up ¼ to ¾c. Fancy smoked hams and bacon also were higher, advancing as much as 1c. Demand was fair to good, with local buying an important factor in the trade. Lard sales were of fair volume.

Meat Stocks.

The Bureau of Markets reports the following stocks in pounds of frozen and cured meat in storage on July 1, 1919, with comparisons:

Product.	Reported July 1,	Holdings not reptd.	Reported June 1,
Fr. beef...	162,386,570	448,525	164,021,736

Many grain elevators in the wheat section of Illinois are expected to close down unless cars are supplied immediately.

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, July 28.—Hog prices made new high mark last week with a reco of $23.50 for light butcher hogs, t price being paid on three successi days. It was 50c above the high lev of the previous week and $4.25 abo the high mark of the same week la year. The average price for the we of $22.20 was also the highest know and 35c above the previous week wi a gain of $3.65 over the same time la year. Saturday's top was $23.30, or 8 higher than a week ago, and the av age of $22.20 showed 35c above the p vious week. Pigs were in light supp all week and good to best ranged at $ @22, a gain of $1@2 for the week.

Average weight of hogs last week w heavier, being 246 lbs., compared wi 242 lbs. the previous week and 245 l last year. Packers bought 99,500 ho for the week, compared with 126,500 t previous week and 122,600 last ye The Armour interest took 20,300, Sw 22,200, Morris 10,400 and Wilson 9,6 Receipts for the week at Chicago we 70,194, compared with 72,427 the pre ous week and 77,073 last year. At t eleven markets there were 458,000, co pared with 535,000 the previous we and 480,000 last year. The twenty m kets had 510,400, against 597,400 the p vious week, a decrease of 87,000.

Good native steers made the high average price known last week. Fu matured corn fed beeves averaged $16. or $3 higher than the low of the ye made about five weeks ago and 5c abo the average of the first week in Feb ary, which was the highest know There was an advance of 50c for t week, and of 35c over the average o year ago, and compared with $9.80 the average for 1911-18. Packers, porters and shippers were all urge buyers of the better grades of cattle

The steer market on the whole w not as satisfactory as that for cho animals and the ordinary run show a loss of $1.25 for the week, while eve thing but choice steers and yearlin were off 50c@$1, business being sl with a good supply. The top prices choice steers were $18.40, which w paid on Tuesday, while on Friday best price made was $17.30. In the p vious week the top was $18.15. It w a most unusual market to have fa beeves advance and the other gra weaken.

Despite the advance in good b steers with a record average nat cows and heifers average the lowest the year, $9.40, or $1 under the previ week, with butchers' stock off 75 $1.50 on the general range, the outs decline being on the best fat cows a heifers and at the close they w $11.25@12.50, with medium to g $8.30@9.10.

There is a rush of Western ra cattle from western North Dakota, M tana and Wyoming, where the fail of the crop and the grass supply a feed generally has necessitated ext sive marketing. Railroads have m special rates for cattle and sheep fr the drouth district to sections wh feed is abundant, and will also put special rates for the return of the l stock next spring, so that the far and ranges can be restocked n spring. Many of these cattle have co into the corn belt, and the supply the market was heavy. Receipts h were 70,200 for the week, being 2, under the previous week, and 6,900 l than last year. Twenty markets l 342,000, an increase of 13,300 for week. Chicago had 20,000 of the W ern cattle last week, mostly from M tana, and is expected to get nearly 000 this week. Thousands of cows young cattle are being shipped to braska, South Dakota, Wisconsin Minnesota and Texas, where grass plentiful. Thin cattle from the dro districts sold here at $7.50@10, feed

ecuring good supplies at $7.50@8. housands of Montana wethers are be- ıg taken by country feeders at $8@ .50.

Bulls declined $1@1.50 with the av- rage $9.15, or $1.40 lower than the pre- ious week, and the lowest of the year. he best butcher bulls were around 11, and beefy bologna bulls at $9.50. alves were $2.50@3 lower, although ne best were only off $1@1.50. Com- on sold around $10@12 and the best ere up to $18.

Stockers and feeders were off 75c@ 1, with a heavy movement to the coun- y. Quality was poorer. Stockers sold ound $6.50@7.50 for light weights, ith some fancy yearlings at $11 and oice feeders at $10.50@11.

Sheep supplies were liberal, Chicago tting 116,262, against 67,485 last year. ne twenty markets had 360,700, a de- ease of 12,300 for the week. Fat na- ve lambs were off $1@1.50 for the eek, with the top $18.70, or 35c lower an the previous week's high point, d the bulk of sales ranged $16.75@ .90, with the average $17.45, or 30c wer than the previous week, and 95c der last year. Western range lambs lt 50@75c, with the top $18. Feeding nbs moved freely, advancing 50@ c, with $15 paid for the best and eeding ewes at $12@15. Sheep ranged $9@11.50, the latter being the top de early in the week. Aged wethers re $8.50@9.50 and yearlings $11.50 3.50. The average was $11, or $1.20 gher than the previous week, com- red with $12.90 last year.

Kansas City Live Stock Market.

Sanders Sosland, Correspondent.

ansas City, July 26.—Nervousness over weather in Kansas and Oklahoma and fact that the Northwest already is suf- ng from a serious drouth have resulted a feeling of uncertainty in the trade in stock in Kansas City. Kansas has not a good rain for about three weeks, and great pasture areas are beginning to d moisture. Oklahoma pastures also d rain. Another week without moisture mean some forced marketing of cattle. h the Northwest seeking to move cattle sheep into the Southwest, the weather ation here is therefore of more concern n usual. But a heavy rain any day may g a great change.

price movements this week, hogs were leaders, closing fully $1 per hundred- ght higher and scoring a new record l. Cattle were irregular, with corn- up and straight grass steers mostly r. Sheep were irregular. Receipts of le and hogs decreased, while sheep ved a small increase.

new top of $23.15 was paid by shippers hogs, and packers paid up to $23.10. light arrivals were sought eagerly by ers early, which forced the market ard. There was a fair demand from pers. Reports as to supply conditions rrounding territory were bullish. The ier stock hogs were in good demand, sold up to $22.25, gaining $1. Average of packers' droves reached $22.79 at end of the week, or above the Chicago age.

ssouri-fed steers weighing 1,440 lbs. at $18.25, the highest price since last and about 75 cents up for the week. as wintered grassers fed cake on the in Texas brought $16, the highest of the year on the quarantine ion. However, straight grassers sold between $10 and $15. Grass cows ght $9.50 to $10.50, the better butcher being strong and plain grades weak cents lower. Veal calves made a improvement, closing up to $15. ers and feeders were barely steady.

Oklahoma Live Stock Market.

husnelda Haehnke, Correspondent.

ahoma City, July 27.—Cattle receipts for the week have been liberal, owing ıe fact cattle are being shipped in the eastern part of the state. Steers been called steady to 25c higher for eek, the top being $13.25, which was for some beeves from Okmulgee y. These were as good in quality nish as in weight, and although sell-)c higher than anything offered here early in June, they were no higher last week's market. At the close of eek $11@12 bought bulk of fair to good killers that carried fair sized bill. Plain steers went at $9.50@ and looked steady.

ough receipts were fairly good, er cattle were called a little lower e week. There was a lack of interest the she-stuff line, packers being un- bidders. Some paid steady for de- kinds and sought lower rates on m grassers, while others operated rsa. Canners and cutters were also o move and the 25c drop for the stood steady. If required something to bring $8.50. She stuff is hopping $1.00 lower than the high spot of onth. Strong cutters are bringing 5.75 and canners and low cutters $5.25@6.00. Stocker brokers are a meager carry-over crop in their ment. Country interest has been warm and especially so on stockers and twos that lacked weight. For the week in this class of cattle the market closed strong and in a healthy condition.

The hog market was a good one this week, $23.00 breaking all previous records. Receipts, however, have been very light compared to a week ago. Hogs here are 75c to $1.00 higher, but usually the short end. Stockers are steady, the $19.50 quotation being in fashion.

St. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

National Stock Yards, July 26.—The cattle run this week was the heaviest of the year, due no doubt to the sharp upturn in prices which we had last week. The market has been one of extremes. Good cattle, those selling from $15 up, were in demand and sold at strong prices during the entire week. On the other hand the plain and common cattle, of which we had a superabundance, show a decline of $1@2, thus losing practically the entire advance of the previous week. Oklahoma and Texas cattle ranging in price from $10.50@13.75 held to a fully steady basis during the entire period. The top for the week on native cattle was $17.00, the highest price paid in several months for beef steers.

Our hog market set a new record this week. On Monday we touched $23.00 and on Thursday a load of hogs sold at $23.50, a new market record. At this writing we are only 10c below the high figure and we are 65c higher than the close of last week. The runs are light and quality only fair. The demand for good hogs is much greater than the supply. The week's closing quotations are: Mixed and butchers, $23.00@23.40; good heavies, $23.15@23.35; rough, $18.50@21.00; light, $22.90@23.35; pigs, $17.50@22.75; bulk, $23.00@23.35.

South Omaha Live Stock Market.

Bruce McCulloch, Correspondent.

S. Omaha, July 26.—Cattle receipts this week have been over 48,000 head, by far the largest July run in the history of the trade. Naturally there has been more or less demoralization in prices and the week closes with sharp declines in every line. Not very many corn-feds have been coming and prices held up fairly well the early part of the week with several of the best loads at $17@18. Bulk of the corn-feds have been selling around $15.75@16.75, but toward the latter part of the week it was difficult to get over $16.50 for anything and dealers were quoting the market fully 75c@$1 lower for the week on corn-feds.

The decline in the corn-fed cattle was largely the result of excessive offerings of western rangers and sharply lower prices for this class of stock. A severe drought throughout the Northwest has resulted in flooding the market with grass cattle, and while choice, weighty kinds have not declined more than 50c this week, the drop on the plain and medium grades has been fully $1@1.50. Choice range steers are bringing $13.60@14.50, with prime lots as high as $15. Bulk of the fair to good westerns sell around $11@12 and common and Texas grades are going at $8@10.

Declines this week have been exceptionally heavy on the cows and heifers, amounting in many cases to $1.50@2. The range in prices is now practically from $5 to $13 and bulk of the fair to good butcher stock is going at a spread of $7.50@10. Veal calves have declined fully $2, with best vealers now bringing $14@15. Bulls, stags, etc., find a very fair outlet at $7@7.50.

The demand for stockers and feeders has been unusually good for so early in the season and prices have been well sustained for steers carrying weight and quality, with sales at $12@13. Most of the fair to good stuff is selling around $9.50@11.50 and the commoner kinds and odds and ends from $9 down. Outside of the best times the market is quotable 50@75c lower for the week.

Although there was some let-up in the hog receipts for the week, the market has been nervous and unsettled, prices on Wednesday reaching the high point of the year and later declining sharply. Closing values for the week are still fully half a dollar higher than on last Saturday. With 9,000 hogs here today the market was 15@25c lower. Best lightweights brought $22.40 and bulk of the trading was at $21.50@22.10.

Fort Worth Live Stock Market.

Ray C. Murphy, Correspondent.

Fort Worth, Tex., July 26.—Cattle arrived in much smaller volume this week, but the reduction in receipts was not sufficient to cause any lasting upward turn in the market. Beef steers had another slow, peddling week, and the market closes around 25 to 35 cents lower. Cows and heifers gained 25 to 35 cents, then lost the advance, but closed stronger and more active, the market showing a gain of about 25 cents over the low time of last week. Calves experienced an uneven week, but closed about steady.

Choice fed steers sold this week at $13.25 to $13.75 for a high range, and choice South Texas cattle went at $11 to $12. Desirable fat cows cleared around $9 to $9.25. A strictly choice lot of calves sold Thursday at $14.25, as against an extreme top of $16 at the recent high time.

Hogs have gained at least 75 cents. Two cars of choice hogs sold at $23.25 on Thursday's market, but strength has been shown since then. However, $23.25 stands as the top, as nothing was choice enough to develop the full strength of the trade Friday or Saturday.

Movement of Cattle.

The Fine Art of Service

FROM the beginning to the end of your stay in Chicago you can be under the responsible protection of La Salle service. This Hotel owns and operates a large fleet of taxicabs and limousines primarily for convenience of guests. Luxurious cars with careful, courteous chauffeurs are at our command at most reasonable rates.

Hotel La Salle

Chicago s Finest Hotel

—is located in the heart of Chicago, yet the unobtrusive courtesy, perfect appointments and service insure all desired privacy.

RATES

One person *Per day*

Room with detached bath, $2, $2.50 and $3
Room with private bath, $3, $3.50, $4 and $5

Two persons *Per day*

Room with detached bath, $3, $3.50 and $4
Room with private bath—
Double room - - $5 to $8
Single room with double bed $4, $4.50 and $5

Two Connecting Rooms with Bath

Two persons - - $5 to $8
Three persons - - $6 to $9
Four persons - - $7 to $12

1026 rooms—834 with private bath

COTTON CROP.

The Bureau of Crop Estimates estiates the condition of the cotton crop July 25 at 67.1 per cent of a normal, compared with 70.0 on June 25, 1919; .6 on July 25, 1918; 70.3 on July 25, 17, and 76.1, the average on July 25 the past ten years. A condition of .1 on July 25 forecasts a yield per re of about 156.8 pounds and a total oduction of about 11,016,000 bales. iat is, the final outturn will probably larger or smaller than this amount cording as conditions hereafter are tter or worse than average conditns. Last year the production was ,040,532 bales, two years ago 11,302,5 bales, three years ago 11,449,930, ir years ago 11,191,820, and five years o 16,134,930 bales.

Comparison of conditions, by states, llows:

tate.	July 25, 1919	July 25 1918	July 25 10-yr. avge.	Change Month. 1919	Change Avge.
Virginia	80	75	82	—2	—2
N. Carolina	76	87	77	—7	—2
S. Carolina	71	80	75	—7	—2

Arizona	93	95	..	0	.
U. S.	67.1	73.6	76.1	—2.9	—4 2

Nine-year average.

The Bureau's estimate of acreage incdes the amount standing on June 2 and therefore does not include acrea planted but abandoned before that de. Usually very little abandonment ours after June 25. This year, howe r, the adverse conditions affecting t crop, particularly excessive rains a boll weevil, have caused material a ndonment since June 25; the a ount has not been estimated in acres, this factor is taken into account in t condition figure. The December mate of acreage picked, compared h the preliminary estimate of acrea, as of June 25, will show the acreage a ndoned since that date.

overnment estimates of acreage and yd together with the percentage conon for July during the past ten rs follow:

ear—	Crop, bales.	Area, acres.	Cond'n Pct.
.....	11,016,000	37,073,000	67.1
.....	15,325,000	37,073,000	85.8

.....32,107,000	1910	.....	33,418,000

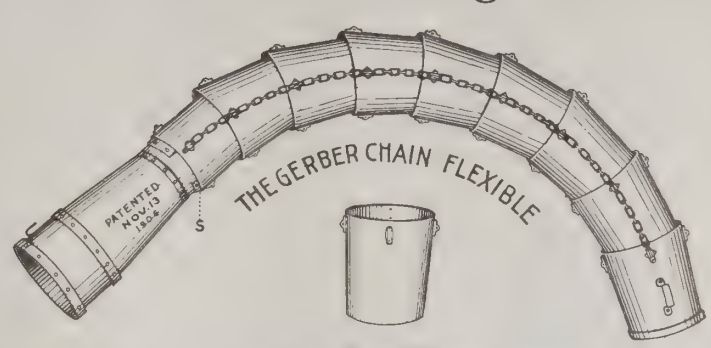
First Bulk Shipment of Grain.

t July 22 the S.S. *West Islay* sailed Astoria, Ore., for New York with 61 bus. of bulk grain in her lower and 142,822 bus. of sacked grain een decks. This grain is in transit Europe and is said to be the first cargo of bulk grain ever shipped from the Pacific coast to Europe.

This editor has a faint recollection that quite a number of years ago a small cargo of bulk grain was shipped from the Pacific Coast to Europe, but after the sailing was reported, if his recollection be true, that there was one, no trace of the shipment could be obtained by him. If any reader on the Pacific Coast has any knowledge corroborating this impression, we would be glad to communicate with him. The shipment of bulk grain through the Panama Canal from the Pacific Coast to Europe is a matter of very great importance to the Pacific Coast and doubtless shippers will follow the *West Islay* to Europe with a great deal of interest.

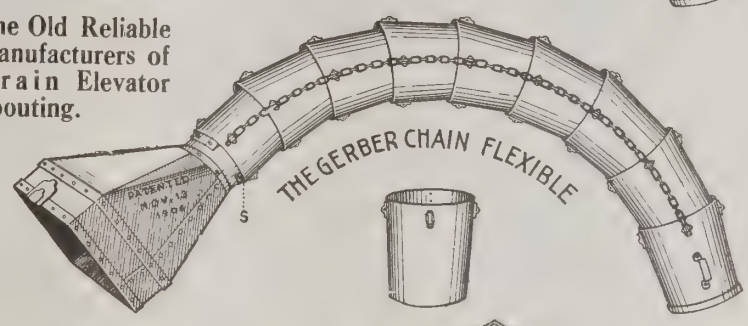
Burlap Market Steady.

The burlap market continued to advance at New York during the past week and on Friday the *Journal of Commerce* reported 15.50c as the basis for lights, making a rise for the week of 1½@1¾c. Cable advices show strength in Calcutta on both cloth and on jute, with freight space largely engaged for the near months and offerings scarce, so that buyers have to bid high to draw out goods. Exchange difficulties continue. Friday's quotations were 15.50c for 8 oz. 40's and 17.75c for heavies.

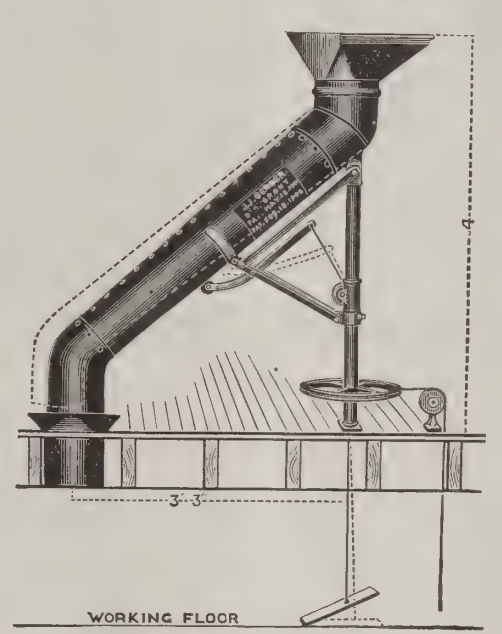


New Texas Corn Fine.

The first car of new Texas white corn of the season was shipped from Brownsville, the extreme limit of the state, to mills at El Paso. The quality is said to be fine. Within a few weeks 2,000,000 bushels of new corn will be available for shipment from southwestern Texas. Recent heavy rains have assured the crop, which is more than 168,000,000 bus., or 100,000,000 more than last year. It is enough to supply the Southwestern trade this season.

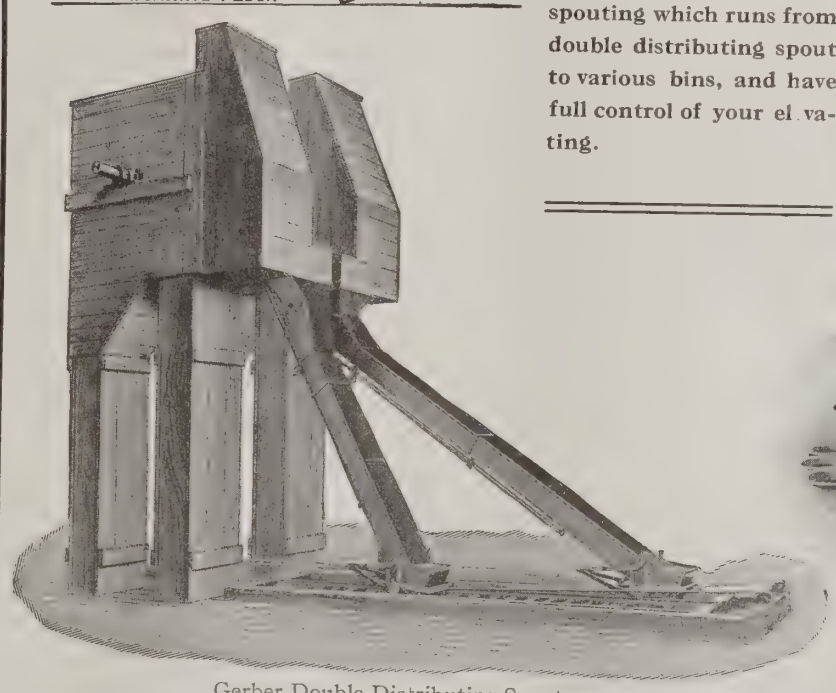


Gerber Products Are Sold on Their Merits

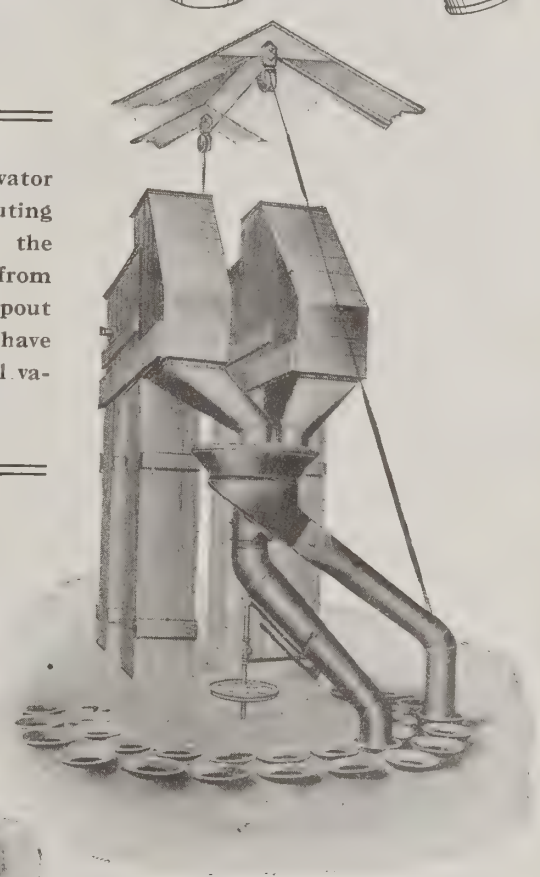


For They Are Practical and Durable at Right Prices

Double and Single Distributing Spouts and Four-lug Telescope Flexible Loading Spouts Have No Equals.



The Old Reliable Manufacturers of Grain Elevator Spouting.



For a double leg elevator use a double distributing spout and save half the spouting which runs from double distributing spout to various bins, and have full control of your elevating.

PRIVATE CROP ESTIMATES.

Allen Logan at Kansas City says dark wheat will be extremely scarce, yields ranging from a minimum of 45-lb. test to a maximum of 60-lb. with practically no 45 or 60 lb. Most of the wheat is running from 53@57 lbs.

DID THEY MISS?

Weekly crop report of the American Steel & Wire Co., dated Aug. 1, says: "The present moment is one for consulting the Government Weather Bureau reports for rainfall, rather than other reports of crop conditions. The corn crop must have rain the ten days following the date of blossoming, and we are in the midst of this critical period and no general soaking rains. Under the conditions, our hope is in the crop being behind schedule in tasseling. Oats and wheat threshing disappointing. Cotton doing only fairly well. General rains missed the corn belt."

CONTINENTAL-COMMERCIAL.

The annual crop report and business review of the Continental Bank of Chicago published on Monday last estimated the wheat crop for 1919 at 1,100,071,000; of oats 1,298,488,000; of corn 2,839,017,000; of barley 233,579,000. The hay crop is very large in spite of some loss reported in the alfalfa sections, total crop being estimated at 112,-600,000 tons. The report concludes: "The hay and coarse grains being the food of the farm animals promises to be far in excess of last year's supply and ample to take care of the constant increase of the number of swine on the farms. The European need of meat and fats will find an adequate supply from the American farms out of this season's crop of feedstuffs."

GOODMAN'S REPORT.

Goodman's monthly crop report, anticipating the Government's Aug. 1 one, estimated to be published on Aug. 9, says: The yield of winter wheat is estimated at 15.2 bu. an acre, indicating a crop of 744,000,000 bu. Spring wheat conditions 59, indicating crop of 242,000,000 bu. Total wheat 996,000,000 bu. against 917,000,000 harvested last year. Oats condition 78.6 against 87.5 last month, and Government 87.6, indicating crop of 1,309,000,000. The crop generally is early and thrashing returns below expectations. The Northwest may further reduce crop. Corn condition 84, against 82.5 last month, and Government 85.7; declines general in the week of July 28 over the big belt. Indicating for crop increased by large par value to 2,903,000,000 bu. Western Canadian wheat condition 66, against 75.9 last month and 58.6 last August; oats 57 against 78.2 last month and 60 last August."

INGLIS' REPORT.

Reports issued on Aug. 1 from several sources show a serious reduction from previous one. Every month seems to lower the condition of all crops. Corn at this date is in the flush of what may be stated its best stage. The marked deterioration I have seen in Central States is significant. Later reports will emphasize this, just as it has done in wheat, oats and potatoes. Forecasting yields from general appearance at present will prove as deceptive as it has done in other grains. Others may claim a crop of 2,800,000,000 to 2,900,-000,000; but having examined corn personally, I think that with favorable conditions until maturity a possible 2,500,-000,000 crop may be obtained. The shrinkage in acreage by flooding and other unfavorable causes at planting period will make a great reduction from the 103 million acres planted.—*John Inglis, with Logan & Bryan.*

SNOW'S ESTIMATE.

The Snow-Bartlett-Frazier report makes condition of corn at 81.3, a decline of four points since July 1, indicating a maximum crop possibility of about 2,800,000,000 bus. upon the basis of the Government estimate of acreage, or 2,745,000,000 upon the Snow acreage. There was marked absence of moisture coupled with high temperatures at the critical period of tasseling, when ears were setting, and no amount of rainfall after the ears are set will add a new kernel to the crop. Rainfall after that date can only aid in filling the grains already formed during the period of pollinization. Threshing returns show winter wheat yields heavily below the expectation of even a month ago. The average up to date is reported at 15.2 bus., or a total crop of about 744,000,000 bus. The quality is much below normal.

Black rust, blight and premature ripening have reduced the spring wheat crop by more than 100,000,000 bus. since July 1, leaving a promise at this time of only 45,000,000 bus. The quality is poor, with a large percentage of thin, shriveled and lightweight grain, some almost too light to have any commercial value. Condition of the crop, 58.0. Oats condition 77.1, a decline of 12.4 points since July 1, with a crop indication of about 1,283,000,000 bus. It is doubtful, in view of the experience in wheat and rye, whether threshing results will be as good as the present indication. The little already done indicates this, and also points to a further deficiency in weight per bu.

North Pacific Wheat Crop.

The *Commercial Review* of Portland, Ore., recognized authority on the Pacific Coast, speaking of the wheat crop of Washington, Oregon, and Idaho says they see no reason to change their estimate of the wheat crop of these states and estimate that the final returns will go to 37,000,000 bus. for the three states. This does not, however, include the whole of Idaho but only the northern portion tributary to the Pacific Coast markets. Binders are now at work in the fields but very little threshing has been done.

WANTED and FOR SALE
GRAIN DEALERS' MARKET PLACE

For Buyers and Sellers of Elevators, Equipment, Grain, Seeds, Hay, Feed, Flour, Millfeed, Beans, Produce, etc.

25c Per Printed Line

ELEVATORS FOR SALE.

For Sale—Elevator and malting plant ocated at Davenport, Iowa; grain elevator 20,000 bushels storage capacity; malt ouse, 1,800 bushels daily capacity, situated n the C. R. I. & P. Ry. tracks, and C. M. St. P. and C. B. & Q. roads are avail- ble; transit privileges are granted for astern and southern points and the loca- on is very favorable for distribution of eds and grain to those points, as well as the central feeding district; the loca- on is in one of the best farming dis- icts; plant is in good physical condition id was operated until now. For particu- rs apply to **Davenport Malt & Grain Co.,** avenport, Ia.

FOR SALE—Half interest or all of 25,000 ushel elevator, excellent repair, $12,000 sh, no trade considered. In heart of corn id wheat belt. Did $500,000 business last ar. Will do more this year. Established enty years. Reason for selling, wish to tire. Have flour, feed, seed and poultry d egg business in connection if wanted. CONNOR & STRATTON, Hartford, Kans

25,000-BU. ELEVATOR, electric power, od coal and feed business, located in st farming district in Iowa. Address DAL, Box 2, Price Current-Grain Re- rter, Chicago, Ill.

ELEVATOR FOR SALE—Capacity 25,000 shels. International farm machinery con- act goes with the deal. Price $12,000. sh $7,000, balance terms. Big grain point d good machine business. Max, N. D. ldress E. BALSUKOT, Plaza, N. Dak.

GRAIN, COAL, LUMBER AND LIVE- OCK business in small town within 50 les of Chicago. Splendid proposition and noney maker. No competition. Address MES M. MAGUIRE, 432 Postal Tel. ig., Chicago, Ill.

MACHINES FOR SALE.

ONE FOSSTON 70" Elevator Cleaner, use three months. Machine in first ss condition. Reason for selling, larger aner wanted. J. M. RIEBS, JR., 407 tchell Bldg., Milwaukee, Wis.

FOR SALE—One 25 H. P., one 35 H. P. l one 45 H. P. Miami Gas Engines, in ellent condition. Address The SHARTLE OTHERS MACHINE CO., Middletown, io.

OFFICE SUPPLIES.

nderwood Typewriters $50.00; 9 column ing machines $100.00, guaranteed for year; $45.00 check writers, like new, 00; Liberty Bonds accepted. Will ship trial. Typewriter Exchange, Russell, is.

FOR SALE—Burroughs, Wales, Amer- n, Dalton, Standard, etc., adding ma- nes, half retail prices, fully guaranteed. ewriter bargains, all makes. Get illus- ed catalog and bargain list. MINNE- TA TYPEWRITER EXCHANGE, Dept. C. 236, 4th Street South, Minneapolis, n.

HAY FOR SALE.

FOR SALE—Elkhorn Valley Hay in car- lots. Write for prices. HARRY T. EIN, Ewing, Nebr.

SITUATIONS WANTED.

Situation—As manager, assistant or sman. Best references, with 22 yrs. rience in wholesale and retail grain, hay, etc.; age 47, own a business 6½ s. F. Gauvin, 111 Lincoln St., Wor- er, Mass.

HELP WANTED.

WANTED — Superintendent for mixed plant in southern city, shipping fifty sand tons annually. Must be capable handling negro labor efficiently and be an organizer with executive abil- f high order. Only experienced, capable energetic man with highest of refer- s need apply. Adequate salary to man. Address STOCK, BOX 3, Current-Grain Reporter, Chicago,

GRAIN WANTED.

GRAIN AND SCREENINGS WANTED— rade wheat, barley, corn or oats, t screenings, corn screenings, corn oat screenings, oat clippings, barley nings, barley chaff or elevator screen- of any kind wanted. Please send les. BEREND J. BURNS, 324 Cham- f Commerce, Buffalo, N. Y.

OPPORTUNITY.

WANTED BY a long established conservative grain commission firm, several experienced traveling men of good address and habits. One for Iowa, others for Kansas, Oklahoma and Nebraska. Must have experience and established trade and be able to show results. Address B. C. CHRISTOPHER & CO., P. O. Box 590, Kansas City, Mo.

$60.00 A CAR PROFIT

Load EAR CORN and Loose Grain into Railroad Cars Without ANY Scooping in Car or Wagon. Stationary and Portable Types.
The Portable type shown in the illustration and the Stationary types for installation in elevators are fully shown in our booklet "$60.00 A CAR PROFIT," which will be mailed free upon request. Any of these outfits will load every car to full capacity without scooping in a dirty, dusty car. They handle EAR corn as well as loose grain of all kinds. They CANNOT injure the grain as grain does not pass through fan. If your elevator should burn down you can use a portable outfit and keep your business until your new elevator is built. Capacity 1,000 to 1,200 bushels an hour. Portable outfits can be used to fill corn cribs and granaries. Different from any machine you have ever seen. Furnished complete with power if desired.

"See How Simply It's Built"

The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.

Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

BUSINESS AND TRADE CONDITIONS

VERY great war is followed by a long period of industrial and commercial perplexity. The shift from disorder to order is more difficult nd painful than the reverse. Because men must live rom day to day. War destroys. It creates nothing ut misery and debt. The world at peace is seldom ir removed at any time from actual want. The numer of men and women who save enough to carry iem beyond a few days without credit is small by mparison. War creates scarcity; it consumes sav-gs; it prevents the accumulation of reserves; therere, it is a cause of advancing prices and pressure those who cannot or will not save but must strug-e for continued existence, which is generally harder ter a war than during its progress. War disarnges industry. The disarrangement is quickly efcted to meet the needs of defense, but is slowly rrected. There is always an interval of hesitation ter a war; in some lines actual cessation. But the ople in the meantime must live. Having saved t little, the majority of the workers soon begin to el the penalty of their thriftlessness and the scarcity consumable goods. The exhaustion of Europe after e Napoleonic wars was so great that it was a genation before the Continent could begin to recover. ngland, the first to do so, did not really begin her covery until she had passed her reform bills and andoned her protective system and began to bring me to herself the surplus products of the world as profits of her industry and carrying trade. In s country the politicians and the equally superal newspapers are busy with their fallacious spreadgleism and hifalutin trying to convince themselves d the people that our own waste of 20 to 30 billions two years as a part of 220 billions by our allies has de the country so rich that we can continue to r more billions of our products into the old world l still have left as great abundance as before and comfortably just as easily. No better test can found of the financial and industrial position of country at the close of a war than the fact that wearied and exhausted combatants cannot after struggle is finished go into the markets with ier goods, money or credit. That is the condition Europe. Her people are exhausted in body and in modities and power of production. They are just ing out how exhausted they are. And we are try- to feed and clothe those peoples and rehabilitate r devastated lands and towns out of our own es of goods and expecting, as our working people to live as well or better, as most of them expect as their right, than they ever did and not work whit harder, in fact less hard and for fewer rs. And there is no one to disabuse them of such . The Administration simply sidesteps its duty. ut as the distress of scarcity can be relieved only ersonal or national industry and economy, and as are not to the liking of men in general and legisrs in particular, the world is full of quack remefor a condition that only time and unremitting r can alleviate. Only yesterday the governments working printing presses overtime making ey to conceal the scarcity of commodities. Now ave the proposition of Senator Myers to reduce volume from currency, which has, of course, beenormous, in order to do the same thing, as if cing the number of dollars could increase the ber of barrels of flour or pounds of meat.

e railway trainmen having again, as in 1917, tened to "turn hell loose" after Oct. 1 if the cost ing be not in the meantime reduced, or provision made to give an 800 million boost to railway wages, the President and cabinet are giving "deep and very thoughtful consideration" to the cost of living.

First of all the President called in Wheat Director Barnes on July 30, and a conference of zone agents, the grain trade advisory committee, millers' committee and bakers will be held tomorrow, August 7, to consider whether in view of the shrinkage of the wheat crops in the U. S. it will be expedient to lower the price of wheat flour. In view of the current notion than man "lives by bread alone" and not in auto, a reduction in the price of wheat might temporarily fool some good people. For the Senate, Senator Bell's subcommittee is gathering evidence to name some cause for prices in the District of Columbia, which are notoriously higher than perhaps anywhere else in the country. In the House a resolution is pending to have the Federal Trade Commission make another of its yellow investigations into "rising costs," a body which with one hand uses its powers to prevent the lowering of prices by striking at what it calls "unfair" competition and with the other penalizes those who do lower them, calling that also by the same name. And there is Rep. Fitzgerald's resolution calling on the Attorney General to take immediate steps to stop "speculation and gambling" in "food products and other necessaries of life" on the stock (*sic*) exchanges. On his own initiative also Attorney General Palmer is in the game and will soon announce whether he will prosecute the packers for the violations of the law alleged by the Trade Commission. In Illinois the state Department of Agriculture has discovered that perishable food products are going into storage for next winter's use and, of course, Mr. Adkin sees "manipulation" in such procedure, recalling, no doubt, as men of his age can, how butter and eggs were once absurdly cheap in spring and summer and there was none at all in the winter unless the housewives "put them down" for such an emergency. In Michigan the state attorney general is going to "investigate" the "big packing concerns" and others dealing in foodstuffs and will "seek the coöperation of Indiana." Ohio's attorney general has already begun. In Cincinnati on Aug. 1 the revenue officers did cut the H. C. L. by stopping the sale by speculators of "Cincy"-New York baseball tickets! and on the same day Congress at the request of the President decided not to take a recess until it had devised some way to increase railroad wages as per Mr. Stone's and Mr. Lee's demands, a tieup already threatened in the Central West by an immediate strike of all "shopmen" at Chicago. And on Aug. 18 the War Department will begin retailing the millions of food products it has until now held off the market rather than break prices. Clearly our rulers are in a panic of fear.

And there is going to be, on paper at least, an attack "all along the line by way of the law of enforcement and the law of suggestion," especially the latter. Because labor is "tired of trying to keep up." The President was told only on Friday last by the Federation of Labor that "they are heartily sick of calling strikes for higher wages to enable their men to keep pace with the cost of living," while these same leaders insist that the men shall cut their hours of labor and keep down the amount of their output.

On July 30 the directors of the National Association of Manufacturers by resolution pointed out the self-evident fact that "high prices are largely due to the growth of tendencies among our labor elements to restrict and curtail individual and collective industrial production, a policy based on the false, pernicious and widely preached doctrine that the less work a man does the more work he provides for others to do," and called on "every factor in the molding of public opinion to give all possible assistance in directing public attention to the urgent need for increasing industrial production." This is indeed the only possible means for saving our civilization. But every effort already made and in the process of making to benefit working men by giving them a share in the management of works and in the profits in order to increase the output is met, as a recent survey of several hundred plans by the National Association of Corporation Schools has shown, by demands for more pay and shorter hours. Mr. Gompers attacks all plans for coöperative management of works with sharing of profits on the ground that coöperative projects have a tendency to break up the solidarity of labor. Labor leaders, in short, are determined that their own people who desire to do so shall not be permitted to better themselves individually by greater industry or development of superior skill. If, as Mr. Gompers and the Covenant of the League say, "labor is not a commodity," the non-unionist is deprived of his rights under human and natural law to the highest rewards for his powers of production. No man, unionist or non-unionist, belongs to himself. The rewards of his labor and his brains cannot be measured by himself but are absolutely at the will of the majority of his union and its leaders. He surrenders his personality with the principle stated by Locke long before this controversy arose, that, "every man has property in his own person." "A man," as Montesquieu says, "is not poor because he has nothing, but because he will not work." The world is in distress now because part of its people will not work as they might and another part cannot do so as they would to the full measure of their capacity. Our rulers ought to know that—they do know it. Mr. Hurley, late head of the shipping board, has told how Government management is reducing output of ships and increasing their cost. Mr. Lloyd George once during the war told the coal miners of England what they are doing to England by "making more work" and demanding shorter hours and less output of coal. Both he and Mr. Chamberlain, who in the same period promised the miners nationalization of the mines, have now abandoned all admonition and seek to hold their power through a new party to include all radicals. In our own country Congress and the Administration instead of facing the crisis war has made are only searching for some magical abracadabra which shall bring plenty without work and without privation to any. And while they search it is the middle class man and his family, the always "forgotten man," who is being squeezed. He may one day cry out. "Quit and don't begin again." He did at Winnipeg.

We are living in a period of universal hysteria fostered by an infinity of illusions, mostly the outcome of the sentimental philosophy which during the past thirty years "has colored all modern ideas in politics, religion, education, charity, industry, and is widely taught in colleges, popular literature, novels, poetry, the pulpit, the rostrum" and "The New Freedom," whose first proposition is that "nothing is true which is disagreeable," with its corollory that it is only necessary for a group of sentimental and ignorant men to make certain laws and create bureaus and all the world will be made "smooth and easy for us to pass through it surrounded by love, music and flowers."

The effect of taxation on prices is another unpleasant feature that all executives sidestep. Big appropriations magnify the dignity of a state and this is now a six-billion dollar Country; and spending public money "makes work." State and municipal debts are

growing to a tremendous volume. Yet some one pays and it is added to the cost of living. And there are few indeed who can on the last analysis pass on taxes to the next man. For this fiscal year Secretary Glass has said $6,535,000,000 of National revenue may be raised by existing law, but in the absence of any budget control over congressional extravagance neither he nor any man can foretell how much Congress will squander. But if no more than the sum named is spent, the public debt should not be increased through deferred Liberty Loan payments by more than $1,032,000,000 or to $26,516,506,160.05.

Bradstreet's for the past week says: "While the wire edge of demand for some few staples, notably cotton goods and raw wool, seems a trifle blunted and the buying of interior jobbers and wholesalers at Eastern centers seems less eager, the consensus of reports is that trade as a whole is still very active for a midsummer period; industry, particularly the big basic lines, such as iron, steel, lumber and coal, seems stronger, with prices hardening; reports that textile mills are crowded with orders well up to the close of the year are repeated, trade reports seem to grow better as the surplus crop producing areas are approached, and complaints are still numerous that mills, Eastern wholesalers and other large producers are slow to fill orders."

INVESTIGATING FEED MANUFACTURERS

THE junior Senator from Nebraska, Norris, has introduced a resolution calling for an investigation of the manufacture and sale of commercial feeding stuffs in order to sift "complaints of adulteration and fraud." The resolution is characteristic of the modern law maker. He is not content to make multiplicity of decrees which he conceives to be laws, but he must needs be constable and judge also. The statute books of the states are heavy with feedingstuffs laws and practically every state has its own officers and executive machinery for executing those laws. If there are "complaints of adulteration and fraud" why then does not Mr. Norris have them referred to the proper state authorities, or to the Bureau of Chemistry which under the food and drugs act has ample authority to punish a shipper in interstate commerce whose labels or invoices are not consistent with the goods delivered on invoices or packed under definite labels?

The ability of members of Congress of both houses to waste their own time on petty police inquiry and the people's money investigating (?) offenses which are amply provided for by law and which when complaint is made should be referred to the police, is their most distinguishing characteristic and a sufficient commentary on the quality of their statesmanship.

PROTECTION AGAINST THE GOVERNMENT

A MEMBER of Congress from Louisiana has introduced a rather novel bill, at least one that has a novel *motif*; which is, to protect the citizen from wrongful acts of Government officials who are directing the marketing of products by virtue of "licenses." This bill provides that when any dealer, etc., in "products of the soil placed under license," shall suffer loss "by reason of the unjust, arbitrary or inequitable acts, rules and regulations of the officials of the Food Administration," etc., he shall have the right to sue said officials to recover damages.

Such a bill is not likely to get very far. It is an impossible idea. Because no rules and regulations can be put into effect which will not be arbitrary and thus cause injury to some. They can only strike an average. Take the matter of the margin in handling wheat. It is assumed that the limit will be 8c, or thereabouts. But 8c will not be sufficient to pay cost in probably the majority of elevators in the winter wheat area. Suppose, then, this law were in force and Zone Agent Irwin, say, were to accept the dictum of Gen. Sec'y Taylor of the Indiana Federation of Farmers Ass'ns, that the margin taken in a certain place was too great, and already complaint has been made to that effect in Indiana, and the buyer's license be taken away and he be put out of business "unjustly, arbitrarily and inequitably," eventually Mr. Irwin would be ruined by law suits and no one benefited.

The Louisiana legislator means well, no doubt; but he forgets that once the Government dips into paternalism there is nothing to do but to follow it to the end. It develops a species of inevitable slavery but there is no mitigation of its evils in this respect except to abandon it altogether. The Bureaucrat does not understand that and apparently doesn't care to.

CEREAL PREMIUM LIST

THE reader hereof is doubtless aware of the fact that the Chicago Board of Trade has put out a premium list to be paid to exhibitors of corn ($4,000), oats ($2,000), wheat ($2,000), barley ($700), rye ($300) and hay ($1,000), at the International Grain and Hay Show to be held at the International Live Stock Exposition on Nov. 29 to Dec. 6, 1919. This important feature of the Live Stock Exposition is under the immediate direction of George Bridge, chairman of committee handling the various details. Mr. Bridge reports that the committee is making fine progress with its publicity campaign and is encouraged by its correspondence in the belief that the Grain and Hay Show will be most successful. Several hundred thousand circulars describing the method of procedure by intending exhibitors and the conditions of the exhibits have been distributed in the United States and Canada, and it has been pleasing to the Committee to note the interest of the Canadian trade and the coöperation of county authorities and agencies, grain elevator managers, as well as grain and hay commission houses, all of whom are putting their shoulders to the wheel to push this enterprise to a successful conclusion. If any reader has not already come into touch with Mr. Bridge as chairman, Board of Trade Building, Chicago, let this be an invitation to do so at once, that every possible avenue of publicity may be utilized for the benefit of all concerned in the greater production of good grain and hay.

CLEAR RECORD CAR CLAIMS

THE trade papers have recently stated over and over that railroad claim agents cannot rightfully decline loss and damage claims upon the plea of "perfect seal record." Such is in fact the common law and the statutory law of some states. An Oklahoma firm has filed suit in this state upon a number of claims declined upon this particular plea. It is desirable that they place in the hands of their local attorney something authoritative and recent which is in line with the contention that these claims can be collected through local courts, and they are asking dealers who can to provide them through their attorneys with citations of authorities which will serve them in the premises. They are willing to pay reasonably for such data as attorneys might supply under special cover. They have but a few hundred dollars involved in these claims but they desire to strengthen the position of the trade generally before claim agents by collecting these claims in the court house if possible. Any reader therefore who can supply such information as is asked for may send it to this office and it will be promptly forwarded to Oklahoma.

EDITORIALETTES

IT IS obvious enough why trading in wheat at Winnipeg for future delivery was stopped last week. Trading had been resumed for only seven days and in that interval the price for the October delivery had advanced 25½c.

A BILL has been introudced into the House of Representatives proposing to levy a tariff of 15 cents a bushel on all corn imported into the United States and 40 cents a hundred pounds on corn meal. Obviously, the purpose is to benefit the producers of corn, but they do not need charity now, and, furthermo the imports are so small that the tariff could be of possible value to Western farmers but would levy j that much tax on manufacturing industries and fe ers on our Atlantic Coast and elevate prices the

WE again call attention to the letter of A. E. Ma in the Letter Box last week, a warning as to overlo ing grain cars. Read it again if you don't recall it.

IF anyone is unconvinced as to the cause of h food prices in this country, let him give only a cas study to the "A Year's Exports" table in another umn, showing how our grain and meats have g abroad. Other foods and commodities not enumera in that table but which will be reported later tell same story of the drain on our food, fuel and cloth resources.

The Continental and Commercial National Bar review, Aug. 1, says: "Business men, more genera than ever before, report confidence in continued dustrial activity and in expanding foreign trade. the same time, there is also reflected the thought t this is not to be accomplished without the exercise business courage, conservatism and the strict adh ence to sound economic principles."

IT IS now announced that hearings on the Ken and Kendrick bills will not take place during Aug —too hot, but may take place in September. debate on the bills in the Senate continues to spicy. Former Congressman Billy Kent, formerly Chicago, who inherited a large fortune and has sp his lifetime in Illinois and California playing part of sentimental parlor socialist, has organize "National Marketing Committee" to coöperate w the senatorial socialists to secure "regulation" of packers. J. H. Ralston, counsel for the Federation Labor, is counsel for this Committee. Women's c sumers' leagues, the Farmers' National Council, other associations of dilettanti and many gentlem suburban farmers who affect the *Country Gentlem* are also members of this Committee.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures fr various statistical exhibits appearing weekly in detail "The Price Current-Grain Reporter," these figures rep senting the past week, the preceding week and cor sponding time last year, here assembled for ready ref ence:

LETTERS on subjects of interest to those raged in the grain trade, news items, reports crops, grain movement, new grain firms, w grain elevators, contemplated improve- nts and cars leaking grain in transit are icited.

THE ADVERTISING value of The Price rrent-Grain Reporter as a medium for ching the buying power of the grain eleva- men is unquestioned. The character and nber of advertisements in its columns tell its worth. If you would be classed with leading firms catering to the grain trade, ce your announcements in the trade's only kly, which is always first to get the live, to-date news to its readers.

ADVERTISEMENTS of meritorious grain rator machinery and supply houses and of ponsible grain firms who seek to serve in dealers are solicited.

CHICAGO, AUGUST 6, 1919.

GRAIN TRADE REVIEW

Economic conditions, which have n presented many times before, the in one being the high cost of living ulting from various causes, have mmenced to make themselves felt; the demand is for a lowering of ues to a point where it is expected t labor will be more satisfied with ir position and less unrest witnessed. s agitation has alarmed Congress; in their present mood it would not surprising if the theorists and timor- politicians should again attempt to rfere with the laws of supply and and and mess things as usual. There possibilities that there will be an market established for wheat, with Government making good the guar- ed figure in case prices fall below level, as seems possible if it were e done at once. In full justice to producer arbitrary action cannot be n. Grain prices have declined in onse with the demand for lower es without reference to other factors as actual supply and the necessity accumulating reserves. The latter been non-existent in this country Europe for several years, and the e amounts of various foodstuffs held he Government have been a prime or in keeping values up. Sooner or values will again respond to the of supply and demand, and no ma- l lowering of prices will probably itnessed until production overtakes umption again and a reserve is es- shed.

t winds have materially reduced the crop prospect in this country. How cannot now be determined, but in sections the losses are doubtless y, even though they may not be n by conditional figures due this . The latter may indicate a fairly al crop, but as in the case of wheat oats, the actual returns may prove less. The general estimate is for n crop of around 2,800,000,000 bu. nder, or practically the same as year and about equal to the actual al requirements of this country. and hogs have parted company , the latter selling at new record s, while corn Monday was off over om the high of the previous week.

Argentina continues to ship corn to this country. So far this country has received probably around 4,000,000 bu. since July, 1, 1919, but news from there attracts little attention. The greatest food need of the world is hog meats and fat, and the reduction in the corn crop would seem to make certain their relatively high price for some time to come. Prices in Argentina are relatively high, but Continental countries have been heavy buyers. Clearances have increased materially as the result of better weather conditions and the arrival of more boats. How much grain there was rendered unfit for shipping by the rains will be known at the end of the season. A little export business has been done by the United States, but the quantity was small and counts for nothing in the long run. Farm reserves are believed to be small, and a rather limited movement is expected until the new crop is ready.

Oat prices have declined to a point where export business with the United Kingdom is possible. The break brings the domestic grain below the maximum import figure. Heavy amounts of old 36-lb. white clips were sold abroad, and there are prospects of future large sales, not only to the United Kingdom but to the Continent as well. Financial conditions are a big factor in the situation. The unrest in Europe seems to be growing rather than decreasing, and it may be months before things quiet down. The crop in western Europe was badly hit by drouth, as was that of this country, and the yields will be small. Estimates based on threshing returns from this country show a total much below the two previous years when the carryover is included. The latter seems to be somewhat smaller than the trade have believed heretofore. Some of the new crop is showing light weight and sells at a good discount under the old. Barley has also been taken freely for export, and while there have been indications of a big business in rye, so far no figures have been given out. Much depends on whether Germany is granted credits in this country. Sterling exchange remains very low.

The wheat situation has assumed a different prospect since the North American crops have been radically reduced. Instead of a burdensome carryover there may be only a moderate one into the 1920 season. Based on the private reports it looks as though this country would have around 650,000,000 bu. for bread, seed and carryover, and 300,000,000 bu. for export, the latter being about all that Europe requires after allowing for the amounts that can be secured from Canada, Argentina and Australia. Other countries than these need scarcely to be considered. There is no scarcity of wheat now, but the main trouble seems to be to arrange for financing and ocean tonnage. Argentina is exporting heavily, as is Australia, but it will be some months before the Canadian new crop moves in volume. The yield in the latter promises to be relatively small due to heavy damage from blight and rust.

Grain Market Summary.

Receipts of wheat, corn and oats at primary for the week follow:

	Aug. 2, 1919.	July 26, 1919.	Aug. 3, 1918.
Wheat	21,606,000	15,701,000	17,160,000
Corn	2,381,000	2,489,000	3,772,000
Oats	6,732,000	5,702,000	5,863,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	30,719,000	26,795,000
Preceding week	23,554,000	24,119,000
Since July 1	87,957,000	95,768,000

Corn prices fluctuated in a violent manner the past week, the active deliveries having a range of 17@19¾c. December leading. New high figures on the crop were made for that delivery early, but the market was in a heavily overbought condition and when adverse news came values slumped badly, and the close was well toward the bottom with net losses of 11¼c. September was off 10¾c. July closed at the top, and within 1.8c of the outside figures of the season on covering by belated shorts and gained 4c. Trade was very heavy at times, with liquidation on toward the last. Talk of reducing the high cost of living, which is a theoretical problem, was the main bearish influence, while early crop damage was responsible for heavy buying.

Oats advanced sharply early in the week, but the close was weak with net losses of 6⅜@6½c. Free buying of September by houses with Seaboard connections who gave up the future in exchange for the cash at 3½c over September, c.i.f. Buffalo, was a supporting influence. Prices have declined to a point where it is possible that export business will be resumed with the United Kingdom.

Demand for cash wheat from mills has fallen off somewhat, as the movement has assumed large proportions, and prices have ranged lower, red winter losing practically all of its premium over the basic, and dark hard winter at Kansas City which was advanced sensationally on buying by oNrthwestern millers has flattened out due to the increasing movement of springs. The latter crop promises to be of poor quality, and some of the strong dark winter may be needed for mixing purposes. Clearances so far on the crop have been rather light, but as soon as labor conditions become better larger exports are probable. Range of prices the past week follows:

	High.	Low.	Close Aug. 2, 1919.	Close July 26, 1919.	Close Aug. 3, 1918.
Corn—					
July	$1.99	$1.95	$1.99	$1.95	$ ...
Sept.	1.98	1.81	1.85¼	1.95½	1 56
Dec.	1.73	1.53¼	1.55	1.66¼	....
Oats—					
July	.81½	.77½	.78	.79⅞	....
Sept.	.81¾	.73½	.73¾	.80¼	.66¾
Dec.	.84½	.76⅜	.76⅝	.83	....

Corn Stocks and Consumption.

Statement of the movement of corn and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Nov. 1	4,117,000	174,000	849,000
P. receipts to Aug. 2	148,177,000	236,517,000	198,743,000
P. shipments to Aug. 2.	90,060,000	121,804,000	107,890,000
P. stocks on Aug. 2	2,189,000	7,895,000	850,000
P. consumpt'n to Aug. 2.	58,870,000	106,992,000	90,852,000

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Aug. 1	13,185,000	4,048,000	539,000
P. receipts to Aug. 2	6,732,000	5,863,000	3,122,000
P. shipments to Aug. 2.	2,944,000	3,959,000	2,442,000
P. stocks on Aug. 2	13,185,000	4,048,000	575,000
P. consumpt'n to Aug. 2	3,788,000	1,904,000	644,000

Grain Corporation Wheat Report.

The Grain Corporation has begun publishing statistics of the movement of wheat and wheat products, which will appear weekly on Wednesdays for a subsequent date. Summarized for the week ending July 18 the data are as follows:

	1919.	1918.
Receipts from farms, bus.	33,793,000	32,516,000
Stocks in mills and elevators	53,824,000	43,698,000
Increase for the week	12,863,000	14,965,000
Flour made, week, bbls.	1,753,000	1,590,000
Barrels made June 27 to July 18	4,293,000	4,293,000

Chicago Grain Stocks.

Wheat stocks in public elevators in Chicago increased 259,000 bu. last week and are 463,000 bu. compared with 993,000 last year; corn, 225,000 bu., a decrease of 38,000 bu. for the week, and compared with 1,270,000 bu. last year, while oats increased 343,000 bu. and are 1,279,000 bu., against 579,000 bu. last year. Rye stocks, 890,000 bu., an increase of 114,000 bu. and barley, 393,000 bu., a decrease of 138,000 bu.

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Aug. 2, 1919, with comparisons with 1918:

	1918-19.	1917-18.
Chicago	11,460,000	9,092,000
Milwaukee	235,000	129,000
Minneapolis	4,679,000	3,260,000
Duluth	468,000	10,000
St. Louis	8,820,000	9,736,000
Toledo	1,507,000	1,224,000
Detroit	146,000	140,000
Kansas City	14,558,000	15,783,000
Peoria	545,000	481,000
Omaha	3,330,000	3,491,000
Indianapolis	2,745,000	2,642,000
Total	48,493,000	45,988,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Aug. 2, 1919.	July 26, 1919.	Aug. 3, 1918.
St. Louis	3,600,000	2,875,000	3,394,000
Kansas City	6,183,000	4,885,000	4,271,000
Omaha	1,748,000	1,231,000	1,420,000
Toledo	636,000	562,000	398,000
Detroit	71,000	37,000	67,000
Indianapolis	1,041,000	982,000	1,072,000
Peoria	281,000	209,000	265,000
Chicago	6,443,000	3,476,000	5,058,000
Milwaukee	89,000	29,000	63,000
Minneapolis	1,423,000	1,016,000	1,123,000
Duluth	91,000	61,000	2,0 0
Total	21,606,000	15,363,000	17,160,000

World's Wheat Exports.

Exports of wheat last week compared with previous week and year ago specially reported for this paper by George Broomhall's service:

	Aug. 2, 1919.	July 26, 1919.	Aug. 3, 1918.
American	10,092,000	4,187,000	2,073,000
Indian	.....	.....	280,000
Argentine	1,774,000	3,890,000	6,184,000
Australian	2,645,000	1,576,000	820,000
Others	.....	70,000	32,000
Total	14,481,000	9,723,000	9,389,000

Exports of wheat since Aug. 1, 1919, commencement of European crop year, compared for three seasons:

	1919-20.	1918-19.	1917-18
American	10,092,000	2,073,000	7,704,000
Indian	.....	280,000	620,000
Argentine	1,744,000	6,184,000	278,000
Australian	2,645,000	820,000	1,868,000
Others	.....	32,000	91,000
Total	14,481,000	9,389,000	10,561,000
Season	.....	529,032,000	376,524,000

World's Corn Exports.

Exports of corn last week, compared with previous week and a year ago:

	Aug. 2, 1919.	July 26, 1919.	Aug. 3, 1918.
American	.....	.....	284,000
Argentine	2,116,000	2,449,000	91,000
African	74,000	100,000	34,000
Total	2,190,000	2,549,000	409,000

Exports of corn since Nov. 1, 1918, compared with last year and year before:

	1918-19.	1917-18.	1916-17.
American	3,502,000	25,533,000	39,098,000
Argentine	49,983,000	13,434,000	54,340,000

IG GRAIN PORT OF CANADA

me Grain Elevators at Midland, Ont., the iggest Grain Shipping Center of Canada—Rapid Growth of a Wilderness Lake Grain Station.

By C. H. BROOKS.

One of the ports which was largely veloped in the course of the war is idland, Ontario. This thriving town, uated on the Georgian Bay, lies about 5 miles north of Toronto. A few ars ago the district around about was wilderness. Today it is a region of

GRAIN CARRIERS WINTERING AT MIDLAND, ONT., SHOWING MIDLAND ELEVATOR

expanding trade. It is now a most portant point on the Canadian lower es for shipping grain. In the season 1918 thirty-five million bushels of in, mainly from the Canadian West, some from the United States also, sed through its elevators and over tracks leading eastward to the sea. idland has three grain elevators. se have a combined capacity of six lion bushels. They are still inadete for the purpose, and a million-ar addition to the largest, known as Midland, is in course of erection, ch will be finished in time to handle year's crop. The Midland Elevator a present capacity of two and a half ion bushels. The Tiffin No. 2, the nd one, has a capacity of two mil- and a quarter, and the Aberdeen, last, has a capacity of one million els. These were not large enough elieve the congestion at this point ng the autumn of 1918, and when winter set in, it caught a fleet of ty-five grain carriers in Midland or. These had fifteen million bushf grain on board, which had to be aded in time for the opening of gation.

the past few years Midland has to be the biggest grain shipping er of Canada. Facilities are pro- for the rapid transshipment of from the elevators. For example, iffin No. 2 four cars are loaded at ne, and at the rate of one every minutes. In the four and a half of war Midland was a point of it for one hundred and twenty mil- bushels of grain consigned to Eu-

ny of the largest freight steamers ie lakes have Midland as a port of

hough the population of the town t more than 10,000, it is one of the st in the Dominion and a place of erity.

thwestern Grain Dealers' Ass'n.

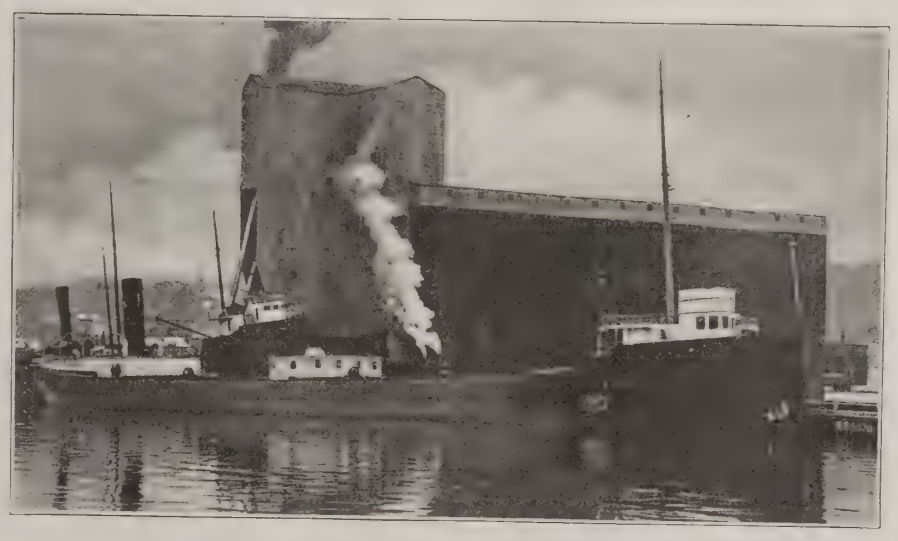
convention adopted resolutions ing with the National Grain Deal- Ass'n; asking the legislature to legislation requiring the assessors lect data as to the area cultivated each season as a basis for crop estimates; and asking the Bureau of Markets to make Montana a separate grain inspection district, with its own grain inspection, instead of having it linked up with the inspection at Minneapolis, Spokane and Salt Lake.



WINNIPEG TRADING STOPPED.

On July 29, at the request of the minister of the Dominion Trade and Commerce, wired from Ottawa, trading in wheat futures was stopped on the Winnipeg Grain Exchange. A telegram reading as follows was received by the president, F. J. Anderson:

"Please see that facilities for trading in wheat futures be withdrawn immediately."

Notice was given to the traders at once and accordingly nothing further was done in wheat trades.

Facilities for contract trading in wheat was opened July 21st, after being closed for almost two years, the price of wheat being fixed. After the reopening there were only seven days' trading, the opening trade being at $2.20 per bushel and the closing price on July 28 at $2.45½ for October delivery, showing an advance of 25½ cents per bushel.

"UP-TOWN ELEVATOR," MIDLAND, ONTARIO.

Argentine Credit to Allies.

A cablegram from Buenos Aires says that the president of Argentina has sent a message to congress urging that immediate consent be given to the government's project for the granting of the credit of $200,000,000 gold to Great Britain, France, and Italy for the purchase of Argentine products which the senate rejected in the last session and which the executive presented again at the opening of the present session.

Our Liner Ad Department, Page 5, always contains some good things.

FROM WASHINGTON

Wants the Feed Trade Investigated—Struggling With the High Cost of Living—Reducing the Price of Wheat to the Consumer—Difficulties.

By JOHN M. GLEISSNER.

WASHINGTON, Aug. 2.—[Special Correspondence.]—A resolution introduced by Senator Norris of Nebraska calls on the Federal Trade Commission to make an investigation of the manufacture and sale of commercial feeds for animals. "There have been complaints of adulteration and fraud," Norris said, in explaining the resolution. "The subject has never been investigated, and I believe it should be."

The investigation will include the gathering of statistics as to supply and price fluctuations and the extent to which commodities are converted into concentrated feeds by manufacturers and wholesale and retail feed dealers. The Commission is asked to determine also if fraud is practiced in misbranding or in using poor quality substitutes. The Secretary of Agriculture is instructed by the resolution to coöperate.

STRUGGLING WITH THE H. C. L.

Agitation is growing in both the legislative and administrative branches of the Government to lower the price of wheat on the market. Such a step, it is argued, would reduce the cost of living; and the problem of high prices is uppermost today in Government circles, yielding not even to the peace treaty and the League Covenant. On the Administrative side, cabinet members are meeting and discussing what they believe to be the underlying causes for continually soaring prices, and are trying to formulate remedies. They will report to the President, and he in turn will suggest action to Congress. The House has postponed its proposed recess at the earnest request of the President, who expects to have a definite program to offer within a short time.

One of the three members of a committee named to draw a report on cabinet conferences, Assistant Secretary of the Treasury Leffingwell is known to favor action to lower wheat prices. He advanced this idea at the first meeting, which was held under the leadership of Attorney General Palmer. Palmer, too, is known to be giving the suggestion serious consideration, and advisers of President Wilson have advanced their arguments to him.

The way was paved for congressional action through the introduction of a resolution by Representative Fitzgerald of Massachusetts, which would compel the Government to market this year's wheat crop at the world market price, making good the deficit from the billion dollars appropriated to guarantee the government's fixed price. This resolution reads as follows:

"*Whereas*, Any market reduction in the price of wheat would mean a lowering in the price of flour, which would be followed by a drop in other commodities, thus making possible the beginning of a movement to reduce the cost of necessities of life; therefore, be it

"RESOLVED, That it is the sense of the House of Representatives that the United States Government take the same action as was taken by the government of Canada and sell the wheat raised in the United States during the present year at world's market price, making up the deficiency from the billion dollars appropriated; and be it further

"RESOLVED, That the Attorney General be requested to take immediate steps to stop speculation and gambling in the stock exchanges of the country in food products and other necessities of life."

It is considered unlikely that action will be taken on this resolution before the President recommends legislation to Congress.

Julius H. Barnes, president of the Grain Corporation, has been summoned from New York to sit in with the cabinet members. This lends weight to the prediction that action is meditated with regard to wheat. Last week Barnes called on the President, and said as he left the White House that an important statement about grain would be issued within 48 hours. The statement has not yet appeared, and no reason has been offered why the President did not issue it as Barnes expected.

Many obstacles, some of them physical, are seen by officials in any attempt on the part of the Government to market the country's wheat crop. A vast administrative machinery would have to be created, it is pointed out, and expenditure of hundreds of millions by the treasury is not desired if it can be avoided. The expenses of the Government this year are to be $6,000,000,000, to come from taxation, and the country is complaining bitterly of the tax burdens it is now forced to bear. Further, the Republican majorities in Congress favor a *laissez faire* policy toward business as much as possible.

But this fact stands out: leaders of both parties recognize that something must be done to readjust the economic situation. Strikes are rife, and 2,000,000 railroad workers want more money. Labor leaders have told the President they cannot hold their men in check unless living is made cheaper; they said they are tired of the "vicious circle" of more pay, followed by extortion by profiteers.

Some officials hold that laws now on the statute books would enable the Government to reduce the market price of wheat without additional authority—say to sell at $1.26. The country technically, they point out, is still at war and wartime powers could be used, though there is a tendency for the Government to give up its paternalistic policies of the past two years as much as possible.

Another plan suggested for reducing living costs is the licensing of dealers. If this were done a certain percentage of profit would be allowed. Bakers, for

instance, would be allowed a cent of profit on a loaf of bread and millers might be permitted to add 25 cents profit to the cost price of a barrel of flour.

Food Administration laws are still on the statute books through which such a step could be undertaken. Money is not appropriated for their operation, however.

SALE OF FLOUR AND MEALS.

The War Department, through its surplus property division, is offering for sale at Ft. Sill, Okla., 180,000 pounds of flour substitutes, sealed bids for which will be opened Aug. 9 at the office of the zone supply officer, St. Louis. Certified checks must accompany bids, in 10 per cent of the amount named. The following commodities are offered: 15,000 pounds of white corn and 15,000 of yellow corn meal; 120,000 of issue flour, in burlap and cotton sacks; 10,000 of rye flour, 10,000 of corn starch flour, 5,000 of oatmeal flour, and 5,000 of white corn flour. All the flour is packed in 100-lb. sacks except the corn starch, which is in 140-lb. sacks. No bid for less than the entire lot will be considered except for the issue flour, which will be sold in lots down to 30,000 pounds. Bids are f.o.b. Ft. Sill. General retail sales will be authorized to begin on Aug. 18.

CANADIAN WHEAT PROBLEM.

Canada is having a serious proposition marketing the prospective spring wheat crop, estimated at approximately 175,000,000 bus. Canadian grain dealers want an open market, fixed prices restricting their operation and of course are deadly as to fluctuations. Western grain growers think the price will go higher, and the week's trading for future delivery on the Winnipeg Exchange indicated that probably they were right. The growers of Manitoba and Alberta last winter refused to endorse a fixed price. Saskatchewan, however, was more frank and wanted it. Now, however, the government steps in, with a plan substantially as follows, a fixed minimum price of $1.75 being understood:

1. A board will buy and market the crop of 1919.
2. A cash payment on account will be made to the farmer at the time he sells his wheat.
3. The wheat crop of Canada will be sold by the board at the prevailing world prices, and the surplus proceeds, after expenses are deducted, will be distributed to the original sellers of the wheat in proportion to grade and quantity.
4. No speculation on exchanges or profiteering by handlers will be allowed in disposing of the wheat crop of 1919 to the disadvantage of either producer or consumer.
5. A direct and immediate cash sale by the farmer and a speedy movement of the crop along the usual channels of transport will be required.

To this however there is very decided objection. Liberal members of the Manitoba Legislature on Friday night last passed resolutions to the effect that an open market was desirable, the caucus failing to see how farmers are going to benefit by the proposed minimum, and in their opinion the proposed bonus system would entail a tremendous amount of bookkeeping without any advantage to wheat growers. A committee was selected to protest against the government plan.

The great difficulty in the problem is the matter of financing the movement. In addition to finding cash purchasers, there is also the problem of transportation. Ordinarily 60 per cent of Canada's grain goes to Europe through the United States, but the United States probably will need its entire facilities for moving its own export surplus and practically the only American port open to Canadian wheat will be Portland, Me. As the Canadian price has been considerably lower than the American government the remedy to prevent a further slump in values is this minimum price, which is not a remedy but an experiment—that is, to make the minimum price the basis for financing. The banks at least will not give credit beyond this minimum and the grain must be handled on credit with a doubtful market and impaired transportation facilities so that Canada thinks she is up against it.

DUST EXPLOSION PROGRAM.

The campaign for the grain dust explosion and fire prevention work of the Grain Corporation, for which an appropriation of $50,000 was made recently at the suggestion of Julius H. Barnes, will be conducted by David J. Price of the Bureau of Chemistry, engineer in charge of the grain dust explosion investigations carried on by the Agricultural Department. He will have the assistance of Dr. H. H. Brown, organic and physical chemist, also of the Bureau of Chemistry.

In order to carry on the "Safety First" program for the grain trade, the country has been divided into four districts. These will be the Eastern, Central, Northwestern and Pacific. Headquarters for the Eastern Division will be at Washington, D. C., with Hylton R. Brown in charge. This district will include Zones 1, 3, 6, 7, 13 and 9, exclusive of Indiana and Michigan, and the Coast and Gulf states of Zone 11. In the Central Division will be Zones 2 and 5, except Utah and the sections of 9 and 11 not included in the eastern district. Headquarters will be at Chicago in charge of B. W. Dedrick. Vernon Fitzsimmons will direct the work of the Northwestern section from Minneapolis, Minn., including Zones 4, 8 and 14. Zones 10 and 12 and the state of Utah will constitute the Pacific section, headquarters at San Francisco and Portland, M. E. McCollam in charge.

A Growing Business.

D. Rothschild Co., one of the progressive and well-known firms of the Chicago Board of Trade, which has been devoting its energy to the merchandising of barley, corn and grain products, will, from now on, also give special attention to consignments and the placing of "to arrive" grain.

This department will have the personal attention of Albert Rothschild, president of the company, who has had over twenty years' experience in all branches of the grain business. He is well known in Nashville, Davenport and among country grain shippers of Iowa, and his associates are conversant with the consignment business and the Chicago floor trade where such grain is sold. In this connection it is not amiss to again emphasize Chicago's facilities and the undoubted advantages they will offer country shipping trade this year. The D. Rothschild Co. in this movement hopes to participate, through their consignment department, and thus increase the business they have already had along broad lines as above suggested. The Chicago office is located in the Webster Bldg.

WASHINGTON WHEAT.

The state of Washington is peculiar, owing to its varied climatic conditions, in that it is the producer of every kind of wheat listed under the Federal wheat grades. The records of the Washington State Inspection Department for the season July 15, 1918-Feb. 1, 1919, shows that at Seattle and Tacoma there were receipts of every one of the six classes of wheat represented in the standard grades as well as mixed wheat in proportion of about 5 per cent of the total receipts. Common white was the most considerable in quantity, aprpoximating 32.72 per cent; White Club, 29.55 per cent; the Hard Red Spring and Winters equaled 25.57 per cent; Soft Red Winter, 6.99 per cent; Durum, 0.04 per cent; mixed wheat, 5.13 per cent.

Sub-classes of course were in evidence, the common white being divided into hard and soft white, the hard red springs into dark northern, northern and red spring; the hard reds into dark, hard, hard winter and yellow and the red winter into red winter and red Walla Walla. Some of these subclasses of course were not very numerous, red spring as a sub-class of the hard red spring amounting only to 0.11 per cent and the yellow winter as a sub-class of the hard red winter only to 0.46 per cent.

Such a condition of course is rather perplexing to the millers, but as this conditions has been more or less in evidence at all times in the history of milling in that part of the country, the millers naturally have adjusted themselves to it and have become rather more expert in the blending of various qualities of wheat to obtain the desired results than most millers in those sections of the country where there is practically only a single variety of milling wheat. The *Weekly News Letter* refers to this as "a serious handicap to millers"; but it may be a question whether it is in fact a very serious handicap to millers who are trained to that sort of thing.

JACKSON BROTHERS INCREASE.

James E. Cairns and Earl O'Neill have been admitted as general partners to the firm Jackson Bros. Co. The growth of their business in both cash and speculative lines, to which reference has frequently been made, makes it the logical thing to give a more prominent interest to these department heads who have been identified with the concern for many years. Both men are familiar figures on the Chicago floor and Mr. Cairns will be recalled as an operator under his own name before the war. He feels quite certain that the fine business opportunities for trade and business interests generally will show for their business a satisfactory share in the season's trade.

James E. Cairns.

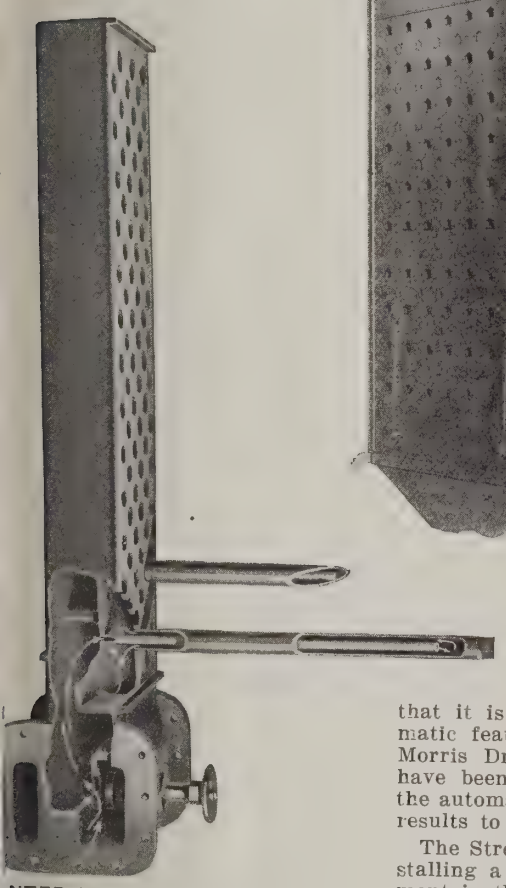
Punjab Wheat Crop.

Consul Richardson, Karachi, reports the final forecast of the wheat crop of the Punjab for the year ending Sept. 30, 1919, as officially estimated at 2,509,191 tons, which is 14 per cent below the average of the past ten years. The total yield in the Native States is estimated at 276,234 tons. With a view to conserving stocks of food grains, no purchase of wheat for export oversea to destinations other than Mesopotamia are now being authorized.

Liverpool Foreign Produce Report.

Bigland, Sons & Jeffreys, Ltd., of Liverpool have resumed publication of their annual "Situation and Forecast of Foreign Produce," which after years of consecutive publication was suspended the second year of the w This review to all interested in tallow animal fats, and vegetable oils of kinds will be found particularly int esting and valuable. In introducing t report the writer says: "To all th engaged in overseas trade we can s the greatest and most difficult probl after governments give up arrang credits with and for one another w be the solution of the foreign excha question"; and this question occupie very considerable portion of this va able report. As to feeding stufls the port says that the government cont on imported cattle cakes and mea having only lately been removed af having been in existence for someth over a year, any endeavor to forec the probable course of the market the next six or nine months becon rathes difficult. The writer of the port, however, says: "We may as w say at once that our views are bulli partly owing to the general condition the world's markets and partly beca in our opinion the price of all ca feeding stuffs must be largely govern by maize (corn)." Another po which the writer says should be bo in mind, is the probability that United States may not export as mu of these products as hitherto beca during the past two years Ameri feeders have begun using these pr ucts themselves to a larger extent t formerly. At any rate, inquiries in U. S. by the company, both for Uni Kingdom and Scandinavian consu tion, has brought the reply that b shippers and crushers have practic no surplus stock on hand, all hav been used up at home. "As we are a advised," says the writer, "this state things is very likely to continue. seems probable that the export surp in the future fro mAmerica will be c siderably less than we have been customed to." The trade is also minded that Russia, from which co try prior to the opening of the large quantities of cake as well as ley, corn, etc., were obtained, are p tically out of the market indefinitel

Movement of Corn.



Following is a statement of the ceipts and shipments of corn at primary markets of the West for weeks named:

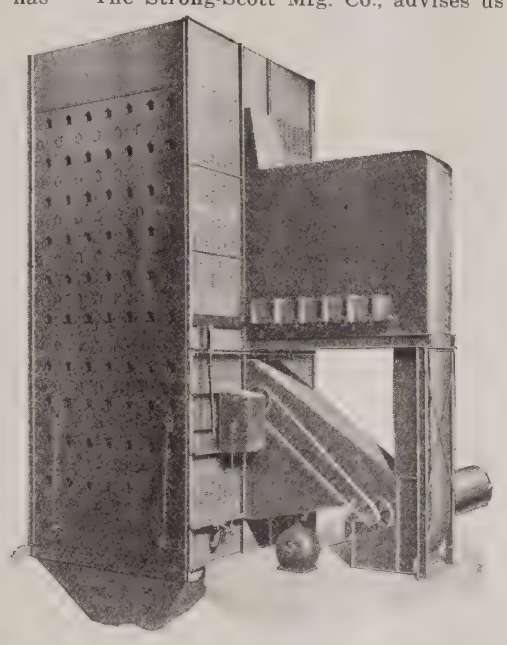
IMPROVED MORRIS GRAIN DRIER.

Ve believe that the trade will be in-ested in the recent improvements ie by The Strong-Scott Mfg. Co., of meapolis, in their Morris Grain er. This drier is now made of the -contained and self-supported type ll sizes, as shown in the photograph reproduce on this page. In this e of construction all of the weight arried from the main floor of the ding. It has been customary with Strong-Scott Company, as well as er grain drier manufacturers, to use beam construction from wall to l of the drier house for supporting heating coils, and in many cases ial "I" beam floor construction to port the drier as well as the cooler. drier and cooler are now made all ne continuous section, and "I" con-ction is furnished as a part of the r for supporting the steam heating s, which greatly simplifies the build-construction; in fact, the building l not be of special design as has customary heretofore. Any type ilding that will house the drier is at is required.



other very marked improvement een made in the method of piping eating coils. These are of the in-l feed type, with one end of each ree to expand and each section of oil is provided with a valve in the We illustrate herewith a sec-view of this new type heater-and the simplicity and economy of s evident at a glance. As the coil ns are bolted together they form tinuous steam header with a valve ach section, and this does away ll external pipe for connecting the is sections together, still giving dual control for each section and is no chance for leaks to occur ll radiation losses in the inter-cting piping has been eliminated. e connections are provided for the and exhaust ends of the coil sec-which makes the coil sections for pipe connections. This type nstruction will appeal to those ar with the multiplicity of piping tions usually furnished with drier ations.

NTED VALVE IN THE HEAD OF ATER-BASE FOR MORRIS GRAIN DRIER.

All Morris Driers as now built are of the patented automatic type commonly known as the Intermittent Discharge Drier. The photograph that we reproduce here shows a direct belt drive from the fan shaft to the automatic mechanism located on the end of the drier. The pulley on this mechanism operates at constant speed, but the mechanism itself can be timed to open the gates every few seconds when a small per cent of moisture is to be extracted, or it can be set to open and close the gates at any interval up to four minutes, when high percentages of moisture are being removed. The intermittent discharge is a positive assurance of a uniform rate of discharge from the cooler and drier, which is guaranteed to produce uniform drying regardless of the rate of drying. The gates on both drier and cooler are swung on rods fastened to the side of the drier as shown in the photograph. This assures an easy moving gate which cannot bind or clog.

The Strong-Scott Mfg. Co., advises us that it is possible to install the automatic feature on any of the old type Morris Driers; in fact, a great many have been changed from the batch to the automatic type with very gratifying results to the owners.

SELF-CONTAINED AUTOMATIC MORRIS GRAIN DRIER.

The Strong-Scott Mfg. Co. are now installing a very interesting drier equipment in the North Central Canton Elevator at Baltimore, Md. This contract consists of eight units of 500 bushels each, all of which are of the automatic intermittent discharge type. It is hoped that these eight units will be ready for operation not later than Oct. 1 of this year. The Strong-Scott Mfg. Co. also report orders recently placed for automatic self-contained driers as follows: Fort Worth Elevator Co., Fort Worth, Texas, one 750-bu. unit; Sperry Flour Co., Stockton, Calif., two 200-bu. units; Terminal Grain Corporation, Sioux City, Ia., two 500-bu. units; W. D. Sheldon Co., Stockton, Calif., one 200-bu. unit; Smith, Parry & Co., Milwaukee, Wis., one 400-bu. unit; Plymouth Milling Co., Le Mars, Iowa, remodeling Morris Drier for automatic discharge.

The manufacturers of the Morris Drier report a very favorable outlook for a great volume of drier business during the next few months and they will send on request complete information on a drier unit of any size.

Field Agent Becker of Wisconsin reports that during the year ending May 1919 about 6,000 silos were built in Wisconsin, making the total for the state about 70,500, estimated as one silo for every three farms in the state.

Inspected Slaughterings.

The Bureau of Animal Industry, in *Service and Regulatory Announcements* for June, reports the following number of inspected animal slaughterings for May, 1919, and for the eleven months ending with 1919 and 1918, as follows:

	May		11 months	
	1919.	1918.	1919.[1]	1918.[1]
Cattle	720,684	781,755	10,598	10,109
Calves	391,304	357,353	3,347	3,011
Sheep	894,324	659,063	10,337	8,022
Goats	14,118	13,987	122	132
Hogs 3,743,463		3,092,325	40,670	32,666

[1]000 omitted.

IMPORTS OF FOOD ANIMALS AND MEATS.

The following statements show the imports of food animals and meats and meat food products inspected by the Bureau of Animal Industry during May, 1919, with figures for other periods for comparison:

From—	Cattle.	Swine.	Sheep.	Goats.
Mexico	21,931	8	8,455	91
Canada	23,563	388	1,243	.....
Great Britain	587	.....	.....	.....
May, 1919 ..	46,081	396	9,698	91
May, 1918 ..	23,849	49	3,908	1,903
11 mos.—				
1918-19 ...428,166		23,899	181,798	24,327
1917-18 ...267,019		13,638	151,620	23,789

Following is a statement of imports of beef and other fresh and refrigerated meat and canned and other meat products, in pounds:

	May		11 months	
	1919.	1918.	1919.[1]	1918.[1]
Beef 1,986,768		741,639	29,660	17,241

Other prod. 535,371		304,566	6,907	11,210
Total 6,969,483		3,407,541	175,572	55,433

PAYMENT OF OLD CLAIMS.

Max Thelen, Director, Division of Public Service, U. S. Railroad Administration, has sent information to the New York Board of Trade and Transportation regarding the present attitude of the Railroad Administration as announced by E. Marvin Underwood, General Solicitor. Mr. Thelen's statement follows:

"Referring further to the matter of the two-year and one day limitation in bills of lading, I enclose herewith, for your information, copy of instructions which are being issued by E. Marvin Underwood, General Solicitor of the Division of Law, to all the Regional Directors.

"As you will note, these instructions provide that in order to secure uniformity of practice over all Federally controlled lines and to maintain the status quo pending the decision of the Interstate Commerce Commission in the case of Jacob E. Decker & Sons vs. Director General et al., I. C. C. Docket No. 10696, all General Solicitors and Freight Claim Agents are directed to withhold payments, pending such decision, on claims which are more than two years and one day old.

"As you will observe, the Railroad Administration states that if the decision of the Interstate Commerce Commission is favorable to the payment of such claims, it will be the policy of the Railroad Administration, during a limited period thereafter, to pay all meritorious claims of this kind provided the consent of the railroad corporation may be secured.

"The proviso with reference to securing the consent of the railroad corporations is necessary for the reason that a number of these corporations have served formal notice upon the Railroad Administration that they will not honor payments of claims against them made by the Railroad Administration after the period of two years and one day, and it would be possible for these corporations, even though the Interstate Commerce Commission should hold that these payments may lawfully be made, to urge that they could have defeated the payments by refusing to make them and standing suit and that the Railroad Administration has no right, by paying these claims, to deprive the corporations of a defense which they might have made.

"It is not personal judgment that in case the Interstate Commerce Commission should hold that these claims may lawfully be paid the Railroad Administration, in co-operation with the shippers, will be able to induce most of the railroad corporations to agree that just claims may be paid by the Railroad Administration.

The following is a copy of the general solicitor's letter to all the regional directors, viz.:

"It appears that on some railroads claims for loss and damage, upon which suits have not been brought before the expiration of the two years and one day limitation in the bill of lading, are being paid by freight claim agents, while on other railroads the payment of such claims is being declined on the ground that same cannot legally be paid.

"The question as to whether or not such claims may lawfully be paid is now pending before the Interstate Commerce Commission. In order to secure uniformity of practice over all Federal controlled lines, and to maintain the status quo pending the decision of the Interstate Commerce Commission, please instruct all general solicitors and freight claim agents to withhold payment pending such decision.

"Should the decision of the Commission be favorable to the payment of such claims, it will be the policy of the Administration, during a limited period thereafter, to pay all meritorious claims of this kind, provided the consent of the railroad corporation may be secured."

Shriveled Wheat and Disease.

Shriveled grains are an indication that plant diseases are probably present in the grain and that such grain should not be used for fall seeding, unless recleaned and treated, according to botanists at the Ohio Experiment Station. Anthranose and wheat scab, which have been quite prevalent in Ohio grainfields during the past year, both cause grain to shrivel, the shriveled kernels containing the spores of the disease.

Movement of Wheat.

Following is a statement of the receipts and shipments of wheat at the primary markets of the West for the weeks named:

The State University Farm at St. Paul recently held a short course in elevator bookkeeping, using the system of the Bureau of Markets for coöperative companies.

The Letter Box

Sold Out.

The Price Current-Grain Reporter: The Watertown Grain Co. of Watertown, Mich., has been sold to Robt. Johnson of Watertown.—*Paul Billings & Co., Croswell, Mich.*

Cars Short—Elevators Filled.

Price Current-Grain Reporter: The wheat crop is about half thrashed. The car shortage is getting serious. It is filling up elevators in this vicinity.—*Dewey Bro. Co., per Frank Littler, mngr., East Monroe, O.*

Seed Cleaner Added to Equipment.

The Price Current-Grain Reporter: We wish to report that we are adding a seed cleaner to our equipment and this season we will clean field seeds of all kinds as well as deal in them.—*Rupert Seed & Milling Co., Rupert, Idaho.*

Sold Elevator.

Price Current-Grain Reporter: We have sold our elevator at Union, Ohio, to the Stillwater Grain Corporation, and are now operating only our elevator at Englewood, Ohio.

We think it very important at this time that threshing should be stopped in the greater portion of the wheat belt until more cars for shipping grain can be secured.—*Baker Bros., Englewood, Ohio.*

New Machinery—Crops.

Price Current-Grain Reporter: The farmers' elevator Co. at this point is building a new office and the St. A. & Dak. Elevator Co. is installing an expert cleaner.

The crops in this section were damaged considerably by rust, especially the Marquis Wheat. Oats are a fair crop, but barley is poor. Flax has been damaged by wilt.—*J. A. Kelly, agt. St. A. & D. Elv. Co., Crystal, N. D.*

From Preble Co., Ohio.

Price Current-Grain Reporter: Ten per cent of the wheat crop is still in the shock. The yield is about 20 per cent short, and the grain shows very low average test per bu.

Oats an average crop.

Corn is looking well with prospect for a good crop.

There are complaints of grasshoppers destroying clover seed prospect and young clover.—*Jos. Poos, Eaton, Ohio.*

Crops in West Texas.

Price Current-Grain Reporter: Crop prospects here were never better than now, and we are harvesting the largest oat and wheat crop ever harvested in this section, with quality fairly good. We expect to have corn in this section this year, but not enough for commercial uses. The majority of the fields will make from 35 to 65 bushels per acre. We have one of the best crops of maize and kafir ever known and expect to be moving it freely in the next thirty days. The farmer should make more from maize and kafir. The majority of wheat in this section is averaging 30 bushels. Some few have averaged 40 bushels, but this was an exception. Oats are averaging about 35 bushels, but some fields go as much as 65 bushels.—*Easton Grain Co., San Angelo, Tex.*

Kansas Wheat Demonstrations.

At the request of Gov. Allen of Kansas, the Department of Agriculture has assigned six Federal grain supervisors to demonstrate in Kansas the Government wheat grading methods. They will work in cooperation with the Kansas state grain inspection department and under the joint direction of that department and the Federal grain supervisor's office at Kansas City. Unusual crop conditions due to weather have increased the importance of a correct knowledge of the factors entering into the grading of Kansas wheat. Grain grading demonstrations already have been held by the Bureau of Markets this year in Ohio, Indiana, Iowa, Nebraska, Missouri, Oklahoma, Texas, Virginia, Pennsylvania, Washington, Oregon and Idaho. Others have been planned in Minnesota, North and South Dakota, and Montana. The following men have been assigned to the emergency work in Kansas: E. L. Morris, division supervisor, Kansas City, Mo.; R. D. Jarboe, grain supervisor, Kansas City; Hazen P. English, grain sampler, Kansas City; J. R. Mathewson, grain supervisor, Minneapolis, Minn.; John Sheedy of the Board of Review, Chicago; J. H. Frazier, assistant grain supervisor, Chicago.

A YEAR'S EXPORTS.

The following statement of exports of domestic breadstuffs, cottonseed oil, meat and dairy products, cotton and mineral oils, from the United States, was completed on Aug. 1 by the Bureau of Foreign and Domestic Commerce, Department of Commerce (000 omitted):

	June, 1919.	June, 1918.	Year ending June, 1919.	Year ending June, 1918.
Exports by Groups.				
B'dstuffs.	$118,330	$54,472	$954,780	$633,240
C't'ns'd oil,lb.	30,695	18,669	178,710	100,789
C'tonseed oil	$6,357	$3,685	$36,821	$18,310

Texas Public Weighers' Law.

The Attorney General of Texas has ruled that under the weights and measures law that no one can sell a sack, a wagon or a carload of oats unless the weight of each sack is plainly and permanently marked on the sack. Sec'y Dorey has called his attention to Section 4 of the law, which reads as follows:

"All contracts hereafter to be executed and made within this State for any work to be done, or for anything to be sold, delivered, done or agreed for, by weight or measure shall be taken and construed to be made according to the standard weight and measure ascertained as hereinbefore provided, unless there is an express contract to the contrary. In making any adjustment of weights or measures under the laws of this State, the standard herein given in this Act shall be taken as the rule and guide for making such adjustment."

Mr. Dorsey contends that this clause relieves the farmer or grain dealer from literally complying with this when "there is an express contra the contrary." He has also urged fact that if the farmer and deale sire to contract for the purchase sale of any quantity of oats with understanding that they are of un weight sacks, with 32 lbs. to the bu the law cannot abridge this righ contract.

Corn in Primary Markets.

Receipts of corn in eleven pri grain markets from Nov. 1, 191 Aug. 2, with comparisons with 191

	1918-19.	191
Chicago	51,240,000	74,3
Milwaukee	4,556,000	10,6
Minneapolis	6,056,000	14,2
Duluth	25,000	1
St. Louis	17,455,000	21,2
Toledo	1,024,000	2,1
Detroit	1,420,000	3,3
Kansas City	15,439,000	27,6
Peoria	16,743,000	28,4

BARLEY MARKET.

ILWAUKEE.—The local barley marıs active, with prices for the week ıncing 6@10c. The top price hed $1.50, but fell back subsequent- The demand is good from indus- and shippers, particularly for the er grades of offerings. Receipts inue moderate, but the markets are well cleared. Saturday the marclosed steady for good malting, but r for poorer qualities. The first of new Wisconsin barley was on this week, testing 43 lbs., being Two cars of new Iowa from the ern part of the state tested 45@ lbs. and sold at $1.35, 7@8c dist under old; graded No. 4. Reıts for the week were 242 cars, ıst 307 cars a week ago and 10 cars in 1918. Current quotations are: Good to choice, 48 to 50-lb. test, quotable at $1.46@1.48; bright, $1.49@1.50; fair to good, 45 to 47-lb. test, $1.38@1.45; low, 41 to 44-lb. test, $1.35@1.40; feed, $1.33@1.40. Iowa quoted $1.35@1.48 for light to fancy; Wisconsin, $1.38@1.50; Minnesota, $1.33@1.48; Dakota, $1.33@1.48; feed and rejected, $1.33@1.40.

DULUTH.—Receipts of barley continued in record volume on this market, receipts for last week aggregating 287 cars, against only four last year. Specialists in their trade reported steady bidding for barley from Eastern interests, and shipments down that way were in good volume, so that supplies in the elevators here were kept down to small proportions. Quotations were advanced to a new record high basis on the crop at from $1.28 to $1.37, but they receded at the end of the week to from $1.26 to $1.32.

PORTLAND.—The barley market is a little less active the past week and buyers are holding off, all kinds of trading being light, both public and private. The market has somewhat modified the grades which appear below. The *Commercial Review* quotes No. 3 blue barley at $69 and feed at $67 per ton.

CHICAGO.—The barley market at Chicago last week was a distinctly tame affair. The week opened with a decline in prices reaching 2@5c on Tuesday, which was not recovered during the week. No one seemed to be interested in the grain. There were fair offerings but only the choicest kinds received any special attention. On Friday a new car of very choice came in which was sold at $1.48, or 3c above the previous high price of the season. Towards the latter end of the week the undertone was firmer but no distinct advance in prices was to be noted. The present week the market opened heavy with buyers without any special interest selecting only choice varieties and generally the price list was from 2@5c under last week's close and some barley for the day had to be carried over. Maltsters took what was sold and the industries practically nothing. Sales for the day were reported as 19 cars at a range of $1.30@1.42. The futures closed at the low point generally from 6¼@8c under Saturday . September sold down to $1.19½, September new down to $1.30¾ from $1.34. December opened at $1.36 and closed at $1.30½. Exports from Atlantic ports for the week were 2,450,000 bus., compared with 850,000 last year.

SAN FRANCISCO.—The barley market is a little more active. Many sales for future delivery have been made and new high values have been recorded. Spot barley is reported by the *Review* at $3.10@3.15 per cental. The harvesting of the crop is almost completed.

KANSAS CITY.—Although the new crop movement began, the barley market ruled strong until the latter part of the week, when it was eased by weakness in corn and oats. No. 3 sold as high as $1.37 and No. 4 at $1.35. Closing prices were at $1.32@1.35 for No. 3 and $1.30 for No. 4, showing net gains of 8@10c a bushel. Sales were mostly for scattered shipment to feeders. Local manufacturers were not disposed to buy for grinding, owing to the advance and the probability that new barley would soon depress the market. Most of the ground feed handled came from Minneapolis. It was quoted at $3.20 per cwt., sacked, or 10@20c up from the previous week. Receipts of barley for the week were 7 cars, against 3 a week ago and nothing a year ago. Local stocks were unchanged, standing at 2,000 bus. The arrivals of new barley were from Kansas. They were bright and sound, but of light weight. As very little threshing has been done, it may be some time before the movement shows an important volume.

MINNEAPOLIS.—The market for barley was carried lower by the decline in the futures. Offerings were lighter, but this did not check the weakening tone. There was a fair day to day clean-up of the arrivals, though at times the holders were too stubborn and carried their barley over in hopes of finding a better market the next day. New barley samples show light weight generally.

New Barley Grades at Portland.

The Merchants Exchange at Portland has made some changes in the standard grades in that market as follows:

Instead of "Standard A 43-lb. barley," substitute No. 3 Blue Barley, Oregon state grades.

No. 2 Eastern as offered must be "sound, cool and sweet and of healthy color, shall not be less than 46-lbs. to the commercial bushel; shall contain not more than 2 per cent of dirt, weed seeds combined, 5 per cent of other grains, which may include not more than 3 per cent of wild oats."

The grade of 40-lb. feed barley remains unchanged.

The rule as to other grains provide for resacking a charge of 4½c each for bad order sack and 11c each for sacking this season. The bulk differential shall be $2 per ton between sacked and bulk feed grains.

The Secretary of New York Produce Exchange on July 31 received the following notice from the Ass't Mngr. of Inland Traffic of the Wheat Directors' Office:

"On account of volumes of new wheat permitted to the Port of New York, which at the present time is about 7,000,000 bushels, and the movement from the West becoming very heavy, so that within the next fifteen days the elevator and grain boat capacity in the port of New York will be entirely used, we must decline to issue permits on coarse grains. You understand that under the direction of the Government, the new wheat crop must be taken care of in preference to the commercial coarse grains."

When the 'BUCKET and BEAM'

Weight Per Bushel Tester Cannot Be Obtained

WHY not get something better?

This Special "Four-in-One" Scale

will give the test weight per bushel even more accurately and easily than the 'bucket and beam' and besides that three other kinds of weights especially adapted to the various needs of the grain man.

No. 14—Special Four-in-One Scale

This scale, designed and manufactured by us, is a smal complete office scale for weighing samples for moisture te and for determining test weights per bushel, dockage weights for mailing samples, etc.

This "Four-in-One" Agate Bearing Scale is the most com plete, compact, accurate and adaptable scale made. Quic breaking and guaranteed accurate. Will do the work four ordinary scales designed especially to satisfy any on of the above needs and at the small price of one. Used b thousands of country shippers, receivers and grain me everywhere. Price with weight per bu. cup, $23.00.

Dockage Sieves are very necessary at this time and are effectively used in connection with the scale.

Order a Set at Once. These Dockage Sieves for Wheat and Oats

Government Specifications are made throughout of aluminum, 13 inches in diameter telescoping, only two pieces of metal are used, thereby making the sides seamless. The bottom perforations are of aluminum, which makes the construction strong, light weight and will not rust. Set consists of

A—Scalper Sieve, round perforations, 12/64 inch.
B—Buckwheat Sieve, triangle perforations, 8/64 inch.
C—Fine Seed Sieve, round perforations, 1/12 inch.
D—Chess Sieve, slot perforations, 4½/64x½ inch.
E—Solid Bottom Pan.

Price, $8.00 for complete set.

The SEEDBURO (Trade Mark) Official Brown Duvel Moisture Teste

(for whole or ground grains) is the only standard tester approved by the Govern ment. It is being used by Government supervision offices, Grain Inspection Departments, Mills and Elevators from coast to coast. Made in size, of 1-2-4-6 tests at a time, heated by alcohol, gas or electricity.

When you buy a moisture tester you want the **Standard**—the **same** tester that the Government inspection departments, terminal markets and big grain shippers use.

That one is **SEEDBURO.** We supply the Government with **all** testers used by them. Don't take chances with any other make. It's been expensive for some who have tried it and failed to get the same tests as the state terminal markets who use our **Standard** Testers.

SEEDBURO (Trade Mark) QUALITY

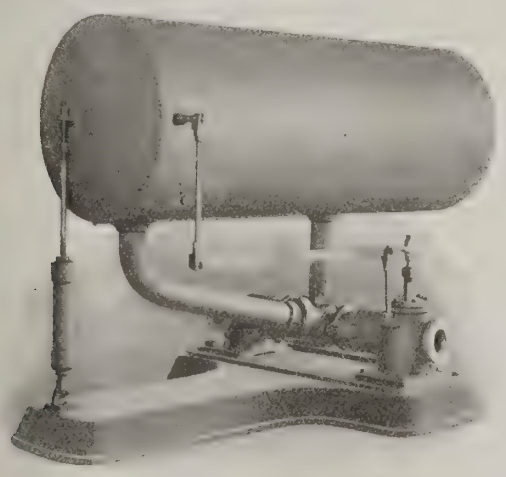
Farmers WANT Ankorite Steel Drive Posts

MILLIONS of practical farmers are reading hard-hitting facts about Ankorite Steel Drive Posts in all of the leading farm magazines. They know the posts and they want them—and they want to buy them from YOU.

We're getting inquires from thousands of farmers who want to know where they can buy Ankorite Posts. Many of them come from your territory—can we refer them to you? An Iowa dealer writes:

"Please ship us at once 1000 more of your 6 foot 6 inch line posts. We're sold out and the farmers are crying for more posts, so please rush the order and we will do our part."

Dealers who began by ordering a few hundred Ankorite Posts are now ordering carload lots by wire! They can't get them fast enough to meet the demand.



Take advantage of this big, smashing, money-making opportunity. Some live wire dealer in your territory is going to make a lot of money through the exclusive sales rights for Ankorite Posts—and we're going to get behind him with all of the resources of the Calumet Steel Company to help him sell posts as he never sold them before.

We want *you* to be that dealer. Sit down right now and drop us a letter or postcard. Just say "Send me details of your dealer proposition and co-operative sales plan." We'll do the rest.

ELLIS AUTOMATIC TILTING TRAP.

n of the new owners to immediimprove this property, giving a considerably larger manufacplant. It is the plan of the s to concentrate on the manufacbusiness, and repeated items in olumn and elsewhere relative to activities in the corn drying field elaboration unnecessary. The sed manufacture of their full driers for all purposes with paremphasis on the rotary type will An important side issue will increased production of the Ellis atic Tilting Trap, illustrated device adapted to handling conion from drying apparatus. Its iful operation is an important feature of every drier installation. The Ellis Company will also increase their output of fans and steam coils, in which specialties as a part of the manufacture of driers they have been successful producers for many years.

Will Buy Flour.

The Grain Corporation announces that beginning Tuesday, Aug. 5, 1919, it will receive weekly offers on Straight Wheat flour. Shipment: 30 days from acceptance of offer and in accordance with shipping instructions. It is also requested that on the first buying day only, Tuesday, Aug. 5, additional offers of flour be made for September shipment, subject to the terms and conditions of Flour Purchase Plan. Purchases shall be based on mill's type samples now on file if samples of new crop flour have not been received by Aug. 4.

Webb McConnell is erecting a seed warehouse in Harlan, Ia., and later will erect a threshing house.

"Properly built storage---"

That's the kind of remarks you always hear made about Polk System grain tanks. Economical design, safety, plus reinforcement, perfect alignment, and a smooth, pleasing finish. They all go with the Polk System. Builders of better storage are now specifying that Polk System machines be used on the job. Many prominent millers and grain men now own their own Polk System machines and build their storage as their needs increase. We'll be glad to show you how it is being done.

News of the Terminal Markets

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

H. J. Huberisque, formerly manager of the Farmers' Elevator Co., of Hull, Iowa, has assumed new duties as solicitor for the McCaull-Dinsmore Co.

The tracks to the Mariner Elevator are now completed, and the driving of piling has commenced. The work on the elevator will be rushed so that the plant will be completed for the new corn crop.

The first car of new oats was received the first of the week from Ruthland, Iowa, tested 30 lbs. and of good color. The oats this year, judging by samples and country advices, are going to be of light weight.

This territory had some nice rains during the past week, which was badly needed for the corn, parties that have been out and inspected the corn fields, report prospects for a bumper crop and one that is about two weeks ahead of normal years.

The Mystic Elevator will be completed in about thirty days. The Flanley Elevator will be completed about September 15th. Both of these elevators are being rushed and are making great headway. The Western Terminal Elevator started to run concrete the first of the week, and is now ready to work 24 hours a day.

NASHVILLE.

John Leiper, Correspondent.

The Oakland Milling & Gin Co., of Jackson, Tenn., has been incorporated by L. D. Johnson and others, with capital stock of $5,000. The company will operate a grist mill.

Southeastern corn mills with capacity of 126,000 bus. reported an output last week of 28,227 bus. Bolted corn meal, sacked, is quoted $4.50@4.60 per 100 lbs., f. o. b. Ohio river points.

The flour mill of N. L. Mansfield and the grain warehouse of H. P. Wayne Co., Delrose, Tenn., were burned, causing loss estimated at $20,000. Lightning is supposed to have caused the fire.

Movement of wheat continued liberal last week, and stocks at mills were materially increased. Corn is in light supply, with demand quiet, and prices a shade lower. Oats are in fair demand, and firm. Quotations: Wheat—No. 2 red, local, $2.15@2.20. Corn—No. 2 white, $2.10 @2.15; No. 3 white, $2.05@2.10; No. 2 mixed, $2.00@2.03. Oats—No. 2 white, 87½@88½c; No. 3 white, 87@88c; No. 2 mixed, 86½@87½c; No. 3 red, 85½@86½c.

Flour trade continues large in the southeast, though not as large in volume last week as for the previous week. Mills have their output sold for about sixty days ahead. Prices hold steady, as follows: Best patents, 98 lbs., cotton, f. o. b. Ohio river points, $10.75@11.25; standard, $10.40 @10.70; 100 per cent flour, $10.20@10.40. Southeastern flour mills, with capacity of 201,270 bbls., had output last week of 138,318 bbls. or 68.7 per cent of capacity. Shipments are active, with no stocks accumulating.

MEMPHIS.

George Williamson, Correspondent.

C. B. Oxendine, of Chickasha, Okla., and S. V. Thompson, of the Carlisle Commission Co., Kansas City, Mo., were visitors on 'Change during the week.

R. B. Buchanan is home from an auto trip to Colorado and other western points. On the trip he wrote letters frequently to members of the local grain trade, giving a detailed account of his experiences, and they were of so much interest that copies were posted at the exchange.

Weather conditions in this territory during the past week have been fairly favorable, although some sections could use general rains to advantage. Showers fell, but some of them were very light. Corn is faring moderately well in the lowlands, but some of the hills are suffering a little. The condition of the cotton crop in this territory has improved.

High prices for cash corn continues and there is very little to be had. Receipts have been light and practically all of it bought some time ago to arrive. Oats have reacted some within the past day or so, reflecting the break in the speculative markets, but sales have been slow since this happened. Illinois oats a few days ago were selling around 83c to 84c, but on call Saturday were offered at 82c for cash No. 2 white and 80c for cash No. 2 red. The latter in transit were offered at 76c, with 74c bid. The best bid for Illinois No. 2 white cash was 79c. Oklahoma No. 3 red sold at 73c a day or so ago, but sales have been few.

Jefferson D. Hardin, Jr.
Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

In order to improve and enlarge this as a market for like stock a number of capitalists and business people who have taken stock in the new local packing house company soon to be built have organized a company and bought the Memphis-Wyoming stock yards, which were built here during the past year. The plant will be doubled in capacity and it is hoped to provide a market for the growing production of hogs and cattle in this territory, most of which now goes to St. Louis and other northern markets. It is estimated that Mississippi alone shipped more than $2,-600,000 worth of hogs to St. Louis during the first half of the present year.

RICHMOND, VA.

Aubrey H. Hawkins, Correspondent.

The wet weather we have been having for the past ten or fifteen days has ruined all of the wheat that had not been threshed throughout this section of the country.

Prospects point to a good corn crop in Virginia.

Mill feeds are very tight and prices on all descriptions are hard to get.

New hay has been offered in limited quantities from Ohio and Michigan points.

Buyers here do not seem inclined to take on many oats at the present basis, although Richmond is a big distributing point for oats, we think very few have been bought here up to the present time.

Good demand for No. 2 rye.

Prices quoted here being as follows: Wheat—No. 2 red wheat, $2.36@2.37; demand slow. Corn—No. 2 white corn, $2.20 @2.23; no demand. Oats—No. 2 white oats, 87c; No. 3 white oats, 86c; No. 2 mixed oats, 85½c. Rye—No. 2 rye, $1.75; No. 1 rye, $1.77. Hay—No. 1 timothy, $34; No. 2 timothy and light mixed, $33; other grades proportionately less.

TAMPA, FLORIDA.

Leonard Selz, Correspondent.

F. D. Jackson, vice-president of Miller-Jackson Grain Co., left this week for a business and pleasure trip through the grain belts of the country and will be gone several weeks. He was accompanied by Mrs. Jackson and son, Richard. Arthur Webb is holding down Mr. Jackson's chair during the latter's absence.

No. 3 white oats are quoted at an unprecedented wide scale of prices. Some sections of the country are quoting at 95¾c, sacked, 100 lbs., delivered Tampa; other sections quoting as high as $1.02½. The local dealers are not buying heavily at these prices and receipts have been extremely light, not amounting to more than twenty cars during the entire past week.

No. 2 yellow corn is quoted at $2.34 per bushel, delivered, Tampa, sacked 100 lbs., and is receiving little or no demand at this price. Many of our buyers are not carrying corn on warehouse floors at all and advise that they will worry along without it. Country buyers seem to feel pretty much the same as the dealers here and demand from that source continues extremely light. As a result of this condition of the corn and oats markets, there is an increased demand for mixed feeds of good quality.

The strike is over and the S. S. Lynchburg is en route from New York to this market with a miscellaneous cargo, among which is considerable feed and grain. Eastern mill feed shippers were out of this market during the marine workers' strike and with the resumption of steamer service from New York, they are again large factors in the Tampa millfeed businesss. The S. S. Lake Fossil is due here from New Orleans with a heavy cargo of feed, grain and miscellaneous goods. Needless to state, the local grain and feed dealers are mighty glad to see the end of the marine workers' strike.

DETROIT.

John Barr, Correspondent.

Miss Harris, of the Duluth Board of Trade, was a visitor on 'Change last week.

Shippers wanted rye early in the week, but later pulled out and let the market decline 7c. There was a little milling enquiry at the decline, but not enough to bring the market activity or strength. The tone at the close was easy at $1.58 for cash No. 2.

Wheat is inactive and unchanged. Millers are about to begin work on new grain and a more active market is expected. Receipts are increasing. Demand for flour is active and for all kinds of millfeed far beyond the capacity of the mills to supply.

The demand for beans is pressing and the market is strong and much higher. Export buying became active in New York some days ago and Michigan dealers could have made much larger sales had they been able to secure the grain. Late in the week the market was firm at $8.75 for immediate and prompt shipment per cwt. There were complaints that the dry weather was injuring the crop, but recent rains have greatly improved conditions.

Oats are in fair demand. Local buying was active before the weakening of the market Thursday and offerings were not large. Later there was no increase in receipts, but buyers were not so pressing and prices declined along with corn. Quote: No. 2 white, 83c; No. 3 white, 82½c; No. 4 white, 81½c; new No. 2 white, 80c.

Local conditions in the corn deal are not changed. Offerings are small, stocks are small and receipts amount to almost nothing. On the other hand, there is little buying and the market is inactive all the time. Reflecting the trend in other markets prices are lower. Quote: Cash No. 3, $2.01; No. 3 yellow, $2.06; No. 4 yellow, $2.04; No. 5 yellow, $2.01; No. 6 yellow, $1.98; No. 3 white, $2.09.

BOSTON.

R. S. Wallace, Correspondent.

Exports of grain for the week ending August 2nd were as follows: Oats, 90,000 bus.; barley, 1,089,726 bus.

Stocks of grain in regular elevators July 28th were: Corn, 1,067 bus.; oats, 252,310 bus.; rye, 13,801 bus.; barley, 551,784 bus.

Exports of grain and flour for the month of July, 1919, were as follows: Wheat, 405,667 bus.; oats, 274,028 bus.; rye, 47,666 bus.; barley, 1,397,322 bus.; flour, 26,925 sacks.

The following were visitors on 'Change during the past week: E. F. Leland, F. P. Randall and J. W. Crosby, Chicago, Ill.; G. W. Merellat, Sleepy Eye, Minn.; Stuart Hyde, Milwaukee, Wis., and Jay Chapin, Pittsburgh, Pa.

Receipts of grain and flour for the month of July, 1919, were: Flour, 182,079 bus.; wheat, 218,719 bus.; corn, 2,600 bus.; oats, 758,230 bus.; rye, 65,450 bus.; barley, 1,271,675 bus.; cornmeal, 275 bbls.; oatmeal, 5,322 cases, 1,760 sacks.

Cash corn is holding firm owing to light primary markets and is not following to much extent the decline in the futures. Demand is light owing to the high prices. The following prices were quoted at the close: No. 2 yellow corn, $2.18 to $2.19 per bushel; No. 3 yellow corn, $2.17 to $2.18 per bushel. Receipts for the week ending August 2nd were, none.

Oats are following the decline from September option. Receipts are firmly liberal. Demand is fair to good, although the break in the market has caused buyers to hold off thinking that prices may go considerably lower. Prices were quoted as follows: Fancy 40/42 lbs. clipped white oats, 88½c to 89c per bushel; fancy 38/40 lbs. clipped white oats, 88c to 88½c per bushel; regular 38/40 lbs. clipped white oats, 87c to 87½c per bushel; regular 36/38 lbs. clipped white oats 86½c to 87c per bushel. Receipts for the week ending August 2nd were 39,150 bushels.

OMAHA.

Leigh Leslie, Correspondent.

Frank P. Manchester, secretary of the Omaha Grain Exchange, has gone with his family to one of the Minnesota lakes.

Good rains fell over a large part of the Nebraska corn belt during the last week, and these rains, with a decided lowering of the temperature, greatly benefited the corn crop, which promises to be a large one.

There has been a liberal movement of wheat to this market throughout the week, while receipts of corn, oats, rye and barley have continued light. The demand for all grains has been sufficient to take care of the offerings.

J. A. Buchanan, president of the Omaha Grain Exchange and secretary of the Omaha Elevator Company, has returned home from Madison Lake, Minnesota, where, with his wife and son, he spent several weeks.

Warren Powell, son of George B. Powell, chief of the inspection and weighing department of the Omaha Grain Exchange, is now associated with J. F. Twomley, Son & Co. For several weeks he has been calling on shippers in Nebraska.

Amendments to Tariffs.

In a letter to members, Henry T. Clarke, attorney and traffic manager of the Omaha Grain Exchange, says:

"Freight rate Authority No. 10559 has been issued and will become effective on 30 days' notice.

"It provides by necessary amendment to C. & N. W. Tariff No. 14000 I. C. C. No. 7823, that shipments of grain, grain products, etc., BETWEEN all stations on the C. & N. W. in Nebraska north of the Platte River AND all stations on the C. & N. W. in Nebraska south of the Platte River, may be given transit privileges at Omaha at a charge of 3 cents per 100 lbs. for out of line service, which charge is in addition to rate, origin to destination, subject to established rules governing transit privileges granted at other stations on the C. & N. W. in Nebraska.

"It provides by necessary amendment to C. B. & Q. Tariff 4204-G, I. C. C. 11400, that shipments of grain, grain products, etc., BETWEEN stations on the C. B. & Q. in Nebraska, Fremont and north thereof, including all stations on the O'Neill line, AND stations on the C. B. & Q. in Nebraska on and west of the line Ashland to Lincoln, thence through Crete, Dewitt, Beatrice and Wymore, Nebr., may be given transit privileges at Omaha, at a charge of 2 cents per 100 lbs. for out line service, which charge is in addition to rate, origin to destination, subject to established rules governing transit privileges granted at other stations on the C. Q. in Nebraska.

"It provides by necessary amendme Union Pacific Circular No. 100-A, I. (2869, that shipments of grain and grain pr ucts, etc., BETWEEN stations on the Uni Pacific in Nebraska, Yutan to Barne inclusive, AND all other stations on Union Pacific in Nebraska, except sta Loma to Heber, inclusive, may be gi transit privileges at Omaha at a ch of 2.5 cents per 100 lbs. for out of l service, which charge is in additio rate, origin to destination, subject to tablished rules governing transit privi granted at other stations on the Uni Pacific in Nebraska."

497 cars, against 953; oats, 279 cars, against 266; kafirs, 155 cars, against 106; rye, 20 cars, against 12; barley, 19 cars, against 6; millfeeds, 484 cars, against 312; flour, 532 cars, against 427.

At a conference of Missouri farmers and agricultural representatives held in Kansas City this week a protest was made against the discounts in prices of wheat grading below No. 1, as promulgated by the United States Grain Corporation. The discounts, which are 3c on No. 2 and 7c on No. 3, are greater than the actual discounts in regular commercial transactions. "It is true," said the resolution adopted, "that the Government discounts are hurting no one at present, because the grain trade has wholly ignored them and is applying the customary commercial discounts. But when the local mills and elevators are supplied with wheat and the Government begins to buy for export, the established price and discounts will immediately become effective, working great hardship and injustice to the farmers who still have wheat to sell." Copies of the protest were sent to Julius H. Barnes, of the Grain Corporation, and the agricultural committee of the United States Senate. Restoration of the pre-war competition in the grain export trade was also advised. Jewell Mayes, secretary of the Missouri State Board of Agriculture, was among those who participated in the meeting.

To Restore River Traffic.

A concerted effort is being made by Kansas City business interests, including milers and grain men, to restore barge traffic on the Missouri River between this city and St. Louis. G. H. Gray, president of the North Kansas City Development Co., is active in the movement.

"The Missouri River should be made navigable as soon as possible." said Mr. Gray this week. "The Federal Government is to be asked to make sufficient appropriations to establish at least a 6-foot channel between here and St. Louis. When the proper channel is established plenty of boats will be available for navigation. We cannot hope to secure and keep large manufacturing industries in Kansas City without cheap coal and iron. The only way to get these materials at low figures is by the river. The coal will come from Illinois and the iron from the upper lake region."

Navigation of the river was stopped last September, when the two steamboats and nine barges of the Kansas City Missouri River Navigation Co. were bought by the Government and placed in Federal service between St. Louis and New Orleans.

Cash Grain Markets.

Wheat—Receipts for the week, 4,650 cars, against 3,917 a week ago and 3,321 a year ago. Affected by the heavy offerings and the possibility of reselling by the Government at a discount as the first step in a "lower-cost-of-living" program, the market had a sharp downward tendency on all grades that showed an important premium over the Federal minimum basis. Dark No. 1 hard, which closed a week ago at $2.60, fell to $2.35, and ordinary No. 1 sold at $2.20, which is the Government price. Generally the market for hard wheat was 1c to 28c lower than on the preceding Saturday. Red wheat, which had not soared with hard, declined 1@4c, with most loss on the lower grades. It is practically on the Federal basis and elevator men are again able to make mixtures for delivery to the Grain Corporation. Prices of wheat the close were: No. 1 dark hard, semi-dark and yellow, $2.20 @2.35; No. 2, $2.17@2.25; No. 3, $2.11@ 2.24; No. 4, $2.07@2.18; No. 5, $2.01@2.09; No. 1 red, $2.19; No. 2, $2.15@2.17; No. 3, $2.12@2.14; No. 4, $2.09@2.10; No. 5, $2.06. Local millers and shippers were good buyers, but always on declines. Flour sales were less than a week ago, but mills were in active operation to fill old orders. Stocks of wheat here increased 1,742,000 bus., to 4,020,000 bus., against 2,500,000 a year ago. Although the blanket permit system of shipping was placed in effect August 1, the grain control committee announced that the car and storage situation was not serious, and that no immediate restrictions should be expected. Reports from the country said wheat threshing had proceeded slowly, owing to heavy straw, lighter yields per acre than originally indicated and scarcity of labor. Farmers have begun to plow for the next crop in territory visited by the rain of July 31.

Corn—Receipts, 84 cars, against 123 a week ago and 296 last year. Bullishness due to drouth and high temperatures carried prices up early in the week, No. 2 white touching $2.11, the highest level since November, 1917. When the weather changed and fairly general rains fell, the situation was altered and the market turned down sharply, with trade very slow. As compared with quotations given a week ago, the close was 6@9c lower, with No. 2 white at $2, No. 3 at $1.96@ 1.98, No. 2 yellow at $1.93, No. 3 at $1.90@ 1.91, No. 2 mixed at $1.91@1.92 and No. 3 at $1.85@1.89. The best demand was for milling grades of white corn. New corn in Texas has cut off the buying in that quarter. Local stocks were decreased 88,000 bushels by shipments on old contracts, leaving 161,000 bushels in store, against 925,00 a year ago.

Oats—Receipts, 106 cars, against 128 a week ago and 151 a year ago. The market drifted downward all through the week, owing to inadequate shipping and local demand. Elevator men had to take a large volume of the offerings. Final prices were 2c to 6c lower, with No. 2 white at 76@77c, No. 3 at 75c, No. 2 mixed

at 73c. No. 3 at 72c. No. 2 red at 73@74c and No 3 at 73c. Stocks increased 71,000 bus., to 841,000 bus., against 295,000 a year ago.

Kafir and Milo Receipts, 29 cars, against 30 a week previous and 5 a year ago. Trade was almost exclusively in California milo, which has constituted the offerings for some time. The supply of this product is said to be waning. There are practically no offerings of kafir or milo from Kansas and Oklahoma. Not much faith is placed in the new crop in southern Texas, which is ripe, as the rains there lately were against the threshing and movement. Demand for poultry feed manufacturing account eastward and northward continue good, but dealers fear they will soon be unable to fill it. Prices advanced sharply, but receded from the top, when the corn market broke. At the close No. 2 white kafir and No. 2 milo were quoted at $3.70@3.75 per cwt., the same as a week ago; No. 3, kafir, $3.68@3.70, or unchanged to 3c higher; No. 3 milo, 3c up, at $3.68. Stocks here were unchanged, at 7,009 bus., against 278,000 in 1918. Crop advices continued favorable.

BALTIMORE.

Robert C. Neu, Correspondent.

Hay prices are "looking up" again in the Baltimore market, and new hay arriving here in good order would sell well up to values of old crop.

G. A. Bennett, of the Bennett Milling Company, of Grafton, Ohio, was a visitor on the floor of the Baltimore Chamber of Commerce last week.

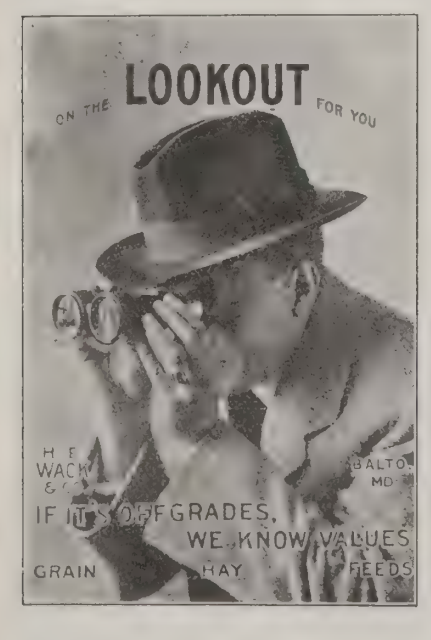
The receipts of new water-borne wheat in the Baltimore market so far this season amounts to 375,000 bushels, compared with 528,000 bushels arrived up to the corresponding time last year.

The "committee on hay and straw quotations" of the Baltimore Chamber of Commerce for the month of August consists of Messrs. W. F. Macneal, Gustav Gerzer, Jr., and Richard C. Wells.

At the August meeting of the Board of Directors of the Baltimore Chamber of Commerce the question of fixing the inspection and weighing charges here on grain for the ensuing year will be considered.

C. E. Clifton, of C. E. Clifton & Co., flour and feed brokers of Washington, D. C., and Charles S. Minnigerode of Minnigerode & Co., food products brokers of Baltimore, have been elected to membership in the Baltimore Flour Club.

Virgil L. Nigh, formerly Federal Grain Supervisor of the Bureau of Markets in this city, has recently been appointed Chief Grain Inspector of the Fort Worth Grain and Cotton Exchange, of Fort Worth, Texas.



Francis Binovec, member of the National Assembly of Czecho-Slovakia, and Frank Zrust, of the Agrarian Bank, were in Baltimore last week looking over harbor facilities with a view of establishing direct connections between this city and their country.

The first car of new hay of the season to arrive in the Baltimore market was received on July 26 by Messrs. E. Steen & Bro., commission merchants, from Ohio. It was a car of timothy and clover mixed, and aside from being over-ripe was in fairly good condition. The hay sold at a good price as compared with the value of old hay of a similar grade.

About 17 American vessels which have been tied up in this port by the recent marine strike began to clear at the close of last week, with full crews of seamen, engineers and other officers aboard all vessels. They are destined to all ports of the world and the clearances of grain should now show a liberal increase. It is said that permits for over 3,000 cars of wheat have been issued to come to Baltimore.

The opening of actual commercial relations between merchants of this country and Germany is reflected in the first shipment of merchandise and flour that will pass through the port of Baltimore about August 10th, when the steamer "Schodack," which has been assigned by the Shipping Board to the Terminal Shipping Company, of this city, will sail for Hamburg. The cargo has been secured and will soon move toward the seaboard.

Robert C. Hill, who is connected with the Grain Corporation at Seattle, Washington, was the guest last week of W. E. Harris & Son, well known grain brokers and forwarders of this city. Mr. Hill, who is also manager of the Merchants' Exchange Corporation of Seattle, is visiting the East to make an investigation of the elevator facilities on the Atlantic Coast and to study the workings of the various Maritime Exchanges, to see whether similar institutions can be established and put in operation in his native city. During Mr. W. E. Harris' recent visit to the Pacific Coast he made the acquaintance of Mr. Hill, and it was his description of the wonderful possibilities of the port of Baltimore that induced the latter to come East and see for himself how the export business is handled here.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Oats receipts were 29 cars with the demand slow and market quoted 3½ to 3¾ cents lower with several cars carried over. New No. 2 whites, selling at 74½c; old 2 whites 75½c, new 3 whites 74c, old 3 whites 75c.

Late reports indicate the strike situation at the Corn Products Company plants at Pekin is unchanged. Their corn buyer at Peoria has been out of the market for several days with the exception of a few cars bought to go to other points.

Several good rains were reported throughout this district last week and corn is in fair shape. Country reports are to the effect that the damage done to the corn by the recent drought and hot weather will not be as great as was at first expected.

The corn market took a big slump Saturday; receipts were 6 cars with practically no demand from local industries and shippers were backing away from the offerings, due to the heavy break in the future market. One car of No. 6 mixed corn was reported sold at $1.85 which was 8 to 10 cents lower than Friday's market. Corn receipts have, however, been extremely light the past week and some days scarcely enough arrived to make a market.

MILWAUKEE.

E. E. Meyer, Correspondent.

Milwaukee has out-distanced some strong competing markets in the movement of oats for the 1918 crop year, Milwaukee handling 37,002,000 bus., and Minneapolis, 36,102,000 bu.

Milwaukee flour mills have produced 13,200 bbls. of flour the past week, representing approximately 51 per cent of capacity production, of which there were 9,200 bbls. of wheat flour and 4000 bbls. of rye flour.

Shipments of grain at Milwaukee for the past week were 339,340 bu. oats, 137,880 bu. corn, 147,070 bu. barley, 17,202 bu. wheat, 4,050 bu. rye; total, 645,708 bu., against 381,102 bu. the preceding week and 692,694 bu. a year ago.

The receipts of grain at Milwaukee for the week ending August 2nd were 242 cars barley, 127 cars corn, 357 cars oats, 74 cars wheat, 22 cars rye; total, 872 cars, against 892 cars the week before, 621 cars a year ago and 295 cars in 1917.

Smith-Parry & Co. are having plans made for the remodeling and repair of their feed and mill elevator at 36th and Lincoln Ave., which was damaged by an explosion several weeks ago. The Burrell Engr. & Constr. Co., of Chicago, has the contract.

The Milwaukee, Chicago and Michigan City Boat Line with a capital stock of $325,000 will begin operations shortly. Three large steamers will be operated for exclusive freight service. Thomas Finn of Marinette, Wis., will be president of the new company.

Harry A. Plumb, of the Milwaukee Chamber of Commerce, was elected secretary of the reception committee made up of federal, state and city officials to meet the captured German submarine, UC-97, now making a tour of the Great Lakes ports and due to arrive at the Milwaukee harbor Aug. 8th.

The Johnstone-Templeton Co. has been incorporated with a capital of $60,000 to engage in buying, selling, handling, etc., of grain, corn, feed, etc. Incorporators are A. L. Johnstone, A. R. Templeton and A. J. Templeton. These men have been long identified with Milwaukee trade, with a fine reputation among western grain shippers.

In cash grain strong markets ruled early during the past week, unfavorable crop reports and hot, dry weather causing an advance of 6@10c in barley, 1@2c in corn, ½@1c in oats, 3@4c in rye, but eased off later with fairly copious rains in the corn belt, and the appointment by President Wilson of an investigating committee on the high cost of living. The movement is moderate, including some new grain, and the demand good. Wheat premiums receded 25@30c, as the new winter crop is moving freely and new Wisconsin spring also appearing.

Visitors registering at the Milwaukee Chamber of Commerce during the past week included the following: W. A. John, Madison; J. A. West, Jefferson; G. Altenhofen, Campbellsport, Wis.; H. Howard Taylor, Alfred B. Taylor, San Diego, Calif.; H. Berger, Phoenix, Ariz.; Len Church, Walworth; C. Hunt, Zenda; Chas. Numdor, Waupun; Merino Nendelson, Madison, Wis.; G. B. McClellan, Chicago, Ill.; Fred Melins, Addie, Wis; A. Stur, Lomira, Wis.; J. McGuigan, Philadelphia, Pa.; E. Connors, D. Normile, Hartford; E. F. Dunn, Lake Geneva; A. L. Meigs, La Crosse; A. G. Baker, Beaver Dam; I. Brandeis, Sturgeon Bay; J. Cary, Delavan, Wis.; S. Silber, Lincoln, Neb.; L. E. Lee, West Bend, Wis.; Craig Wiley, Sioux City, Ia.; J. A. Becker, Madison, Wis.; C. S. RECEIVERS AND EXPORTERS

WHEAT - CORN - OATS - BARLEY

CONSIGNMENTS AND C.I.F. OFFERS SOLICITED

PRODUCE EXCHANGE NEW YORK

NEW YORK.

J. M. Nugent, Correspondent.

The grain trade here, as a whole, prefer awaiting some definite action on the part of Washington before again taking an independent stand on the future course of values.

According to announcement, the Grain Corporation, beginning on Tuesday, August 5th, will resume making export purchases of straight flour. They have already asked for offers for both August and September shipment.

The following visited the floor of the Produce Exchange during the past week: F. Warren, of Landon, and J. Yudal, of London; W. A. Coates, of Montreal; F. A. Crerar and J. Stewart, both of Winnipeg; H. S. Hage, of Chicago, and J. R. Ness, of Toronto.

There was only a small trade in cash corn during the week and, although prices showed a declining tendency, still they did not follow close after the futures. No. 2 yellow corn was quoted at $2.09¼; No. 2 yellow, $2.08¼; No. 2 white, $2.12¼; No. 3 white, $2.11¼; No. 2 mixed, $2.07¼, and No. 3 mixed, $2.06¼c.

The domestic demand for cash oats was of fair proportions, and there was also a somewhat better enquiry from exporters. Some fair sized quantities were worked for export believed to be for the United Kingdom. Belgium also was reported a buyer of a moderate amount. Quotations as follows: No. 1 white, 86½c; No. 2 white, 86c; No. 3 white, 85½c, and No. 4 white, 85c.

Demands for the lowering of the cost of living and the apparent determination on the part of the Government to take some radical action in this direction had a very disturbing influence on the local flour market during the latter part of the week, and buyers, generally, withdrew to await developments. Prior to the announcement that the Government intended to make a statement on the grain situation, flour prices held very firm as mills were still paying high premiums in the Southwest for good milling wheat, and private crop estimates disclosed very serious losses to both the winter and spring wheat crops. Many thought that the Government minimum price for wheat would be easily maintained throughout the season on the reduced crop yield, and consequently felt more confident in regard to prevailing flour quotations. It now remains to be seen what action the Government will take to lower the high cost of living and, while bread constitutes only a very small proportion of the annual budget of the householder and consumer, nevertheless, the Government has control of the wheat situation, which makes it undoubtedly the logical point of attack. New spring wheat flour was traded in in a moderate way during the week and buyers were beginning to show an increased interest in this character of flour. Prices of old spring wheat patents were quoted at $12.25 to $12.75 and new spring patents $11.75 to $12.

DULUTH.

S. J. Schulte, Correspondent.

Application has been made for the transfer of the Duluth Board of Trade membership of Denman F. Johnson to Frank A. Falk, who is now associated with the Becher LaBree Co.

Progress is being made by the contractors in pushing along the new house of the Consolidated Elevator Co. It will have a capacity of 1,750,000 bushels and will bring that company's capacity up to the largest at the Head of the Lakes.

Some good samples of wheat and r were displayed on the Board of T sample tables here during the last w In one wheat sample from Park Ra Minn., the heads were plump and h grain would grade No. 1 dark north

Capt. W. L. Beasley has received discharge after serving for two year the army, and he has resumed his position as cash buyer for Randall-Ge Mitchell on the Board of Trade here. was with the 34th Division at Le M France, when the armistice was sig but he missed participating in any of active fighting.

W. H. Strachan, chairman of the Dul grain control committee, has issued an der to the effect that for the present no strictions will be imposed on the volum grain moved from country stations. I mits must be obtained, however, on gr removed between the primary mark from the primary markets to the seabo or from country stations to the seapo either for domestic or for export.

Wide fluctuations were covered in rye market here during the last few d Practically no interest in rye was repo from the East after Tuesday, when qu tions were marked up to $1.66 on a w of buying caused by dry weather ne The market in No. 2 rye broke 10c tween then and the end of the week $1.56. Substantial rye stocks are bo carried in the elevators here, and not has been shipped out for some time.

Grain receipts at Duluth during crop year ended July 31 last were offici reported at 124,300,267 bushels, aga only 33,182,500 bushels last year. Rece of domestic wheat were 88,796,552 bush against 16,395,910 bushels during 19 Bonded wheat receipts were only nomi amounting to just 1,883,191 bushels. movement of rye this way was a feat during the twelve months, amounting 17,200,737 bushels, against 3,477,357 bush last year. Barley receipts were repor at 8,534,393 bushels, against 7,511,631 bu els last year. Oats were 2,662,582 bush against 765,553 bushels last year, and mestic flax receipts were 4,523,739 bush against 2,761,915 bushels last year. Sh ments of all grains aggregated 121,000 bushels, leaving just 2,172,000 bushels all kinds of grain in the elevators on gust 1.

Wheat is still coming in freely. movement of local wheat by truck a wagon lines is lighter. It is reported th farmers are feeding a considerable amou of low grade wheat this year, which wo command a price equal to fair corn. tween reduced yield and feeding prospe are for far less wheat being marketed th preliminary estimates of 15,000,000 bus els made by Commissioner of Agricultu Cohen.

Announcement was made in Louisvi during the week to the effect that Alfr Brandeis, head of the grain house of Brandeis & Son, Louisville, would clo his Government office at Washingt about August 1 and return to Louisvil Mr. Brandeis has been in Washingt since February, 1918, as chief of the e forcement division of the U. S. Food A ministration, at $1 per year. In this co nection he handled the auditing and chec ing of grain and milling concerns.

Williams & Monroe—"The House of Good Service"
MEMBERS—Chicago Board of Trade
129 So. Fifth Street, LOUISVILLE
City 2670 Private Wires Main 2676

Grain markets have been very wild and excited during the past few days, Saturday morning finding the corn market so wild that dealers quit trying to keep up with it, and waited for the close. Oats have been off during the week due to better movement of new crop. Principal cash prices on corn and oats quoted in carlots by Louisville jobbers on Saturday were: No. 2 white corn, $2.15 a bushel; No. 4, $2.12; No. 3 yellow, $2.05; No. 4 yellow, $2.02; No. 3 mixed, $2.04. Oats, No. 2 white, 76c; 3 white, 76c; 2 mixed, 75c. No. 2 rye, $1.50. The principal corn demand is for milling white.

BUFFALO.

E. Bangasser, Correspondent.

Rain has helped corn in this state and also other growing crops.

There is at present no spot price on millfeeds and an active demand.

Wheat is being delivered to country mills at $2.18 to $2.22. Some of it is of light weight but said to be of good milling quality.

Rye was offered at $1.75 for No. 1 and $1.73 for No. 2 on track, through billed. It could not be sold at those prices. No. 1 in store c. i. f. quoted 4c over Chicago August.

One of the concrete canal boats sunk at Tonawanda. A leak was reported, only slight, on the trip from Buffalo, but only a few hours later the rush of water carried her down with 15,000 bus. of wheat destined for New York.

The price of corn advanced 5c this week, after which it began to tumble, much faster, however, than it advanced. The high prices here were due to a good demand and a very light supply. The purchases made rest at lower figures arrived and there was no demand here the past two days, with sellers trying to get bids. Closing: No. 1 yellow, $2.06½; No. 2 yellow, $2.06; No. 3 yellow, $2.05; No. 2 mixed, $2.03@2.04, on track, through billed.

Barley dealers had the market well in hand this week and sold quite a liberal amount at 10c to 15c over bids of a week ago. Maltsters were the best buyers of spot offerings, wanting good, plump barley and also took, and are still figuring on lots sold to arrive at the close today. Some new barley arrived, weighed 42 to 45 lbs., and sold to feed buyers at the price of for malting a week ago. Closing: Malting, $1.50@1.58; feed, $1.45@1.50, track store, Buffalo.

Oats slumped as soon as new began to arrive and the closing was 5c to 6c lower than last week, with little demand at the close and offerings light on track. Buyers are looking for a decline the next few days and taking only what they need. The new oats arriving are better than generally expected. Although some weighed only 25 lbs. there were others as high as 32 lbs. and mostly of bright color. Closing: No. 1 white, 81c; No. 2 white, 81½c; No. 3 white, 80½c; No. 4 white, 79½c. on track, through billed.

Inspection track receipts for the week: Wheat—No. 2 soft white, 5 cars; No. 3 soft white, 11 cars; No. 4 red, 1 car; No. 2 red, 14 cars; No. 3 red, 53 cars; No. 4 red, 3 cars; No. 5 red, 3 cars; sample red, 3 cars; No. 2 mixed, 14 cars; No. 3 mixed, 2 cars; No. 4 mixed, 1 car; No. 1 yellow hard, 6 cars; No. 2 yellow hard, 6 cars; No. 2 hard winter, 46 cars; No. 2 hard winter, 9 cars; No. 3 hard winter, 9 cars; No. 2 dark hard. 24 cars; No. 3 dark hard, 2 cars; No. 2 mixed hard, 7 cars; No. 1 northern, 4 cars; sample spring, 2 cars. Corn—No. 2 mixed, 5 cars; No. 4 mixed, 1 car; sample mixed, 1 car; No. 1 yellow, 2 cars; No. 2 yellow, 47 cars; No. 3 yellow, 4 cars; No. 4 yellow, 2 cars; No. 6 yellow, 15 cars; sample yellow, 7 cars; No. 1 white, 2 cars; No. 2 white, 1 car. Oats—No. 1 white, 6 cars; No. 2 white, 33 cars; No. 3 white, 17 cars; No. 4 white, 8 cars; sample, 4 cars.

CINCINNATI.

George Mosbacker, Correspondent.

Early & Daniel handled the bulk of new corn arrivals here the past week.

Murray Eisfelder, of the A. C. Gale Grain Co., states they are planning to double the grain elevator capacity.

Cincinnati is soon to enjoy advantages in rail freight rates to St. Louis and the water rates to New Orleans equal those of Chicago.

Jan B. Granger & Co. had the distinction of receiving the first car of new oats of the season, which was of excellent quality, grading No. 1 white, 33½ lbs., and weight 82½c per bushel.

Cincinnati pork packers in a resolution sent to Attorney General Price at Columbus blamed the artificial price of hogs at as fixed by the government as responsible for the high cost of food products.

A comprehensive idea will be gained of the amount of hay received in Cincinnati during the year when it is shown that during the entire year of 1915 only 7,382 tons were received, while in 1916 only 1,000 cars were moved into Cincinnati.

According to George F. Munseon, chief hay inspector of the Grain and Hay Exchange, only 10 per cent of the last 100 cars of wheat received at Cincinnati graded No. 2, 60 per cent No. 3, 25 per cent No. 4, 4 per cent No. 5, and the balance sample.

The Louisville District Freight Traffic Committee at its hearings at Cincinnati on or Aug. 13, will consider the request of the Southern Railroad Lines West for a revision in its rules governing the refund of switching charges on grain at Louisville to conform to the rules published by the Louisville and Nashville Railroad.

Articles of incorporation for the Simmons Milling Co., who are extensively engaged in cattle feed products at Cincinnati, were issued at Columbus, Ohio, this week. The company will be capitalized at $50,000. The incorporators include J. S. Simmons, R. S. Simmons, Lillian S. Simmons, William M. Simmons and Clara S. Simmons. The company has been doing a general milling business at 41 Walnut street.

The hay plugging market, which has made Cincinnati an ideal place to ship hay, is responsible for the heavy receipts so far this year. In order to meet the demand which will be made upon the hay plugging market to handle all of this year's crop, the Board of Directors of the Grain and Hay Exchange has under consideration plans for increasing the capacity of the yard from seventy cars to 100 cars a day.

Following the announcement of the Cincinnati Grain Control Committee, consisting of J. A. Morris, terminal manager, C. S. Lewis, traffic representative, and M. J. Todd, representative of the Grain Corporation, that the blanket system of grain permits would become effective Aug. 1st, S. S. Reeves, manager of the Traffic Department of the Exchange, immediately issued to shippers of grain to this market instructions as follows:

"The Blanket Permit is very liberal, and from a practical viewpoint will not affect the movement of wheat or other grains to Cincinnati. The carriers will permit wheat to move to this market as usual and no individual permits are required,

and they will regulate the movement according to arrivals. It is not necessary for the shipper to secure a permit from the agent at the country shipping point, as the committee will control the movement at this end on all kinds of grain.

D. J. Schuh, Executive Secretary of the Grain and Hay Exchange, addressed a letter to H. D. Irwin, second vice president of the U. S. Grain Corporation, questioning the statement made in local papers that as a result of a survey by the Chamber of Commerce it was discovered that Cincinnati was without any available grain storage capacity. The survey referred to was made at the instance of the Grain Corporation. Letters from the Clifton Springs Distilling Co. offering storage capacity of approximately 200,000 bushels, the Rossville Co. of Lawrenceburg, Ind., of a like amount, and several others were received by Mr. Schuh.

Total receipts of wheat at Cincinnati during the month of July, officially inspected as to grades, is shown in the following tabulation for years indicated, as compiled by the Cincinnati Daily Bulletin:

July, 1915—No. 2 red, 277; No. 3 red, 196; No. 4 red, 60; sample, 41; total, 874.

July, 1916—No. 2 red, 273; No. 3 red, 73; No. 4 red, 73; sample, 95; total, 514.

July, 1917—No. 1 red, 1; No. 2 red, 6; No. 3 red, 13; No. 5 red, 20; sample, 23; total, 63.

July, 1918—No. 1 red, 422; No. 2 red, 614; No. 3 red, 208; No. 4 red, 49; No. 5 red, 10; sample, 10; total, 1,313.

July, 1919—No. 1 red, 5; No. 2 red, 559; No. 3 red, 660; No. 4 red, 186; No. 5 red, 37; sample, 7; total, 1,454.

The success of the hay plugging system established at Cincinnati by the Grain and Hay Exchange is demonstrated in a statement issued by Executive Secretary D. J. Schuh, which discloses that receipts for the year 1919 will be the largest on record. For the seven months ending July 31, 7,046 cars of hay were received in Cincinnati. This is 1,986 cars more than were received during the same period last year and is within 1,908 of the total received during the year 1918. Previous to 1917 and including 1917, during the last half of each of those years, more hay was received in Cincinnati than during the first half of the year. If this ten-year average may be taken as a basis, at least 8,000 cars of hay should move into Cincinnati during the coming five months.

"Send your shipments and consignments along as usual."

The records of the Cincinnati Grain and Hay Exchange show that the receipts of wheat during the month of July, 1919, were 1,454 cars. A minimum car of wheat contains 1,075 bushels. Many cars are loaded considerably in excess of this amount, but based on the minimum, 1,454 cars represents 1,563,050 bushels, at an approximate value of $3,500,000. During July, 1918, 1,313 cars were received here, representing a minimum of 1,411,475 bushels or 151,575 bushels less than during the month of July this year. Receipts of other grains were in proper proportion.

In order to facliitate the handling of samples drawn by our inspectors, the Exchange has employed extra help and has made the purchase of a one-ton truck. This truck is used to transport samples from the various railroad yards to the Exchange and insures rapid receipt at the testing machines. The Exchange is equipped to test seventy-two cars per hour. This capacity eliminates any possibility of samples being held over to the next business day for inspection, thereby aiding the farmer in receiving his money with the least possible delay.

Wheat.—Trading in wheat continued to display all the activity characteristic of the market since the movement began, which the past week totaled the largest in the history of Cincinnati's grain business. Millers, elevator and feed mixers eagerly took all offerings at practically unchanged prices from a week ago, and were apparently far from accumulating the desired volume. Some difficulty was experienced by elevators in handling the abnormally large movement on several days, but the condition was only temporary, and had practically no effect on demand or prices. Choice milling quality, grading No. 2 of heavy weight, showed greater scarcity, and though No. 3 predominated, a larger percentage of Nos. 4 and 5 were shown among the inspections.

No. 1 red winter, track	$2.25@2.26
No. 2 red winter, track	2.23@2.24
No. 3 red winter, track	2.19@2.20
Low grades as to quality	2.00@2.18

Smutty wheat discounted from 2 to 4c per bushel as to grade.

Corn.—There was a fair milling demand for top grades of white and yellow the past week at new high levels of the crop, but offerings below these grades sold slowly and at liberal discounts. One car of No. 1 white brought $2.19, a car of No. 1 and No. 2 yellow $2.11½, and a car No. 1 mixed $2.11. Receipts continued small, but mostly of good quality. Ear corn scarce and wanted.

No. 1 white	$2.08@2.09
No. 2 white	2.07@2.08
No. 3 white	2.06@2.07
No. 4 white	2.03@2.05
No. 5 white	2.01@2.03
No. 6 white	1.99@2.01
No. 1 yellow	2.04@2.05
No. 2 yellow	2.03@2.04
No. 3 yellow	2.01@2.03
No. 4 yellow	1.99@2.01
No. 5 yellow	1.97@2.99
No. 6 yellow	1.95@2.97
No. 1 mixed	2.03@2.04
No. 2 mixed	2.02@2.03
No. 3 mixed	2.00@2.02
No. 4 mixed	1.98@2.00
No. 5 mixed	1.96@2.98
No. 6 mixed	1.94@1.96

OATS.—The market had the first arrivals of new oats of the season this week, which were generally of good quality, but sold slowly at a discount of 1 to 1½c below old whites. Toward the close future influence weakened prices, and losses of 2c per bushel were recorded from first sales. Mixed ruled dull.

No. 1 white	78 @79
No. 2 white	77½@78
No. 3 white	76½@77
No. 4 white	75 @76
No. 2 mixed	75½@76½
No. 3 mixed	74 @75
No. 4 mixed	73 @74

ST. LOUIS.

E. E. Reeves, Correspondent.

T. H. De Guire, of the Bismark Milling and Mfg. Co., of Bismark, Mo., was a visitor on the floor of the Merchants Exchange last Wednesday.

Good, general rains in the territory tributary to St. Louis Thursday night and Friday so improved the crop situation that a heavy break in the grain prices followed.

W. E. Newman has sold his interest in the firm of Newman & Malkemus, and has gone to New York state, where he will engage in the business of raising chickens on a large scale.

The will of Andrew J. Keiser, who operated a flour mill at Mount Olive, Ill., for more than 40 years, was filed for probate last Tuesday. The estate, which is valued at $40,000, goes to his wife during her lifetime

E. E. Lament, of the Dunlop Milling Co., of Clarksville, Tenn., who was in St. Louis on business for his company, came on the floor of the Merchants Exchange last Thursday to size up the milling and wheat situation.

In order to accommodate the growing need for space in the Cash Grain Corner, Secretary Eugene Smith has had the grain pit moved south enough to permit another row of cash grain tables to be placed in the corner.

V. O. Shaw, of the Bonne Terre Feed Co., of Bonne Terre, Mo., was on the floor of the Merchants Exchange last Wednesday, looking over the feed situation here and taking advantage of the record-breaking feed prices.

Philip Rothrock, Federal Supervisor of Grain, who resigned to take effect July 31, intending to accept a position with a local grain house, has withdrawn his resignation and will remain with the Department of Agriculture.

R. C. Jordan, superintendent of the Central Elevator and Warehouse Company, of New Orleans, La., was among the visitors on the floor of the Merchants Exchange Friday, reporting that New Orleans is enjoying an unusually good business.

For quick returns use our Market Place Department, Page 7, for wants and sale announcements.

Paul J. Mathews, of Dilts & Morgan, of Kansas City, one of St. Louis' most popular suburbs, was on the floor of the Merchants Exchange, Friday, trying to learn how they do business in a real grain market. He was well satisfied with his visit.

Supervisor of Weights John Dower, of the Merchants Exchange, made an inspection tour over the railroad tracks on "The East Side" last week with the L. & N. test car, and tested the various scales on that side of the river, finding them in good condition.

Margaret Collins, the popular Bell telephone operator for the Merchants Exchange, has returned from her vacation, which she spent at Michigan summer resorts, and Mary Bird, the Bell's crack long distance operator, is therefore now able to "ring 'em up" in the country.

Edward Loesch, statistician in the office of Secretary Smith, of the Merchants Exchange, who returned from his annual vacation last Monday, is acting doorkeeper, in the absence of Arthur McDonald, grain pit reporter, who is taking his vacation, and Doorkeeper Marc. Gautier is reporting pit transactions.

Mackie, who has operated barges and towboats upon inland waters for the last 40 years, and whose experience is largely embodied in the design of the new fleet, has retired from water transportation for a partnership in the Lientz Oil Furnace Corporation, of Kansas City. His successor is Lewis T. Kavanaugh.

Bert Lang, second vice-president of the Food Administration, held a conference with local grain and elevator men last Wednesday, at which he outlined plans for expediting the handling of wheat. He stated that "we are getting so much wheat in the elevators here that we must alter our plans to meet the conditions as they arise."

Elmer Kleaver, who formerly was employed in the Department of Weights of the Merchants Exchange, but who enlisted in the Hospital Unit and saw service in France, has been appointed hay inspector for the Merchants Exchange, to succeed Henry Schulte, who resigned. Mr. Schulte is one of the best judges of hay in the country, and his loss to the department will be felt.

The St. Louis Board of Aldermen have appropriated $55,000 for extending the branch street sewer further into the river, to prevent the sewage from flowing along the new docks, for the improvement of which an appropriation of $300,000 recently was made by the city. The new docks will be built as rapidly as possible. Two additional docks and warehouses will be built at the south end of the present docks.

James C. Wilson, vice-president, secretary and treasurer of the Alco Feed Mills, of Atlanta, Ga., was in St. Louis last week making arrangements for the purchase of feed grinding machinery for his company. Mr. Wilson is a brother of Charles Wilson, official sampler for the Merchants Exchange. He reports that there is a record-breaking demand for hog feed meals and also for sweet feed in the South, particularly in his locality.

Two car loads of wheat which were grown on the right-of-way of the Illinois Central Railway, near Wenona, Ill., were marketed last week, but through ignorance on the part of the shipper, they were sent to Chicago, instead of St. Louis. This is, we believe, the first effort of this kind to utilize the waste land along a railroad right-of-way. The success of this venture probably will lead to a more general use of this heretofore idle land, as the railroad companies not only will secure the rentals, but will be saved the expense of cutting and burning the weeds on this part of the right-of-way.

Advices to local commission men from the vicinity of Benton, Ill., state that the wheat crop in that section is a great disappointment to the farmers, as it is not turning out so well as was expected. Threshing has been completed in Franklin County and wheat which earlier in the season looked as if it ought to make 25 bushels to the acre has yielded only 11. The wheat was poorly headed and made a large amount of straw. Oats are the same way and a light yield is expected. Hay is better than usual, but the acreage is small. The acreage of corn is at least 50 per cent short on account of the wet spring. The condition of corn with few exceptions is far below normal.

A. W. Mackie, who recently resigned as manager of the Federal Barge Line, was presented with an elegant wrist watch Thursday by towboat captains and others of the operating department of the River Service, to show their appreciation of his efforts in their behalf, and in behalf of the revival of river traffic. S. L. Flournoy, assistant manager, who resigned to engage in business in Kansas City, was presented with a gold mounted fountain pen by his associates. Mr. Mackey predicted that when the new fleet of six towboats and 40 2,000-ton barges, which now are under construction, are completed, and are in operation, which will be in the early part of next year, the Federal Barge Line between St. Louis and New Orleans will earn a profit for the Railroad Administration of at least 20 per cent.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

Jim Fones, a Chicago cash grain man, was visiting in Minneapolis last week.

W. J. Russell, of Gregory, Jennison & Co., returned last week from an eastern automobile trip.

Lt. Leonard Brisley, formerly with Randall, Gee and Mitchell, returned from France last week.

Carl Bosch, manager of the syrup department of Leisy Bros. Company, Peoria, was in Minneapolis last week.

Frank Butler, formerly cash grain salesman for a local grain commission company, is now located in Winnipeg.

Deliveries of oats on Minneapolis July contracts totaled 1,072,000 bushels; rye, 448,000 bushels; barley, 484,000 bushels.

Bert Milligan and H. M. Parker have applied for traveling representative's license to represent the Farmers Elevator Commission Co.

Among those returning to Minneapolis today from vacations were W. A. Gregory, of Gregory, Jennison Co., and Lou Howard, of L. A. Howard & Co.

Randall, Gee & Mitchell received the first car of oats from the new Northwestern crop. They came from Viborg, S. D., tested 31 lbs. to the bushel and graded No. 2 white. The International Grain Co. bought the oats at September price.

The following requests for transfer of membership in the Minneapolis Chamber Association have been filed: From John A. Reed to Clark W. Ewe; Harry F. Brown to Frederick C. Lyman; Z. H. Stacks to Kingsley Ervin; W. G. Miller to Geo. E. Miller; A. J. Larson to George J. Reed.

Cash Wheat—Agitation against the high cost of living and heavy pressure of new winter wheat caused a sharp decline in local wheat prices during the past week. Spring wheat offerings were light, but this wheat suffered the greatest decline. News from Washington caused the flour buyers to hesitate and hold back and under the circumstances the millers were not inclined to buy wheat as freely as they have been buying it of late. Top grade wheat was the firmest in tone. Lower grades were in slow demand and the weakest. The demand for durum wheat was not as active as during the previous week.

Several cars of new spring wheat came on the market and all of them showed the effect of rust and blight. The best wheat graded No. 2 Northern. Samples of Montana winter were received and showed good quality, though the wheat was light in weight. Rains are interfering some with harvest operations at present. No. 1 Dark Northern today sold at $2.80@2.85, No. 1 Northern at $2.50@2.75. Kansas and Oklahoma winter wheat on spot sold at $2.32@2.37.

Corn.—The undertone of the corn market was weak on account of the decline in the futures. A fair to good demand prevailed for the best grades and for the low grades the market was poor. Eastern demand for the low grade corn was much narrower owing to labor trouble at different plants.

Oats—The demand for oats is fair to

good and prices are holding firm compared with the futures. A few cars of new oats were received during the past week and showed fair quality. Thin oats started the week slow, but they were in fair demand at the close. There has been a steady export inquiry for heavy old crop oats, but the holders are asking more money for their offerings than the seaboard trade wants to pay. No. 3 white sells at ½c under to ⅛c over September price, No. 4 white at 1@4c less.

Rye—There has been a fairly steady demand for rye through the past week with the mill buyers paying a premium for the heavier offerings. Some of the best rye brought a premium over the September future. Elevator buyers bought No. 2 at ½@1c under the future. Offerings were fairly heavy and considerable new rye of good quality arrived on the market. Deliveries on July contracts were moderate

TOLEDO.

Carl Bryant, Correspondent.

"Bill" Cutler of Cutler-Dickerson & Co., Adrian, Mich., was a visitor on 'Change Friday.

The Flea Club held their week-end session at George Kreagloh's Point Place chateau, Saturday afternoon

"Phil" Horn of Horn Brothers, grain and seed dealers, Monroeville, O., visited with his many friends on the floor Saturday.

Flour production of Toledo mills increased last week to 40,000 brls. or 83 per cent of capacity. Output the previous week was 36,090 and year ago 27,560.

The Earle B. Slawson Co., Toledo's new grain, bean and potato firm, says of the bean situation. "Michigan new crop will net only 60 per cent of last year. With imported beans advanced $2 per cwt.; the California crop sold for export; and good demand from canners, we feel mighty bullish on beans." Strictly choice handpicked beans were offered Saturday at $9.75 per cwt. f.o.b. Toledo

Shippers of grain in this territory may expect relief from the car shortage within a very few days as a result of tireless work on the part of L. G. Macomber, traffic manager of Toledo Produce Exchange, to improve the local situation. Mr. Macomber received assurance Saturday that a large assignment of empty cars were en route for the Toledo territory from the East, where they have just been released.

Cash values eased off here last week in sympathy with the break in futures and sales of No. 2 white oats Saturday were at 75⅜c basis Toledo rate of 23c to New York. Corn arrivals are so light that it is difficult to determine the value. No. 2 yellow sold early in the week at $2.05½, Toledo rate point. Demand here for rye is excellent and 50 cars, grading mostly No. 1 and 2, were received during the week. Oats movement is expected to show considerable increase this week. Receipts for the week were: Wheat, 189 cars; corn, 6; oats, 18; rye, 50.

John Wickenhiser of John Wickenhiser & Co., spent part of the week on a crop inspection tour of northwestern Ohio, reporting that despite the many conflicting reports on the oats yield farmers in Paulding county declare their threshing "rings" have proved 45 bus. per acre and of good quality. Corn in that county has not suffered any great damage from drought and will produce close to an average crop. He says farm land is in great demand

Strong's Double Indexed Car Index
Is a record book designed to afford ready reference to the entry or record of any car number. Facing pages 11x14½ inches of heavy ledger paper are each ruled into five columns, those on the left-hand page being numbered 0, 1, 2, 3 and 4; while columns on the right-hand page are numbered 5, 6, 7, 8 and 9. Each column is ruled into three distinct divisions with the following sub-headings: "Initial," "Car No." and "Index."
The marginal index figure represents the right hand or unit figure of the number entered; and the column heading the second or tens figure. So that the required number can always be instantly found if properly entered.
ORDER FORM 20 contains 36 pages, bound in heavy canvas covers, with spaces for registering 9,000 cars. Price, $1.50.
ORDER FORM 22 contains 68 pages, bound in art canvas covers, with spaces for registering 17,000 cars. Price, $2.50.

was hinted Saturday that a band—uniformed, too—would herald the entry into Defiance. The "quartette," composed of Bill Cummings, John Luscombe, Paul Barnes, Les Howard and Earle Slawson, have been in practice daily, and will probably give vent to their hurt feelings, but, as one of them remarked, their efforts and vocal training were never fully appreciated even by their own friends and frequently they were "ruined" by outsiders who, anxious to show that they "knew the words," were always ahead of the quartette. The meeting was an important one as dealers in the midst of the big wheat and oats movement discussed many matters of timely interest. L. G. Macomber, traffic manager of 'Change, submitted transportation problems and offered his expert assistance to any of the dealers who are unable to secure cars. J. C. Cannon, in charge of the Bureau of Markets at Toledo, will talk on federal grain inspection and the new oats grades.

CHICAGO.

A Board of Trade membership sold late last week at $9,050 net to the buyer.

Oats at Chicago Monday were 3@6c lower despite an active shipping demand especially for old. There were 362 cars on hand.

Among recent visitors on the Chicago floor were T. W. Swift of Detroit, J. E. Decker, Macon City, Ia.; Geo. Spangler, Winthrop, Ia.; and H. S. Allen of Pittsburgh.

August 1 the permit system as devised by the Railroad Administration and the Grain Corporation for controlling the shipment of this year's grain crop was put into effect.

The A. B. Elevator Co. of 300 W. South Water St. has been incorporated under the laws of Illinois with a capital of $2,500. The incorporators are Otis Groves, Ralph Hearn and others.

Postal Telegraph rates have been reduced to the level prevailing before Mr. Burleson made the 20 per cent increase. However, Western Union will continue to operate under the 20 per cent increase.

Shoe leather worked over time last week when all transportation was effected via pedal extremities, automobiles and the steam railroads. Chicagoans who guided their cars without accident throughout the week may consider themselves in the expert drivers' rank.

It is estimated that nearly 100,000 cans of army rations are held in Chicago warehouses, so that when the Postoffice Department is equipped to sell the Government surplus stocks via parcel post Chicago consumers will benefit in that orders can be filled quicker and the postage will be less.

Cash wheat was in good supply Monday there being 1,081 cars at this market. The milling and shipping demand was good with choice grades bringing a premium of ½@1c over basic prices with the poorer grades 2c lower on winters and 3@8c lower on springs. The Government is loading a cargo for shipment to seaboard.

Charles S. Michaels, George Booth and others on Change are finding a few thrills in life out of the ordinary as a part of the reserve militia on guard in the riot districts of the South Side and "Charley," stationed at 35th and State St. with the Third Reserve Militia says sleeping on the floor is pretty soft after the first few nights.

Effective Aug. 5 the Grain Corporation will receive weekly offers on straight wheat flour, shipment to be 30 days from acceptance of offer. The Grain Corporation reserves the privilege of diverting shipment to any seaboard or inland destination making proper price adjustment therefor and shipping directions will be forwarded shortly after acceptance of offer.

On Saturday last millers in the Chicago zone, which includes six of the central western states and northern Missouri held a meeting at which they completed plans for the formation of the Millers Export Ass'n. Each of the six zones has an executive committee of five, the Chicago zone being represented by Frank G. Rice Chicago; E. C. Andrews, St. Louis; F. S Blish, Seymore, Ind.; Mark Mennel, Toledo, and G. A. Amendt, Grand Rapids Mich. Maj Walter Stern of Milwaukee was elected a director. The corporation under the laws of Delaware has a capital of $1,030,000.

The Farmers' Elevator of North Manchester, Ind., incorporated with a capital stock of $40,000; grain elevators. Directors are C. C. Dillman, L. A. Catey and Dan Frantz.

The Tallewanda Grain Company of Portland, Ind., is incorporated with a capital stock of $10,000; grain elevators; directors. C. S. Emerick, C. B. Wilson and C. B. Mooney.

A pair of mules and three tons of hay were burned near Vincennes, Ind., as a result of Charles Marshino smoking while driving a wagon load of hay. The mules were burned before Marshino could unhitch them.

The wheat crop of Madison county is estimated to be 750,000 bushels and the value $1,500,000 by County Agent H. S. Agster, who states that the crop fell one-fourth below expectations due to scab and other diseases. Only half of the threshing has been completed.

Corn throughout the state has been badly damaged the last few days, according to Purdue University agriculturists. The extremely hot weather and the lack of rain has done damage that even a good, hard, general rain could not offset. The yield has been affected by the heat and drought.

Several grain elevators closed in Rush county the latter part of July, and others are on the verge of closing because of their inability to get cars in which to ship wheat. Many farmers expressed their intention to feed the wheat to hogs if they cannot haul to an elevator within a reasonable distance. The Hutchison elevator at Arlington handled capacity business, and Elmer Hutchison had to limit the amount of wheat hauled from each threshing ring sending wheat to him. The Carthage elevator would have closed but for the fact that the Carthage Board and Paper Company released some of its cars for wheat.

As a result of the damage done by wheat smut in Porter county, farmers will lose $140,000 on the crop, according to the statistics compiled by County Agricultural Agent S. B. Sink. In checking up the damage done by the smut, Mr. Sink found that a 7 per cent decrease in the yield would be caused by the disease, bringing it down to 1,000,000 bushels. With wheat at $2 a bushel, the cost of the damage is estimated at $140,000.

July, 1919, is the banner month in the history of the Indianapolis wheat market. The total arrivals were 2,415, far in excess of receipts in July, 1918, when the number of cars received for inspection by the Indianapolis Board of Trade was 1,949. The previous high record for wheat receipts in this market was held by the month of August last year, when 2,191 cars were inspected. An indication of the growth and importance of Indianapolis as a grain center is seen in the recent price set by the Board of Trade for trading privileges on the floor—$5,000. When in 1916 it was decided to sell these privileges to members, the price was $250.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports for the week ending Augus were 152,000 bus. wheat; 25,714 bus. and 24,298 bus. of barley.

C. G. Hause & Bro., of Philadelp have brought suit against James Brow recover $264.35, alleged to be due for sold.

Samuel Borowsky, also of this city, started suit against Samuel Lang, also Philadelphia, to recover $183.25 alleged be due for flour sold.

Receipts for the week ending Augus were, 3,729,544 lbs. of flour in sacks; 7 768 bus. wheat; 23,218 bus. corn; 27 bus. oats; 3,950 bus. rye; 72,503 bus. b ley; 15,000 bus. malt and 280 tons fee

Milton F. Baringer, grain and dealer of the Commercial Exchange, has been confined to his summer home Tobyhanna, Pa., for several weeks with scarlet fever, is able to be on 'Cha again.

Dougherty, MacHenry & Co., f brokers, 232 Bourse Building, and And Schlickling, Jr., with Geo. M. Richard flour and grain broker, Bourse Build have been proposed for membership in Commercial Exchange.

(Concluded on page 33.)

MPOSSIBLE TO OBTAIN THE BUCKET AND BEAM" WEIGHT PER BUSHEL TESTER.

The grain trade has suddenly mani- sted a distinct fondness for the eight-per-bushel testers, commonly own as the "Bucket and Beam." So

Special Funnel Scoop.

Weight Per Bu. Cup.

SPECIAL "FOUR-IN-ONE" SCALE.

at has been the call for them that all cks on hand have been entirely ex- sted and future orders are outstrip- g manufacture by many hundreds. e Seed Trade Reporting Bureau, bably the most extensive handlers this popular device, advise that stocks e been entirely depleted and at the sent time it is not obtainable any- ere in the country.

his manufacturer, however, has been e to fill the breach with its "Four- One" Scale. This scale has become y popular with the grain men, as its r separate and distinct graduations two beams make it the most com- te, compact, office scale made. The our-in-One" Scale was especially de- ned and patented by this firm to isfy a long felt want in the grain le for a small complete office scale weighing samples for moisture test, kages, weights for mailing and de- mining test weight per bushel. It agate bearings, strongly made, with springs or steel bearings to rust and ome inaccurate. Its large readable res on beams, specially designed ss funnel scoop, brass weight per hel cup and handsome appearance ke it truly an aristocrat of the scale ily. With this scale the "Bucket Beam" device is unnecessary as a shed brass weight per bushel cup mpanies each scale and a special luation on beam makes the accurate ghing of test weights per bushel one ts chief functions.

he Seed Trade Reporting Bureau, tal Telegraph Bldg., Chicago, abso- ly guarantees it to be accurate, k breaking and to do the work of ordinary scales. Its popularity ng grain men everywhere is well rved and is gaining with rapid es especially at this time when ght per bushel testers are in such and and the "Bucket and Beam" not be obtained.

ditions Affecting Meat Consumption.

practicing conservation during the our people became accustomed to ng less meat than formerly, and the required to return to a pre-war umption basis now depends to some nt upon a general lowering of es and a more uniform use of the ral wholesale cuts of meats which titutes a beef carcass. The wide ance in retail prices in different lo- ies for the same grades and cuts eef is due largely to a local demand for meat from only two or three wholesale cuts and neglect of the meat which is cut from other parts of the carcass. To remedy such conditions involves educating the public to broaden the demand to include all parts of the carcass. Should this be accomplished, it would be the means of materially reducing the cost to the consumer by narrowing the range of retail prices of meat based on the quantity derived from the wholesale cuts. A more equal demand for the meat from all parts of the carcass should also increase consumption by lowering the average cost per pound. Reputable retail dealers will welcome a closer range of prices for all parts of the carcass and a more uniform demand which would include all cuts. Press reports frequently refer to a wide difference in the retail prices of beef in different localities. When making comparisons, consideration should be given to the grades of meat offered for sale, as the wide range of prices quoted may be due to a difference in the quality of the meat and a corresponding difference in the cost at wholesale rather than to a higher retail profit. The service performed by the retailer is another feature which should be considered, as accurate deductions cannot be made when prices of cash-and-carry markets are compared with prices of those markets which conduct a credit and delivery business.—*Bureau of Markets.*

A committee of 100 has been appointed at St. Paul to proceed to Washington in person to file claim of railway discrimination in freights affecting St. Paul, Minneapolis and Duluth.

Pacific Northwest Grain Dealers.

At the recent annual meeting of the Pacific Northwest Grain Dealers' Ass'n held at Portland, Ore., S. C. Armstrong of Seattle was elected president; I. C. Sanford of Portland vice-president; A. A. Ryer of Seattle, secretary-treasurer; directors—J. A. Pease of Seattle; N. A. Leach of Portland; W. J. McDonald of Seattle; I. C. Sanford of Portland; M. J. O'Neil of Spokane; S. C. Draper of Portland and S. C. Armstrong of Seattle.

The only routine business of importance transacted was the adoption of a resolution that interest at the rate of 6 per cent be made on all advances to growers and dealers; and that 11c be the uniform price for resacking grain; and 4½c for resacking bad order sacks.

Gov. Smith of New York has sent letters to states representatives in Congress asking them to assist in defeating any attempt in Congress to amend the Commerce Law giving the Commerce Commission regulation and control of canal transportation rates.

The movement of Texas wheat to market now is about as heavy as any on record but is seriously interrupted by shortage of cars.

Trade Mention

The Hunter Robinson Mlg. & Grain Co., Pierce Bldg., St. Louis, Mo., is going after business in a big way. They have four men on the road soliciting consignments, and these fellows are well able to talk up the advantages of the St. Louis market as a broad storing, processing and shipping terminal for the quick and profitable disposition of new wheat. Harry Wilson as manager of the cash grain department states that business through the St. Louis gateway is most promising, and believes that his company will get its full share.

The Ransom Coal & Grain Co., Kansas City, has put into tablet form a bunch of their shipping notifications to be used by grain shippers notifying receivers of the kind and quality and other details of daily shipments. Accompanying this collection of blanks is description of the operations of the company and several pages of technical information in relation to grades, crops, terminal markets' facilities, etc., all of which makes a very interesting, and to shippers in Kansas territory, valuable information, including as it does a table of freight rates reduced to cents per bushel for wheat, corn, rye and oats.

Randolph Drier Output.

The Randolph Drier will hereafter be manufactured in even larger quantities through the lease of a large building in Toledo, in which the construction and assembly of parts will be made. Oliver Randolph, the inventor and directing head of the company, is optimistic of lowering the price on driers, maintaining, however, the operating qualities that are so essential for turning wet corn into graded corn and thus saving the owner of the drier its cost in an exceedingly short time.

Gray Automatic Shut-Off.

Bulletin No. 115 on the Gray Automatic Shut-off for elevators is one of several brand new pamphlets issued by that large producing concern, the Weller Mfg. Co., of Chicago. Grain men will be interested in this shut-off, for they are familiar with the fact that 80 per cent of all fires in mills and elevators start in the elevators. Fires are never fully compensated for by the insurance, for in spite of the most generous adjustment the profits for the closed season are lost; therefore, it is the wise man who does everything in his power to prevent fire. The elevator equipped with the Gray Automatic Shut-off will never choke from overfeeding. Danger to the machinery such as injury to the motors from spout-choking or overfeeding, is eliminated and there will be no loss suffered from burned drive belts, ripped off buckets, torn elevator belts, etc., all of which must be reckoned in the repair items when a shut-off such as described is not installed. The cost of this device is not great, and there is the further advantage of its easy installation by any employe of an elevator handy with his tools. Inquiries addressed to the manufacturers above referred to will bring an extended description of this equipment in their Bulletin 115.

Big Harvest and Transportation.

In the next few weeks the problem of transportation is likely to assume a very serious aspect. The harvest, which promises to be the largest on record, is but a few weeks off, and the railroads will be taxed beyond their capacity to handle it. The country is getting on a peace basis that is as strenuous as at any time during the war. The demand for merchandise and material of all descriptions is without parallel.

With the present deplorable situation of the railroads, through no fault of their own, there is only one solution possible, and that is the use of the motor truck on an even larger scale than during the war. Volume of motor transportation is, perhaps, the only relief available and the demand for trucks is already so great that buyers must anticipate their transportation needs now and act at once if they do not want to suffer great losses through transportation delays.

Kansas Claim Bureau.

The office of the Traffic and Claim Department of the Kansas G. D. Ass'n was opened July 1. It is prepared to handle all of the members' traffic and claim troubles; in fact, has already secured payment from carriers on a few claims that had been previously declined.

S. H. Duckett, who has charge of t office, has had seventeen years' exp ence as a traffic manager and claim juster, ten of which were spent v various railroads in all departm both in the local offices and genera fices, including service with fre claim agents, and seven years as a t fic representative of various ship and organizations, having been se tary of the Topera Traffic Ass'n six years, where invaluable experi was gained in preparing and presen cases before the Commerce Commis and state Public Utilities Commis He has also finished a course in law

Associated with him is C. C. Carter, whose experience embraces teen years' service in all departm of various railroads and as an i pendent traffic manager and claim juster. He has also taken a cours law.

TERMINAL MARKETS.

(Concluded from page 30.)

Geo. M. McMullin, connected with the firm of David McMullin, Jr., grain, hay and feed dealers of this city, will leave here August 12 for a tour through China, Japan, and the Philippine Islands. He expects to be gone for a year and will sail from San Francisco.

The following is a statement of cars of grain unloaded during the month of July: Port Richmond Elevator, wheat 227 cars, oats 147 cars, corn 1 car; total, 375 cars. At the Twentieth street elevator, 81 cars were unloaded as follows: Oats, 78 cars, corn, 2 cars, and peas, 1 car.

The United States Railroad Administration has issued the following notice to the grain trade: On all cars of wheat containing percentage of dockage, we will clean the cars for dockage only to protect grade, and no orders will be accepted to clean or reclean dockage wheat for regrade.

They have also issued notice that on and after July 28 all wheat grading sample, account of moisture, which requires drying, will be unloaded and dried on orders and under the supervision of the Inspection Department, as per our custom of previous years; and it will not be necessary for consignee to file formal drying order.

The following out-of-town visitors were registered at the Commercial Exchange during the week: C. M. and David Robbins, Port Norris, N. J.; L. L. Layton, Georgetown, Del.; J. K. Eddington, Fredricksburg, Md.; H. V. White, Bloomsburg, Pa.; H. L. Saam, New York City; Richard L. Cann, Lakewood, Del.; Geo. R. Merrillat, representing the Sleepy Eye Flour Mills, Sleepy Eye, Minn.; Theo. Carstens, representing Taylor & Browning Co., grain receivers, Buffalo; Luke McKernan, Cedar Rapids, Iowa; R. L. Burns, Watsontown, Pa.; F. School, Indianapolis; E. R. King, of the Arcady Farms Milling Co., Chicago; J. K. Lewis, Honeybrook, Pa.; J. W. Richively, Goldsboro, Md.

Visible Supply of Wheat.

Official statement of visible supply of wheat in the United States, weekly, for four years:

The Grisley Bluff Creamery, Humbolt Co., Calif., has published a statement of butter fat prices paid for April from 1905 to 1919, inclusive. The range runs from 11½c in 1895 by pretty steady progressions to 66c in 1919. Still they complain that dairying is not profitable.

The State Board of Grain Appeals of Minnesota have accepted the U. S. standard grades for wheat, corn and oats, but have fixed state grades for rye, barley and flax. The grading of the lower qualities of barley were somewhat modified to make the grades a little more liberal."

Field Seeds

Timothy seed threshing began last week in Lucas County, Ia.

The North Dakota Improved Seed Growers' Ass'n will hold their mid-winter show and contest January next at Fargo.

The Oscar H. Will Co. at Bismarck, N. D., has been incorporated with a capital of $150,000 to take over the seed business and nurseries of the late Oscar H. Will.

E. R. Kuch & Co., with headquarters at New Knoxville, O., on Aug. 1 opened an office at Wapakoneta, the firm handling all kinds of seeds, including grass seeds.

Reports come from Shelby County, Ia., that there will be a good crop of bluegrass seed but enough wasted to pay the county taxes. Nevertheless about 1 000 acres could not be harvested on account of rains.

The latest estimate of the linseed area in British India is 1,972,000, against 3,770,000 acres a year ago. The final estimated yield for the crop of 1918-19 is 229,000 tons, compared with 515,000 the previous year.

The May Seed and Nursery Co., which recently acquired the Armstrong Seed Co. at Shenandoah, Ia., have begun the erection of a 3-story brick building for their business 60x120 ft. in size. G. A. Chambers, lately connected with the Griswold Seed and Nursery Co., of Lincoln, will have charge of the business at Shenandoah.

Most of the Van Dusen-Harrington reports from South Dakota, Minnesota and eastern North Dakota say flax is in very satisfactory condition. Some correspondents say the crop has never looked better, and as there is an increased acreage in this territory the yeild there will probably compensate for the heavy loss in western North Dakota and Montana. In northwestern North Dakota late flax is at a standstill and the early is in very poor condition.

The Alberta legislature has enacted a law providing for an advance of $300 in value for seed grain for a quarter-section in the form of loans secured by lien on the crop and the land. The maximum amount of loan on any quarter-section at any time shall not exceed $600 for seed or $650 for seed and feed. Where the consent of the owner of the land cannot be obtained, the district may make a lien on the crop and the mortgage on the borrower's goods and chattels.

The Idaho correspondents of C. A. King & Co. report no seed to harvest. An Oregon firm says seed acreage is short, stand thin and weedy. South Dakota firm says very little clover and timothy cut for seed; will have to import. Missouri firm says timothy acreage reduced; yields and quality of seed good. Western Illinois, we expect more clover seed than last year. Southwestern Ohio, only half a crop of clover. Kansas firm, no red or alsike acreage saved for seed, large acreage of timothy.

Kansas City Seed Market.

KANSAS CITY, Aug. 2.—Timothy seed has begun to divide honors with blue grass seed in the local market, but offerings thus far are light, as little threshing has been done. The market is yet indefinite and dealers quote old prices, which range from $9 to $10.50 per cwt. Considering the reduced acreage and the high prices of hay, there may be a fair sized crop of seed. The quality is expected to be good, as dry weather prevailed at harvest.

Some dealers say the majority of the big blue grass seed crop in Missouri has passed from first hands. Competition for the remainder is active. Dealers are in a position to allow the market to advance and are quoting seed in the rough at $10@14 per cwt. to arrive.

More time must elapse before any positive indication can be given on the clover and alfalfa seed crops. Recent weather has been favorable for both hay and seed areas.

Official advices continue to favor the growing crops of cane, millet and sorghum grains in the Southwest, particularly in Kansas and Oklahoma. There is no movement of old cane and millet seed.

The market for seeds in Kansas City is quoted per cwt. as follows: Alfalfa, $12@20; timothy, $9@10.50; blue grass, rough, $10@14; cane seed, last sale, $2.60.

St. Louis Seed Market.

ST. LOUIS, Mo., Aug. 2.—There is little doing in the local seed market, but timothy seed is showing more strength. Aside from some inferior blue-grass seed, there is no new crop seed offered, but the movement is expected to start within the next fortnight. Nominal quotations are as follows: Timothy, $11.50 to $13.50 for good to choice seed, per 100 lbs.; clover, $35 to $41.50; alfalfa, $20 to $25; red top, $12 to $13 for fair to good seed; golden millet, $4.25 to $5; Siberian millet, $2.60; comm millet, $4 to $4.25 per 100 lbs; sorgh cane seed, $2.50 to $2.60 per 100 l stock peas, only poor quality seed f fered, but the last sale was at $5 100 lbs. for whippoorwills.

CHICAGO SEEDS MOVEMENT.

Following is a report of the receipts and shipments of grass seeds at Chic for the months and weeks named in 1919 and 1918, in pounds (000 omitted)

Timothy Seed at Toledo.

Timothy seed was very active all s week at Toledo, the trade being chi in September, October, December March with the heaviest trade in e cember. There was not very much ing in the cash. Stocks of old seed still large. Some of it seems to c on the market at every little adva J. F. Zahm & Co. have had some ports from Iowa that the yield is up to expectations but on the other h Missouri reports and those from o states are to the effect that a good o has been harvested.

Duluth Flaxseed Market.

DULUTH, Aug. 2.—The market in f seed appeared to have become toph after its recent sensational adva and breaks extending to 13@15c v recorded during the last week. R falls over parts of the Northwest

lepressing effect, though many of the perts doubted if the amount of moisre had been sufficient to make any terial improvement in view of the rched-up state of the plant in wide as of western North Dakota. Others, wever, took the view that the worst ases of the crop damage had been counted in the high prices set for d, and it was noted that crushers not appear to be disposed to follow market up. The linseed oil inests bought on any recessions, howr, and their bidding was counted n to furnish a steadying influence times when selling became perent.

teceipts were liberal for the season, ounting to 99,659 bus., as compared h 4,061 bus. last year. Only two , amounting to 41,190 bus., were ped out during the week, and ks in the elevators increased to ,000 bus. That farmers throughout Northwest were endeavoring to lize on their remaining stores of l was shown in the number of bulkded cars received. Considerable l was also shipped in sacks, someg that would not be done under inary marketing conditions.

losing prices of flaxseed on the uth market on Saturday, as comed with the previous Saturday and year, were:

	Saturday	Wk. ago	Yr. ago.
rack	$6.07-10	$6.12-14	$4.56½
arrive	6.07	6.11	4.56½
ember	6.07	6.11	4.60½
ber	5.87	6.00	4.55
ember	5.81	5.96	4.52
mber	5.72	5.82	....

Milwaukee Seed Movement.

ovement of seeds at Milwaukee ng week ending Aug. 2, 1919, as rted to THE PRICE CURRENT-GRAIN ORTER by H. A. Plumb, secretary mber of Commerce, follows:

	—Receipts—		—Shipments—	
	1919.	1918.	1919.	1918.
othy, lbs.	4,702		76,350	51,800
er, lbs.	76,687	257	.....	.....

SEED SITUATION.

WILL BE SOME SEED DEMAND.

ORTH DAKOTA (5)—Grain crops are t 50 per cent of normal. There be some wheat, oats, rye and barto sell, and also some demand for s seed and corn.—*Geo. L. Robinson, essor to Mo. Slope Seed Co., Garri- N. D.*

CLOVER SEED CROP POOR.

ICHIGAN (3).—The Clover Crop in section up to the present time has d very poor, but in the last few we had a few rains and prospects Red Clover now is fairly good.— *Oppenheim & Son, Dowagiac,*

Louisville Seed Market.

UISVILLE, KY., Aug. 1.—The general situation in the Louisville market proximately the same as it has Some little blue grass seed is beold by farmers at $1.50 a bushel, novement is light. Orchard grass hing is increasing, and about 50 ent of the crop has been threshed. country seed delivered has sold at .05 a bushel.

ion sets represent about a 75 per crop of good quality sets, which in instances, however, are running small in size, but representing a good keeping crop. Farmers are asking four cents a pound for yellow sets and 4½ cents per pound for white sets.

Minneapolis Flaxseed Market.

MINNEAPOLIS, Aug. 2.—The demand for flax continued quiet during the past week owing to the fairly liberal stocks the crushers had accumulated for immediate needs. Late last week several buyers became more aggressive and paid better prices for the seed compared with the futures. Daily offerings are light. New crop news is mostly unfavorable. Rains helped considerable North Dakota territory in the past few days and better news is expected to develop shortly. Sales of Manchurian seed continue. Local crushers have taken nearly a thousand tons of it. No. 1 seed on spot and to arrive sells at seed continue. Local crushers have Mostly bulk-head car lots are offered to buyers now. Full car lots are going to Duluth.

Chicago Seed Market.

The timothy market was quiet throughout the week although on Saturday some little firmness was exhibited; $12.65 was asked for old contract prime throughout the week and Saturday cash sales were effected at $10.75. The clover market gained strength throughout the week. Country lots were quotable at $38@42 for seed of fair to good quality with choice seed bringing as high as $45. Quotations follow on both timothy and clover:

Tim.—	Sept.	October.	
July 28	$13.50A	$12.25B	$12.75A
July 29	13.75A	12.35B	12.75A
July 30	13.90A	12.25B	.....
July 31	13.00B	13.50A	12.35B	12.75A
Aug. 1	13.00B	.....	12.25B	12.75A
Aug. 2	13.00B	.....	12.30B	.....

Clover, contract prime—

July 28	$47.00	July 31	$49.10
July 29	49.10	Aug. 1	49.50
July 30	49.10	Aug. 2	49.50

Clover Again Breaks Record.

New high levels were reached by clover seed at Toledo last week, and prices are subject to sharp fluctuations.

Rains have helped the seed crop. Michigan dealer who was quite pessimistic before, writes Southworth & Co. that he believes the second crop now has a good chance; an Ohio dealer speaks of seeing some mighty fine red clover fields in a recent motor trip; another says yield of mammoth clover will be good, but on a restricted acreage, and that there will be no medium clover; grasshoppers deprived it of what little chance it had.

Reports from Indiana, Illinois and Wisconsin are somewhat mixed, but nothing like a normal crop is expected. From Oregon they hear the acreage in the Willamette Valley is small and clover is not filling well. Probably will not have more than half a crop on 25 per cent of normal acreage. "The alsike production throughout the country, we believe, is going to be larger than normal crop," is the advice we have from one well-posted dealer. With the clover crop still in doubt alsike prices look high in comparison, although the country was never so well drained of alsike as it was during the past season.

Argentine Linseed.

The linseed market has been very erratic in the Argentine during the past few weeks, but has been advancing in what the *Times of Argentina* calls "a truly delightful manner." The demand has diminished somewhat, largely on account of the difficulties in obtaining tonnage, ship owners either giving that part of the world a wide berth on account of labor troubles or insisting on extremely high freights in order to compensate for the inevitable delays caused by dock laborers.

Foxtail in Alfalfa.

The foxtail pest is one of the alfalfa grower's biggest obstacles. To get rid of this infernal nuisance is next to impossible in many sections, especially in oil fields where it has established itself. Despite cultivation, the foxtail will come up in the spring and just as the cool weather holds the alfalfa back, it gives the foxtail its chance to grow, for cool, damp ground is just what it needs to make growth. The result is that the first cuttings of hay in most alfalfa fields are foul with the foxtail, which, in its ripened or almost ripened state, animals will not eat. Unless forced to it they will often refuse the alfalfa with which the foxtail is mixed. Immense quantities of the first crop of alfalfa are therefore not worth making into hay and in seasons when hay has been cheap many farmers have cut their fields, dried the crop and set a match to it. This is about the only thing to do once foxtail has taken possession of an alfalfa field. "We are getting into a serious stage of food production when the match is not permissible on crops after they have once made their growth," says *Field and Farm* of Denver, "and some other method must be followed. If we can't stop the foxtail, why not find some way to utilize it, some way in which the irritating awns can be made into valuable feed instead of injuring the animals that would eat it. This is being done by many of the dairymen. The silo is the means by which this is being accomplished. Foxtail makes good ensilage of itself, and when mixed with alfalfa it is still better. So why not use it this way and get rid of it?"

New York Oats Market.

Oats receipts at New York last week, 524,300 bus. Arrivals are now quite moderate and promise to continue so, as there is an embargo against export shipments of coarse grains to this market.

Prices were firm during the early part of the week, but declined sharply the last two days through speculative liquidation. The present agitation against high prices of all food commodities is responsible, in a large measure, for the liquidation now in progress, and just how far it will run it is impossible to foretell. Its effect upon the spot market has been to deter dealers from making new commitments, and for the present their purchases will be restricted to actual necessities.—*L. W. Forbell & Co., New York City.*

Wheat buyers in the Inland Empire say that wheat buying is more of a gamble this year than last. Dealers this year must grade and pay full price and take the chance of the corporation graders changing the grade.

Cotton Statistics for Week.

The following shows the statistical position of cotton figured up to Saturday morning by the *Financial Chronicle:*

	Aug. 1, 1919.	July 25, 1919.	Aug. 2, 1918.
	Bales.	Bales.	Bales

The Iowa Weather Crop Bulletin says: "It is problematical what the effects of the heat will be on pollenization of corn. Extreme heat tends to scorch the silk and render it unreceptive to the pollen and also to kill the pollen. Up to July 29, however, there was nothing to indicate that the yield of corn has been reduced below normal, although it is quite certain that a bumper crop cannot be expected for the state."

STATE NEWS.

(Concluded from page 35.)

Hitchcock, S. D.—Work of tearing down the old elevator belonging to John Kingdon has been completed and the crew is now working on the foundation for the new one which is to be erected immediately.

Parker, S. D.—The J. A. Christopher grain elevator and coal houses and the Parker Flouring Mills were sold at auction. Shanard of Bridgewater bought the grain elevator at $1,500. H. M. Best of Bancroft bought the Parker Roller Mills.

TENNESSEE.

Knoxville, Tenn. — The Superior Mills has been incorporated with a capital of $300,000. Incorporators: C. M. Thomas, Jesse Thomas, and others.

TEXAS.

Canyon, Tex.—The Panhandle Grain & Elevator Co. of Amarillo has purchased the mill in Canyon.

White Deer, Texas.—The North Texas Grain Co. has installed a Boss Air Blast Portable Car Loader.

Gatesville, Tex.—The machinery of the new flouring mill is being put in position and it is expected to begin operation in the next few weeks.

Whitewright, Tex. — The Whitewright Milling Co. has been chartered with $150,000 capital by T. H. Sears, L. P. Sears and J. P. Southerland.

San Juan, Tex.—The Community Grain Co. has been organized with a capital of $25,000. Incorporators: Wm. J. Buttachau, P. J. Williams, and others.

Stratford, Tex.—The new 25,000-barrel grain elevator, costing around $12,000, is well on the way to completion. It is owned by Douglas, Cator & Barnes.

Edinburgh, Tex.—The Edinburgh Elevator & Milling Co. has been chartered with a capital stock of $12,000 by Frank Flanagan, B. F. Richey and W. H. Corsage.

Abilene, Tex.—Wiley Turner, manager of the Farmers' Union Warehouse Co., is building a grain warehouse 50x140 feet at the corner of Cherry and S. 3rd Sts.

Sweetwater, Tex. — The West Texas Grain Co. of Sweetwater has been incorporated with a capital stock of $25,000. Incorporators: W. H. Wortham, J. B. Bowie and D. T. Watkins.

Houston, Tex.—The Cereal Milling Co. has been organized for the manufacture of breakfast cereals from rice. S. B. Brown, president of the Central Bank of Wilcox, Ariz., heads the new concern; J. B. Gaughan of Houston, is vice-president, and Chas. Leo of Rosenberg, Tex., as secretary-treasurer.

VIRGINIA.

Huddleston, Va.—The Huddleston Milling Co. has been organized with a capital of $25,000 by L. F. Hubbard, and others.

Crimora, Va.—A flour mill at this place owned by Chas. Harman and Wallace DeRundeau was struck by lightning recently and burned to the ground with a loss of $16,000, covered by insurance. 2,500 bushels of grain were stored in the elevator.

WEST VIRGINIA.

Bluefield, W. Va.—The Wright Milling Co. is constructing an elevator here to cost $30,000.

WASHINGTON.

Spokane, Wash.—Kerr, Gifford & Co., millers and grain exporters, have consolidated their Colfax and Spokane offices and will now operate entirely from this city.

WISCONSIN.

Hilbert, Wis. — The Hilbert Farmers' Elevator Co. has been incorporated with a capital of $25,000.

Campbellsport, Wis.—M. N. Altenhofen sold his elevator and feed plant to E. F. Messner and Anton F. Ketter.

Waterford, Wis.—H. C. Berger sold his third interest in the Waterford Milling Co. to his partners, A. S. Titus and Geo. Healy.

Hartford, Wis.—The Hartford Co-Operative Company has purchased the malt house and grain elevator of John Grimm and Al. Schroeder. Plans are now under way to remodel the building into a warehouse and elevator.

Oconto, Wis.—The Oconto Grist Mill will start operation about August 15th. The mill has been completely overhauled and new machinery installed. Permanent officers have been elected at a recent meeting at the city hall council chamber.

Neenah, Wis. — Neenah and Menasha Supply Co., co-operative, has been incorporated with capital of $6,000, to deal in farm products, etc. Incorporators: Jerry Vosburg, M. J. Kellett, George C. Harness, John Gibson and Otto C. Erdmann.

Juneau, Wis.—O. L. Warren and C. H. Beadle, of this city, have formed a copartnership to engage in the milling business. A suitable building has been leased and modern machinery and equipment is now being installed. Wr. Warren was formerly proprietor of the Juneau Roller Mills here.

Sturgeon Bay, Wis.—The Farmers' Company, of this city, has purchased the interests of the Door County Seed Company. The deal includes the office and warehouse building which will be used for grain only. The present quarters of the Farmers' Company will be maintained and used for the exclusive handling of flour, feed and seed.

CLIMAX SUPERFINE BRAND.

You know there are lots of wise birds in this world, ranging from the owl down. We have made quite a study of birds because the scarecrows in the fields and the particular preference for certain seeds and crops evidenced by certain birds help us in our seed business.

Our friends above, an eagle and a crow, sitting on a fence overlooking a broad field of fine timothy, are sizing up the situation.

The crow says to the eagle, "You may be the king of birds, but look at the crop that Small's Woodpecker Brand produced."

Now, as a buyer of seeds, we ask you frankly whether you are willing to parallel your good judgment and seed selection ability with the crow? If you agree with him, ask your dealer for Small's Woodpecker Brand of timothy seed.

CLIMAX SUPERFINE BRAND.

The Mayfield Grain Co. of Minneapolis received the first car of spring wheat in that market on July 29, which sold to the Washburn-Crosby Co. at $2.70. It came from Waterville, Minn.; graded No. 3 Northern; weighed 56½ lbs.; 7 per cent damage noted; 1 lb. dockage; moisture content, 13.7 per cent.

British Ministry Food Profits.

The report of G. H. Roberts, chairman of the British Food Ministry, for the fiscal year ending March, 1918, shows a turnover for the year of £46,278,571 with a gross profit of £1,549,027 and a net profit of £133,366, or ¼ of 1 per cent. The report for the year ending March, 1919, has not yet been published. These figures do not include the accounts of the Royal Commission on wheat and sugar supplies and they exclude also the amounts paid as subsidy to potato growers amounting to £249,000.

The estimated turnover for the f year ending March, 1919, is app mately £550,000,000, or £900,000,0 the commissions on wheat and sugar included. There was a loss in the chase of potatoes of £46,000 and on etables £21,000.

The Houston, Tex., Grain and Exchange has been organized with offices in the Chamber of Commerce S. P. Sheran has been elected presi and the membership of the organ tion has been limited to 100 with initiation fee of $100 each.

Beans and Potatoes

Beans in Tennessee are reported doing fairly well.

The New York bean crop is said to be in excellent condition.

Beans in Colorado are reported backward in some localities.

Condition of growing bean crop in California is reported improved.

The early potato crop in Warren Co., ., is reported a practical failure.

Spokane Co., Wash., reports a pea crop valued at $1,000,000, the crop now being grown on about 30,000 acres.

Soil conditions are not the best in New England, potatoes being dry; but here is no complaint as yet of blight.

The county agent of Pueblo Co., Colo., is trying to organize the farmers of the county to build an immense bean elevator at Pueblo.

The Michigan Weather Report of July reports early potatoes drying up, beans and late potatoes in fair condition, but would be benefited by rain.

BEAN SITUATION.

BEAN STOCKS LOW.

MICHIGAN (5).—Bean stocks are very low. The new acreage is only 25 per cent of normal, but the condition of the crop is good. Demand for beans is urgent.—*E. A. McGeorge & Son, Gladwin, Mich.*

OLD BEANS GONE—NEW CROP FINE.

MICHIGAN (8).—The old beans are nearly all out of the farmers' hands, very few left, and there is nothing much in our elevators. The new crop is looking fine; the recent rains have done a world of good. Short acreage here this year.—*Mayville Mlg. Co., Mayville, Mich.*

BEAN AND POTATO PRICES.

Quotations follow for lots of good quality and condition beans and potatoes, sacked, per cwt., unless otherwise noted, as of Aug. 2:

Beans—

Buffalo—Marrows, $10@10.50; mediums, $7.50@8; pea beans, $7.50@8; wh. kidney, $11@11.50; red kidney, $11@11.50.

Chicago—Prices firmer. Sma. supplies. New crop doubtful acct. lack of moisture. Pea beans, hand-picked, ch. to fancy, $8.50@9; fair to good, $7@7.50; brown Swedish, $5.50@7.50; red kidney, $11.50@12.

Cincinnati—Navies, $8.75; marrowfats, $12.50@12.75; red kidneys, $12.50; limas, $10@10.50; pintos, $7.50.

Denver—Pintos, paid to jobbers, $4.25@4.50; navies, $6.50@8.50; limas, $9@10.

Detroit—H.-p. pea beans, $8.25.

Minneapolis—Navies, $8; soya, $5; brown, $6; Calif. limas, $11.

Montreal—The market holds steady with an improved business, cars of Ontario hand-picked being quoted at $5, and three-pound pickers $4.75. Quebec beans are quoted at $3.75@4.25.—Trade Bulletin.

New York—Calif. limas, $10.75; pinks, $7.25; ch. marrows, $11.50; fair, $10.50@11.25; ch. pea beans, $8; sma. wh. Calif., $7.50@7.75; red kidney, $13@13.25; wh. kidney, ch., $11.75@12.25.

St. Louis—Quote c. lts.—ch. h.-p. Mich., $8.50; prime ma.-p., $8.25; orders and small lots higher; pinto beans, $7 per cwt. From store—Scotch peas, 8c per lb.; split peas, green, at 15c, and yellow at 8c per lb. Per cwt.: Calif. black eyes, $6.50; ch. limas, $12.50; Calif. pinks, $8; white, $8.50.—Market Reporter.

Potatoes—

Boston—East'n Shore, $18.

Buffalo—East'n Shore No. 1, $7.50@7.75; No. 2, $6.50@6.75.

Chicago—Market strong; Ks., Mo., Ill., Ohios, $3@3.25; Calif. wh., $3.50@3.65; Ky. Cobb, $3.65@4; Va. Cobb., $7.50.

Cincinnati—Ky. Cobb., 150-lb. sk., $5.40; Aro. Cobb., No. 1, bbl., $6.50; Early Ohio, h.-g. bbl., $6; Va. Cobb., bbl., 6.50.

Denver—Wholesale prices to jobbers. New—Colo., $3.25; Calif., $3.75@4.25. Kansas City—Kaw Valley Cobb., $2.90@3.15; Ohios, $2.75@3.

New York—New—East'n Shore, bbl., $5@5.25; Va., bbl., $5@6; Jer. rnd., 150-lb bg., $5; L. I., bbl., $5@6.

Montreal—Receipts for week ending July 5, 1,208 bags, against 368 bags last year. The market is quiet. Most of the offerings being American, which sell at $6.50@7 per bbl. for No. 1 and $3.50@4 for No. 2. A few Canadians have sold at $2.50@2.75 per bag.—Trade Bulletin.

St. Louis—New—Fcy. stk. steady. Farmers del. bulk, $2.90@3.10.—Market Reporter.

RECEIPTS AND PRICES OF RYE.

The first car of new crop Canadian rye was placed on the market on Friday, Aug. 1, by the Dominion Elevator Co. The grain came from Rosebank and was graded as 2 C. W. rye.

Receipts of rye at the principal primary markets of the Central West for the week ended August 1 and for the corresponding week last year, as compiled by the *Minneapolis Market Record*, were:

	1919. Cars.	1918. Cars.
Minneapolis	228	27
Duluth	101	...
Chicago	200	109
Omaha	71	6
Milwaukee	23	5
Total	623	147

Closing outside prices of rye of standard quality and spot cash for each day of the week beginning July 25, were:

	Mpls.	Dul.	Chi.	Oma.	Mil.
July 25.	$1.57¾	$1.57	$1.61	$1.52	$1.60
July 26.	1.60½	1.61¼	1.63	1.53	1.63½
July 27.	1.66	1.66¼	1.69	1.58	1.68
July 29.	1.63½	1.64¼	1.68½	1.58	1.68
July 30.	1.63¾	1.64	1.68	.....	1.67
July 31.	1.61½	1.61½	1.58	1.55	1.66
Aug. 1.	1.57¾	1.57¾	1.64½	1.51½	1.66

Exports of Rye.

The exports of rye from all United States ports, as reported by the Chief of the Bureau of Statistics of the Department of Commerce for each month, for four years, were as follows, not including rye flour:

Mos.	1919.	1918.	1917.	1916.
Jan.	1,201,973	1,829,416	1,203,136	1,372,448
Feb.	1,873,127	1,065,537	1,178,870	1,218,480
Mar.	3,738,932	1,001,384	530,693	1,216,492
April	2,905,482	124,739	840,406	1,053,714
May	7,397,392	118,482	1,249,452	1,610,050
June	7,121,660	266,259	739,861	1,181,281
July	.....	213,466	367,016	489,947
Aug.	.....	212,243	97,749	591,031
Sept.	.....	308,017	136,856	1,043,799
Oct.	.....	466,100	1,248,128	1,678,885
Nov.	.....	1,094,442	2,918,421	2,082,669
Dec.	.....	1,099,038	2,891,936	1,622,294
Yr.	.....	7,631,639	13,411,524	18,741,061

Rye Declines, Feeds Advance.

Rye followed corn up last week and then followed it down when the Government agitation for lower food prices discouraged buying, closing for Sept. 6c under July 26.

Meantime feeds continued to advance. This anomalous situation seems to us to offer every inducement for buyers to stock rye flour, especially the whiter grades, which are more largely affected by the price of feed.

The Wisconsin rye crop is proving of excellent quality. — *Blodgett-Holmes Co., Janesville, Wis.*

Government as a Buyer.

The permit system for supplying cars went into effect on Aug. 1. Dealers will continue ordering through local agents and see that the railway superintendent knows just what the situation is. Cars are very scarce and the movement of wheat will be a long drawn out affair. Elevators at Chicago are having difficulties with the out-inspection on wheat loaded for the Grain Corporation, the Federal supervision being very rigid. This has caused buyers to reduce their bids to the basic prices and for the present only choice winter wheat of good weight and color will bring any premium. Be careful of Yellow Hard, as its basis is 2c under the straight Hard. Mixed wheat is also being discounted under the basis; low grades are hard to sell and discounts increasing.—*W. H. Perrine & Co., Chicago.*

Feedstuffs

M. W. Green has sold his feed mill at Browns Valley, Minn., to Clarence Skaggs.

W. R. Newberry has purchased the feed business at Mauston, Wis., from R. S. Joslin.

The Delta Flour & Feed Co. has been incorporated at Memphis, Tenn., with a capital of $20,000. Incorporators: M. G. Odeneal, Walter Chandler, W. S. Gunning, G. W. Howland, J. A. Tindle.

FEED DEMAND GOOD.

INDIANAPOLIS.—We find a very good demand for both wheat feeds and corn and oat feeds. In fact, the demand for wheat feed is greater than the supply, on account of both domestic and export flour sales not being at all heavy, consequently our output of feed is limited. We believe this situation prevails over the entire country, and as a result dealere are using other fine ground mixed feeds. The demand for poultry, hog, dairy and stock feeds is very good, and we see nothing which will prevent good business for at least the next few weeks.—*Acme-Evans Company, Indianapolis.*

Light Cottonseed Feed Demand.

KANSAS CITY, Aug. 2.—Few sales were reported by cottonseed cake and meal market interests in Kansas City this week. Prices are holding firmly, and while graziers display interest in the market, crushers and jobbers are filling only scattered orders. The Southern trade continues to seek bids on new crop cake and meal for fall delivery, but bid prices are far out of line with the asking quotations.

Movements of Stock Pigs.

A comparison of the movements of stock pigs from the live stock markets of this country in the first half of the present year and the corresponding period of 1918 shows an increase of 49,194, or 12 per cent. While there has been a decrease in the numbers shipped from most of the live stock markets of the Middle West, shipments from the South Central and Southern markets in most instances show heavy increases. The increase in the movement of stock pigs has been principally at Kansas City, St. Louis, Oklahoma, Louisville, Montgomery and Nashville, which shows a total increase of 110,681, or 123 per cent, during the six months' period. The markets which show the greatest decrease are Chicago, Omaha, Sioux City and St. Paul, with a total decrease of 41,086, or 39 per cent, in shipments from those markets when compared with the same period one year ago.

FEED MARKETS.

CHICAGO.

Chicago, Aug. 2.—The supply of mill feeds is inadequate for the demand and consequently the market is strong and higher prices prevail. The market is also firm as regards cottonseed meal of which there is a light supply. Quote bran $45, sacked; middlings, $56.

BALTIMORE.

Baltimore, Aug. 2.—A much firmer feeling prevails in feedstuffs as a result of an improved demand here and firmer Western advices. Demand for bran and middlings is sufficiently active to keep the daily offerings well absorbed. Quotations follow: Western spring bran, per ton, in 100-lb. sacks, $48@49; Western middlings, per ton, in 100-lb. sacks, $59@60; city mills' winter wheat bran, per ton, in 100-lb. sacks, $60; brown middlings, per ton, in 100-lb. sacks, $60; white middlings, per ton, in 80-lb. sacks, $70.

LOUISVILLE, KY.

Louisville, Ky., Aug. 2.—Feed prices are very high and according to jobbers present values are at least ten to fifteen dollars out of line. This condition is due to a heavy demand and the fact that the soft winter or Southern wheat millers are about the only ones running, and they are keeping up feed prices and holding down flour. As soon as the Northwestern mills are in operation it is expected that feed prices will tumble as the market loads up, and that flour will advance. Quotations are: Bran, sacked, packed, carlots, Louisville, $50 a ton; mixed feed, $58; middlings, $62; hominy feed, $80.

NEW ORLEANS.

New Orleans, La., Aug. 2.—Mill feeds have advanced considerably and apparently are holding their price, notwithstanding the decline in corn and oats. Tagged bran offered for shipment at $2.35 per hundred for both hard and soft wheat bran. Shorts quote at about $3.10 for gray and hard to obtain at this figure. Quote the market on shorts nominal.

NEW YORK.

New York, Aug. 2.—The market for mill feed was very strong throughout the week and prices were again advanced. Offers were of very small proportions and holders demanded higher prices. Consumers bought only when they were forced to and the volume of business was limited. City bran was quoted at $49, middlings at $59 and red dog at $69 per ton, while Western bran was quoted at $49@50, middlings $60@61, and red dog at $71@72 per ton.

MILWAUKEE.

Milwaukee, Wis., Aug. 2.—The local mill feed market is again higher under a good demand which is unusual for this season. Due to the free offerings of Southwestern mills the markets in the Northwest are running very brisk. Current quotations are: Bran, $45@46; standard middlings, $56; flour middlings, $61; red dog, $64.50@65.50; hominy feed, $76.50; rye feed, $53; old process oilmeal, $92.50; cottonseed meal, $86@93; brewers' dried grains, $59, all in 100-lb. sacks.

MEMPHIS.

Memphis, Aug. 2.—Active demand for all sorts of mixed feed continues and practically every plant here is still behind with its orders and cannot accumulate any stocks. Reports indicate the biggest business in the history of the trade for July and the outlook is encouraging for it to continue. Prices hold steady, as no effect of the reaction in grains has yet been felt. The demand still runs largely to feeds having oats for grain rather than corn.

Mill feeds are scarce and high and business done has been at higher levels, but offerings are expected to be larger soon.

The people who have any old cottonseed meal are doling it out around $77.50 for 7 per cent ammonia grade, but there is expected to be some trading in new meal soon, although none will be available until along in October. Preparations are being made by the trade here to resume trading on the call board of the Merchants Exchange about Aug. 15. Application has been made for a charter for a clearing association patterned after those in use on the Board of Trade and other exchanges, the purpose being to petter protect trades.

BOSTON.

Boston, Aug. 2.—The demand has been good for all grades of feed the past week. Prices rapidly advancing. The following prices were quoted at the close: Bran, spring, sacked, $49 per ton; bran, sacked, $49.50; middlings, sacked, $59@65; mixed feed, sacked, $58@62; red dog, sacked, $58@72; second clear, sacked, $73; oat hulls, reground, sacked, $35; hominy feed, sacked, $78.40; cottonseed meal, sacked, $83. Receipts for the week ending Aug. 2 were: none; for the month of July, 1919, were: 587 tons.

NASHVILLE.

Nashville, Tenn., Aug. 4.—Heavy demand continued last week for feed. Mills are not able to meet demand for wheat bran and middlings and are sold far ahead on output. Demand for other ground feeds is good. Quotations: Soft wheat bran, 100-lb. bags, per ton, $46.20; middlings, $58; horse and mule feed, $51@66; dairy feed, $53@68; poultry feed, $76@82; hog feed, $68.

DULUTH.

Duluth, Aug. 2.—Advances extending to from $2 to $5 were set in feed prices during the last week. Good demand was reported and the mills were short of supplies with their operations at a minimum on account the flow of wheat this way being of a straggling nature pending the movement of the new season's Northwest crop. Prices follow: Bran, per ton, $41.50; ground oats, $48.25; No. 1 ground feed, $64.50; No. 2, $61.25; No. 3, $51.75; shorts, $53; red dog, $63.50; Boston mixed, $49; cracked corn, $71; rye feed, $40.

ST. LOUIS.

St. Louis, Mo., Aug. 2.—All kinds of feeds are scarce and strong with prices breaking all records. Quotations are: Bran, spot, $43@44.50; gray middlings, $61; brown, $57; mixed feed, $50@53; white hominy feed, $73.50; oat feed, $25@26; barley feed, $60 per ton, on track. Offerings are scarce and there is an active demand. It is more difficult for jobbers to get the feeds than it is for them to sell them.

TAMPA.

Tampa, Fla., Aug. 1.—Notwithstanding the recent sharp advances in shorts and other mill feeds, the local demand continues brisk at present prices of $63@64 for gray shorts and $52@52.50 for bran. Alfalfa meal is quoted at $47 delivered Tampa, but the demand for this product is slow at the present time on account of our trade being well protected with alfalfa meal bought some little time ago for much less money. Hominy feed is being quoted at $80 per ton, delivered, which makes this class of feed too high for Florida dairymen. However, hominy feed became very popular with our feeders on account of its high milk-producing qualities and will resume its place among the rapid sellers whenever prices become near that of other feeds. No prices are being heard of cottonseed meal and hulls just at this time, and as reported in a recent letter cottonseed meal has practically disappeared from this market from a feeding standpoint.

PHILADELPHIA.

Philadelphia, Aug. 2.—The market continues strong under a good demand and light offerings, and prices show a further advance over last week's quotations. The following quotations represent carlots in 100-lb. sacks, to arrive: Winter bran $50@51 per ton; spring bran, $49@50 per ton; standard wheat middlings, $60@61; flour middlings, $65.50@66.50; red dog, $68@70; shorts, $60@61; low grade flour, $71@72.50; rye middlings, $60@61; fine yellow hominy, $77@78.50; fine white hominy, $77@79.50; reground oats feed, $31.50@32.50; cottonseed meal, 36% protein, $81@83.50; cottonseed meal, 41% protein, $86@88.50; cottonseed feed, 20% protein, $64@66.50.

PORTLAND.

Portland, Aug. 1.—The Commercial Review reports the demand for mill feeds a strong compared with the output with a strong undertone to the market. Shipment offerings are light and eagerly taken; middlings in good demand for both prompt or nearby shipments. Brokers and jobbers look for a steady market in the near future. There is very little millrun for sale in transit. All grades are in light supply. Millrun is quoted at $40 per ton.

MINNEAPOLIS.

Minneapolis, Aug. 2: The decline in grain prices generally caused many mill feed buyers to hold back and during the past few days the undertone has been a trifle easier for all grades, though there has been prompt absorption of what the millers had to spare. At present the output is very small, but an increase is expected shortly as the millers have plenty of flour orders to fill during the next thirty to sixty days and cash wheat is arriving on the market in greater volume. There is a steady western demand for bran owing to the lack of pasturage in that direction. Heavier grades have been selling to a territory quite freely.

Quotations in car lots f. o. b. sacked 100 pound sacks.

Bran	$32.00@44.
Middlings, flour	53.00@54.
Middlings, flour	58.00@59.
Red dog	64.00@65.

PITTSBURGH.

Pittsburgh, Aug. 2.—Practically no feed has been coming into the Pittsburgh market and this condition is giving little concern owing to the lack of demand. On 4 cars of all kinds were bulletined in the last period. Some bran could be placed and a few cars of extra middlings would find ready sale here.

The Quaker Oats Co.'s stockholders have voted to increase the authorized capital to $50,000,000, of which $10,000,000 will be preferred and $10,000,000 common.

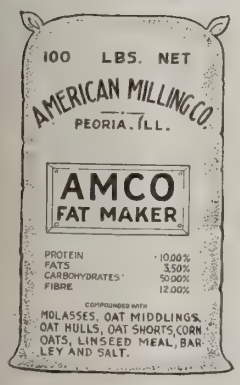
SUCRENE FEEDS



The Feeds That Nourish The Stock

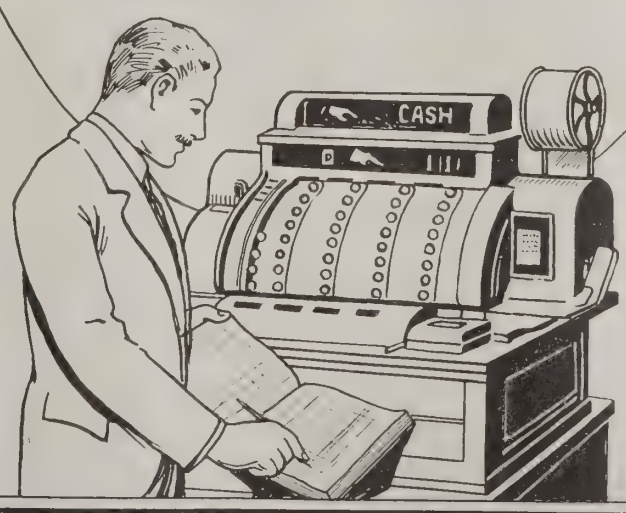
Bring Repeat Orders

Almost any feed can be sold to some stock raisers **ONCE.**

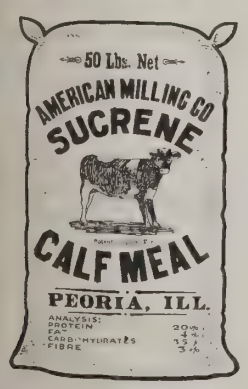
Sucrene Feeds are the "Come-Back-For-More" Feeds, because the quality is always there.

You have Sucrene reputation pulling for you all the time—the reputation that's based on 19 years of recognized leadership—more firmly established in the good-will of the stock feeding world today than ever before.

The Till Tells the Tale



Keep your mind's eye on the Sucrene Line. In the near future our big new mill—larger, more modern, than the one destroyed by fire recently—will turn out Sucrene Feeds of standard quality, which will be offered to the trade at money-making prices. Due announcement will be made to the trade.



Send in your orders for Sucrene Poultry Scratch Feeds. We fill orders promptly on the full line.

Southern Mill: Owensboro, Ky.

MILK VS. DAIRY FEEDS.

The spirit of competition exerts as it should a certain influence in keeping feed prices in line with the cost of materials entering into the dairy ration. It has become noticeably apparent in the last few months, however, that advancing costs of dairy products are disproportionately high compared with the manufacturing costs of such feedstuffs. Beginning Aug. 1, the city of Chicago has been advised milk will cost 15c a quart, 9c in pints, cream 16c for a half-pint and whipping cream 20c, certified milk at 20c per quart or 13c per pint. The Chicago laboring people, though themselves demanding, like Oliver Twist, "more," and others who must get but cannot demand "more," characterized this further elevation of the high living scale simply as another insult and evidence of profiteering. The Milk Producers' Association, explaining the increase, simply refers to the price formula adopted by the Milk Commission of the United States more than a year ago, then warraning the price of $3.52 per 100 pounds of milk, and on this the above consumers' rates are based.

Milk prices are not greatly affected by feed prices, at least now. It is the cost of labor on the farm and of distribution in our metropolitan cities which is the expensive proposition. Drivers in Chicago are getting $150 per month plus commissions. But the entire situation, from the dairy cow to the consumer, is vitally important and interesting to dairy feed manufacturers, who are now considering their program for the coming fall and winter. It is a certainty that the rapidly advancing scale of living will continue until a general smash comes; but it occurs to us that the cost of dairy feed materials is not for the moment, as it should be, the determining factor in their resale price to the dairy feeder. A certain amount of official meddling may perhaps be expected in the grandstand endeavor to maintain "fair profits" and to eliminate "profiteering." One may doubt its efficacy, however; and the months before us will offer an excellent opportunity to the feed manufacturing trade to further substantiate their position that in furnishing good feeds they are doing so at fair prices and that those prices have relatively very little actual influence over the advancing cost of milk produced compared with its retail price.

THE DAIRY-CATTLE INDUSTRY

The Dairy Division of the Agricultural Department has published "Dept. Circular 7," entitled "Trend of the Dairy-Cattle Industry in the United States and Other Countries," in the form of "simple charts with interpretations." It rather conflicts with the general impression made on the public by the recent declarations of assistant secretaries, that the cattle industry of the Nation and the world has fallen on desperate times. The January census of live stock by the Bureau of Crop Estimates shows that on Jan. 1, 1919, the number of milch cows in the U. S. was 157,000 greater than at any time in our history, while other cattle also were greater in number. This Circular adds that "throughout the world the cattle industry shows general growth." The "comments and conclusions" of the Circular are abvious because they conform exactly to what commercially speaking should be expected, and so are very interesting. They follow:

"The general trend of cattle development is: First, work animals; next, raising cattle for commercial beef; next, commercial dairying in addition to the business of meat production; and finally the increasing prominence of dairying.

"Throughout the world the cattle industry shows general growth, but has made its greatest advance in regions where pasturage and feeds are more abundant.

"The recent trend of cattle development indicates that beef production and dairying are progressing, generally, outside of the immediate war area.

"Countries which depend largely on imported feeds appear to maintain relatively few cattle in addition to their dairy cows, which have gradually replaced other cattle.

"Dairy cows have shown less fluctuation in number than total cattle. This condition is noteworthy throughout the world over long periods, including adverse conditions, such as disease, drought and war.

"European experiences indicate that when a country has reached the practical limit of cattle which the land will maintain, further increase of milk production is obtained by improving the yield per cow.

"It appears logically that the United States can best meet changed world conditions, first, by increasing simultaneously both the number and quality of its cattle; secondly, by constant attention to economy of production; and thirdly, by maintenance of cattle raising and dairying in conjunction with general farming, thus reducing dependence on purchased feeds."

Rates on Cake Feeds.

The Commerce Commission has found that rates on cottonseed and peanut cake and meal, in carloads, from Texas common points to points in Colorado, Montana, Idaho, Wyoming, Utah and Oregon are unreasonable and unduly prejudicial, and has issued an order effective Nov. 6 that the G. C. & S. Fe and other companies in territory indicated shall make a new rate which shall not exceed 5c per cwt. more than the rates contemporaneously in effect on traffic from points in Texas on the Ft. Worth-Dallas group to same destinations in Colorado, Montana, Idaho, Utah and Oregon; or which shall exceed the aggregates of the intermediate rates subject to the act contemporaneously in effect, or rates to intermediate points in same states and, Wyoming which unauthorizedly exceed the rates to more distant points.

Missouri Cattle and Hog Report.

JEFFERSON CITY, Mo., Aug. 2.—The number of cattle on feed in Missouri on July 15 was a little over half that of last July, but the number of hogs on feed was 7 per cent more, according to the joint report of E. A. Logan and Jewell Mayes, of the Bureau of Crop Estimates and the State Board of Agriculture. Returns from 131 cattle owners in 70 counties show that only 14 of this number were feeding and they had 908 steers on feed against 1,771 in July, 1918, or but 51 per cent as many. The number on grass, at this time is 5 per cent less than last year, or 5,893 against 6,401 for the 131 owners. Very few cattle are now going on feed and much the larger portion have been on feed for some time, as over 70 per cent of the above number have been fed 20 weeks or more. None of these cattle will be fed longer than 7 weeks and by the middle of August 60 per cent of them will have been shipped out.

Feeders are undecided as to their operations this fall and are waiting for market conditions to clear up and on the outcome of the corn crop. Most Missouri feeders were fortunate in their decision not to actively compete for feeders' stuff early in the summer, and those who held for a more favorable market express themselves as ready to sell all fat stuff and are doubtful whether they will feed immediately.

Eighty counties, with 154 farmers who reported hogs on feed, show 6,284 hogs on feed against 5,873 last July, or 7 per cent more. Of this number 65 per cent have been on feed eight weeks or more and 70 per cent of them will have been marketed by the middle of August, with very few feeders holding later than the middle of September. About two-thirds of the number will have been given a 12 to 16-weeks' feed. The number of hogs on grass for these farmers is 3 per cent more than last year, but as to the number to be fed this coming fall, many are undecided, waiting on the corn crop. Northwest and northeast Missouri show fewer hogs on grass than last year, while the west district, with a very poor corn crop last year, shows a decided reduction; but the other sections of the state are pasturing an increased number of hogs.

Hay Shrinkage.

Since the losses which stored hay undergoes depend upon the amount of moisture the hay had at the time of storage, together with losses in dry matter due to fermentation, one cannot say with certainty just what the shrinkage in any particular case may be. Neither can we say just what the shrinkage losses will be for each month under storage. However, it may be safely said that these losses occur largely during the first two months. Hence, hay stored at any time during the summer will have suffered its losses by spring of the following year.

Hay fit to be stacked or hauled into the barn will usually contain from 15 to 25 per cent moisture, averaging about 20 per cent. According to the work done by various experiment stations upon this problem, shrinkages range anywhere from 15 to 35 per cent. Hence a fair average would probably be about 25 per cent. Therefore, a ton of alfalfa hay worth $34 in March would be worth on this basis about $26 sold directly from the field, if other factors affecting prices are not considered. That is, it would be fair for you to give about 2,660 lbs. of hay directly from the field for $34. This price, however, does not allow for the cost of harvesting and storing as compared with the ease of selling directly from the field. And since we do not know your specifi conditions we cannot advise in this re gard.

According to the Pennsylvania Ex periment Station, stored timothy ha showed a shrinkage ranging from 18. to 25.7 per cent depending largely upo the stage of cutting. It would, ther fore, be safe to assume that timoth hay cured under ideal conditions lose about 20 per cent when stored. Henc if timothy hay is worth $20 a ton i March or April it should sell for abou $16 a ton from the field, not considerin harvesting and storage problems.

It is a well known fact that new made hay, especially clover and alfalf has a laxative effect upon horses an may even cause colic. It can not be fe with entire safety until complete sweated and cooled off. If it must b used before this time it should be fe sparingly. It would be much safer mix it with oat straw. Then the hors will not get so much at one time an will not eat it as greedily. Keeping in the cock and under cover woul probably be better as the fermentati and heating will not be as great when packed in the mow. It might safer for you to secure some old hay possible to tide you over this period. *George B. Mortimer, Wisconsin Colle of Agriculture, in Hoard's Dairyman.*

Big Demand for Feeds.

GRAND RAPIDS, MICH.—We simply ca not fulfill the demand for mill fee and owing to the dry weather it i doubtedly will continue. In the histo of our milling, the demand, for this se son of the year, is unequaled.—*Voi Milling Co., F. A. Voigt, Pres. and Mg Grand Rapids, Mich.*

It is expected that cattle feeding wi be heavy this coming winter in the be district of Nebraska. The beet acrea as well as that of alfalfa is consid ably larger than last year. In th neighborhood of Bridgeport there a now three sugar factories in operati Many cattle are expected to be mov from Wyoming to this district.

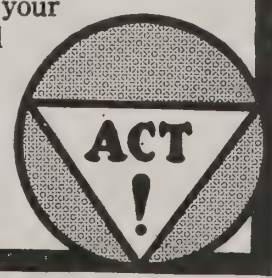
—Good, fair or quiet? If you cannot say "good" who is to blame? You? Now don't hedge on the answer. Business volume is largely what you make it. Did you ever hear one of the winners deny this? No, and we never did either.

A good line of feeds—feeds that satisfy your customers, plus persistent energy on your part, and the terms "fair" and "quiet" would disappear. But you must be sure that you are offering your trade the best in feeds—

INTERNATIONAL FEEDS

All over these United States an ever growing army of live feed dealers are coming to know—profitably know—the International line of feeds for all kinds of live stock.



Headed by the famous International Special Dairy Feed straight through the list, including such well known feeds as International Ready Ration Dairy Feed, International Calf Meal, International Hog Feed, International Pig Meal, International Poultry Feed, etc., the full International line represents the one line you ought to look into.

Let us send you all the facts, samples, etc. Then you will know that this famous line of strongly advertised feeds ought to be part of your business. It's the greatest antidote for "fair" and "quiet" feed business you ever hooked up with. Ask us to "show" you.

INTERNATIONAL SUGAR FEED COMPANY
MINNEAPOLIS, MINN.

Mills at Minneapolis and Memphis

Live Salesmen Wanted

Alfalfa Department

The second cutting of alfalfa is in progress in Potawatamie Co., Ia.

Grayson Co., Tex., has already harvested three crops of alfalfa. The hay crop is also heavy.

Seattle reports a $3 advance in alfalfa during the past week with similar tendencies in the Yakima Valley.

Lewiston, Ida., reports plenty of local alfalfa for the demand and it is not expected that much will be shipped in.

Pastures in the neighborhood of Las Vegas, N. M., are reported good and likely to supply grass through the coming winter.

In spite of the drought, a stockman from Detrick, Ida., says all irrigated alfalfa in that section will yield about the usual amount of feed this year.

Centralia, Wash., reports the demand for alfalfa good. At Kennewick new alfalfa is reported moving at $20@22. Ellensburg reports No. 1 alfalfa quoted at $21@22.

In the irrigated district of Salina, Utah, two crops of alfalfa have already been harvested and another crop will be made this year. Grain crops are reported heavy.

Baker, Ore., reports new alfalfa held by farmers at $20 per ton in the stack. Jerome, Ida., reports second cutting of alfalfa averaging good, price about $18 in the stack.

THE ALFALFA SITUATION.

ALFALFA BAD AND GOOD.

WICHITA, KANS.—We have had most of the first crop damaged by rain, but have had practically no rain for six weeks and the second crop has been put up in extra fine condition.

All crops, including alfalfa hay, have been suffering for rain, but a shower came last night, July 31. Prices of hay are steadily advancing and every one looks for higher prices.—*L. A. Ottaway, Wichita.*

FINE CROP OF ALFALFA.

MCKINNEY, TEX.—This section of our state has made a fine crop of alfalfa, and most of it has been saved in good condition and sold to the consuming trade. There is very little stored in this section for winter supply, only by those who raise it. Last year these people had to buy their supply of alfalfa, while this year they have what is needed, and perhaps some to supply their neighbors.

Then the grass crops of hay are very large, especially Johnson and prairie grass, while millet and sorghum are also fine. We do not expect to see the high prices that obtained last year. Our part of the state, and in fact most all parts, has the finest corn crop made in years, and it made, and gathering will begin to some extent in about thirty days.—*Plummer-Harris Grain Co., McKinney, Tex.*

St. Louis Alfalfa Market.

ST. LOUIS, MO., Aug. 2.—The alfalfa feed market is strong, in sympathy with the strength in other kinds of feed, and prices are advancing. Offerings are scarce, and there is an unsupplied demand. Quotations are as follows: Choice, $65; No. 1, $56; No. 2, $50; molasses alfalfa, choice, $45; No. 1, $42; No. 2, $39; alfalfa meal, choice, $41; No. 1, $40; No. 2, $36 per ton, on track.

Alfalfa hay is scarce, firm and wanted, but there is little demand for the low grades. Quotations are: Choice, $35@36; No. 1, $33@34; standard, $31@32; No. 2, $27@28 per ton, on track.

Western Alfalfa Market.

The alfalfa market is hit pretty hard right now, for it is being called upon for the largest supply of hay in the history of the trade. This, together with the fact that the production of alfalfa is bound to be considerably below normal, makes for bullishness in the trade in this variety of hay. We are already hearing of contracts at $30 with the threat that the price is likely to go to $70 the ton. The yields from the second cutting in Colorado are light and only moderate supplies are available elsewhere. As to the outcome of the succeeding crops, all depends upon the weather and the irrigating water which gives no promise for the late crops. We are surely up a stump this year and a lot of farmers are baling common hay out of the windrow to supply the market demand.—*Denver Field and Farm.*

Good Demand for Alfalfa Meal.

KANSAS CITY, Aug. 2.—A good demand prevailed for alfalfa meal on the Kansas City market this week. The volume of business, however, was light, owing to scant offerings by Western mills, and reluctance of buyers to pay prices quoted. In sympathy with the higher alfalfa hay market, an advance of $1 to $2 was recorded in the meal trade. Mills in Colorado and other Western states are not operating actively, attributed to scarcity of labor and heavy demand for hay from other sources. Small sales of meal were made to the East, South and Southeast. California mills are reported working meal through New Orleans.

Choice alfalfa meal closed at $39@40; No. 1, $37@38; No. 2, $33@34; brown, $29@30.

A continued broad demand for alfalfa mixed feed was reported by manufacturers in Kansas City. Supplies are moving almost exclusively to hog feeders. Drouthy conditions in surrounding territory has stimulated demand from graziers, but sales so far have been light. Prices were unchanged, as follows: No. 1 alfalfa molasses feed $41@42; No. 2, $38@39; brown, $35.50@37; alfalfa grain molasses feed, $48@60.

The live stock census of the Netherlands taken March last gives the number of milch cows at 1,232,264, compared with 1,068,361 in June 1910. In addition there were on March 1, 1919, 471,724 heifers. The total of all cattle was given at 1,968,609, compared with 2,026,943 June 1910. All sheep 437,075 in March; 889,036 in June 1910. All pigs 450,000, compared with 1,260,000 in June, 1910.

A NEW PLANT IN KANSAS CITY.

Kansas City's importance as a feed manufacturing and distributing center was considerably strengthened with the completion August 1 of the plant of the L. C. Worth Commission Co., shown in the accompanying picture. For a number of years the company has been engaged in the handling of hay on a large scale in Kansas City, in addition to its extensive trade in corn, oats, other grains, millfeed and mixed feed products. Its trade extends into the South, the Southeast, Southwest, the East, and in practically every other section of the United States where Kansas City is looked upon as a source of supplies. The company also has a large local trade, now considered one of the largest distributors to retail feed handlers in Kansas City.

Having developed a broad demand for its products, the company some months ago discovered the need for a manufacturing plant of its own, in order that it can readily meet the demand of customers and in preparing products that will strengthen trade relations. The result is the accompanying plant.

Corn chop, rolled oats, ground oats, ground barley, rolled barley and chicken feed include the list of products manufactured in the plant of the L. C. Worth Commission Co. The machinery includes a Gibson Oat Crusher and Great Western Manufacturing Co., equipment. The company has a capacity of 10,000 bushels of grain daily, and more than 200 cars of hay. The chicken feed, to be marketed under the Buckeye Brand, includes corn, oats, barley, cane seed, milo, wheat screenings and sunflower seed.

L. C. Worth, who is at the head of the organization, is a member of the Kansas City Hay Dealers' Association. E. R. Cash is head of the shipping department.

Molasses Improves Stock Feed

Better stock feed can be made at less cost from the cheaper, unpalatable parts of grain by mixing with molasses.

Besides making the feed palatable, molasses provides the necessary amount of fattening carbohydrates. The result is a highly nutritious concentrate which cattle eat readily.

Our line includes, from Blackstrap up, all grades of

Cane Molasses
Domestic and Imported

Our great stocks, storage equipment and transportation facilities combine to provide an unequaled service for feed manufacturers.

We are prepared to handle carload orders for immediate or deferred shipment. Contract orders solicited.

American Sugar Refining Company

Molasses Department

Chicago New Orleans

Hay Department

Scarcity of hay and beet pulp is reported from McCall, Ida.

Pastures in the neighborhood of Ramona, Okla., reported good with cattle doing well.

Baling of new hay at Ellensburg, Wash., has begun; new timothy is offered at $27@28.

Lewiston, Ida., reports baled hay being received there in quantities larger than needed for immediate demand.

Reports from Muskogee County, Okla., are to the effect that there is a big crop of prairie hay with excellent pastures.

Walla Walla, Wash., reports little new hay being offered and the crop is expected to be shorter than last year.

Baker, Ore., reports timothy hay stacked and wild hay in course of harvest. Farmers are holding timothy at $30.

At Carey, Idaho, hay is reported very scarce. The present quotations on alfalfa are about $18@20 per ton in the stack.

The timothy market is reported steady in Spokane with poor demand, however. Seattle reports the timothy market steady.

A stock shipper from Gillette, Wyo., says no hay was put up in that section this year and feeders are now using up the remains of last year's surplus.

Reports from Cherry County, Nebr., are to the effect that there has been a heavy hay crop with abundant grass pasture assuring plenty of winter feed.

A hay grower at Simms, Mont., reports the sale of 200 tons of alfalfa at $30 per ton f. o. b., of 100 tons at $28. Still another holds his crop at $25 in the stack.

Bozeman, Mont., reports new timothy still scarce and high. Great Falls, Mont., reports very little movement until after the 50 per cent reduction in freight goes into effect.

The Assistant State Immigration Inspector of Minnesota ventures the prediction that the hay crop of Minnesota will be the largest ever produced in that state and thinks the price of milk will come down.

The Agricultural Department of Minnesota has begun to list all hay acreage in that state and to compile the available tonnage with a view to meeting the demand for grazing and fodder from the cattle companies westward.

A stock shipper from Paola, Kans., says the hay crop in that section is the heaviest and best in many years. This is true of the prairie hay crop. The second crop of alfalfa is also being harvested and there will be plenty of feed. The hay crop all through is good as to quality and was put up without rain damage.

It is reported from Bismarck that several thousand acres of land in Kidder and Stutsman Counties, N. D., have been leased for haying purposes at $50 @75 per section. This hay will have to be shipped from 100 to 200 miles for consumption, but as the freight rates by arrangement have been split in two, the movement of the hay is said to be profitable.

Chas. D. Carlisle of Kansas City, Mo., called on us last week, reporting activities in hay and alfalfa meal, indicating this would be another big year. Prices are continuing high, emphasizing the responsibilities of those covering broad territory as does the Carlisle Commission Co. They anticipate, however, taking care of their old trade in good shape and developing new business from those fast realizing the importance of suitable feeding grades and the manufacturing advantages of alfalfa meal.

Special telegraphic summaries to the *National Weather and Crop Bulletin* for the week ending July 29 says that haying and harvesting in New York is about completed. In Pennsylvania pastures and meadows have revived and prospects for a second crop of hay are excellent. In the Carolinas, Georgia and Florida the hay crop has been materially damaged by excessive rains. The same is true for Alabama. In Louisiana some hay has been cut in the northeastern section. In Oklahoma the third cutting of alfalfa is reported light. In Tennessee hay has done fairly well. In West Virginia the hay crop is good and harvest well advanced. In Minnesota hay yields continue very good. In Missouri the dry weather has favored hay cutting and stacking, but has affected all other growing crops. In Montana the first crop of alfalfa is nearly all stacked; second crop maturing rapidly where irrigated. In Wyoming the weather is favorable for haying, but the crop is light. In Utah the second crop of alfalfa is good. In Washington an excellent crop of hay was secured in the western counties. In Oregon haying generally is completed except late cutting of alfalfa and clover.

HAY SITUATION.

HAY CROP FINE.

WISCONSIN (2)—The hay crop in this territory is the best in year. Small grain is just being harvested and reports are that the crop is on the average.—*Boyd Produce Co., Boyd, Wis.*

EASTERN NEW YORK HAY.

NEW YORK (9).—Farmers in our section have been delayed in harvesting their crop of hay on account of rainy weather, but we believe the crop will be a little over an average yield. The quality we think will be largest per cent of No. 2 and No. 3 hay. The high price of labor we think will make the price of hay high this year.—*Bristol Brothers, Claverack, N. Y.*

GOOD CROP OF HAY.

MOIRA (7), N. Y.—The hay in this locality is about all cut by this time and is a very good crop, although some of the farmers complain of its being light.

The corn is drying up considerably in the last two weeks on account of very little rain, but all other grain crops are coming fine.—*C. E. Brush & Son, Moira, N. Y.*

HAY AND LABOR DEMAND.

KANSAS CITY.—Because of shortage of help and the country being overcrowded with work, it is hard to get people to stop to make hay, and load it for market.

Meantime, there is some demand in the Northwest. The markets are creeping up a little. Prices advanced $2.00 per ton last week on prairie and alfalfa is about $1.00 to $1.50 higher. Timothy showing strength also. Begins to look like high prices again this year, not because of lack of tonnage, but lack of facilities to get it to market.

Then, too, cars are beginning to scarce. Begins to look like hay wheels is going to bring some prem shortly.—*J. A. Brubaker & Co., sas City, Mo., by J. W. B.*

HAY MOVING SLOWLY.

OHIO (4).—Hay is moving very s ly. Very little is fit to bale and f ers are very busy with their thres and are not inclined to accept p which dealers are offering. Practi all of the hay has not been cut either baled out of the field or m away. Baling out of the field, ever, has now ceased. The crop little below an average in quantity was harvested in excellent conditi *Dellinger & Sons, Bloomville, Ohio*

HAY CROP SHORT.

LAS CRUCES, N. M.—There is not doing in the hay business here year, as there is not 25 per cent o hay here that we had a few years Prices are well sustained and the lively bidding for the desirable Very little is being shipped, as prices the hay is bringing put it above what other sections are se for, and consequently almost all of going into storage for the winter t

The Pecos Valley in New Mexico Texas as well as Arizona have underselling us continually since first cutting was finished, and prices have been from two to four lars below us all this time.

A good many farmers are planni replant to alfalfa this fall, and w pect to see the acreage considerab creased another year.—*Mesilla V Produce Exchange.*

New England Hay.

The American Steel & Wire Co. port on New England hay for the ending Aug. 2 may be summariz follows:

Northern Maine. — Grass lands clover very good; western part, old lands are short but the new la good; southwestern, grass lands and clover fair. New Hampsh Eastern grass lands good; sout fair to extra good; southwestern, o good; western, need moisture. Ver —In the northern section hay abo average, pasture and clover good; eastern, pasture poor but clover hay good; eastern section hay haled, grass lands and clover exce southeastern, grass lands and

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

he death of Mathew W. Ransom, er of F. E. Ransom and A. M. Ran- of the Ransom Coal & Grain Co., sas City, occurred Friday night, ust 1. Mr. Ransom was 74 years of Besides the two sons, the widow, Sarah Ransom, and two daughters, Bessie Knapp and Mrs. Lizzie pp, survive. The funeral was held the family home in Kansas City lay, under Masonic direction.

new record for a single day's ar- ls of timothy was established on day, July 28, when a total of 135 of the hay were received in Kan- City. The previous daily record for thy hay receipts is 81 cars, this nt having been received in the pre- ng week. For the week, the ar- s of timothy amounted to 384 cars, argest total in many months. The of the timothy is coming from ouri, though some of the hay is g shipped from Iowa to the Kansas market.

idence of serious drouth conditions e Northwest is contained in the an- cement that the C. B. & Q. R. R. granted a reduced rate on hay ship- s into the drouth striken region. emergency rates, equal to one-half ariff rate, with a minimum of 20 per hundredweight, will be al- l from all points on this railroad on or west of the Missouri River l points in Montana and Wyoming and including the C. R. N. Junc- Wyoming, and New Castle, Wyo- . Transit will not be allowed on the ed rates. Reduced rates on other entering the Northwest are being at by R. D. Sangster, transporta- commissioner of the Kansas City ber of Commerce, who is working C. D. Carlisle, chairman of the sportation Committee of the Kan- ity Hay Dealers' Association, and ls of the grain exchange and live exchange. Kansas City hay deal- already are shipping considerable e into the drouthy areas, and rous inquiries regarding later ship- s are being received. A heavy ment is predicted with the inaug- on of the one-half emergency rate l lines.

nsiderable timothy from Missouri find its way into the drouth en territory of the Northwest," ed J. C. Kerr of the J. C. Kerr Company. "Cattlemen of Mon- Wyoming and other surrounding already are inquiring for prices ther details regarding the mar- or timothy hay, and small ship- now are being made in various ies. It is unusual, of course, for orthwest to draw upon Missouri mothy. During the severe winter o years ago a small amount of y was sold to the Northwestern rs, but the amount will be much during the present acute period. is a large amount of tame hay ble in Missouri, despite the recent tions that the acreage was sharply d to permit a larger area for production. Large quantities of y are available in Iowa, some of is being worked into Kansas Quality of the hay this year is below normal, which producers attribute to the heavy early rains. Difficulty has been encountered by growers in properly curing the hay. Large quantities will yet move to market. In addition to purchases by the Northwest, the South and Southeast is providing an important outlet for the tame hay."

Timely rains fell over the important hay producing territory of the Southwest the past week, though the soil still is in need of moisture. The weekly state reports, issued before the rains fell, indicate some damage by dry and hot weather, with hay production somewhat stunted. "The week was one of uninterrupted sunshine and good wind movement, which has rapidly continued the drying out process," says the Kansas bulletin. "Pastures need rain generally over the Eastern two-thirds of the state. The second cutting of alfalfa has been secured in good condition and the third cutting, which is making slow growth has begun in the Southeastern portion." Missouri—"Upland pastures are failing fast, and water is becoming scarce in some localities. All grass needs rain badly." Nebraska—"With hot, dry weather and excessive sunshine, the week was favorable for haying. A good crop of hay is being secured." Oklahoma—"Except a few light and widely scattered showers in the northeast portion, no rain fell. Soil moisture continues good in the Southern and Western portions, but drouth is becoming serious in the Northern and Northeastern districts. Pastures are still fair to good but are drying fast. The third cutting of alfalfa has been harvested with the yield light. An abundant crop of prairie hay has been saved."

"My advices from the country show there are plenty of cars in the interior, but that a serious lack of motive power and terminal facilities prevails, which necessarily causes difficulty and restricts the movement of hay," commented J. C. Glover of J. C. Glover & Co. "Already the country is complaining of inability of railroads to have cars on hand for the movement of hay to market, and with the present enormous movement of wheat and prospects for continued heavy shipments, it would not be surprising to witness a serious car situation in August, September, October and even in November."

Hay Markets

KANSAS CITY.

Aug. 2.—Higher prices for prairie and alfalfa and further recessions in timothy and clover mixed were recorded in the hay trade in Kansas City this week. Choice prairie was unchanged, No. 1 closed unchanged to 50c higher, No. 2 grade is up 50c to $1.50 and No. 3 is up $1.50 to $2.50 a ton. Midland prairie also advanced, closing $1.50 to $2 a ton higher. The sharpest advance occurred on alfalfa, which shows a gain of $2 to $3 compared with a week ago. The advancing prices were recorded in the face of a liberal movement to market. The receipts aggregated 1,239 cars, compared with 1,044 cars last week and 617 a year ago. Timothy arrivals were comparatively heavy, and while demand was broad, orders were not sufficient to clear the entire offerings. Declines amounted to only 50c. Straw closed 50c to $1 a ton lower.

Prairie—Choice, $20; No. 1, $19@19.50; No. 2, $17.50@18.50; No. 3, $10.50@17; packing hay, $6.50@9.

Midland prairie—No. 1, $15.50@17; No. 2, $10@15.

Alfalfa—Choice, $29@30; No. 1, $27@28.50; standard, $23.50@26.50; No. 2, $19@23; No. 3, $16@18.50.

Timothy—No. 1, $24.50@25; standard, $23@24; No. 2, $21@22.50; No. 3, $15@20.50.

Clover mixed—Light, $24.50@25; No. 1, $23@24; No. 2, $17@22.50.

Clover—No. 1, $21@23; No. 2, $13@20.50.

Straw, $9.50@10.

BOSTON.

Aug. 2.—Receipts of hay during the past week were light and considerably less than the previous week. The demand showed a slight improvement, although not active. Buyers, however, are slow to pay the advanced prices, but with all outside markets quoted higher, local receivers are firm in their views and holding at

higher prices. A little new hay has been offered on the market this week and a few cars were sold, but offerings were not general. Sales were noted this week of new No. 2 hay in small bales at $30 per ton, with new No. 1 timothy in small bales quoted at $35. Some new is reported in transit to this market, but shipments have been so long delayed that the trade is slow about taking hold, expecting that the quality of the offerings will not be satisfactory on arrival. Old No. 1 timothy hay is quoted at $39@40 per ton for the small amount offering, with some receivers claiming that fancy cars will bring still higher prices. No. 2 timothy ranges at $34@36. No. 1 Eastern takes a range of $32@35, with No. 2 Eastern unchanged at $28@30. No. 3 hay is held steady at $26@28. The range of clover mixed, all grades, is unchanged from last week, at $26@30. Fine hay takes a wider range at $23@26. Packing hay is quoted $17@19 per ton. Receipts for the week ending Aug. 2 were: Local, 48 cars; for the month of July, 1919, were: Local, 485 cars.

The straw market is dull with offerings fully equal to the demand. Choice rye straw is quoted at $16 per ton as extreme, with oat straw a shade firmer at $12@13. Receipts for the week ending Aug. 2 were: Local, 3 cars; for the month of July, 1919, were: Local, 16 cars.

CINCINNATI.

Aug. 5.—The almost entire absence of shipping orders was directly responsible for one of the dullest markets experienced by the hay trade for a long time, and sharp reductions in price of all kinds made in an endeavor to increase orders failed to stimulate the trade. The declines reported in other markets only increased the depression, and but for fair local buying, losses in values would undoubtedly have been greater. Receipts fortunately were small. The quality of new hay was mostly good with less in heating condition and nearly all of No. 2 character, though mainly of timothy. Mixed was rather scarce, and fairly steady in tone, but clover was firm and in urgent demand with practically no arrivals since the movement of new began. First offerings of new clover will command very high values as the trade is urgently inquiring for supplies. Rye straw is also wanted. Quote as follows:

Timothy—No. 1, $30.50@31.50; standard, $29.50@30.50; No. 2, $28.50@29.50; No. 3, $25@28; threshed, $18@21.

Light clover mixed, $29@30.

Clover mixed—No. 1, $28@29; No. 2, $24@27.

Clover—No. 1, $6@28; No. 2, $22@24.

Local alfalfa—No. 1, $26@28; standard, $25@26; No. 2, $23@25.

Straw—Wheat, $6@7; rye, $12@13; oats, $6@7.

LOUISVILLE, KY.

Aug. 2.—The demand for hay continues fair with new hay filling the demand, old hay being almost entirely cleaned up. Prices are fair but not as strong as they were, due to heavier offerings. Quotations are: No. 1 baled timothy, $28; No. 2, $26; No. 1 mixed, $25.50; No. 2, $23.50; No. 1 alfalfa, $30; clover, No. 1, $23; No. 2, $22; wheat and oat straw, $8.50; rye straw, $10.

NEW ORLEANS, LA.

Aug. 2.—No. 1 timothy hay offered at from $34@35.50, No. 2 from $33@34.50, and No. 3 from $32@33. Prairie hay quoted from $20@21. Alfalfa hay offered from $32@33.

NASHVILLE.

Aug. 4.—Dealers report only fair demand for hay. Prices in carlots and more, delivered at Nashville, are: No. 1 timothy, $34@35; No. 2 timothy, $32@33; No. 1 clover, $30@31; No. 2 clover, $28@29; choice alfalfa, $33; No. 1 alfalfa, $31.

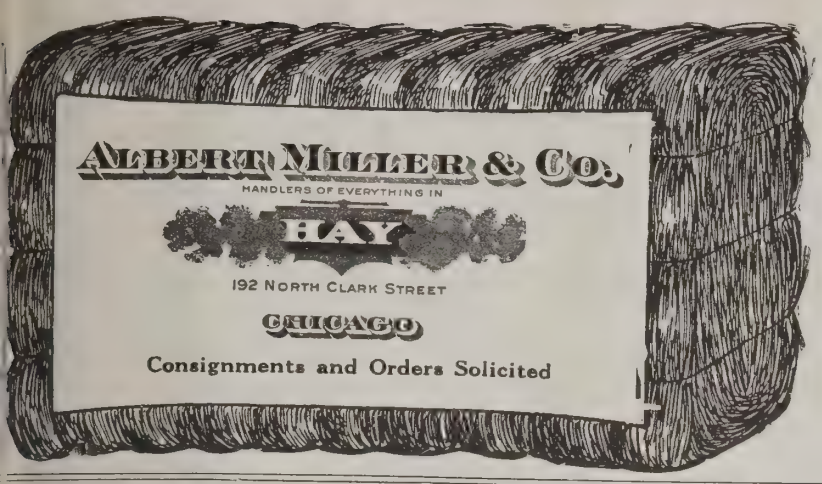
MILWAUKEE.

Aug. 2.—The Milwaukee hay market ruled higher during the past week. The new hay crop promises to be exceptionally large and of fine quality. The first new timothy has appeared on the market and is quoted at $26@29. The old crop is practically exhausted. The higher prices are probably in sympathy with the strong mill feed markets. Current quotations are: Choice timothy, $29@30; No. 1, $28@28.50; No. 22, $25@26; new timothy, $26@29; No. 1 clover, $20@21; light clover mixed, $22@25; red top and timothy mixed, $24@25; stained timothy, $12@15; marsh feeding, $11@12; packing, $9@10; rye straw, $9.50@10; oat straw, $9@9.50.

TAMPA.

Aug. 2.—Strictly No. 1 timothy is offered this market as low as $37.50, prices ranging from $37.50 to $38.75. There has not been a great deal of new hay bought as yet, the trade fearing arrivals of heating hay. Stocks of old hay in warehouses are being well cleaned up. There is scarcely any demand in this market for other than No. 1 and choice timothy; straight clovers and clover mixed being unpopular in this section.

SAN FRANCISCO.



Aug. 1.—Receipts are increasing and probably will continue to do so from now on for several weeks unless the shortage of cars should prevent the natural movement of hay at this time of the year. A large portion of the hay received has been by boat from bay and river districts, and has been of all grades and kinds. Receipts by rail have been quite small for this period of the season.

Demand has been fairly active and prices have been maintained without difficulty. Several sales of round lots of hay have been reported from country districts where trade has been better than for some time and considerable hay has moved in this direction.

This is especially the case with alfalfa, but owing to reported shortage of water in some of the irrigation districts and of the grasshopper pest in others, alfalfa has been held firm on a higher range of prices than heretofore.

ST. LOUIS.

Aug. 2.—Offerings of timothy hay are liberal and are increasing. The market is declining as the demand is confined best grades, and some of the receip more or less heated. The best gra clover are scarce and in deman alfalfa hay also is scarce and fir prairie hay is dull and easier. Quot are as follows: Timothy—No. 1, $ standard, $29@30; No. 2, $26@28; $23@24. Light clover mixed—No. 1 30; No. 2, $26@27. Heavy clover n No. 1, $27@28; No. 2, $26@27. Clov —No. 1, $28@29; No. 22, $26@27. hay—Choice, $35@36; No. 1, standard, $31@32; No. 2, $27@28. hay—Choice, $26@27; No. 1, standard, $23@24; No. 2, $21@22. $9.50.

MINNEAPOLIS-ST. PAUL.

ug. 2.—Quote hay prices for the Twin es as follows:

	Minneapolis.	St. Paul.
1 timothy	$27.00@28.00	$27.50
2	25.00@26.00	26.50
3	20.00@22.00	23.00
1 mixed, timothy and wild	23.00@24.00	25.00
2	21.50@22.50	22.00
3	17.00@19.00	16.00
1 mixed, different grasses	22.00@23.00	22.50
2	20.00@23.00	21.00
3	16.00@19.00	16.00
1 clover mixed	19.00@21.00	25.00
2	15.00@18.00	23.00

1 wheat straw	8.50@ 9.00	9.00

NEW YORK.

ıg. 1.—The New York Hay Exchange rts the hay situation as follows:

	Hay tons	Straw tons
ipts for week	5,154	360
ipts last week	3,918	240
ipts Sept. 1 to date	208,564	13,268

e firm feeling noted at the time of last report resulted in a very strong tion and a marked recovery in prices. ipts have run much lighter at all or points and the amount of hay roll- ls less than half the amount at this last week. The shortage is very ted at 33d St., due to the embargo, there has been scarcely anything able at Brooklyn Eastern District inal and very short supplies at Bush- station. New invoices are running otionally light but more or less hay is ing by boat. The situation at this ng is firm but irregular with values well defined, all sorts of prices being ed and the same grade of hay has at 33d St. at widely varying prices. till Line boats are bringing forward or less new hay; buyers as a general prefer old hay and the new sells at a unt of close to $4 a ton from the prices d, No. 2 new hay reaching $37 with ulty. It should be understood that ations as given below are meant to only old hay.

ere is the usual scarcity of top qual- mothy hay. No. 1 in large bales has up to $43 and we understand that one worked out up to $44. No. 2 in big sells largely in range of $40@41, a sales being reported down to $39 at some of the harbor points, and one or two cars have worked out at 33rd St. shed at extreme figures. Leaving these high grades the demand is not so keen though values have advanced in sympathy with the general market, this being especially true of small bales which are gradually working closer to large bales than formerly. A good deal of no grade, coarse or damaged hay is knocking about which is offered at all sorts of prices according to the quality. Clover and heavy mixed is not wanted and selling values are uncertain, though a few cars of light mixed could be worked out in about the ranges given.

Rye straw has had sale up to $15 and some No. 2 is offering at $13. Oat straw selling in range of $10@12. Quotations, old hay:

	Large bales per ton	Small bales per ton
No. 1 hay	$42.00@43.00	$41.00@ 42.00
No. 2 hay	39.00@41.00	37.00@39.00
No. 3 hay	35.00@37.00	31.00@33.00
Shipping hay	27.00@30.00	25.00@27.00
No grade	20.00@26.00	19.00@24.00
Fancy light clover mixed hay	38.00@40.00	36.00@38.00
No. 1 clover mixed	34.00@35.00	30.00@32.00
No. 2 clover mixed	28.00@30.00	25.00@28.00
No. 1 rye straw	14.00@15.00	
No. 2 rye straw	@13.00	
No. 1 oat straw	11.00@12.00	

Effective July 31st, the N. Y. C. removed embargo from 130th St., Melrose Junction, Clarmont Park and Port Morris stations.

DULUTH.

Aug. 2.—The trade simply marked time in the hay market during the last week. Demand was purely local and it was of a straggling nature. Receipts of baled hay amounted to only three cars but loose hay from the country was offered liberally. An enormous crop of hay was cut in this territory and considerable shipments of it are expected to be made to the drought districts of Montana and western North Dakota under the special reduced rates offered by the Railroad Administration. Prices are unchanged, as follows: No. 1 timothy, per ton, $26@28; No. 2, $24@25; No. 1 mixed timothy, $23@24; No. 2, $20@23; No. 1 prairie, $25@226; No. 2, $22@24; No. 3, $18@20; No. 1 midland, $20@21; No. 2, $10@12; rye straw, $9@10; oat straw, $9@10.

PHILADELPHIA.

Aug. 3.—There is a good inquiry for desirable qualities of hay which is in small supply and firm, but the bulk of the offerings consists of low grades which are slow of sale. Straw is quiet but steady with small stocks. Quote:

Timothy (according to location)—No. 1, nominal; No. 2, $36@37; No. 3, $32@33.

Clover mixed—Light mixed, $36@37; lower grades, $31@35.

Straw—No. 1 straight rye, $13.50@14; No. 2, $12.50@13; No. 1 tangled rye, $13@13.50; No. 2, $12@12.50; No. 1 wheat straw, $12@12.50; No. 2, $11@11.50; No. 1 oat straw, $12@12.50; No. 2, $11@11.50.

BUFFALO.

Aug. 2.—Just where prices on old hay will close nobody knows. There is a wide range. Somewhere between $28 and $33 for fair to choice seems to be the prevailing market, but the demand is limited. New hay, which this year is of fine quality, is interesting hay buyers but there is no fixed price as yet. There will be no oat straw in this state but plenty of fancy wheat and rye.

DETROIT.

Aug. 2.—Old hay is out of market and present quotations are for new. The market is not well supplied and dealers have trouble meeting the needs of consumers. A firm market is quoted. No. 1 timothy, $31@32; light mixed, $30@31; No. 2 timothy, $29@30; No. 3 timothy, $25@26; No. 1 mixed, $27@28; No. 1 clover, $25@26.

MEMPHIS.

Aug. 2.—Demand for hay is slightly better and undertone is steadier for alfalfa, but timothy is not cheap enough yet to meet the competition and the result has been small receipts of the latter. Considerable timothy was started this way, or would soon have been, but prices offered were too cheap and most of it diverted to other directions. Receipts of alfalfa for the past few days have been moderate, which helps account for the better tone. On call today $30 was bid for cash No. 1 timothy and $28.50 for No. 2, but little was offering. For choice alfalfa $30 was bid, but holders wanted about $2 more. For No. 1 grade $29 was bid, for standard, $26, and for No. 3, $23, but some of the latter sold yesterday at $24. Very little of other kinds is being received.

OMAHA.

Aug. 2.—Receipts light on prairie hay, while the demand has improved, causing prices to go some higher. Alfalfa continues steady.

Upland Prairie—No. 1, $22@24; No. 2, $18@20; No. 3, $10@15.

Midland prairie—No. 1, $21@23; No. 2, $17@20.

Lowland prairie—No. 1, $15@18; No. 2, $12@14; No. 3, $8@10.

Alfalfa—Choice, $26.50@27; No. 1, $25.50@26; standard, $21.50@25; No. 2, 17.50@21; No. 3, $14@17.

Straw—Oat, $8@9; wheat, $7@8.

BALTIMORE.

Aug. 2.—As a result of a cleaning up of previous supplies of old hay, lighter receipts, and only a limited movement thus far of new hay, the local market has recorded a considerable advance in the past week or ten days, and the general hay situation is firm as quoted. For the better qualities of timothy and mixed hay there is a fair demand, and new hay, where it arrives in good order, is selling well up to corresponding grades of old. All damaged and bad order stock, however, has to go for whatever it will bring.

Straw of all descriptions is selling sparingly in consequence of which current supplies are ample for trade wants. Quotations follow for old hay: No. 1 timothy, nominal, $42; standard, $41.50; No. 2, $41; No. 3, $37@39; No. 1 light clover mixed, $39@40; No. 2, $38@39; No. 1 clover mixed, $38@39; No. 2, $36@37; No. 1 clover, nominal, $34; No. 2, $32.

Straw—No. 1 straight rye, $15@15.50; No. 1 tangled rye, $13@13.50; No. 1 wheat, $10@10.50; No. 1 oat, $12.50@13.

MONTREAL.

Aug. 2.—Shipments of old Canadian hay have been made from country points to New York, and have done well, much better than by sending them to this market. In fact, they are not wanted here, as stocks in store are sufficient to supply the trade at present. On the whole the past week has been propitious for the ingathering of hay, and a considerable portion of the crop has been harvested, notwithstanding scattered showers. Owing to the high price of labor dealers are of opinion that it will be some time before the price of hay will get down to pre-war times. There has been no change of any importance in the local trade for baled hay, sales being reported at from $20@25 and $27 per ton, as to quality. Quite a lot of new hay has been brought into the city from nearby points in a loose condition, which of course fills a place. The market, however, for old baled hay is steady as above quoted.

Advices from the North Shore at the beginning of the week stated there were quite a few fields of prime timothy ripe for the reaper still standing. It was about time they were cut, as too ripe hay deteriorates.

The receipts of hay during the last week at Montreal were 1,237 bales, against 6,638 bales for the same week last year.

The market is quiet with sales at from $26@28 per ton, as to quality.—Trade Bulletin.

PITTSBURGH.

Aug. 2.—Receipts of hay during the last few days have been very light. For the last period only 213 tons of all grades were bulletined at the Pittsburgh exchange, as against 563 tons for the corresponding period in 1918. Shipments were 120 tons. The better grades of timothy are moving easily at $35@36 a ton. None of the No. 1 timothy came into the market for several days last week, but invoices are increasing, according to Supt. Alexander, and lower prices are predicted for the near future. Quotations are as follows: No. 1 timothy, $36@37; No. 2 timothy, $35@36; No. 3 timothy, $30@32; No. 1 light mixed, $35@36; No. 1 clover mixed, $28@29; No. 1 clover, $25@26.

CHICAGO.

Aug. 5.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Aug. 2, also the total receipts and shipments of hay from Jan. 1, 1919:

	Aug. 2, 1919.	July 26, 1919.	Aug. 3, 1918.
Total receipts	1,935	2,089	5,373
Total shipments	202	293	450
Recpts. since Jan. 1	146,595	144,660	208,068
Shpts. since Jan. 1	34,500	34,298	64,814

The demand for hay has been active enough to absorb everything offered and at somewhat higher prices. New timothy is coming in now in quantity and freely taken at top prices, the old commanding $2@3 above the new, however. Monday's receipts (26 cars new timothy, 19 of new prairie, 27 alfalfa and 1 of threshed timothy) were light for two days and everything was sold at prices and with such ease as to indicate that prices are seeking still higher levels. At any rate, the market will in probability continue strong for some time. Quote as follows for Monday, Aug. 4:

Timothy—New, No. 1, $35@36; standard, $34@35; No. 2, $32@33; No. 3, $27@30; sample, $25@28; threshed, $15@20; old, $2@3 above new.

Light Clover—No. 1, $32@33; No. 1 clover mixed, $28@30; clover, $21@24.

Prairie—Kansas and Oklahoma, $25@30; Iowa, Minnesota, Dakota, $22@24.

Marsh Hay—Feeding, $18@20; packing, $13@14.

Straw—Rye and oat, $11@12; wheat, $9@10.

In reply to a special inquiry G. E. Hilliar, mgr., feed department of the Douglas Co., Cedar Rapids, Ia., says as to the rumors of rebuilding the plant of that company that "as yet there has been no decision as to rebuilding in Cedar Rapids or elsewhere."

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Aug. 4.—Action of provision prices last week was erratic. A sharp advance early on the light receipts of hogs was followed by a decline in sympathy with hogs and grain and on selling induced by race riots at the Stock Yards. The Negro workers at the Yards have been eliminated for the present. Receipts have been curtailed by fears of labor troubles and more are predicted by laborites.

The provision situation on the whole is a most interesting one. There is a general impression among the speculators, the public and part of the trade that the market has been controlled by the packers and that a lower level of values is due. The Government is to sell 195,000,000 lbs. of fresh cured and canned meats, of which there is 9,000,000 lbs. of bacon, all of which should have been disposed of months ago. It is to be sold through the post offices of the country, and the goods will be sent via parcel post. Prices to be lower than the present. This has had considerable to do with lowering values. In the early part of the week prices advanced with hogs, which were up to $23.60, a new high level. In the late trading liquidating sales carried pork off nearly $2.65 a barrel, the high point; lard $2.32½ for September and $2.15 for October, and short ribs lost $1.75. Fair rallies followed the break on Saturday when the lowest prices were made, due to covering by shorts and support from the packing interests. At the close pork was $1.55 lower, lard $1.60@1.65, and short ribs $1.35 lower for the week.

A good deal of selling toward the last was on the increase of 11,651,000 lbs. of lard in July, making the total here 45,779,665 lbs., compared with 38,148,697 lbs. last year, and were almost 12,000,000 lbs. short of two years ago. This heavy accumulation, the largest in July for recent years, indicated a liberal movement from country packers and an increased make by local packers. A specialist says lard is 6c a lb. over meats, so that it behooves packers to trim closely and secure all the fats available. Shipments of lard for the week were 22,508,000 lbs., the largest in months, and compared with 4,849,000 lbs. last year. This outward movement is said to represent sales made one to two months ago and is equal to almost 50 per cent of the stocks here. Leaf lard was $32.75 at the close and regular cash lard around $33.

Trading in meats was moderate, being affected by the same interests as lard. Supplies of dried salted meats here were 79,170,000 lbs., an increase of almost 3,000,000 lbs. for the month, and a decrease of 19,000,000 lbs. from last year. Short ribs increased 1,923,000 lbs., pickled meats aggregated 66,773,000 lbs., a decrease of almost 2,000,000 lbs. for the month, but supplies exceeded last year's by 6,032,000 lbs. Total stocks of meats aggregated 145,944,000 lbs., an increase of only 1,040,000 lbs. last month, compared with 6,793,000 lbs. last year, when they were 159,000,000 lbs.

*July 31.

Kansas City Provision Review.

KANSAS CITY, Aug. 2.—Provision interests in Kansas City report a much larger volume of business in fresh pork than is normal for this period of the year. A fair to good demand prevailed this week, with sales by Kansas City houses stimulated by labor difficulties in Chicago. Comparatively high prices for hogs in Kansas City compared with other river markets was a restricting influence. The East was a fair buyer of fresh meat, and local territory supplied a fairly liberal outlet. Prices show a rise of as much as ½c for the week, though generally unchanged to ¼c higher. Lard advanced ¼ to ½c, with a good demand prevailing. Dry salt and heavy smoked meats are moving to the South in larger supply. Prices were unchanged. For fancy hams and bacons, the market was ½c higher. Hot weather stimulated demand for these fancy meats.

Cash Meats.

On Monday there was considerable activity in the hog products market and the large offerings witnessed considerable fluctuation in prices tending towards an erratic market. Hogs were much lower. Mess pork, lard and ribs ruled sharply lower, but before the close some recovery was effected. Export demand continues urgent. Quotations follow as of Monday, Aug. 4:

M. pork, new	$53.00	@.....

...Louis National Stock Yards.

H. L. Wyatt, Correspondent.

...onal Stock Yards, Aug. 2.—The re... of cattle this week while compar... ...out evenly with the corresponding ... a year ago, are considerably lower ...ast week. The percentage of good ... is running higher and upon this ... the market is high; indeed, we ... it is at about the highest point in ...story of the local market. The de... for good cattle all week has been ...and the consequence has been ex...gly active trading. Medium and ... cattle which dominate the bulk of ...n were for the most part of the ... kind. On these the market was ... good and while some of the better ... in the middle class sold not far ...steady the average is 50c to 75c ... than the close of last week. Com...ow priced cattle are showing slight ...tions. The season's high mark was ... this week on yearlings, which ...it $18.25 and the top on heavy ... was $17.85. The outstanding fea... ture of the steer market this week was the sale of a string of Texas cattle which ranged from $14.70@16.50, the top figure being paid on a load of strictly grass fed south Texas cattle which were about as good as anything ever sold on this market from the Lone Star state.

The hog receipts continue light and quality about fair. Another record was made on Friday of this week when $23.55 was paid for some prime butcher hogs. At this writing the market is around 10c lower than the close of last week. The week's closing quotations are: Mixed and butchers, $22.75@23.00; good heavies, $22.75 @23.00; rough, $18.50@20.75; light, $22.60 @22.90; pigs, $17.50@22.00; bulk, $22.65 @22.90.

A steady tone prevails in the sheep house and the quality of the offerings is fair. Best lambs are worth around $15.50 but they must have quality and finish to bring this figure. The heavy runs in this department continue and it is still noticeable that there are not many ewes coming in. She stuff, particularly black-faced good ones, are in keen demand.

Oklahoma Live Stock Market.

Thusnelda Haehnke, Correspondent.

Oklahoma City, Aug. 2.—The cattle receipts here have been fairly liberal this week and at no time have there been more than could be handled. The big end of our cattle run came from the eastern part of the state, there being no steers from Texas. $12.75 was paid for some good caked grassers, which formed the bulk of plain to medium steers on Monday. Steers were steady the fore part of the week, but draggy and a little lower towards the close, some calling it 15@25c lower. Thursday 2,750 head made up the supply against 22,166 a week ago and 1,786 a year back. A few loads of weighty but far from fat steers brought $10.75@ 11.65.

Butcher stuff showed a good deal of snap early in the week but had a tendency to be lower towards the end, as packer buyers showed a real 'don't-care attitude toward their bids. Cows must be pretty good to bring $8 or more. Canners and cutters are bringing $4.75@5.50, with a few real low canners bringing around $4.50. We have had a decidedly lower market on calves, the top being $2 lower. Bulls are going at fully steady prices with very few coming this way. The stocker division showed lack of pep towards the close, a few yearlings and feeders bringing $9@10. Good stockers, $7.75@8.25. Stock cows and heifers, $6.25 @7.25.

The highest price yet, $23.25, was paid for some good quality hogs here Friday. They have been steady throughout the week. Receipts have been very light, however, and our market is sadly in need of more hogs. Stockers are very scarce, the market being steady. Top on same being $22. A week ago it was $23, and a year back, $19.60.

Omaha Live Stock Market.

Bruce McCullough, Correspondent.

South Omaha, Aug. 2.—Although there was a very noticeable letup in cattle receipts this week, the supply being 34,000 head as against 48,000 the week previous, the market has not responded to the decrease supply and trend of value was lower most of the time. Corn feds held up fairly well as there were very few of them here, the best selling around $16.65 @17.75. On the range cattle the market broke 50@75c, and although choice beeves are still quoted at $14@15, the bulk of the western grassers are selling around $11@12.

Demand for the cows and heifers was broader than recently owing to the better inquiry from the country. Prices at the close were fully 50@75c higher than last week with bulk of the trading around $7.50@9.50. Veal calves ruled steady at the recent decline, selling at $8@14, and there was not much change in bulls, stags, etc., that sold at $7@11.

For so early in the season the activity in stockers and feeders was remarkable and prices advanced fully 50@75c. The corn belt is full of rough feed and there is every promise of a bumper corn crop so that feeders are anxious to get in early and buying has been very free all week. Best feeding steers are selling $11.50 @13, fair to good grades around $10@11, and the common to fair stuff from $9.50 down.

The hog market has been a very erratic affair this week owing largely to the demoralizing influence of the strikes and race riots in Chicago. Demand has been fairly satisfactory right along and receipts not at all excessive so that but for the bad reports from outside points the local trade would have been in very good shape. As it is closing values on packing hogs are around 50@75c lower than a week ago although there has not been much change in the shipping grades. Today, with about 13,000 hogs here, the market was sharply lower, the decline amounting to 50@75c in the case of packing hogs. Best shipper loads brought $22.50 as against $22.40 a week ago, while bulk of the trading was at $21@21.20 as against $21.50@22.15 a week ago.

Liberal receipts of sheep and lambs continue to feature the market, this week's supply amounting to 123,000 head. Fat lambs sold off very nearly $1 and best grades at the close were selling around $15.50@15.75. Demand for feeder lambs held up well, however, and desirable kinds are still bringing $14@15. On aged stock the trend of values has been lower, the decline amounting to half dollar on an average. Closing quotations on yearlings are $10@10.50, wethers $9.75@10.25, and ewes $7@8.50.

Movement of Sheep.

Cattle prices were lowered with a large supply, particularly of Western ranges, which came into competition with natives. Closing prices in leading markets follow:

	Beef steers.	Cows and heifers.
Chicago	$11.50@18.25	$5.00@11.00
Kansas City	9.00@17.25	5.25@12.00
Omaha	9.50@16.75	5.50@12.50
St. Louis	9.25@17.00	5.50@12.25
St. Joseph	9.00@16.50	5.40@12.00
Sioux City	9.25@15.50	5.25@12.25
St. Paul	9.00@15.50	5.00@11.60

Sheep and lambs were in good supply, although lighter than the previous week, and prices declined, closing as follows:

	Lambs.	Sheep and yearlings.
Chicago	$9.50@16.25	$8.00@12.25
Kansas City	9.00@15.75	3.75@ 9.50
Omaha	9.50@15.50	4.00@ 9.00
St. Louis	9.75@15.40	4.00@ 9.10
St. Joseph	9.25@15.75	3.75@ 9.00
East Buffalo	13.00@16.50	6.00@10.20
Pittsburgh	13.00@16.50	6.00@10.00
Jersey City	14.00@17.75	7.00@ 9.50
Louisville	13.00@15.25	6.00@ 9.00

A recent private cable says that Omsk, Russia in Asia, is reported to have wheat in store there of three years' crops in large quantity.

WANTED and FOR SALE
GRAIN DEALERS' MARKET PLACE

For Buyers and Sellers of Elevators, Equipment, Grain, Seeds, Hay, Feed, Flour, Millfeed, Beans, Produce, etc.

25c Per Printed Line

SCALES FOR SALE.

OR SALE—Richardson Automatic Sack-Scale, good condition. OVERMAN LLIAMSON CO., Richmond, Va.

ELEVATORS FOR SALE.

or Sale—Elevator and malting plant ated at Davenport, Iowa; grain elevator 000 bushels storage capacity; malt se, 1,800 bushels daily capacity, situated the C. R. I. & P. Ry. tracks, and C. M. St. P. and C. B. & Q. roads are avail-e; transit privileges are granted for tern and southern points and the loca-n is very favorable for distribution of ds and grain to those points, as well as the central feeding district; the loca-n is in one of the best farming dis-ts; plant is in good physical condition was operated until now. For particu-apply to **Davenport Malt & Grain Co.**, enport, Ia.

5,000-BU. ELEVATOR, electric power, d coal and feed business, located in t farming district in Iowa. Address AL, Box 2, Price Current-Grain Re-ter, Chicago, Ill.

LEVATOR FOR SALE—Capacity 25,000 hels. International farm machinery con-ot goes with the deal. Price $12,000. h $7,000, balance terms. Big grain point good machine business. Max, N. D. lress E. BALSUKOT, Plaza, N. Dak.

FOR SALE—Three grain elevators In State of Washington THOMPSON GILLIS CO. Spokane, Wash.

RAIN BUSINESS FOR SALE—In-les a large elevator with the best im-ved machinery; in a thriving city in sachusetts, covering a population of 00 including suburban districts. Has ood retail business; also a mixed car ness with milling in transit privilege, ch can be increased to any amount of ness desired. Has three other retail es in connection. Business established 40 years. Reason for selling have e outside interests and unable to give roper attention. An exceptional bar-. Will take part cash down and the nce on easy terms to the right party. full particulars address THRIVING SINESS, Box 7. Price Current-Grain orter, Chicago, Ill.

MILLS FOR SALE.

00 BUSHELS CORN MILL for sale; e or half interest—equipment first-Nordkye & Marmon machinery at lla, Ala. Fine location; own side-and warehouse electrically equipped. I. P. Cheap rates milling and transit states—4 railroads. Write or wire. BROWN, East Florence, Ala.

MACHINES FOR SALE.

R SALE—One 25 H. P., one 35 H. P. one 45 H. P. Miami Gas Engines, in lent condition. Address The SHARTLE THERS MACHINE CO., Middletown,

OFFICE SUPPLIES.

R SALE—Burroughs, Wales, Amer-Dalton, Standard, etc., adding ma-s, half retail prices, fully guaranteed. writer bargains, all makes. Get illus-d catalog and bargain list. MINNE-TYPEWRITER EXCHANGE, Dept. 236, 4th Street South, Minneapolis,

AN PICKERS FOR SALE.

R SALE—Giant Bean Pickers, new Machines in first-class condition. NT CANNING CO., 310 Coml. Bk. Grand Rapids, Mich.

HAY FOR SALE.

R SALE—Elkhorn Valley Hay in car-lots. Write for prices. HARRY T. N, Ewing, Nebr.

ITUATIONS WANTED.

NTED POSITION as manager grain y business. Would consider operat-artnership; have had years of ex-ce and know all the good trade in ast and south to sell to. Address Box 7, Price Current-Grain Re-, Chicago, Ill.

RANDOLPH GRAIN DRIERS

STEAM OR DIRECT HEAT — CONTINUOUS FLOW — MADE IN ALL SIZES

O.W. RANDOLPH CO. TOLEDO, O. U.S.A.

GRAIN WANTED.

GRAIN AND SCREENINGS WANTED—Off-grade wheat, barley, corn or oats, wheat screenings, corn screenings, corn bran, oat screenings, oat clippings, barley screenings, barley chaff or elevator screenings of any kind wanted. Please send samples. BEREND J. BURNS, 324 Chamber of Commerce, Buffalo, N. Y.

MR. BARNES ON WHEAT PRICE.

In response to the popular clamor for a reduction of food prices, the proposition was put up to the Administration that the price of wheat should be cut to the mills, and the loss absorbed by the Grain Corporation. Mr. Barnes does not favor such a course. He believes the crop will all be needed and that it can all be sold at the guaranteed price.

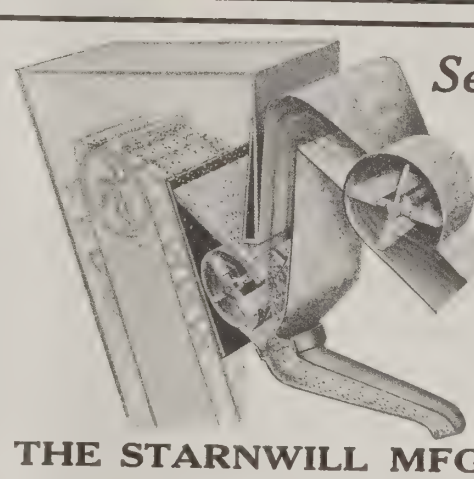
On the basis of his own private reports from Europe and elsewhere, Mr. Barnes predicted a shrinkage of "probably 400,000,000 bushels" in the wheat production for North America, 250,000 bushels of which is in the United States, from the June forecast, and a further shrinkage in European wheat and rye production of 300,000,000 bushels outside Russia. He did not say, of course, that the American crop is short, and that it has come to the point that only 1,000,000,000 bushels are assured. There was no warrant, he said, however, for statements that the price has been inflated. He announced definitely that as far as he could see there was no hope for a reduction in the near future, and that he would not sell wheat at a price below the guaranty.

Figures were given by Mr. Barnes on the world price as follows:

Average farm price to American farmer under guaranty, $2.05 a bushel; average farm price in the United Kingdom during the last calendar year, $2.28; average farm price for four big producing countries, United States, Canada, Argentina and Australia, producing 1,500,000,000 bushels, $1.94; average grower price (largely guaranteed) of Europe's fifteen consuming countries, producing 800,000,000 bushels, $3.75; average of all wheat growers, weighed according to the size of their contribution to the total crop of the world, works out an average world grower price of $2.46.

Argentine wheat, with longer voyage and higher freight rates, the Barnes statement said, costs delivered in Europe fully 50 cents more than American wheat delivered in Europe.

There is no support for "the theory of intimate relation and influence between wheat price and other foods," the statement said.



"Great Britain, France and Italy," Mr. Barnes said, "all have artificially reduced flour and bread prices, buying their raw material at the world's price and absorbing the loss by national taxes. Any sale of wheat or flour by us at reduced rates to them would only save their national treasuries, while depleting ours, without any possible reflection in the bread price to their people which is already fixed."

Mr. Barnes also contended, as he easily might, that bread was now the cheapest item in the diet. If all other foods were at the same rate as bread the annual cost of food for each person would be about $50, or a national food bill of $5,000,000,000 instead of $18,000,000,000. "This, of course, is impracticable," he said, "but let us spend a few millions in teaching housewives, and throughout schools, how and what to buy to get food at reduced expenditure, and without sacrifice of taste and palatability."

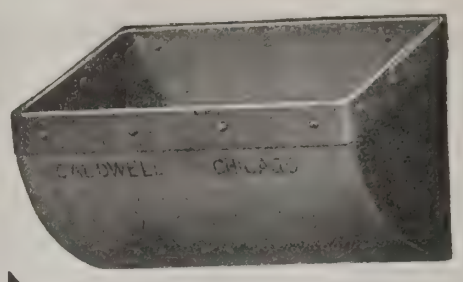
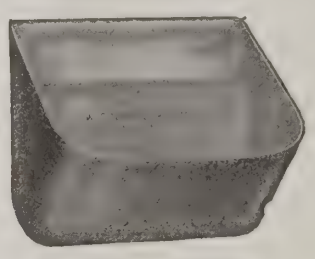
"See How Simply It's Built"



The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

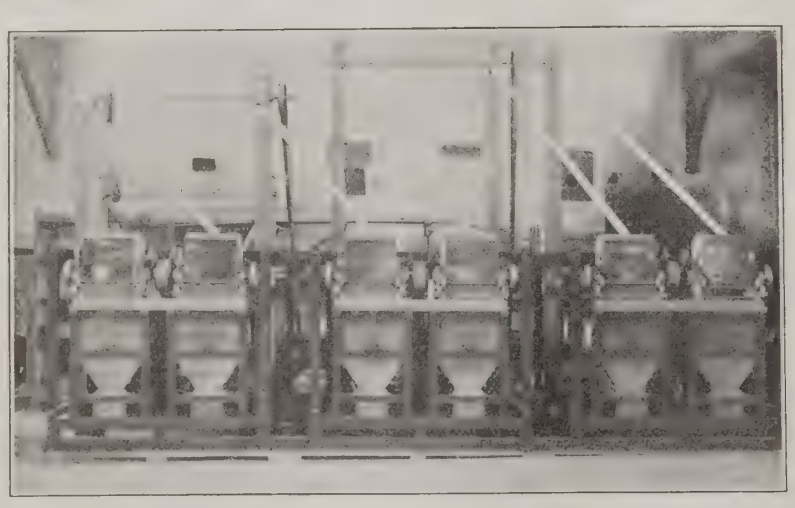
It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.



Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

The XX th Century MILL MFG. CO.
DECATUR - ILLINOIS

Elevato Bucket



WE CARRY IN STOCK at all times a large supply of Elevator Buckets, including Salem, Caldwell Seamless Steel, Regular Riveted, and various styles of Malleable iron. All sizes and gauges for handling different materials. Special buckets made to order. Manufacturers of Helicoid Screw Conveyor, Steel Elevator Casings, Pulleys, Bearings, Rope Sheaves and Gears. Complete Equipments of Elevating, Conveying and Power Transmitting Machinery for Grain Elevators, Flour Mills, etc., etc.

H. W. Caldwell & Son Co.
17th Street and Western Ave., Chicago
NEW YORK, 50 Church Street DALLAS, TEXAS, 709 Main Street

Elevator Operators are fast realizing that profits are to be made through

MILLING WHEAT AT ITS SOURCE

A strict eye on the tailings and bran is the food program of the Nu-Way Mill. It occupies very small floor space; Uses minimum of power; Inexpensive to buy and to operate.

The Simplest, Most Practical, Most Economical Flour Mill on the Market

Cape Mill Manufacturing Company
10 S. Frederick St. CAPE GIRARDEAU, MO.

Work! Work! Work!

That's the motto of "Handy Andy." Never gets tired. Never strikes. Never lets up until you say so.

"Handy Andy," the practical, portable, adjustable elevator, is the strong armed workman that lifts and conveys bags, boxes, bales and other packages without a complaint. Loads cars, loads wagons.

Light in weight. Sturdy in construction. Simple to operate. Saves money.

There is another model of "Handy Andy" for handling material in bulk.

Send for particulars.

BUSINESS AND TRADE CONDITIONS

HE President's Message to Congress on Friday was reassuring if not convincing. His notice to the Brotherhoods that "threats and undue istence upon the interest of a single class make tlement impossible," had a wholesome influence. ey began at once to hedge. Mr. Plumb on Fri- said: "There has been a great deal of misap- hension. . . . We would be blind to our own in- ests if we attempted such methods as strikes or eats." It is something that the President has sed this change of stance. His prior notice to the king shopmen, that no settlement of their claims uld be considered until or unless they should re- n to the jobs they had abandoned in defiance of ir own leaders, was equally effective. The rail- d men are, of course, entitled to their own opin- s as to the ultimate ownership of these proper- , in which most of them have only an employe's re; but when prior to the President's Message Brotherhoods give notice that they were in "no d to brook the return of the lines to their former ners," and that this ownership must be lodged tly in the Government and in the men who have expect to have no pecuniary investment in them, he price of the further peaceful conduct of the nsportation of the Nation, common people, con- ers of transportation, began to wonder whether ason" did not need defining anew.

r. Plumb's apology for expropriation, that the roads have been plundered by their officers and nagers, begs the question and is also ancient his- . All baiters of railroads have used this argu- t for a score of years and still resort to it when aling to public prejudice. But it is now pretty understood that the water has long since been ezed out of railroad stocks. The problem the ping public has before it is not the past, which not be recalled, but the transportation of the re. A few months of Government operation has onstrated its failure, as compared with private ation, to render service at reasonable rates and nserve the properties. The roads are in a poorer ical condition today than at any time in a gen- ion; yet the demands on them for service are ter than ever, the earlier months of the war ex- ed. There is therefore the presumption that if roads were turned over to the employes the ser- and the condition of the properties would still ier depreciate. Mr. Hurley, speaking of the yards, said the other day: "I don't know of a rnment-owned plant that produces more than hirds efficiency and there are numerous exam- much below this line." Showing that what the esman of the Brotherhood called the "brains and gy" of railroad operation does not lie in the em- s but in the "financial interest" which, as in all strial production, is responsible for the success- peration of the railroads. All private property stified, not of itself, but because the services to public rendered by the property and by the r are thereby insured to be greatest at the mini- of public cost. Railroad nationalization is not ntried experiment. Nearly all Continental rail- are state owned. So are those of New Zealand Australia. Some Canadian roads are state d. But nowhere, except in pre-war Prussia re the public was "thwarted and badgered at turn with a number of insolent government uls"), has government operation paid all of its ises, nor has it supplied a satisfactory service for freight or passengers, nor have rates been as low as those upon privately managed railways. The Brotherhood chiefs simply lost their heads in the craze of the times, and plunged into a non-American venture of French syndicalism from which apparently the President has for the moment at least extricated them.

The President's solution of the problem of prices was not so promising except the wise admonition that, "We must quicken, not slacken, our national production." The President and his party ever since the Baltimore convention of 1912 has been struggling after a fashion with the cost of living. In the platform of that year the party pledged a reduction of living costs; but the country is farther from such a consummation now than then. The war policy of licenses was tolerated, but aside from flour the system had practically no effect on prices, which kept moving to higher levels as the demand became more urgent; and that movement is still in the same direction, here as in England and elsewhere, for the same reason. Hon. Jos. E. Davies, then a member of the Federal Trade Commission, told the Conference on the World's Food held by the Academy of Political and Social Science in September, 1917, that the Commission had had a "large corps of accountants and investigators ascertaining the facts as to costs of production," etc., in order that the President might know what would be proper prices "when the price was named, if it were to be named"; but it did not appear to the Conference or to the Commission then, nor does it now, that the cost of production does not fix the prices of articles in general consumption but that the demand is what makes price, the production cost affecting only the volume of production which will be great or small as the demand justifies, ceasing entirely when the demand ceases.

The President has ample power by statute and under the common law, without demanding more, to punish profiteers, hoarders, and all those who exercise justifiable human prudence in providing for the future by putting current surplus foodstuffs into storage for subsequent consumption; but if he were to succeed in his party purpose, which he will not, we may be assured the President would simply repeat the blunder of the past of intensifying by drastic measures the hardships forced upon the world by the exigencies of war and the refusal of nature to provide when man himself has not done his part to provide for himself. Nothing is so easy as to convince the public that food prices are manipulated. It is only necessary for some one in authority to say so. The President is right in saying that, "Much of the accumulation of stocks has no doubt been due to the sort of speculation which always results from uncertainty. Great surpluses were accumulated because it was impossible to foresee what the markets would disclose and dealers were determined to be ready for whatever might happen"—a most wise precaution, we take it, which, when exercised in times past, has been of great benefit to other peoples by saving those who could not or did not provide in advance for themselves. But when the President says that, "Some very interesting and significant facts with regard to stocks on hand and the rise of prices in the face of abundance have been disclosed by the inquiries of the Department of Agriculture and of Labor and the Federal Trade Commission," which "seem to justify the statement that in the case of many of the necessary commodities effective means have been found to prevent the normal operation of the law of supply and demand," the President loses his grip of the matter in hand and descends to the futilities of the departments quoted. That there are persons who take advantage of the abnormal times to squeeze the public and to make inordinate gains is no doubt true—the world would be quite a different place and man a different creature if this were not true; but to ascribe the massive, widespread and continuous upward movement of prices to this cause, in the face of the well known condition of European supplies of food and low production, the obvious scarcity of goods the world over, and the tremendous outflow of all kinds of foodstuffs and other supplies from our own accumulated supplies, not to mention the shrinkage in bushelage in July, 1919, is equivalent to ascribing the spring floods in the Potomac to the opening of household water taps at Harper's Ferry.

It is just as essential that there shall be orderly consideration of the business of handling the grain, meats and foodstuffs generally as of the problems arising out of the railroad situation. If the world is going to be fed from the stores of the United States we must expect high prices; for there will not be enough to go round without the enforced economy of use which high prices will certainly effect. If the United States is to have cheap foods an embargo on their exportation must be enforced, and that will result, as embargoes always do result, in unfairness and discouragement to producers which will find its reflection in discontent in other quarters, and it may be in possible reduction of production in the future. Further, the effect of "curtailed" exports, as the August review by the National City Bank of New York says, would be to cause prices to fall rapidly in this country; the cost of living would come down; the problem of inflation would be solved; but it would not be pleasant at home or abroad where all our products that can possibly be spared are desperately needed. Without them peoples will starve and social chaos will result in Europe." But what will happen here if something is not done? The present official view of the price situation and its reckless, immoderate and frivolous treatment by the newspapers encourage all sorts of opportunist political legislation, the only result of which can be to harass producers on the farms and in the industries and to cause harm that may last a generation. A conspicuous example of this sort of hysteria is the Kenyon-Kendrick bills to emasculate the packing industry. Against this legislation there has been abundant protest from the live stock industry as represented by breeders, feeders, commission men and the live stock exchanges without exception, and from other lines of trade likely to be similarly harassed; yet a congressional committee is reported to favor its immediate passage without giving the interests involved even a respectable hearing.

No one, in fact, in official life is giving this problem serious consideration, but all are going at it with a view to responding at once to the intense popular clamor, because something must be done even though it be in defiance of national law in order to "save the party"—both parties. The weakness of the presidential program, which brings a doubt to every thinking one of its efficiency, is, as the New York *Post* has expressed it, its "further dependence upon the wisdom and the vigor of the Government. There are to be more Government measures, more inspectors, more commissions, more labyrinths of official misunderstanding and delay and blundering. For say what one will, no small part of our present troubles is due to the inefficiency of the Government in the past. It has been undeniably

wasteful. It has choked itself with the excessive number and overlapping of its own agents. Its organization has been halting, its methods extravagant, its lack of foresight deplorable. Thoughtful men may be excused, therefore, if they are not ready to believe that this same inefficient Government will be able to assure them instant and full salvation." The President's first message on reconstruction suggests his belief that Federal regulation should be dropped and everything left to economic laws and private enterprise. But the threat of revolution by the Brotherhoods has thrown him back into the arms of the Department of Agriculture, the Department of Labor and the Federal Trade Commission, which in the crisis are *capable de tout.*

The behavior of labor during the week was disastrous to business. The fear of a rail tie-up checked the movement of grain, coal, ores, etc., and caused a slowing down of industry. Without transportation the world returns to the mediaeval stage of civilization; industry becomes localized and each community must feed itself or starve; and the public has come to feel that 2,000,000 railroad men and their allies in Washington must not be allowed to hold up all the rest like highwaymen. The price agitation, of course, had a similar effect. Owners of commodities hide them in the face of threatened expropriation; goods in sight go at a sacrifice and scarcity is intensified until men again become reasonable. Farmers refused to accept a lower range of values and embargoes tied up the movement of the grain in sight, causing an advance in prices for cattle, potatoes and other foodstuffs, although thanks to recessions in the prices of some grains *Bradstreet's* food index number based on thirty-one articles, stood on Aug. 8 at $5.25 compared with $5.30 on Aug. 1 and $4.47 on Aug. 8, 1918. But the general commodity prices index based on July prices stood at August 1 at $20.0017, an increase of 5.9 per cent, compared with July 1 and 129 per cent over that of July 1, 1914.

UNEXPECTED FEED CROP

IT MAY interest those who have "killed" the present corn crop to consider just one angle of the situation, presented by the increased yield and consequent profits to Northwestern farmers who planted silage corn and now find they will harvest feed corn. Considering this in connection with the total production of the country, although it is quite fully appreciated that it is a small matter, it does, however, in a rather important way, affect the tonnage of millfeeds, forage and feed grains which will be offered from Northwestern markets this fall. It also concerns corn shipments from Western terminal markets which have in certain seasons been made in considerable volume to the Northwest, where they have unfortunately had two extremely cold winters in succession with deep snow, when sheep particularly, and other stock to a lesser degree, suffered severe hardship on the Montana and Wyoming ranges.

GRAIN TRADE NEXT

THE space given herein to the objectionable character of the Kenyon and Kendrick bills to emasculate the packing industry may seem excessive to a certain portion of our readers who being grain dealers are only collaterally interested in that industry, insofar as stock growing and feeding may affect the quantities of grain, hay and feedstuffs they may handle for shipments. But as the popular clamor against the packers is due at this time wholly to the sensational reports on the industry put out by the Federal Trade Commission, it may interest the readers to whom reference has been made, that the same Commission is understood to have ready for publication a report of the investigations made by its agents, which our Washington correspondent says is expected to be not favorable to the functioning of the grain trade as at present.

It has been aptly said that there are allegations enough in the report on the packers "to convict a pirate," yet the "Beef Trust" so-called, has been tried before on similar evidence, largely circumstantial, and the jury refused to consider it. A criminal prosecution on the Commission's evidence, which the packers welcome, may convict, but it is doubtful. The real object of the report was not, as we suggested a few weeks ago, to present judicial evidence, but to support a recommendation that the Government should take over large fractions of the packers' plants and by a system of "license" control avoid the necessity of future judicial proceedings except in defense on packers' appeals to protect their property rights. We may assume, therefore, if our Washington correspondent's information is correct, that a similar recommendation of emasculation of the grain trade will be a part of the Commission's report, thus fulfilling a prophecy made to that effect in the St. Paul and Minneapolis *Daily News* almost immediately following the appointment of its editor, Mr. Colver, to be a member of the Commission. The grain men are in the same boat with the packers.

NATURAL LAW SET ASIDE

IN releasing the material collated by us on another page, entitled "Food Stocks on Hand," the Federal Trade Commission says: "That the 'Law of Supply and Demand' is immutable and to be blamed for high prices does not seem to be borne out by figures. Not counting the Government surplus stocks, there was a greater supply of foodstuffs in this country on June 1 this year than the same date last year. The excess is 19 per cent in the combined total of a number of the most important foods in dry and cold storage."

This is an entirely characteristic statement of the Commission. It is consistent with the opportunism which has characterized the entire food handling program. It does not take into account the natural instinct of prudent men to provide for the future. Foodstuffs have been going out of the country as fast as ships can take them and naturally enough holders here expect that they will continue to go out and are trying to provide for the future requirements of the peoples at home as well as abroad and also the calls of the moment; and if the predictions of Mr. Hoover and Mr. Barnes are measurably accurate there will be call for every pound. It is not what is in store now compared with a year ago that *per se* counts, but how will the stocks compare with the probable demand for them six to eight months hence? It is the business of the merchant to adjust the visible to the probable. In spite of the effort of the Administration and its incompetent economic apologists ever since the war demand upon this country began, in the fall of 1914, to declare and demonstrate the law of supply and demand had been set aside by the war, the facts have made it daily more and more certain that the law has not been and cannot be set aside, but it is pressing upon the world more relentlessly today than ever. It is time for the Government to stop swivel-chair philosophizing and yellow journalizing in order to look facts in the face. The foods of the world, barring wheat alone as the one possible exception, are growing scarcer as winter approaches; and it will not be the man charged with hoarding but the men who as our rulers by arbitrary persecutions prevent the natural conservation of the momentary surplus food for the necessity of tomorrow who will deserve the condemnation of sane men should they come later to suffer from the effects of bureaucratic flapdoodle.

EDITORIALETTES

IT MAY be of interest to know that the Aug. 1 condition of spring wheat, 53.9, is the lowest on record in any month for which a report of condition was made. It shows a loss of 27 per cent in condition of July wheat, itself a record, and it is 21.9 per cent below the 10-year average. Surely July did "do things" to that crop.

DON'T think this is a year when shippers can depend on office-boy commission houses to handle their grain. Send your stuff to dependable houses who c be depended upon to merchandise your grain w even more care and skill than you could do it yo self if you were on the ground. Grade everythi strictly by rule. Don't deceive yourself or yo patron in the country; be fair to both. Then g your receiver all the information you have of t grain and what you think it should grade at t end of the line. It is the only way to play even.

THE kind of men who are filing as candidates election to the coming Illinois Constitutional C vention is not encouraging to the making of a dec or safe fundamental Instrument for a great sta The cranks, special class interests, "long haired m and short haired women" are coming to the front droves and it looks now like a school for unde ables.

IT IS with some surprise, in view of the recent vance in the price of milk at Chicago, that we le from a York state correspondent of *Hoard's Dai man that* "there appears to be no doubt that dairy farmers are now making the most money th ever have made," and "do not really desire to s their farms," although farmers are now as land cr as at any time in our history.

BRITISH agricultural journals bear witness to fact that farmers over there are getting their fill government control of several things. The gene feeling is that agricultural products are control as long as they promise the producer a profit released when they show him a loss. "And yet, the face of all the lessons experience has taught says the *National Stockman and Farmer*, "there some so-called statesmen in our own country w want more Government control of this or that bu ness!"

WE WOULD ask the reader to again read the torial in the last issue, "Clear Record Car Claim and if they have the information suggested to ple forward to this office at your earliest convenience

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures fro various statistical exhibits appearing weekly in detail "The Price Current-Grain Reporter," these figures repr senting the past week, the preceding week and corr sponding time last year, here assembled for ready refe ence:

	Aug. 9.	Aug. 2.	Aug. 10, '1
Wheat—			
Primary receipts	16,450,000	21,606,000	20,597,0
Primary shipments	5,920,000	5,197,000	7,637,0
Receipts since July 1.	64,943,000	48,493,000	66,585,0

The Price Current-Grain Reporter

Published every Wednesday by the
Price Current-Grain Reporter,
912 Webster Building.
327 So. La Salle St., Chicago, Ill.

J. CARVER STRONG,
Treasurer and Manager.
EATON G. OSMAN,
President and Editor.
GEO. A. WELLS,
Vice President and Contributing Editor.
H. A. SHEPARD,
Secretary and Advertising Manager.
L. A. KOCH.

THREE DOLLARS a year in the United States and Mexico; $4.00 a year for Canada, $5.00 United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 10 cents.

LETTERS on subjects of interest to those engaged in the grain trade, news items, reports of crops, grain movement, new grain firms, new grain elevators, contemplated improvements and cars leaking grain in transit are solicited.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain elevator men is unquestioned. The character and number of advertisements in its columns tell its worth. If you would be classed with the leading firms catering to the grain trade, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

ADVERTISEMENTS of meritorious grain elevator machinery and supply houses and of responsible grain firms who seek to serve grain dealers are solicited.

CHICAGO, AUGUST 13, 1919.

GRAIN TRADE REVIEW

Theorists are making little or no headway in their campaign to lower the cost of living. Some people believe that the word "theorists" is wrong; it is all politics. At any rate, everyone seems to be working at the problem from the wrong end. The fact that there is no reserves of foodstuffs ignored and much is made of the several holdings of various commodities in cold storage, which represent the show windows. Retail profiteering in foods has been rampant and still continues. Labor is after another big increase in wages and has been able to use a rather general tieup of the railroads in some sections of the country, and the worst is still to come. Every man in a position of power appears to be exploiting a pet theory now. Nationalizing of the railroads for the benefit of the few employes who only a week or so ago said, "The public be damned," seems doomed to failure public protest means anything. There is considerably more interest being taken by the general public in some of the demands of union labor. This constant pyramiding of wages and costs of commodities must in the end fall of its own weight, and the longer it continues the greater will be the crash when it comes. Well posted people say it will probably be witnessed late in 1920 or early in 1921, some that it will come early in 1920.

No low prices for foodstuffs are in sight for another year at least. The Government Report showed heavy reductions in the crops of all bread grains and the actual loss in corn was over 200,000,000 bu. in July, although the increase in the par was sufficient to offset all but 27,000,000 bu. of this. The wheat crop, instead of being a bumper one, promises to be only moderate, and while the total is 940,000,000 bu. it is conservatively estimated that only 800,000,000 bu. is fit for milling stock rust and blight hit the spring wheat crop, the condition of which on Aug. 1 was the lowest on record, and much of it will be of very light weight. With the shortage in oats and barley most of this poor wheat will probably be used for feed, especially with corn selling at around $2 for the cash article, the latter now selling at the highest price on the crop.

Not only are crops in this country much shorter than expected earlier in the season but the same applies to Europe. The latter will have to import large quantities of feed grains as well as wheat and rye. In talking of high prices the average man forgets that the entire world is suffering from the same thing, and that the solution is to be found only in a material increase in production everywhere. Some articles have reached a point where consumption is being checked. Strikes, moreover, serve to decrease production, and shorter hours without the men speeding up still further curtails the output. Somewhere between the producer and the consumer there is waste. In grains this waste is almost nil, and always has been and will be. A 10 per cent difference in the price would call for a Congressional investigation; but some articles of food have gone up 200 to 300 per cent or more without the producer receiving the slightest benefit.

No amount of rain can change the size of the corn crop. There are still some sections that have had no rain and the crop is suffering. Moisture would help fill the kernels already set, but will scarcely change the yield, as the period of pollenization has passed. The general appearance of the plant may prove as deceptive as did wheat and oats, and threshing returns show that the crops of the latter were materially overestimated.

Supplies of oats for the season are far short of last year's, and the Canadian crop was also badly hit by the hot weather which damaged the yield this side of the international line. Western Europe also suffered from drought, and has bought considerable grain in this country, now that prices have reacted considerably from the recent high point. Argentina has grain to ship, and the ocean tonnage situation is such that wheat and corn get the preference. It is interesting to note that while the United States raised about 75 per cent of the world's corn crop over 1,000,000 bu. of corn was shipped from Argentina to this country the past week, showing how great is the demand for it here and the difficulty of getting our corn to the seaboard.

Rye and barley crops suffered from the same causes that affected oats and to some extent wheat. Europe is unfortunate in being forced to rely on this country for both grains, which are grown here in fair amounts, although the crops as compared with those normally produced in Europe are extremely small. No other country can furnish large amounts of barley, and the curtailing of the domestic consumption through prohibition promises to be more than offset by the European demand.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the week follow:

	Aug. 9, 1919.	Aug. 2, 1919.	Aug. 10, 1918.
Wheat	16,450,000	21,606,000	20,597,000
Corn	1,517,000	2,381,000	3,368,000
Oats	6,057,000	6,732,000	9,076,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	24,024,000	33,041,000
Preceding week	30,719,000	26,795,000
Since July 1	101,981,000	128,809,000

Corn prices fluctuated in a sensational manner the past week. At the low point December was off 32c from the high of the previous week, while the extreme outside price showed a rally of 16c from the inside figure, while September was up 21½c, and within 3c of the best price on the crop. Heavy covering by shorts was responsible for the upturn, and there was a more bullish feeling in evidence as the market had had a sensational decline. Threats of a general tieup of the railroads were also a factor, as the movement of grain is already limited. Eastern demand slow, but cash prices the highest on the crop. All other factors other than railroad news ignored. Government crop report construed as bullish. Closing trades were at net gains of 2@9¼c, the latter on September.

Oats had a range of 8⅜@9½c, and closed with net gains of 2¼@2⅜c. Trade was heavy at times, and there was persistent buying of futures by houses with eastern connections, partly against export sales. Country offerings small, and while the Government report showed a slightly larger crop than the trade expected much of it is of light weight. Sentiment was bullish a good part of the week. There is a large amount of grain sold for August shipment from the country, and shippers are also short against sales to exporters.

Winter wheats have declined to around the basic figure in practically all markets, although there is sufficient milling demand for dark hard at Kansas City to permit of good premiums being secured. Offerings of winters liberal, but quality not as good as earlier in the season, a greater percentage grading No. 3. Quality of the spring wheat is distinctly poor, and prices in the Northwest have advanced materially from the recent low point, and are far above a parity with Chicago. Bulk of the northwestern crop will grade No. 3 or lower. No advance in price through the adding of storage charges to the basic figures will be made at present. Range of prices the past week follows:

			Close		
Corn—	High.	Low.	Aug.9, 1919.	Aug.2, 1919.	Aug.10, 1918.
Sept.	$1.95	$1.73½	$1.94½	$1.85¼	$1.59
Dec.	1.57	1.41	1.57	1.55	.....
May	1.53	1.39	1.52½	.....	.....
Oats—					
Sept.	.76½	.67	.76	.73¾	.68⅝
Dec.	.79⅜	.70	.79	.76⅝	.....
May	.82⅛	.73¾	.81¾	.....	.....

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Aug. 1	13,185,000	4,048,000	539,000
P. receipts to Aug. 9	12,789,000	14,939,000	8,848,000
P. shipments to Aug. 9.	7,915,000	7,665,000	5,921,000
P. stocks on Aug. 9	12,977,000	4,677,000	904,000
P. consumpt'n to Aug. 9.	5,082,000	6,642,000	2,562,000

Corn Stocks and Consumption.

Statement of the movement of corn, and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Nov. 1	4,117,000	174,000	849,000
P. receipts to Aug. 9	149,684,000	239,885,000	203,001,000
P. shipments to Aug. 9.	91,594,000	123,801,000	110,273,000
P. stocks on Aug. 9	1,626,000	7,026,000	816,000
P. consumpt'n to Aug. 9.	60,581,000	109,232,000	92,761,000

Oats in Primary Markets.

Receipts of oats in eleven primary grain markets from Aug. 1, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	2,979,000	7,852,000
Milwaukee	739,000	1,934,000
Minneapolis	459,000	651,000
Duluth	84,000	5,000
St. Louis	492,000	1,562,000
Toledo	73,000	183,000
Detroit	31,000	78,000
Kansas City	289,000	542,000
Peoria	281,000	627,000
Omaha	246,000	552,000
Indianapolis	384,000	953,000
Total	6,057,000	14,939,000

Receipts of oats the past week at primary markets, compared with preceding week and corresponding week last year:

	Aug. 9, 1919.	Aug. 2, 1919.	Aug. 10, 1918.
Chicago	2,979,000	3,362,000	5,010,000
Milwaukee	739,000	827,000	1,185,000
Minneapolis	459,000	631,000	354,000
Duluth	84,000	65,000	2,000
St. Louis	492,000	640,000	761,000
Toledo	73,000	33,000	121,000
Detroit	31,000	56,000	48,000
Kansas City	289,000	192,000	252,000
Peoria	281,000	201,000	427,000
Omaha	246,000	300,000	232,000
Indianapolis	384,000	425,000	684,000
Total	6,057,000	6,732,000	9,076,000
Shipments	4,971,000	2,944,000	3,709,000

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Aug. 9, 1919, with comparisons with 1918:

	1918-19.	1917-18.
Chicago	16,560,000	16,795,000
Milwaukee	317,000	217,000
Minneapolis	6,567,000	5,276,000
Duluth	505,000	37,000
St. Louis	10,979,000	13,048,000
Toledo	2,015,000	1,526,000
Detroit	231,000	204,000
Kansas City	18,989,000	20,302,000
Peoria	722,000	861,000
Omaha	4,500,000	4,778,000
Indianapolis	3,558,000	3,541,000
Total	64,943,000	66,585,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Aug. 9, 1919.	Aug. 2, 1919.	Aug. 10, 1918.
St Louis	2,159,000	3,600,000	3,312,000
Kansas City	4,431,000	6,183,000	4,519,000
Omaha	1,170,000	1,748,000	1,287,000
Toledo	508,000	636,000	302,000
Detroit	85,000	71,000	64,000
Indianapolis	813,000	1,041,000	899,000
Peoria	177,000	281,000	380,000
Chicago	5,100,000	6,443,000	7,703,000
Milwaukee	82,000	89,000	88,000
Minneapolis	1,888,000	1,423,000	2,016,000
Duluth	37,000	91,000	27,000
Total	16,450,000	21,606,000	20,597,000
Shipments	8,107,000	5,197,000	7,637,000

World's Wheat Exports.

Exports of wheat last week compared with previous week and year ago specially reported for this paper by George Broomhall's service:

	Aug. 9, 1919.	Aug. 2, 1919.	Aug. 10, 1918.
American	7,170,000	10,092,000	2,504,000
Indian	.....	.....	210,000
Argentine	2,248,000	1,774,000	2,823,000
Australian	2,450,000	2,645,000	680,000
Others	84,000	.....	30,000
Total	11,952,000	14,481,000	6,247,000

Exports of wheat since Aug. 1, 1919, commencement of European crop year, compared for three seasons:

	1919-20.	1918-19.	1917-18.
American	17,262,000	4,577,000	14,077,000
Indian	.....	490,000	1,306,000
Argentine	3,992,000	9,007,000	366,000
Australian	5,095,000	1,500,000	3,468,000
Others	84,000	62,000	91,000
Total	26,433,000	15,636,000	19,308,000
Season	.....	529,032,000	376,524,000

World's Corn Exports.

Exports of corn last week, compared with previous week and a year ago:

	Aug. 9, 1919.	Aug. 2, 1919.	Aug. 10, 1918.
American	2,000	.....	171,000
Argentine	2,844,000	2,116,000	50,000
African	112,000	74,000	24,000
Total	2,958,000	2,190,000	245,000

Exports of corn since Nov. 1, 1918, compared with last year and year before:

	1918-19.	1917-18.	1916-17.
American	3,504,000	25,704,000	40,847,000
Argentine	52,827,000	13,484,000	54,768,000
African	5,128,000	2,566,000	.....

American	3,504,000	3,350,000	6,452,000
Argentine	52,827,000	1,279,000	293,000
Others	5,128,000	.....	.....
Total	61,459,000	4,629,000	6,745,000
Season	.....	113,282,000	140,826,000

Wheat Stocks and Consumption.

Statement of the movement of wheat and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at July 1	2,942,000	226,000	4,289,000
P. receipts to Aug. 9	64,943,000	66,585,000	18,398,000
P. shipments to Aug. 9.	18,838,000	21,240,000	10,654,000
P. stocks on Aug. 9	23,251,000	16,866,000	1,599,000
P. consumpt'n to Aug. 9.	25,796,000	28,911,000	10,434,000

FOOD STOCKS ON HAND

Statement of the Federal Trade Commission of Foods in Store on June 1—Proof That Prices Are Due to Hoarding and Not to Scarcity.

"The comparative amounts of food stocks on hand June 1, 1919, as against June 1, 1918, in the case of many important foods, show that the stocks are considerably larger," says a special "memorandum" put out last week by the Federal Trade Commission as its contribution to the Administration camouflage of the "high prices" discussion. "On June 1, 1918, the United States stocks were in demand for feeding the armies of the Allies as well as the civilian population. The fact that stocks of many important foods were much larger on June 1, 1919, while prices were as high or higher apparently means that they are being withheld speculatively for a world demand which is not now here but which is expected when hunger-impelled strikes secure higher wages with which higher food prices can be paid.

"The statistics of stocks are from the latest and last issue of the Bureau of Markets Food Surveys, June 27, 1919. We use the quantities reported by identical firms for 1918 and 1919. Stocks held June 1, 1919, by other firms not reporting for June 1, 1918, increase the actual stocks from 5 or 10 per cent up to 20 or 25 per cent over the comparable stocks. The stocks are those in warehouses and cold storage houses and in hands of wholesale dealers. Retail stocks are not reported. The prices are wholesale prices, furnished by the Bureau of Labor Statistics, for the first Tuesday in June, unless otherwise specified. Foods that have increased in stock are first listed, then the total stocks of all foods covered by the Bureau's surveys are compared."

The survey tabulated gives the following comparisons:

COMMODITIES INCREASING IN STOCKS AND IN PRICE.

	Quantity			Price	
Commodity.	June, 1919.	June, 1918.	Inc. 1919 %	June, 1919.	June, 1918.

Manitoba Wheat Crop.

The Manitoba Department of Agriculture in a report issued last week, in part, says: Harvesting in Manitoba began this year almost unprecedentedly early. In nearly every part the weather during July was hot, over hastening ripening of grain, and generally reducing the possible yield. In the earlier districts binders were at work in the wheat fields for a full week before the close of July, and harvest was in progress in the latest districts by the beginning of August. This is about three weeks ahead of the usual date. Every correspondent reported entire absence of frost. The damage by hail has been slight, but rust is very prevalent in all grains; and this, together with the heat, has reduced the yield very greatly. In the worst rusted areas the latest crops will suffer very greatly, but the heads of the early crops are much better filled. The reports come of some damage by insects working among the crops. The rough estimates of correspondents as to the wheat yield average about 15½ bushels per acre, with varying prospects for coarse grains, and potato prospects somewhere about average, below rather than above. Almost everywhere there is enough straw, with a very generous supply on the average.

TO ALL LICENSEES.

Zone agents are advising licensees to buy wheat that the privilege of signing the United States Grain Corporation Trade Agreements has been extended to August 20, 1919. Dealers who have not yet executed the agreement and wish to take advantage of the protection offered therein, are notified that signed and properly executed agreement must be returned on or before August 20th, and that positively no agreements can be accepted after August 20th.

Italy Fixes Grain Prices.

A cablegram from Peter Jay, counselor of American Embassy at Rome, dated Aug. 4, 1919, says that a royal decree issued that day fixed the price of home-grown grain for 1920 at 70 to 80 lire per quintal of 220.46 pounds, with a supplementary price of 12 to 13 lire for grain of the Pronvinces which were invaded, of the Islands, and of certain zones of the Provinces of Rome and Grosseto. At normal exchange the Italian lira is equivalent to $0.193 United States gold.

Coming Conventions.

Aug. 15, 16.—New York State Hay & Grain Dealers' Ass'n, Onondago Hotel, Syracuse, N. Y.

Oct. 13, 14, 15.—Grain Dealers' National Ass'n, annual meeting, St. Louis, Mo.

FROM WASHINGTON

The Animus Behind the Attack on the Packers—Federal Trade Commission Report on Future Grading Coming Soon—Kicking at the Guaranty

By JOHN M. GLEISSNER.

WASHINGTON, August 9.—[Special Correspondence.]—Observers here are not at all surprised at the decision of the Department of Justice to bring both criminal and civil indictments against the big five packers. The Federal Trade Commission had amassed a tremendous amount of data about packer activities, none of which was favorable to them. This could not be repudiated by one department of the Government without repudiating the Federal Trade Commission, and it was not to be expected that one branch of Wilson's government would repudiate another branch. Furthermore, there has been a loud hullabaloo in the Capital about living costs these past two weeks. Executives publicly called the situation acute and promised action. Food costs are high and the packers are the biggest handlers of food. Ergo: bring action against the packers.

But observers here do not believe the Government's action will bring down the cost of living. They doubt if the Department of Justice will be able to convict the packers of the various crimes and near-crimes with which they are charged, and any dissolution or similar result would not be felt, if at all, for many months. Conservatives argue that the move of Attorney General Palmer is one of expediency and savors much of demagogy. Mr. Palmer has the reputation of being a very level-headed citizen, but also a very astute politician. It is not to be denied that officials of the packers, appearing before the Senate committees, made a distinctly favorable impression. They gave the wholesale prices of meat in Washington, which showed that retailers are making 100 per cent profit in most instances, and talked with apparent frankness. One point that should not be overlooked: Officials are alarmed at the growth of the packers and their branching out into other allied businesses. They contend that the public should be acquainted with the facts of expansion and the control exercised by a few over food supplies, and that court actions will have a salutary effect in calling attention of the public to this condition. They feel that such great control is dangerous, whether the packers are guilty of violating federal laws or not.

One interesting fact in the entire living cost question is that apparently little attention is given to the natural economic causes contributing so greatly to a high price level and the general wave of liberality sweeping the country. Little is said, publicly at least, about the tremendous expansion of currency in circulation, practically double the figure of pre-war days, which in itself would diminish the purchasing power of a dollar by half. Nor is much said of the inflation of credit during the war, which has brought about a condition which some economists argue is very much akin to the result of injecting greenbacks into circulation during Civil War days.

Many of the measures for relief thus far proposed seem to be superficial and super-imposed, rather than genuine efforts to reach underlying causes. It is not to be denied, of course, that there has been the wildest kind of profiteering in necessaries, and any real effort to curb this to legitimate bounds will be hailed by the country. The President, it is said, will not try to interfere with the natural laws of supply and demand, but he believes these laws in a great many instances are no longer operative.

There is a general tendency to relief at the diminishing probability of reduced wheat prices, with the Government paying out of its pocket the difference between a low price and the guaranty. At least, this is true among the more conservative of the President's official family. They want no "Roman bread."

FEDERAL TRADE COMMISSION ON FUTURES

The Federal Trade Commission is preparing a report on dealing in futures which will shortly be made public, it is learned authoritatively here. It is understood that the practice of dealing in futures, insofar as it tends to bring profits to others than producers of grain and other commodities, will be severely condemned, and Government regulatory action will be suggested.

REPEAL THE GUARANTY.

The Senate Agricultural Committee is shortly to consider the advisability of repealing the wheat guaranty law. There is apparently a division of opinion among senators from the agricultural states. Chairman Gronna of North Dakota favors repeal, believing that the farmers in this way would obtain higher prices for their wheat. Senators Norris of Nebraska and Capper of Kansas hold that the farmers will lose if the Government's fixed price is lifted.

Gronna charges that millers, and not farmers, are profiting from the fixed price. He says the Grain Corporation has used the Government's price to keep down the farmer's profit, while millers, jobbers, retailers and bakers are permitted to hike the price of breadstuffs all they please. Wheat, he points out, is now selling for much more than the guaranty, and he holds that it will go even higher because of world market conditions. Other senators argue that repeal of fixed prices would induce speculation and bring about an undesirable condition in the way. They argue that if the price is removed, wheat will flood the markets and congest transportation, causing a decline in price; then, they think, the price will rise, benefiting speculators and dealers rather than the men who raised the grain.

The question is forced temporarily into the background, pending proposals purchase by the Government of the entire year's crop, to be re-sold on the market at a lower price. This step is urged in order to reduce the general price level, in the belief that if bread is cheap, competitive food commodities will tumble in price in sympathy. This action has been suggested to President Wilson and his advisers as one way of solving the problem of high prices and is being considered by them. The whole situation, complicated by labor troubles, is too intricate for even the best informed to predict what will happen.

Observers say the President and Congress are in a mood to take drastic steps to do away with what they believe to be artificial causes aggravating natural ones. They hold that combinations, speculations, hoarding and general suspension of the laws of supply and demand are responsible to a great extent for a situation that is creating a terrific uproar in official Washington and occupying the time of both legislative and executive branches of the Government.

Charges that the Government itself is guilty of profiteering through the Grain Corporation were made to the House Aug. 5 by Representative Fairfax C. McCulloch, of Ohio. He made public a series of letters exchanged between Julius H. Barnes, head of the Grain Corporation, and himself, relating to profit made by the corporation. "When the wheat guaranty bill was under consideration by the House I contended that the loss which would result, if any, should be paid out of the treasury of the United States and not added to the price of bread to the consumer," said Rep. McCulloch. "The law passed by Congress placed the power in the President to handle the wheat situation as he saw fit, it being admitted during the debate that the United States Grain Corporation was the medium through which the President would act and that Mr. Julius H. Barnes, who would have charge of the United States Grain Corporation favored distributing the loss betw

Treasury and the consumer, or cing the loss entirely upon the con-ner. It now develops that Mr. rnes has not only placed the entire s upon the consumer, but has added rofit as well. During the month of rch it was admitted that as much 17 cents a bushel profit was added to guaranteed price of $2.26 bushel." tep. McCulloch produced a letter he l written to Mr. Barnes protesting inst profit-making by the Grain poration. "A constituent of mine," McCulloch wrote, "a large dealer grain, has just informed me he was ipelled to pay to the Grain Corpora-1 last week (April 12) $2.56 a bushel wheat, this amount being 30 cents ushel over the guarantee price paid the farmer. He says that it was ctically admitted that the 30 cents bushel over and above the guaran-price was to care for the expenses the Grain Corporation, such as in-ction and the like."

Ir. Barnes replied among other igs that, "It has been the policy of Grain Corporation to handle the eat situation on a basis which would fair to both the producer and con-ier and our records will show that have been very active in seeing that terminal price is properly reflected the dealer to the consumer. We e been able to secure restitution of idreds of thousands of dollars back he producers from the dealers. So as a policy of the Government is cerned for 1919, that will depend iewhat upon the development of the p and the extent of the demand oad, and the direction of the Presi-t, from whom Mr. Barnes, the sident of this corporation, has his ointment as wheat director."

1 reply Rep. McCulloch said he was osed to the Government creating a iopoly in wheat and selling it at a fit. "The people are now over-dened with the high cost of living," wrote, "and for the Government to ct a profit on the sale of foodstuffs ns to me to be little short of an out-e."

r. Barnes' reply was a history of Corporation's operations, in which said:

am perfectly in accord with you the Government should not create ionopolistic agency that lays burdens he consumer or on the producer. I so in accord with that, that during two years ending July 1, last, we l to operate the Grain Corporation iout any profit, merely earning for National Treasury the interest on money employed, for which the isury itself was paying interest to own people in its borrowings. As xperienced man you will agree with that after handling almost $2,000,-)00 worth of foodstuffs of various s in overseas shipment, a profit re-of one-half of 1 per cent was about ear operating without a profit, and out a loss, as could be calculated esult. . . .

f world-wide supply and demand in-ices could be reinstated today, that ie only just substitute for the fair-e expression which we are making tive, but in my humble judgment are totally in error in calculating t the effect of that supply and de-d influence would be if reinstated. ould be just as likely to result in er prices as in lower; whereas your le argument is constructed on the ng that the wheat price is sus-ed solely by the Government guar-, although for the past three ths the wheat price in this coun-ias ruled higher than the guaranty. because it is impossible to cacu-the exact price which would be tered by supply and demand that iave assumed the fair-price expres-which has ruled for two years is best measure now attainable.

1 international trade the conver-of British sterling alone within the week fluctuated the equivalent of ents per bushel and every trade-ling facility along the line be-n producer and consumer faced any such fluctuating hazard iat one item of exchange would in-sure against it by excessive trade margins, and would greatly widen the spread between the producer and the consumer. There is, therefore, a real public service at this time in the Grain Corporation acting as the guarantor against such trade hazards, and thereby establishing moderate trade margins along the line of conversion."

FARMERS FIGHTING THE GUARANTY.

Senate and House Agricultural Committees, meeting this week, will have under consideration proposals to remove the Government's guaranteed price for wheat. Senators from the agricultural states are backing the plan, and national farm organizations also with offices in Washington are urging it. They would abolish the Grain Corporation, arguing that the fixed price has proved to be a maximum rather than a minimum, and has served to deprive them of higher quotations they argue are warranted by world market conditions. Officers of National Grange asserted before the Senate committee that had not the guaranteed price been in effect wheat would have gone to $5 a bushel and that farmers are being robbed of a billion dollars on this year's crop. The National Board of Farm Organizations takes a similar stand. They also complain of the grading system, which they say reduces the price received by the farmer much below a fair figure.

Exports of foodstuffs continue heavy, according to a report on traffic issued by the Railroad Administration. This report shows that on July 30 there were 10,280,209 bushels of grain stored at North Atlantic ports awaiting export, while at South Atlantic ports there were 3,817,527 bushels. During the week of July 30, 3,613,016 bushels were received for export, while 2,868,-897 bushels were cleared.

A bill has been introduced in the House to prohibit the misbranding or adulteration of commercial feedstuffs.

Visible Grain Supply.

The following table shows the stock of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons, as compiled by the secretary of the Chicago Board of Trade for the week ending Aug. 9, 1919 (000 omitted):

Grain Corporation Weekly Report.

The United States Grain Corporation's weekly bulletin giving the complete figures covering the wheat and wheat flour movement throughout the United States for the week ending July 25th, in comparison with the figures for the same period a year ago, is as follows:

Wheat—	1919.	1918.
Recpts from farms, bu.	51,665,000	40,283,000
Receipts previous week	33,793,000	32,516,000
Receipts from farms, June 27 to July 25	107,939,000	105,432,000
Stocks, all elevators and mills, bu.	80,638,000	64,544,000
Stocks, previous week.	53,824,000	43,698,000
Change for week, bu.	+26,814,000	+20,846,000
Flour—		
Produced during week, bbl.	1,976,000	1,870,000
Previous week	1,753,000	1,590,000
Produced June 27 to July 25, bbl.	6,268,000	5,319,000

GOVERNMENT AND PACKERS

Further Reply to Assistant Secretary Ousley on the Beef Situation and the Attack of the Government on the Packing Industry in General.

This paper has had more or less to say with reference to the attack of the Government, through the Federal Trade Commission and the Department of Agriculture on the packing industry, and those who are interested in this subject are recommended to reread editorial matter in the numbers bearing date July 9, 16 and 23, which will add to the understanding of the following on the same subject, addressed under date of July 22 by L. F. Swift of Swift & Co. to Hon. Clarence Ousley, Assistant Secretary of Agriculture:

"Allow me to call your attention to the fact that your statement of July 4th explaining high prices of meats is in some respects manifestly misleading, and that it does the packing industry a gross injustice.

"Although the packers are not mentioned specifically, the whole statement, issued while an agitation for drastic legislation against the packers is in progress, gives the definite impression that federal regulation of the packers is the only solution for high prices. That this interpretation is not fanciful is evidenced by the write-ups that the statement received in newspapers all over the country. Not content with one issuance of this statement, I find that it has been sent out again, in abbreviated form, for release to newspapers on July 18th.

No criticism can be raised against the following points, quoted directly from the review, for they are facts known to all those in touch with the meat trade. Certain words have been underlined by the writer to give added emphasis:

"1. 'Prices of good and choice beef cattle on foot at Chicago have declined about $4.00 per hundred-weight or nearly 25 per cent since March 1, while lower grade beef cattle have declined as much as 15 per cent.'

"2. 'During the same period wholesale dressed beef prices show on the average approximately a corresponding percentage of decrease, which varies, however, in different cities from about 15 per cent to 30 per cent.'

"Since these facts by themselves apparently clear the packers from any responsibility of high prices, the Department of Agriculture has gone out of its way to find some other method to show that the packers have profiteered. It therefore says that the increased values of hides and by-products have been an unseen source of profits to the packers.

"In making this charge, the Department evidently jumped to certain conclusions without ascertaining the facts. The actual records of Swift & Company, for example, show that the charge is utterly without foundation. With the exception of three weeks in May, Swift & Company has lost money each week since January on its dressed beef business, after giving full credit for hides, fats, and by-products, due to the relatively high prices being paid for live cattle as compared with the prices we have been able to get for meats and by-products. For ten weeks this loss averaged from $5.00 to $7.00 per head, while for the last four or five weeks the loss has been reduced to about $1.50 per head. We shall be glad to give you every possible opportunity to check our figures, if you so desire.

"Higher prices for by-products have merely made the packers' losses smaller than they would have been. They have also resulted in a smaller difference between live cattle prices and wholesale beef prices than would have otherwise been the case. The values of by-products are taken into account in the competitive buying of cattle and sale of meats.

"From these facts it is perfectly obvious that it was entirely unjust to the packing industry to insinuate that it is obtaining undue profits because of the increase in the value of by-products, and we are indeed surprised that the Department of Agriculture should have so carelessly misrepresented us in such a serious matter.

"In the face of these facts, there appears to be no justification for your sweeping conclusion—'The facts demonstrate clearly the commanding need for governmental supervision over the manufacture, sale and distribution of meat products'—especially as such a conclusion is bound to be interpreted as an official endorsement of proposed legislation restricting the packing industry, and is destined to give the impression that such legislation can bring about lower meat prices, or higher cattle prices, or both.

"It is generally conceded that expenses have been reduced to a minimum by the packers, and that since their profits on meats, including the returns from cured hides, refined oils, rendered fats, and other by-products, amount to only a fraction of a cent per pound, no possible kind of legislation can have the effect of lowering meat prices as compared with the price of live stock. It is our view that Government interference can only decrease efficiency, increase expenses, and thereby cause higher prices of meat as compared with the prices paid for live stock.

"In view of the seriousness of your statement, I wish to ask whether there is not some way in which this matter can be set right before the public."

NEW POLICY AS TO WHEAT.

The United States Grain Corporation announces that there will be no storage premiums added to the basic prices in its buying scale, for the present nor until there accumulates in the Grain Corporation's hands a sufficient reserve of wheat to secure a measure of protection for future home requirements.

In accordance with this policy the Wheat Director is refusing proffered contracts which foreign buyers are desirous of making at the Grain Corporation price level, these buyers being apparently anxious to cover their requirements for some months in advance. Apparently, their inability to secure supplies in other sources of wheat makes them especially urgent in proposing contracts with the United States, but these contracts can not be entered into until a sufficient accumulation of wheat in the hands of the Grain Corporation furnishes assurance of reasonable prices to our own people.

Corn in Primary Markets.

Receipts of corn in eleven primary grain markets from Nov. 1, 1918, to Aug. 9, with comparisons with 1917:

	1918-19.	1917-18.
Chicago	51,825,000	75,718,000
Milwaukee	4,720,000	10,926,000

The Letter Box

Texas Corn Crop.

Price Current-Grain Reporter: Texas has a record crop of corn and the movement has begun in the extreme southern part of the state.—*Reinhardt & Company, McKivney, Texas.*

From Ford County, Illinois.

Price Curren-Grain Reporter: I closed out my seed business and went to work for Noble Bros., during the war.

There will be a little timothy seed in Central Illinois and what clover there is is looking good.

Ten farmers near Gibson City tried out Rosen rye last fall and have a good crop this year.

Corn is good prospect, oats were not very good. The recent rains have provided plenty of moisture.—*John T. Oxley, Gibson City, Ill.*

Grain Moving Slowly.

Price Current-Grain Reporter: Wheat threshing continues to drag and railroad conditions have made it impossible to empty country elevators, most of which have a liberal quantity in their bins.

Weather here past week has been most favorable to the growing crop, sunshine and rainy days alternating in about the right proportion. Very little corn has gone to market recently and it will probably be some time before the railroads will be in shape to furnish cars for corn in addition to those urgently needed for wheat, but the time is approaching when our usual after harvest movement of corn should occur.—*H. I. Baldwin & Co., Decatur, Ill.*

Crops in Central New York.

Price Current-Grain Reporter: Report for this section of New York state: Oats are a short crop, not over 50 to 60 of normal; corn looks good but is late and will need good corn weather and a late fall to mature. The wheat acreage is less than a year ago, but the crop is good. Buckwheat acreage is smaller than a year ago, but at present the crop looks good. The potato crop will be rather light—would estimate it at not over 60 to 75 per cent of normal.

The timothy hay crop is good, but on account of rainy weather much of it is not yet cut.

Of beans, a good acreage was planted and there is a good stand, but on account of late planting the crop is late.

The weather has been very unfavorable for the harvesting of crops.—*The Page Seed Co., Greene, N. Y.*

The Australian Situation.

Price Current-Grain Reporter: I have your letter of August 4th, enclosing copy of article in your last issue on "The Australian Wheat Situation." The article in question was not written by me, as you know, and I knew nothing of it until I saw it in your paper. It strikes me, however, as being a fair summary of the general situation with reference to their handling methods; it apparently having been written from that standpoint.

There is one feature, however, which is not very fully covered, in my opinion, and that is the transportation question with reference to bulk handling in Australia. I am a thorough believer in bulk handling and think that Australia should get into it as soon as possible, and it is extremely unfortunate that the political aspects in some of the states have been such as to delay this movement. One of the greatest difficulties, however, to be overcome is the qestion of cars for transporting grain from country points to the terminals, as all of their grain heretofore has been shipped in open cars. To continue to handle grain in open cars means a bagging proposition until it gets to the terminal market. At least, as I see the situation, it will undoubtedly take several years before they build boxcars such as we have in the states, for shipping grain, so that it will be protected.

I have never released any of the results of my personal investigations in Australia for publication, although report has been made to the Department.—*J. W. T. Duvel, U. S. Grain Corporation, New York City.*

From Licking County, Ohio.

The Price Current-Grain Reporter: The wheat crop in this locality we believe to be better than the average; for, while disappointing for the amount of straw harvested, the yield per acre is very good. The danger now is that some of it may rot in the shock, on account of frequent rains and owing to the fact that much of the crop still remains in the field.

The prospect for a good corn crop is surely flattering, and if "Jack Frost" is at all generous we certainly will have a "bumper" crop.

The crop of mixed hay was very good, but there is very little pure clover or timothy. This being true, one can not expect a large acreage of either to be cut for seed, and reports from the farms show a decidedly poor yield per acre for timothy. We believe that the hot, dry weather at filling time is responsible for this.

We like THE PRICE CURRENT very much, and we are always interested in the reports from the "other fellow." That's why we are sending ours.—*C. S. Osburn & Co., Newark, Ohio.*

From Northwestern Missouri.

Price Current-Grain Reporter: Our crop conditions are not as good as expected on July 1. The wheat crop is poor; usual grade 3 and 4, sometimes as low as 5; yield, 10 to 15, with an occasional yield of 20 bushels. The acreage was large, yield and quality very disappointing.

We think our corn crop is damaged fully 25 to 30 per cent by dry, hot weather in the last days of July & first days of August. We have had good rains the last few days, and conditions are much better now.

Oats are not up to the average; yield, 30 to 35 bushels with fair quality.

Meadows were very good as we had plenty of rain early in spring. Other forage crops are promising a good yield.

A new elevator is nearing completion at Braymer, Mo. This elevator is being built by the Farmers Co-operative Society, with C. D. McCartney as manager, an all round good fellow, and a fine business man. The Morrison Grain Co. of Kansas City, at 301 Board of Trade Building, will probably build an elevator at Cowgill, Mo., within the next year, and the writer may possibly be interested with them.

We have shipped large quantities of corn from Iowa and South Dakota in the past eight months, selling later at $2.00@2.05-10 to the farmers to feed cattle and hogs. The cattle and hogs are mostly marketed. The crop of young hogs is an average.—*A. F. McCray, Cowgill, Mo.*

Wheat Situation Difficult.

The railroad situation has caused most of the wheat buyers to withdraw from the market, as they fear a complete tie-up. This has made the sale of wheat difficult, especially the low grades; most everything is going at basic prices except that on Friday last slight premiums were secured on choice Red Winter and Northern Spring. If the trouble is not settled it probably will be necessary to sell all wheat to the Government at basic prices.—*W. H. Perrine & Co., Chicago.*

Export duties from Argentina for August of linseed in bags are 7.7 pesos; linseed in bulk, 6.24; wheat flour, 0.306; tallow, 21.3; these rates being per metric ton payable in Argentine gold, equivalent to 96½c per peso.

HANDLING CANADIAN WHEAT.

James Stewart, formerly head of the Canadian Wheat Purchasing Commission, has been appointed chairman of the new Wheat Board which has been created for the purpose of handling the Canadian wheat crop. The Minister of Trade and Commerce states that the board will comprise ten or twelve members, several of whom will constitute themselves an executive committee.

The board, called the Canadian Wheat Board, is composed of the following: James Stewart, of the Wheat Export Co., chairman; W. A. Matthieson, Winnipeg; W. A. Black, Montreal; C. B. Watts, Toronto; H. W. Wood, Carstairs, Alberta; Norman McLeod Patterson, Fort William; W. L. Best, Ottawa; F. O. Fowler, Winnipeg; W. H. McWilliams, Winnipeg; Joseph Quintal, Montreal; Col. J. Z. Frazer, Burford, Ont.; and F. K. Wm. Riddell, Regina. Canadians consider the personnel of the board as representative of the various branches connected with the grain trade.

The Minister states that there is an apparent misunderstanding of the purpose of the Board and of the proposals which have been agreed upon for the handling of the crop. "It is being represented," he declared, "that the government is fixing a minimum price for wheat, such is not the case. What the government proposes is to pay the farmer a set price as the initial installment on his wheat. It will then relieve him of the responsibilities of marketing, etc. When the grain is sold on the markets of the world, the farmer will secure the difference between what he got and what it brought minus transportation and other charges." This statement was made no doubt in answer to many telegraphic protests from western Canada who understood that the $1.75 price was the maximum as well as the minimum price.

The government's plan is sharply criticised by the Simpson-Hepworth Co. in the *Grain Trade News* who in part say: "This will mean that the farmer who sells his wheat when the international price may be the lowest will receive as much as the farmer who holds his wheat at home, and ships when the world's price is highest. In other words, every farmer will be on the same basis — individual initiative and judgment as to market trend will be destroyed.

"Again, the question arises: Is the government working in the interest of European buyers or for Canada? The price is put at the lowest level that in all probability would be witnessed under open market conditions; and indeed we question whether the $2 mark would be reached under conditions of excessive marketing with an open market. On July 28 No. 1 Dark Northern Spring was worth $3 to $3.05 and even Common Durum was selling at $2.35 to $3.45 at Minneapolis. Canadian authorities in themselves are not strong enough to curb the rising costs of commodities, and in view of the great strength in the United States wheat market above the guarant price of $2.26, why should the Canad farmer be made the target for rep sion and curtailment of his business, government action? When a gov ment undertakes to acquire a busi or a public utility, the assumption that they can do it cheaper and be than an individual or private corp tion; but it seems to us that in ev activity engaged in by government is loaded down with greater expe than would be done under reg trade channels, and individual act

"The machinery and organization handling grain by both European North American grain dealers car be excelled, and as to ocean tonn and financing of grain bills; there competent organizations for attend to that end of it, and so long as government exercises its power in stabilizing of sterling exchange, procuring an equitable distribution ocean tonnage for Canadian shipp we fail to see what further assista they can render to the Canadian g trade or to the farmers. A future m ket for wheat would enable grain t carried in store without risk to holder, or buyers to anticipate fu requirements, and for which they not ready to take delivery.

"We venture the opinion that American wheat will remain consta over the guaranteed price of $2.26, to hand out our farmers $1.75 wit promise of something more—perha later on, is not founded on good b ness judgment, nor is it fair, eithe the producers or to the trade who l spent their lives and capital in buil up the present machinery for hand the business."

NEW HOME OF KIESTER-HA SEED CO.

A seed concern which bids fai become prominently identified with distribution of the fine crops for w the state of Iowa is noted is the K ter-Hall Seed Co. of Waterloo, Ia. its personnel are men of wide ex ence. H. E. Kiester, president, widely known as a keen publicity m George Hall, vice-president, a seed pert of national acquaintance, has m a life study of seed and done muc wards producing good seed and b crops. The directors of the comp are mostly representative men Black Hawk County.

A few weeks ago the company its first annual meeting of the sh holders, with about 150 members guests in attendance. The mee which was followed by a banquet, of great interest, in that sev speeches bearing on the develop of better seeds, better crops, inter cultivation, etc., were delivered. new home of the Kiester-Hall Seed as illustrated herewith, gives t ample facilities for housing the y crop and for meeting the 1920 seed mand which it is anticipated will l unusually large proportions.

BARLEY MARKETS.

WAUKEE.—The Milwaukee barley et is firm and cash changes for week show an improvement, the et closing 1@2c higher. Receipts ie past week have been somewhat and the demand is good especially from local industries. For the past week Milwaukee has been the highest market in the western territory due to the fact that new barley is coming in light weight and chiefly unsuitable for industrial purposes, owing to large shrinkage. New barley is being sold at a discount under old. At week-end session barley was wanted and firm, with light receipts and prices higher, with a good demand and the market well cleared. During the past week 162 cars arrived compared with 242 cars a week ago and 52 cars in 1918. Current quotations are: Good to choice, 48 to 50 lb. test, is quotable at $1.45@1.50; bright, $1.51@1.52; fair to good, 45 to 47 lb. test, $1.40@1.47; low, 41 to 44 lb. test, $1.32@1.39; feed, $1.32@1.40. Iowa quoted $1.35@1.50 for light to fancy; Wisconsin, $1.38@1.52; Minnesota, $1.35@1.50; Dakota, $1.35@1.50; feed and rejected, $1.32@1.41.

BUFFALO.—Barley dealers had little to offer on spot and there was a good demand from maltsters for choice old. There has never been a wider range in prices here than at present due to the light weight new offerings. Quoted prices were: Malting, $1.42 to $1.58; feed, $1.35 to $1.42 on track or in store, Buffalo.

KANSAS CITY.—Under the embarrassed transportation conditions incident to the railroad shopmen's strike, the week's receipts of barley fell to one car. The market was only a nominal affair, but prices were quoted up 4@7c a bushel, to $1.38@1.39 for No. 3 and $1.35@1.37 for No. 4. Very little threshing of any kind of grain has been done in Western Kansas, where most of that state's barley is grown. A good movement is expected unless the farmers get the "holding" idea into their heads. It is not believed that the crop is of very high quality, especially as to weight. Dealers in barley feed report little interest just now, as buyers look for lower prices and are able to buy wheat shorts for less than barley chop. The unloading of cars accumulated previously caused an increase of 4,000 bus. in local stocks of barley, making 6,000 bus. in store, as compared with 82,000 a year ago.

DULUTH.—Trade fell off in the barley market during the last week. Specialists in the trade reported that Eastern demand appeared to have been satisfied for the time being. Some fresh buying developed at the end of the week however after the appearance of the government crop report and price firmed up. Quotations closed unchanged to 3c up. Receipts during the week aggregated 152 cars against only 3 last year.

PORTLAND.—An increased movement in barley market is noted, exporters absorbing all offerings. There is also some inquiry from interior feeders who have become somewhat exercised over the advancing quotations. Buyers now, the *Commercial Review* says, are in the country securing crops wherever the growers are in the mood to sell. Exports from the North Coast are not expected to be large. Most of the requirements will have to be filled in California. The *Review* quotes No. 3 blue barley $66@67, feed $66.

SAN FRANCISCO.—The barley market is very active and prices advancing daily. Quotations of $3.20@3.25 per cental are quoted by the *Review* with futures for December delivery at $3.35 @3.40 and holders not at all anxious to sell. The trade generally expect values to go higher in view of the fact that the crop of the North Coast is only about 50 per cent normal.

MINNEAPOLIS. — Prices are holding rather stiff and there is a good demand for the limited offerings of choice barley. Ordinary barley is in fair demand and thin and oaty stuff is rather quiet. Most of the new barley is thin and of low grade quality on account of the lack of weight. The color is good. Prices today quoted at $1.15@1.42.

CHICAGO.—The barley market last week was very dull and unsatisfactory. The week began with a heavy market and declining prices and continued so almost to the end. The choice barley was taken from day to day by the maltsters and the industries, but the lower grades were very slow. Supplies were ample, although offerings were not great and a considerable quantity of barley was loaded out of the elevators. The threatened strike and general condition of the transportation system at the time of course had its influence upon the market, curtailing receipts as well as interfering materially with the Chicago Inspection Department, the strikers not permitting the inspectors to get at the cars in the yards. On Saturday, however, the tone was considerably better and prices reacted from 2@3c while futures were noticeably stronger. On Monday of this week the market had a stronger undertone. The offerings were light and the principal buying was on maltsters' account. Shippers, as was the case last week, took comparatively little; no export inquiry reported. Sales of 18 cars were reported at a range of $1.35@1.45. Futures were stronger. September sold up to $1.29 and closed at the top. September, new, which opened at $1.37, closed at the top of $1.38. December closed at $1.38¼ bid. Exports from Atlantic ports for the week amounted to 2,400,000 bus. compared with 360,000 the corresponding week a year ago. The visible supply is shown in the regular table.

RECEIPTS AND PRICES OF RYE.

Receipts of rye at the principal primary markets of the Central West for the week ended August 8, and for the corresponding week last year, as reported by the Minneapolis *Market Record* were:

	1919. Cars.	1918. Cars.
Minneapolis	202	126
Duluth	77	...
Chicago	212	182
Omaha	33	3
Milwaukee	21	14

Aug. 5	1.34½	1.38	1.51	1.41	1.51
Aug. 6	1.46	1.48¼	1.48½	1.40	1.49½
Aug. 7	1.44¼	1.46½	1.50½	1.30	1.54
Aug. 8	1.45	1.48¼	1.49½	....	1.52

Rye Crop Report Bullish.

Rye had an exciting week, fluctuating over a range of 20c per bu. last week, reaching its low point on Tuesday and closing Saturday at about the previous Saturday's price.

The Government crop report was doubly bullish as to rye. Not only did it shrink available rye 18,000,000 bus., but it shrinks wheat, and the less wheat there is for export the more the demand for rye will be increased.

Meanwhile rye flour prices remained abnormally low as the result of feed prices being high. — *Blodgett-Holmes Co., Janesville, Wis.*

REPORT ON THE CEDAR RAPIDS MILL EXPLOSION.

Joseph G. Hubbell, manager of the National Inspection Company, of Chicago, recently issued a report on the loss of the Douglas Starch Works at Cedar Rapids, which contains a careful discussion of the various features of construction, processes and hazards. Mr. Hubbell concludes that this explosion did not involve all the dry starch departments and that it evidently took place also in wet process buildings, in which there was some dry starch.

He concludes that the explosion was of a progressive character, the place of origin being somewhat in doubt, and, "by projecting air blasts through the doors and conveyors connecting these sections, filled them with a starch dust cloud caused by smashing and upsetting of conveyors, packages, bins, trays, etc., and went to the end with increasing speed and compression until the building structure gave way.

"It seems clear," says Mr. Hubbell, "that, as these explosions are initiated almost entirely by manufacturing operations having to do with dry starch, the grinding mill was probably the cause here. It is clear that proximity of this mill to other departments and its connection to these by spouts, conveyors and doorways afforded an easy avenue of spread for drafts and ignition."

A number of suggestions for control of starch explosions and underwriting against them are made in the report. Among these the following appear especially important:

"As dry starch grinding is known to be the most prolific cause of starch dust explosions, it is clear this operation in all starch plants should be conducted in detached buildings not connected with any other buildings by conveyors, spouts, elevators, passageways or any other enclosed space through which a draft or dust cloud can be set up or an impulse propelled into other buildings or along which flames may flash or burning stock be conveyed to other sections. If not so separated such connected sections should be regarded as subject to one possible blow up with the grinding department.

"All dry starch buildings engaged in different operations, and finished dry starch warehouses, should be separated so that there is no chance of an explosion in any one producing a dust cloud in another or of propelling a dust cloud into another or of communicating flame thereto at a time when the jar of explosion in one may have stirred up a dust cloud in another. Dry starch packed goods warehouses are not likely to originate explosions but, because of character of contents, would certainly be able to pick up and extend an explosion coming into them from other sections. For that reason they should be detached.

"All material handled between dry starch handling, milling, packing or storage sections should be conveyed only by carts on trucking ways which may have shelter roofs but should never have enclosed sides."

Corporation Flour Prices.

In furtherance of the statement made following his recent conference with the President that flour would be placed on the market at $10 a barrel, Julius H. Barnes on Friday last wired agents of the Grain Corporation authorizing them to make the following announcement in their zones:

"The Grain Corporation is prepared to divert from its flour purchases and to sell and deliver to wholesalers and jobbers straight wheat flour in 140-lb. jute sacks on a basis of $10.25 delivered in carload lots in territory east of the Illinois and Indiana line and east of the Mississippi from Cairo to the Gulf, and at $10 delivered in carload lots on track west of that line, but now applying to Pacific Coast territory.

"Jobbers and wholesalers who purchase such flour from the Grain Corporation are required to guarantee not to sell it at more than 75c additional. Wholesalers and jobbers must in turn require that the retailer shall not sell at more than $1.25 additional to the wholesale price in original packages and at a price not higher than 7c a pound for broken packages of any size."

In a statement of same of its weekly purchase of wheat flour, the Corporation announced that there were purchased of all flours, soft, hard, Durum and blended, for August and September delivery at Baltimore, packed for export, 1,031,013 bbls. at prices ranging from $9.80 to $10.40 per barrel. It is expected that the Corporation will announce from week to week the result of its calls for flour offers and the amounts it accepts from the mills.

BROOM CORN.

The *Broom Corn Review* reports very high temperatures in the Southwest with only scattered showers in northwestern Oklahoma and some fair rains in western Kansas and eastern Colorado. Broom corn areas appear to be in better condition there than in other parts of Kansas and Oklahoma. The crop in western Kansas, Colorado and New Mexico is reported in good condition.

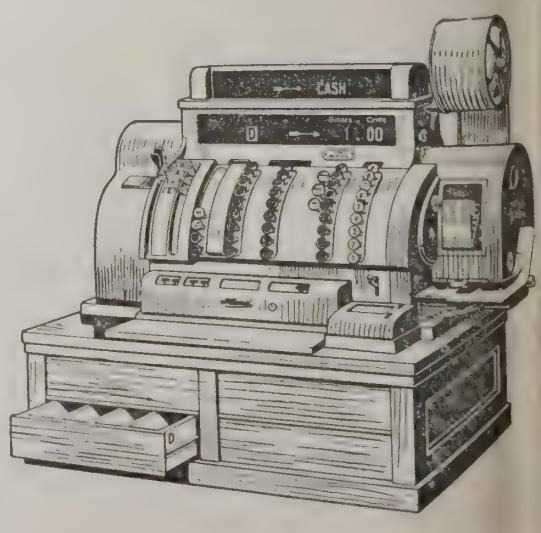
Very little corn has been marketed in the Southwest recently and prices continue practically unchanged at $60@100. In the Lindsay district prices on the opening market ruled from $100@265 according to quality, the bulk selling for $150@225. Trading on the Wichita market the past week was confined to old corn at prices from $90@125. Some South Texas corn was offered at $15(250. Stocks of old corn are very lig In Central Illinois the movement v very light during the past week; c crop reported sold at $225.

Car Shortage.

The car situation is becoming qu serious and unless there is quick re the entire wheat belt will be tied so far as country elevators are c cerned. Indiana, Illinois and e Iowa are complaining that their hou are full of wheat and car supply ina quate and uncertain, with oats hang on waiting for their chance.

Plowing for fall seeding is beginn in Michigan. Late rains have grea improved the soil for that purpose.

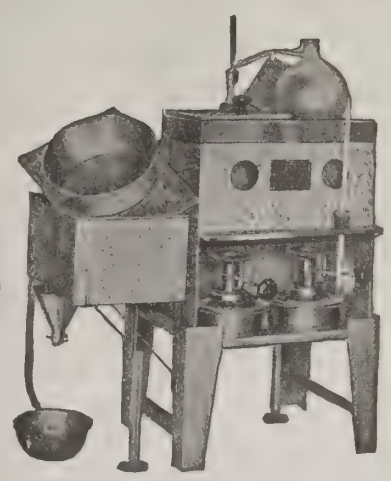
6800 PEOPLE



Make nothing but National Cash Registers

THEY work with the best materials that we can buy. They are well organized. They are carefully trained. Their working conditions are good.

They are making a machine that is the result of 35 years of study. Into this machine we have put thousands of suggestions from merchants all over the world.



These 6,800 workmen are doing their work so well that we are making and selling more than 325 registers a day.

In Case of an APPEAL

Your position is exceedingly precarious if your grades are not backed up by the proper Government method of grading. The Zone Agent says: "Proper grading of wheat by standard Government methods cannot be over-emphasized."
Now that the wheat is moving you need the

SEEDBURO (Trade Mark) Standard Official Brown-Duvel Moisture Tester

for whole or ground grains) is the only standard tester approved by the Government. It is being used by Government supervision offices, Grain Inspection Departments, Mills and Elevators from coast to coast. Made in sizes of -2-4-6 tests at a time, heated by alcohol, gas or electricity.

When you buy a moisture tester you want the **Standard**—the **same** tester that the Government inspection departments, terminal markets and big grain shippers use.

That one is **SEEDBURO.** We supply the Government with **all** testers used by them. Don't take chances with ny other make. It's been expensive for some who have tried it and failed to get the same tests as the state terminal markets who use our **Standard** Testers.

No. 14—Special Four-in-One Scale

This scale, designed and manufactured by us, is a small, mplete office scale for weighing samples for moisture test id for determining test weights per bushel, dockages, eights for mailing samples, etc.
This "Four-in-One" Agate Bearing Scale is the most complete, compact, accurate and adaptable scale made. Quick eaking and guaranteed accurate. Will do the work of ur ordinary scales designed especially to satisfy any one the above needs and at the small price of one. Used by ousands of country shippers, receivers and grain men erywhere. Price with weight per bu. cup, $23.00.

Dockage Sieves also are very necessary at this time and are effectively used in connection with the scale.

Order a Set at Once—Dockage Sieves for Wheat and Oats.

Government Specifications—made throughout of aluminum, 13 inches in diameter telescoping, only two pieces of metal are used, thereby making the sides seamless. The bottom perforations are of aluminum, which makes the construction strong, light weight and will not rust. Set consists of

A—Scalper Sieve, round perforations, 12/64 inch.
B—Buckwheat Sieve, triangle perforations, 8/64 inch.
C—Fine Seed Sieve, round perforations, 1/12 inch.
D—Chess Sieve, slot perforations, 4½/64x¾ inch.
E—Solid Bottom Pan.

Price $8.00 for complete set.

Crop Reports

Compiled by GEO. A. WELLS

CHANGES THE WHEAT OUTLOOK.

The deterioration of the small grain crops during the month of July was enormous. The Government report for August, which indicates a decrease as compared with the estimates of July 1 of 221,000,000 bushels of wheat, the largest loss known in a single month, reduced the 1919 wheat crop to 940,000,000 bus. Of this crop 600,000,000 will be required for bread and seed, leaving 340,000,000 for export, the average annual exports of wheat being about 200,000,000 bushels. The extraordinary demand under the reconstruction conditions, the serious loss to the wheat crops of Europe by drouth, and the small carry-over from the last crop, have completely changed the situation from a probability of the world's price level being below the U. S. Government guarantee price to the possibility that wheat will even be worth a premium above the Government price; and farmers are now asking Congress to repeal the Government wheat price guarantee.

The spring wheat crop in the Northwest is a partial failure and so deficient in milling quality that Northwestern mills are shipping wheat from the Southwest to perfect the blending necessary to maintain their quality standards.

The situation is evidently such that Mr. Barnes does not consider it necessary as yet to place an advancing premium on the guaranteed wheat price to encourage the farmers to withhold deliveries. Possibly he may experience a reversed situation, in which the farmer may develop into the most dishonorable kind of speculator, in the light of the present day code of morals relating to food supplies.

It is a thrilling situation, so far as the grain trade is concerned. The grain merchant who can assume the ownership of grain these days under such violent market fluctuations as arise from unnatural and abnormal causes and avoid bankruptcy on one hand or the penalties of profiteering on the other, is neither more or less than a "fool for luck."

The Government now estimates the corn crop at 2,788,000,000 bushels showing a loss in the crop during July of 2,700,000 bushels. Iowa, however, showed a gain in the crop during July.

The oat crop is now estimated by the Government at 1,266,000,000 bushels as compared with last year at 1,538,000,000 bushels and the crop is lighter in weight than last year.

Compilations.

The compilations given below are based on reports given by our correspondents on August 4-8 and any changes in conditions since those dates should be taken into consideration.

SOIL CONDITION.—The soil condition is reported almost entirely "favorable," in the states of Ohio, Minnesota, North Dakota; largely "favorable" but "too dry" in considerable portions in the states of Indiana, Illinois, Missouri, Iowa, South Dakota; and almost entirely "too dry" in the states of Nebraska, Kansas and Oklahoma.

TEMPERATURE.—The prevailing temperature during the past two weeks has been largely "too hot" in Illinois, Missouri, Iowa, North Dakota, South Dakota, Nebraska, Kansas and Oklahoma, and more generally "favorable" in the states of Ohio, Indiana and Minnesota.

CORN.—Basing the Government term normal at 100, the comparative percentage of growth condition of corn at this time as compared with our reports two weeks ago is as follows:

GROWTH CONDITION OF CORN.

	Now.	Two weeks ago.
Ohio	91	92
Indiana	82	90
Illinois	83	90
Missouri	82	81
Iowa	94	96
Nebraska	86	93
Kansas	72	89
Oklahoma	76	89

According to the above reports the flat average now is 83 as compared with 90 two weeks ago, thus showing a depreciation in the corn crop condition of about seven points during the past two weeks. General rains have occurred throughout the corn belt, so that it would seem that we have a substantial promise of a corn crop of about 2,750,000,000 bushels as compared with 2,582,000,000 bushels last year.

OATS.—The reports as to growth condition of oats at time of threshing show considerable depreciation as compared with our report of two weeks ago as follows:

GROW CONDITION.

	Now.	Two weeks ago.
Ohio	72	81
Indiana	72	76
Illinois	70	73
Iowa	75	82
Minnesota	71	78
North Dakota	71	77
South Dakota	75	79
Nebraska	83	84
Kansas	81	89

The climatic effect on the oat crop during the month of July was such as to make the estimating problematical as the fields were spotted as well as different localities. The oats in some sections are light in weight but grade well as to color.

General Reports.

The following general reports as to threshing yields of spring wheat, winter wheat and oats are self-explanatory:

OHIO.

Bucyrus (1): Winter wheat is not yielding the amount of grain to the acre that was expected (20 bu. per acre). No spring wheat grown. Oats about 75% of a normal crop. Too many extreme weather conditions for the crops this year.

Middletown (3): Lot of wheat out in fields spoiling.

Greenville (2): Wheat disappointing in yield and light weight, about one-fourth below expectations. Oats about same as wheat. Farmers holding some wheat, also oats.

Portsmouth (6): Corn looks fine, best prospect in years. Wheat quality and yield disappointing. Oats good quality and yield.

Eaton (2): Winter wheat disappointing both yield and quality, very small crop.

Xenia (2): Wheat averaging 18 bu., mostly No. 3 grade. This is about 60% of expectations. No spring wheat grown here. Oats very poor, not over 50% of a crop either in yield or quality.

Agosta (5): Wheat averaging 25 bu., mostly No. 3 or 4. No oats threshed yet.

Rockford (1): We are having fine rains the past two days. Makes the corn in fine condition for earing.

Liberty Center (1): Big rain Aug. 4 at 3 A. M.

Bryan (1): We received rain on August 4-5 which will greatly benefit the corn. Temperature very favorable to growth and maturing of corn. Winter wheat yield 24 bu. per acre. S. W. 11 bu. Oats 35 bu. per acre.

Blanchester (3): Wheat turning out one-half to two-thirds of prospects June 1.

Ansonia (2): Wheat average per acre 17 bu. Oats about 35. We had a fine rain here July 5th. Will make lots of corn. Fine for young clover.

INDIANA.

Tipton (5): Wheat practically all threshed, yield about 70% of normal.

Winchester (8): Winter wheat averaging about 16 bu. Poor quality. Oats about 30 bu., good color, but very light, testing 25 to 30 bus. Hay scarce and high, no clover seed.

Wabash (4): Spring wheat near failure. Winter wheat yield average about 14 to 15 bu. and mostly grades 3 and 4. Oats acreage small, yield light.

Kendallville (7): It has been too dry for corn and pasture and potatoes until this week, we have had good rains but it did not come in time. Dry weather had burned the corn and considerable is beyond help.

Laurenceburg (9): Yield of winter wheat about 15 bu. Oats 30 bu. No spring wheat.

Vincennes (3): Wheat yields low, quality low in most cases.

Rushville (8): Our wheat crop all in, made 16 bu. per acre over this country. Tested about 57 to 58 all over country.

Monticello (1): We have had extremely warm weather, but showers have been good for corn, but slightly injuring growth before the rains. Wheat poor yield, light weight, large per cent of No. 3. Oats light.

Marion (5): Winter wheat yield average about 15 bu. Oats about 35.

Greenfield (5): Wheat yield only fair. Corn backward, too hot and dry.

Jasper (3): Winter wheat average is about 13 bu. to acre. No spring wheat. Oats 35 bu.

Waveland (2): The last two weeks have cut the corn crop one-fourth or more. Oats 20 to 40 bu. yield. Some few fields in a little higher. Winter wheat 10 to 25 bu. Quality poor.

Portland (7): Yield on winter wheat has been generally good, running from 18 bu. to 35. Quality good. Oats not much threshing done yet. Crop about average, however spotted, yield 30 to 45 bu. Good rains.

Decatur (7): Wheat yielding from 6 to 27 bu. Oats 30 to 45 bu. Rains all around us. Need a good one here to help corn.

ILLINOIS.

Highland (6): Soft wheat (winter) is yielding an average of 15 bu. per acre, which is one-third less than expected in the spring months.

Paris (8): Winter wheat 10-23 bu. done. Spring wheat 5-14 bu. done. Oats 12-48 bu. nearly done.

Belleville (3): The average yield is about 19 bus. to acre winter wheat. Oats about 50 bus. to acre, light weight, hot weather before it was cut made the damage.

Pocahontas (3): Corn is practically a failure. Oats one-third crop. Threshing yield average 15 bu. Oats 20.

Eureka (1): Winter wheat 10 bu.-30 bu. average, possibly 17. Spring wheat 8 bu. Oats average about 30.

Rockport (2): Red winter wheat yield is about 12 to 15 bu. Spring wheat none. Oats about 20 bu., very poor.

Sidell (8): Threshing returns about as follows: Oats average 35 bu.; winter wheat 18 bu.; spring wheat 10 bu. Extreme hot and dry weather shows about 15 to 20% damage to corn.

Nashville (3): Altogether too hot and dry for corn. Firing in many places and indications now are that the crop will be extremely light.

Ashland (5): Winter wheat average yield 20 bu. of fair quality. Wheat (spring) failure and oats very light crop, average yield 25 to 30 bu. of light weight.

Freeport (4): Threshing returns show light yields, wheat 10 to 20 bus., oats 25 to 45 bus., barley 10 to 30. rye 20.

Lostant (4): Good yield of winter wheat. Spring wheat and oats yield considerable lower than normal crop. Spring wheat 10 bu. to acre and oats 30 bu. acre.

Mt. Carroll (4): Winter wheat yield 20 to 24 bus., spring wheat 12 to 20 bus., oats 25 to 60 bus.

Ashton (4): Some corn injured by heat, yield of winter wheat 17 to 35 bu. Spring wheat 12 to 24 bu. Oats 15 to 40 bu.

Wenona (4): Oats will average about 30 bu. per acre. Winter wheat 22 to 23. Spring wheat 10.

Sparta (6): Winter wheat is yielding from 10 to 14 bus. per acre. Oats very disappointing. Corn about 60% acreage, and not over 60% condition.

Princeton (4): Wheat 25 bus. to acre. Spring 15. Oats 30.

Vermont: Winter wheat yielding from 16 to 22 bu. Oats about 25 to 40 bu. No spring wheat.

Mattoon (8): Winter wheat average about 18 bu. Spring wheat average about 10. Oats average about 28 bu. per acre.

Marshall (8): Wheat not to exceed 60%. Oats but few threshed, about 50%. Quality poor (light). No spring wheat sown.

Decatur (5): Showers last week helped some, need more as corn was badly in need, think safe for good crop with rains next 10 days.

Riggston (5): Wheat is yielding from 17 to 29 bus. Oats about 18 to 20 bus.; poor crop, not very good.

Odell (7): 75% corn and 60% on oats. Local showers have helped corn, but much is fired. Winter wheat about 24 bu. Spring from 3 to 15 bu.

MISSOURI.

Lamar (3): Wheat yields are mostly making from 15 to 20 bus. per acre. Average about 16 bus. No spring wheat in this locality. Oats yielding from 12 to 25 bus. per acre. Average about 17 bus

Chillicothe (1): Wheat yielding 15 bu. oats 35 bu.

Carrollton (2): We have had some very hot dry weather until the first of August, when we had a nice rain that will hold the corn for a while.

Higginsville (1): Believe corn is damaged about 10%.

Salisbury (4): We have just had a good rain, our early corn is made and one more good rain will make our late corn. Thr ing under way, yields disappointing.

Marionville (3): Threshing returns dicate 75% of wheat crop.

Clinton (1): Wheat is turning out f 8 to 15 bus. per acre, occasionally yi 20 per acre. Quality poor, crop very appointing.

Bethany (1): Oats and wheat too n straw. Oats making 10 to 25 bu.

Paris (5): Wheat averaging abou bu. Spring wheat almost a failure. 35 bu. per acre.

Harrisonville (1): Our wheat is run 12 to 20 bu., weather favorable for thr ing.

Richmond (2): Winter wheat 14 bu

IOWA.

Corydon (6): Wheat yielding 10 t bus. Oats 20 to 40 bus.

Marcus (1): Wheat 5 bus., some d thrash it. Oats 24 to 27 lbs. per bu., 40 bus. to acre. Corn needed rain which would have made good corn. many fields of corn didn't fill, lots of chaffy corn.

Guthrie Center (2): Winter w seems to be yielding 16 to 18 bus. Sp wheat around 10. Oats 25 to 35 bu.

Hull (1): Threshing just begun. W is poor and oats just weigh out.

Whitten (4): Yield of winter and sp wheat poor and of poor quality. yield from 30 to 50 bu.

Lowden (8): Winter wheat ave about 25 bu. Spring wheat 8 to 15 Some kinds very poor grains, other h fair quality. Oats average 25 to 30 test, 35 bu. per acre. Crop 30% less last year, and from 4 to 9 lbs. lighte weight. Today we are having our fine general rain, badly needed by and pasture. Have had an immense crop.

Gilbert (5): Winter wheat going 10 to 15 bu. I do not know of any sp wheat. Oats will make close to 40 bu o' 25 to 32 lbs. in weight.

Patterson (5): Winter wheat is ma from 12 to 25 bu. per acre. Spring w 5 to 8 bu., and oats about 25 bu.

Wright (5): Winter wheat 18 Spring 7 bu. Oats 35 bu. Rye 17 bu.

South English (9): Spring wheat 8 to 10 bu., poor quality. Winter w yield 10 to 20 bu., poor quality. Oats 12 to 45 bu., quality good, but a little in weight.

Indianola (6): Hard wheat yieldir to 30 bu., mostly 20. Spring wheat a 10 bu. Oats about 30. Recent rain made early corn. Threshing about done.

Belmond (4): Spring wheat yields a 10 bu. per acre. Oats 25 to 30 bus.

Onawa (2): Winter wheat average 15 bu. Spring wheat 5 bu. Oats 30

Wall Lake (2): Winter wheat yie to 15 bu. Spring wheat 5 to 10 bu. 30 to 40 bu.

Arthur (2): No winter wheat. Sp wheat total failure. Oats 30-35 bu., weight.

Keokuk (9): Wheat average 16 bu. 52-58 for winter wheat. Spring w tests 40-55. Many fields not worth cu White oats light weight, poor yield; oats good.

Moulton (6): Winter wheat yield 15 bu. Spring 3 to 10. Oats 20 to 30 very light.

Henderson (3): Fall wheat is yie about 20 bu. per acre. Spring wheat oats not threshed.

Hamlin (2): Winter wheat is fair 15 to 20 bu. Spring wheat nothing. about 35 to 40 bu.

Osceola (6): Winter wheat yields 22 bus. Spring wheat 7 to 15 bus. 15 to 35 bu. Timothy seed 2 to 5 bu

Allison (4): No wheat at this point, are very light, testing 24 to 31 lbs. pe

Washington (8): Winter wheat rather small yield and light in we testing from 54 to 59 lbs. Oats te from 27 to 32 lbs., yield small.

Clemons (5): Wheat 6 to 15 bu acre. Oats 12 to 25 bu.

New Sharon (5): Winter wheat ing 20 bu., spring wheat 7 bu. Oats 25 to 70.

Spencer (1): Oats 60% of normal. W very poor.

Spencer (1): Winter wheat 5 to 2 Spring wheat practically nothing. run light and 22 to 34 lb. average. ably 28 lbs. Yield likely to show 30 bu.

MINNESOTA.

Donnelly (7): No threshing been yet, but all reports are about one-ha a crop for this year.

Franklin (6): Wheat poor, 4 to per acre. Oats light and poor.

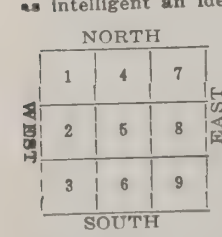
Minneota (3): Wheat yield 3 to 1 per acre. Oats 5 to 30. Quality of poor. Oats are light weight but qu good.

Albert Lea (6): Spring wheat very yielding one report 5 bu per acre, an 4 bu. and another 10 bu. Quality poor, not much better than chicken Oats 25 to 50 bu., light weight.

Prior Lake (6): Winter wheat yie about 22 bu. No spring wheat or threshed.

Hutchinson (6): Corn that was w is in good shape, but the grain field not mature.

Hayward (6): No threshing has done in our territory yet.



Warren (1): No winter wheat her threshing yet.

Wells (6): No threshing being here yet.

Eden Prairie (6): Wheat all harv and started to thresh. Goes from

LOCATION KEY.

Explanation.—In order to give the reader as intelligent an idea of the districts from which all crop and local trade condition reports are received, they are numbered to correspond with divisions shown in the accompanying diagram, the numbers 1, 2 and 3 representing the western one-third of the state from north to south; 4, 5 and 6 in central third, and 7, 8, 9 the eastern third. Figures indicating these locations will appear in all crop reports, in letters referring to trade situations in beans, feed, hay, etc. Each state will be treated as a square body.

bu. an acre. Poor grade. Corn looks d. Oats fair, 20 to 25 bu.
lenderson (6): Winter wheat yields 14 20 bu. Spring wheat 6 to 14 bu. Oats to 35 bu. All wheat blighted, not to eed 48 to 55 lbs. to bu.

NORTH DAKOTA.

labon (7): No threshing done yet, harting just commenced. Spring wheat naged 50% by hot weather. Oats and ley will make a good crop, some winrye 15 to 22 per acre.
reat Bend (9): Spring wheat 10 to 8 per acre. Grade 3 and 4, down to 45 a bu.
rayton (7): Spring wheat threshing 10 days or two weeks. Spotted wheat much light wheat. Oats will be light, fair yield.
akota (7): Spring wheat about 50% naged by rust.
argo (8): Spring wheat poor. Yield be about 8 bu., light weight. Oats only fair.
angdon (7): About 75% of oats cut. t crop. Spring wheat about ready to good crop.

SOUTH DAKOTA.

iller (5): No oats or wheat threshing orted. Barley so far 20 bu. per acre.
ankton (9): Spring wheat is threshing n 4 to 10 bu. to the acre, with very quality. Oats are of fair yield and lity—running from 25 to 35 bu. to the .
ookings (8): No winter wheat. Exsome spring wheat threshing this k provided rains do not interfere. Oats 25 to 40 bu. Barley 15-25.
itchell (8): Wheat from 2 to 10, avre 6. Oats 20-35, average 25. Oats light in weight. 20-30, average 26.
urley (9): No winter wheat here. Some ng wheat will not be threshed. Most rop will probably be feed. Too inr for shipment.
inton (9): Very little winter wheat, 15 poor quality. Spring wheat about 5 test 44-51 lbs. Oats 60% crop.
oerdeen (7): Not enough threshing to an estimate, load of new wheat ded today testing 55 lbs.
idgewater (8): Corn needs rain to e a good crop. Stand about 75%.
ark (7): With rain in week will have 0% corn crop, but oats will not be 70%, barley 70% and wheat 40% of year.
ll Rapids (8): No winter wheat here. ng wheat a failure here. No reports ats as yet.
reford (9): Oats light in yield and ht. Wheat same.
andreau (8): Spring wheat 8-13 bu., turn, some fields not cut. Oats 30-40.) lbs. test.

NEBRASKA.

leans (6): Winter wheat threshing rds show 22 to 32½ bus. per acre. ng wheat poor, very little threshed. light, few threshed.
perior (9): Winter wheat average t 15 bu. Parts not threshed, but exnormal average.
ranton (9): Wheat threshed, average 15 bu. Quality will average No. 2. ng wheat almost a failure. Oats a crop.
ood River (9): Winter wheat average u., will grade from No. 3 to No. 5.
ntral City (9): Winter wheat average bu., 54-55 lbs. average test. Spring t very poor. 3 to 8 bu. testing 40-s.
seland (9): Wheat average 8 bu. ng from 52-55 lbs., some 56 and as low 6 lbs.
perior (9): Winter wheat is yielding u. Oats 35.
irmont (9): Wheat threshed out about u. average testing 56-57 lbs.
rvard 9): Corn has suffered from and long dry period; must have rain or little corn.
hland (9): Corn fields short of cuion account of wet spell and harvest. Good growth. Some wheat yielding 1. Good quality.
nnetoon (7): Winter wheat 5 to 10. ng nothing to 4 bu.
atrice (9): Wheat averaging about 1. for winter, oats about 25 bu.
braska City (9): Winter wheat about u. average. Oats 25, spring wheat 8

rce (7): Winter wheat 12½ bus. ng wheat very poor. Oats 17½.
mphrey (8): No winter or spring t worth mentioning.
ligh (7): Corn needs rain badly. have rain this week or corn will r badly.
den (7): No wheat, oats yielding t 30 bus.

KANSAS.

y Center (4): Nicely as far as I can Wheat is running from 12-30 bu. cre, and testing from 52-60 lbs. The ner has been very hot and dry for ays. Should we get rain soon will some good corn.
more (2): Wheat making from 5 to . Oats 15 to 40 bu.
ney (2): Winter wheat is averaging per acre, spring 10. Oats about 35. is 50% more old corn in cribs and r here than usual at this time of

ction City (7): Winter wheat should ge 17 to 18 bu.
inville (4): Corn in good shape but rain soon.
cordia (4): Winter wheat in Cloud y will make a yield of about 15 bu. cre. No spring wheat around here. Oats are making good yields, some are yielding as much as 75 bu. per acre.
Athol (4): Winter wheat 18 bu., spring wheat none, oats 40 bu.
Alta Vista (8): Wheat is yielding disappointment. Only about 10 to 20 bu. Oats are not very good.
Greenburg (6): Here will average about 12 bu. of 56 lb. wheat. Oats 25 bu., barley 40 bu. It is too dry and hot for corn.
Hillsboro (5): Our threshing yields for winter wheat runs from 5-19 bu. Test from 50-59 lbs. No spring wheat raised in this vicinity. Oats crop is not as good as last year, test from 30-33 lbs.
Pleasanton (8): Corn needs rain very badly, and without moisture in a few days 70% will be too high.
Mahaska (4): Very dry and hot here. Corn has held its own but is going the trip fast now, no rain here since July 26. Oats 90%. Wheat from 3 to 25 bu. Average about 16.
Wellington (6): Dry hot weather has about finished the corn.
Neodesha (9): Our crop soft wheat 60% of a crop. Damaged by too much rain before and during harvest. Average yield 12 bu. against 20 bu. last year.
Waldo (5): Yields are disappointing, and also quality. Test runs from 48-56 with very little running to dark. Threshing slow for want of machinery and disappointing. Wheat yield from 4-15 bu.
Oswego (9): Winter wheat about one-half threshed. Yield 15 bu., test 56 lbs. Oats light yield about 20-25 bu.
Wakeeney (2): Winter wheat is yielding all the way from 6 bu. per acre to 30 bu. testing from 46 lbs. to 58 lbs.
Madison (9): Little rain since July 4, very hot and dry, corn needs rain badly.
Wichita (6): Winter wheat from 6 to 22 bus. Oats from 16 to 40 bus.
Schroyer (7): Wheat around 20 bu. Oats 25 to 30. Wind blowing hot.
Humboldt (9): Wheat yields about 15 bu. per acre.
Seneca (7): Yield of wheat varies from 12 to 35 bus. No spring wheat raised here. Oats about 30 to 40 bus. Unless we have rain in the very near future corn will not yield much. Badly damaged now.
Uniontown (9): Winter wheat 15 to 20 bu. No spring wheat raised here. Oats 25 to 30 bu.

OKLAHOMA.

Miami (7): Wheat averaging 18 bu. (red winter). Oats 30 bu. Much corn firing on account of dry weather. Need rain badly. Yield would be good if could get good soaking.
Geary (2): Yields running from 10 to 27 bu., test from 50 lbs. to 60 lbs. Estimate average yield at 18 bu. on wheat. Oats excellent quality and yield 40 bu.
El Reno (5): Winter wheat about 15 bu. Oats 45 bu.
Kingfisher (4): Wheat about 60% of June estimate.
Enid (4): Winter wheat yields average about 10 bu. per acre, quality generally No. 3 wheat.
Enid (4): Winter wheat yield 12 to 20 bu., average test 56 to 59. Oats about 40 bu. average.
Cordell (2): Winter wheat about 18 bu. to acre.

PORT COLBORNE ELEVATOR DESTROYED.

The Port Colborne elevator on the Welland Canal, owned by the Canadian Government, was wrecked by an explosion on Aug. 9, and eight persons killed and a score more or less injured. One of the dead was found in the debris of the elevator and three others in the wreck of the steam barge *Quebec* lying on the beach outside the harbor, where she was towed to prevent her sinking. One of the badly injured was the superintendent, D. S. Harvey, who may even now be dead.

The explosion occurred shortly after the elevator hands returned to work from dinner. The concussion shook the whole town, and windows in nearby buildings were smashed. Flames spread through the wreckage, but because of fireproof construction they soon burned out, and an hour after the explosion rescue parties were at work.

The condition of the interior of the elevator indicated that the explosion occurred and spent its greatest force in the upper part of the structure. The roof was blown off, and parts of it fell a mile away. The elevator legs and bins below were broken up and crashed through the ground floor.

The *Quebec* moored at an elevator leg, was smothered under a pile of similar wreckage as she heeled over, and a huge rent was torn in her side by a block of concrete that came from the top of the elevator. The barge quickly began to list forward, and to prevent her sinking with the injured pinned to her decks, she was towed outside the breakwall and beached.

The elevator was built eight years ago at a cost of $2,000,000. It had a capacity of more than 2,000,000 bushels, and the bins were said to be about one-third filled with grain, mostly wheat. The loss is estimated at $1,800,000.

WESTERN GRAIN DEALERS MUTUAL FIRE INSURANCE COMPANY

HAZARDOUS CONDITIONS

This is the season of the year when country grain shippers usually make repairs on their elevators preparatory for the handling of the next crop, and we urgently suggest attention to the following hazardous conditions, namely:

Windows:—Broken or open. **Doors:**—Out of order; no fastenings; not locked at night. **Siding:**—Openings in, or warped away from wall. **Roof:**—In bad condition. **Foundation:**—Openings in. **Cob Room:**—Not closed, or husks and dirt allowed to accumulate. **Dust Room:**—Accumulation of dust and dirt. **Pulleys:**—Wooden. **Gasoline Engine:**—On wood floor; gasoline leaking; torch ignitor; gravity feed; improper method of starting engine; supply of gasoline too near engine or not properly protected; accumulation of oil and dirt about the engine. **Electric Power:**—Not properly installed or neglect in use of. **Dust and Dirt:**—Accumulation in elevator. **Weeds and Trash:**—Allowed to remain around elevator. **Chimney:**—Defective. **Stove:**—Floor, walls or ceiling not protected. **Oily Rags or Waste:**—Thrown about the premises. **Bearings:**—Not oiled, allowed to become dry and heat. **Wooden Spittoons:**—Cigar stubs thrown in. **Lights:**—If electric, not rightly installed or protected. If lanterns, carelessly used.

The correction or elimination of all such hazards will materially reduce the danger of fire, will reduce the cost of insurance, and avoid serious loss.

ENLARGED OMAHA TRADE.

Our regular Omaha terminal market news on another page refers to the settlement of the railroad situation which had seriously although briefly congested in and out shipments. This great growing Western market is surely ideally located to handle virgin wheat and other cereals, and the Omaha grain trade has made a close study of distributing methods. It seemed particularly unfortunate, therefore, that the present crop movement should be embarrassed, as far as Omaha's share is concerned, by railroad strikes and restricted movement of milling wheat and merchandised grain. The elevator interests of Omaha are keyed up for big business and they want it known among the trade that their present unloading, shipping and rail connection facilities are unhampered and that their early plans will be carried through with but little delay in taking care of Central, Eastern and Southern business.

It is reported from Kay County that Kansas farmers are exhibiting an inclination to hold their 1919 wheat, believing that even a better price will have to be paid than now offered.

Sec'y Culbertson of Illinois reports 40 new members since the annual meeting in May.

CASH PRICES FOR GRAIN.

Following is a statement of the weekly range in cash prices for grain as mentioned in the leading markets of the country for the week ending Aug. 9:

CORN—	CHICAGO.	ST. LOUIS.	KAN. CITY.	OMAHA.	MILWAUKEE.	PEORIA.
No. 1 mixed	189 @198	.....	.....	.....	.....	.....
No. 2 mixed	189 @202	188 @196	183 @195	182 @193	190 @201	190 @200

News of the Terminal Markets

CAIRO, ILL.

J. E. Clancy, Correspondent.

Receipts of oats the past week have been light. Shipments are some better. The dealers report an increased demand.

Hay harvest has been completed. There was an exceptionally good yield of timothy and clover and the quality is fine. The alfalfa yield has been disappointing, both in quality and quantity.

The condition of corn is poor. Some corn so far gone rain will not benefit it as the ears are fully formed, and are small and poorly filled. The prediction is for from 65 to 75 per cent of last year's crop, which was poor.

Threshing of wheat is nearly completed. The average yield in Alexander county was 12 bushels, against 18 last year. More wheat is being held on the farms than ever before, due to the financial condition of the farmers and the allowance of storage by the food administration. Farmers have started breaking ground for the seeding of wheat.

Owing to the lack of building the past two years and a steadily increasing population, Cairo has been facing the problem of providing houses and a company is now being formed with a capital of $100,000 for the erection of two to three hundred homes to accommodate the employes of the Menominee Electric Co., which will move here from Menominee in October.

MEMPHIS.

George Williamson, Correspondent.

The Delta Flour & Feed Co., M. G. Odeneal, president, has made application for membership in the Merchants Exchange. They have just opened up a big distributing agency here.

The Charles Tiedeman Milling Co., of O'Fallon and Collierville, Ill., has obtained quarters at 50 No. Front, and will in a few days open up a big distributing branch for their output. J. N. Whiteside, recently sales manager for a local grocery concern, will be in charge of the branch.

The rail situation has affected business all during the week and until it is cleared up there is no prospect of improvement. Receipts have been small and so have shipments, but the trade had already prepared itself for a dull period. Some of the reports from this territory say that yield of corn will be materially cut by the prolonged dry, hot spell. This means that business with the trade here during the coming season will be good, for there is prospect of high prices of cotton and a better yield than thought possible a short while ago.

Quotations on corn in this market are practically nominal, according to members of the trade. There is but little for sale and brokers are unable to name a price except at the shipper's confirmation. The mills are grinding little meal and the slow-up in feed manufacturing has lessened demand for the colored and mixed. The very high prices continue to restrict buying and oats are used more in the mixed feeds as grain basis than corn. The latter have been quiet all week and sales within the last day or so have been made around 79c basis track here. The firmer markets Saturday gave an improved tone and caused holders to stiffen their ideas.

NASHVILLE.

John Leiper, Correspondent.

Receipts of grain at Nashville last week were 398 cars. Stocks at the end of the week were as follows: Flour, 34,800 bbls., increase 8,800; wheat, 872,000 bus., increase 262,000; corn, 82,500 bus., increase 27,500; oats, 169,000 bus., increase 29,000.

Demand for corn meal continues light, with prices easy. Bolted corn meal, sacked, is quoted at $4.40@4.50 per 100 lbs., f. o. b. Ohio River points. Corn mills with capacity of 154,800 bus. reported output last week of 28,716 bus., or 18.5 per cent of capacity.

Flour trade was almost brought to a halt last week, so far as new business was concerned, by the campaign against high food prices at the National Capital. There was considerable concern among both buyers and millers, but the situation seemed to be more satisfactory with developments of the Grain Corporation policy, and other phases. Prices were almost nominal, but practically unchanged, as follows: High grade soft winter patents, 98 lbs. cotton, f. o. b. Ohio River points, $11 @11.50; standard patents, $10.75. Southeastern mills, with capacity of 191,910 bbls., had output last week of 141,747 bbls., or 73.8 per cent of capacity, which compared with 73.2 per cent of capacity by mills reporting for the same week last year.

Continued heavy movement of wheat was the important feature of the grain trade last week. Mills are now accumulating good stocks. Corn is in moderate supply, and the cash article has responded very little to the violent changes in the contract market. The demand is only fair. Oats are in fair supply and lower: Quotations: Wheat, No. 2 red, local, $2.15@2.20. Corn—No. 2 white, $2.10 @2.15; No. 3 white, $2.05@2.10. Oats—No. 2 white, 81½c; No. 3 white, 81c; No. 2 mixed, 80½c.

Jefferson D. Hardin, Jr.
Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

There is no ear corn arriving in the local market and price is nominally quoted at $2.15 for best grade.

There is nothing new to report in the straw market. Arrivals continue light but sufficient to meet all demands at this time. Best grades of oat straw are selling readily at $10.50@11 a ton. Sixty tons were the receipts last week.

Arrivals of shelled corn continue very light and there is practically no change in local conditions. The demand is hardly up to arrivals, although these have been low. Prices are advanced in conformity with market conditions elsewhere. No. 2 yellow is at $2.08@2.10; No. 3 yellow, $2.05 @2.06.

Mostly new oats are coming into the market and unsettled conditions prevail. There has been a great decrease in receipts for the last period, only 60,000 bushels having been bulletined, as compared with 136,000 for the same period a year ago. It is difficult to effect sales, although prices have been shaded somewhat, owing to the unsettled conditions of the market. Buyers are following a very conservative policy and stocking only what they need for immediate use. Best grades are selling at 82½@83c a bushel.

SIOUX CITY, IA.

Paul Larson, Correspondent.

Owing to the shopmen's strike, receipts of grain have been light during the past week. Very little corn moved, most of the receipts were oats and wheat.

Very little spring wheat is being moved in this section of the country, farmers are not willing to sell at the basic price and are holding their wheat for a premium. The Sioux City mills are receiving wheat from southern Nebraska which is of good quality.

The six terminal elevators under construction here made great progress the last ten days, due to the favorable weather. There has been a little drawback in getting switching of material owing to the strike, but have been able to get in twenty fours a day.

Another million-dollar terminal elevator project was launched here last week with the filing of articles of incorporation of the Farmers' Elevator Company, which will erect an elevator on the site formerly occupied by the old pickling works in North Riverside. J. J. Gill, of Elk Point, S. Dak., is president; C. F. Downing, Ute, Ia., vice-president; R. N. Rawson, Hornick, Ia., treasurer, and A. P. Soelberg, Sioux City, is secretary. Other incorporators and directors are C. F. Corr, Salix, Ia.; Charles Frick, Yankton, S. Dak.; E. M. Parry, Kingsley, Ia.; Willard Sanders, Geddes, S. Dak.; R. R. Pollock, Akron, Ia.; E. B. Kast, Scotland, S. Dak.; G. Harter, Armour, S. Dak.; C. J. Brown, Jefferson, S. Dak.; J. F. Gamerding, Remson, Ia.; C. W. Felton, Sioux City, and A. P. Soelberg, Sioux City.

TAMPA, FLA.

Leonard Selz, Correspondent.

C. H. Moorhouse is back at his desk and is being warmly greeted by his many friends among the grain and feed trade. Mr. Moorhouse underwent a painful operation at a hospital in Indianapolis.

No. 2 mixed corn is offered at $2.30 per bushel and stocks are very light. Recent arrivals of Argentine corn found the local market practically bare and but little interest is being accorded current quotations. The demand is light from country points. Receipts this week, 3,000 100-lb. bags.

Considerable nervousness was felt among local dealers the early part of this week over market conditions and extreme uncertainty as to how far reaching the effect would be in case of the Government placing wheat as an open commodity. The heavy decline in corn and oats caused our dealers to assume a watchful waiting attitude from which they have not entirely recovered.

The effects of the railroad shopmen's strike was marked by the refusal of the Seaboard Air Line here yesterday to accept further shipments of anything excepting food for human consumption. The Atlantic Coast Line has not as yet issued an embargo order. Up to this time but little difficulty has shown itself in regards to carlot shipments entering this market and stocks of all feeds, grain and hay are ample. It is believed that the embargo order will not be of long duration.

No. 3 white oats are quoted at 92½c. This price represents considerable recovery from the low levels reached the early part of this week, when No. 3 white oats were quoted as low as 87c. No Texas R. R. P.'s have reached this market so far and their arrival is looked forward to with a great deal of interest. Reports from Texas shippers show that a large volume of receipts from country elevators are not running better than No. 4 and that practically all receipts show more or less stain. Receipts of oats have been fairly heavy here during the past week, amounting to 42,000 bushels.

OMAHA.

Leigh Leslie, Correspondent.

The Smith-Vincent Grain Company last week received from the Farmers' Grain Company, of Nehawka, Nebr., a car containing 2,251 bushels of wheat.

E. E. Richardson, who for some time has been manager of the Wells-Abbott-Nieman Company's Omaha branch, has severed his connection with this company to go with the Omaha Flour Mills Company.

On account of the railroad shopmen's strike and the resulting several days' embargo on grain shipments, receipts of wheat in this market were light last week. Now that the embargo has been lifted, the prospects are that the wheat movement will increase very materially.

The members of the Nebraska State Press Association visited the Omaha Grain Exchange last Thursday, John T. Buchanan, president of the exchange, made a brief address of welcome in which he quoted figures showing the growth of the exchange from one of the smallest into one of the largest institutions of its kind in the country.

Committee Lifts Embargo.

At a special meeting Friday the Omaha Grain Control Committee decided to remove the special embargo on Omaha and to thus open this market to shipments of grain.

It is believed by railroad authorities that President Wilson's announcement that Director-General Hynes is authorized to take up the demands of the railroad shopmen for higher wages and to decide them on their merits, provided the shopmen return to work and again recognize the authority of their organization will quickly bring the strike to an end.

W. M. Jeffers, of the Union Pacific, chairman of the Omaha terminals committee; Fred. Montmorency, general freight agent of the Burlington; Henry T. Clark, traffic manager of the Omaha Grain Exchange, and Mr. Wilson, of the federal food administration, held a special session Friday afternoon and decided to let the wheat and other grains pour into the Omaha terminals and elevators.

Special permits had been required of grain shippers during the previous few days, because of the strike and the attendant damage to motive power. The allotment of grain cars into Omaha terminals will be 311 cars per day.

At the opening of the strike there were 1,400 cars of grain in the Omaha terminals and about the same number loaded and destined to these terminals. It was decided that no other cars should be loaded for their destination, but after Friday's meeting this embargo was removed.

DULUTH.

S. J. Schulte, Correspondent.

The first lot of new wheat for the season was received on the Duluth market on Aug. 9. It graded dark northern, but tested only 48½ pounds. It brought $2.12.

Frank W. Falk and J. H. MacMillan, Jr., of Minneapolis, have been elected to membership in the Duluth Board of Trade. The former has made an engagement with the Becher-La Bree Co. as a buyer on the trading floor, and the latter will become a member of the Cargill Commission Co.'s force on the board here.

With few exceptions, all the wheat samples that have been shown so far on this market have been lightweight as a result of the lack of moisture over western Minnesota and North Dakota. Samples that stacked up favorably came, however, from Minnesota districts, where rains were received at critical periods.

R. M. White, of the White Grain Co., is back in harness again after completing a 5,500-mile auto trip extending over six weeks. He ran from Duluth to Chicago and Washington and then on to New York and Portland, Me. He found the corn crops backward over a territory extending from Chicago to New York state. He was especially impressed by the dried up condition of pasturages in the East, which in many districts were so bad that farmers were compelled to feed new hay to their cattle. The hay crop he found to be on the bumper order within a radius of 100 miles of Duluth.

The Duluth Sampling Bureau has opened up offices at 222 and 224 West First street. It is in charge of J. E. McNamara, who had been first assistant chief inspector of grain in the St. Paul district. The bureau has experienced samplers at various points where samples are taken for the trade. It is also announced that the bureau is prepared to send samples o cars of grain at the request of their ers or agents, for which a nominal c of 25 cents a sample will be made. supervisors of samplers are under jurisdiction of the warehouse commis chief grain inspector, G. H. Tunnell, Paul.

W. W. Bradbury, representative o Van Dusen-Harrington Co. on this ket, returned from a recent inspectio extending from western North D through to the Red River Valley to nesota. He expressed the belief wheat will not run more than 4 bush the acre over wide areas of North D while he found the crop to be smutty in the Red River Valley, where cond were supposed to be favorable. Gr of all kinds of grains will sustain losses through depredations of gras pers and other insect pests this seas asserted. He found the flaxseed cr have been greatly helped over e North Dakota by recent rains.

Barley is inactive and easy at $2.4 per cwt. for cash No. 3.

There is nothing doing in the market. Flour is dull with consumers ing off for the lower prices promis Government officials. All classes o feed are in active demand and firm.

Beans were in active demand ea the week and were quoted firm at Later demand came to a sudden en the market was weak at $8.25. The buying was largely for export.

Oats are in fair demand and offi rather light. The market is stea 78c for cash No. 2 white, 78½c for white, 77½c for No. 4 white, 76½c fo No. 2 white and 75@75½c for new white.

Demand for rye increased late week and some sales were made for ern shipment. Local milling dema not amount to much. The mark vanced to $1.50 for cash No. 2 an quoted firm at the close.

Trading corn has been quiet fo eral days. The market recovered fr early depression, but demand did n crease and receipts were very Quote: Cash No. 3, $2.02; No. 3 $2.05; No. 4 yellow, $2.03; No. 5 $1.98; No. 6 yellow, $1.93.

NEW YORK.

J. M. Nugent, Correspondent.

There is no active trade in casl but values remain firm with No. 2 corn quoted at $2.16, No. 2 mixed a and No. 2 white at $2.19. Argentin f. o. b. cars is not quoted.

The market for white corn flou ruled firm at $5 to $5.25 on account scarcity of supplies. Prices for corn are purely nominal in the absence active demand. The high cost of p tion, however, keeps the price firm.

Domestic demand for spot oats ha fairly active during the week and have ruled firm. Export inquiry, ho has been lacking and foreign intere not appear anxious to purchase. tions as follows: No. 2 white, 88 No. 3 white, 87c.

The following gentlemen visite floor of the New York Produce Ex during the past week: C. W. Olan Sweden; R. Vallen, of New Orlea Elridge, of London; W. A. Lamson, cago; Gordon Grimes, of Minneapol Morris Hudnut, of Boston.

The uncertainty of the situation in flour nds to restrict purchases, and buyers e only taking what they absolutely need. arly in the week there was considerable eculation as to what the Government in-nded to do with regard to price fixing id the trade, as a whole, was in an xious attitude. It goes without saying, aders were materially relieved when it as announced that the wheat guarantee ice would not be removed. According announcement, the Government is pre-red to sell soft winter wheat flour at 0.25 east of the Indiana and Illinois line d at $10 west of that, not including the cific Coast. In addition the jobber is to allowed 75c a barrel, and the retailer permitted $1.25 more per barrel over ls price. In broken packages, the re-ler will not be permitted to charge more an 7c per pound.

BOSTON.

R. S. Wallace, Correspondent.

Exports of grain and flour for the week ding Aug. 9 were as follows: Flour, 19,524 ks; barley, 209,992 bushels.

Stocks of grain in regular elevators Aug. were: Wheat, none; corn, none; oats, ,206 bushels; rye, 13,801 bushels; barley, ,495 bushels.

The following were visitors on 'Change ring the past week: Captain Meyers of w York City; W. A. Hall, Memphis, nn.; E. T. Chapman, Minneapolis, Minn.; wrence Richey, New York City; C. C. nson, Minneapolis, Minn.; and E. R. ng, Chicago, Ill.

Nearby corn considerably higher than t week with offerings extremely light. ces generally quoted as follows: For pment, No. 2 yellow corn, $2.25@2.26 per shel; No. 3 yellow corn, $2.24@2.25 per shel. Receipts for the week ending Aug. vere 1,100 bushels.

The market on nearby oats considerably her than last week with offerings very nt and held very firm on account of the lroad situation. Prices quoted as fol-s: Fancy 40/42 lbs. clipped white oats, @91½c per bushel; fancy 38/40 lbs. ped white oats, 90½@91c per bushel; ular 38/40 lbs. clipped white oats, 89½ 9c per bushel; regular 36/38 lbs. clipped ite oats, 88@88½ per bushel. Receipts the week ending Aug. 9 were 565,570 shels.

ST. JOSEPH, MO.

W. H. Moore, Corespondent.

. E. Addington, formerly with the Key-ne Elevator & Grain Co., is now con-ted with the Holdrege Grain Co.

. D. Gilbert, of the St. Joseph Hay & in Co., returned to the office Saturday, r several weeks' trip through Mis-i and Iowa.

pplication has been received by the Joseph Grain Exchange for transfer membership in escrow, and formely in name of B. L. Fiedeler, to J. H. Stal-

ne of the largest transactions affect-the St. Joseph grain market took e last Friday when the Elwood Grain ator at Elwood, Kans., was purchased ight by the Mid-West Grain Company n the Keystone Elevator & Grain Com-y. The purchase price was not an-nced, but it has been estimated be-en $100,000 and $125,000. The purchase his elevator means much to the St. ph market, as it marks the return to ownership of one of the largest ele-rs in this territory. The elevator erty consists of a 500,000-bus. eleva-fourteen acres of ground, industrial ching and out-buildings.

ne following registered on the Grain nange during the week: R. H. Mc-Burlingham; F. M. Kale, Willis, Kan.; cribner, Lincoln, Nebr.; J. L. Conover, therby; M. F. Logan, City; H. E. bs, Forest City; R. L. Morgan and t. Whitten, Albany; Porter Bunton, hedale; W. C. Elliott, Gower; B. G. arty, City; W. H. Gibson, City; C. L. ks, Atchison; Glen Redman, Mays-; W. L. Goodrich and C. L. Brown, bury; O. D. Rive, Maloy; W. H. John-Pawnee City, Nebr.; Tom Highland, er; Treat Payne, Amity; C. J. Siebens, sas City. J. O. Youngman, Kansas J. L. Frederick, St. Louis.

Cash Markets.

Wheat—Receipts for the week were lighter than the week previous, ow-o labor trouble. While St. Joseph has been embargoed as yet, shippers are le to get cars for loading. The last of the week showed decided improve-in the demand for good grades of t, while samples of lower grades went ng. There was a moderate carryover e lower grades of yellow hard, which slow on Saturday. Cash follows; No. k hard, $2.24@2.28; No. 2 dark hard, @2.26; No. 3 dark hard, $2.18@2.22; 4 dark hard, $2.12@2.19; No. 5 dark $2.10@2.12; No. 1 hard, $2.22@2.24; hard, $2.20@2.22; No. 3 hard, $2.16@ No. 4 hard, $2.10@2.15; No. 5 hard, @2.10; No. 1 yellow hard, $2.18@2.20; 2 yellow hard, $2.15@2.17; No. 3 yel-hard, $2.12@2.14; No. 4 yellow hard, @2.10; No. 5 yellow hard, $2.05@2.07; 1 red, $2.18@2.19; No. 2 red, $2.16@ No. 3 red, $2.12@2.14; No. 4 red, $2.09 ; No. 5 red, $2.06@2.08.

n—Bullish construction of the Gov-ent report and a more encouraging t of the railroad situation assisted ially in establishing firmer corn . Cash corn on Saturday was unchanged to 2c higher. Receipts were very light during the entire week, and there was an absence of good grades of corn. Several cars of lower grades were on the floor, selling at good prices. Cash follows: No. 2 yellow, $1.94@1.96; No. 3 yellow, $1.92@1.93; No. 4 yellow, $1.88@1.90; No. 5 yellow, $1.83@1.85; No. 2 white, $1.97 @1.99; No. 3 white, $1.94@1.96; No. 4 white, $1.91@1.92; No. 5 white, $1.88@1.90; No. 2 mixed, $1.94@1.95; No. 3 mixed, $1.90 @1.92; No. 4 mixed, $1.86@1.88; No. 5 mixed, $1.83@1.85.

Cash Oats—There were practically no offerings of oats the entire week, although prices were strong in line with the corn market. Cash oats follow: No. 2 white, 74½@75c; No. 3 white, 73½@74½c; No. 2 mixed, 72½@73c; No. 3 mixed, 72@72½c; No. 2 red, 73@74c; No. 3 red, 71@72c.

BUFFALO.

E. Bangasser, Correspondent.

Rye was entirely neglected. The only quoted price was 1c under Chicago September for No. 2 in store, lake receipts.

While Squire Ryley's spring wheat did not turn out as prolific as he expected, he is making good on the rest of his farm crops. Getting the highest prices and seems to have an abundance of vegetables as they come along. In fact, he has it all over the rest of the city grain men in the farming line.

Oats sold on arrival and sellers followed the option closely, resulting in a wide range in prices. The new crop is turning out far better than expected and the tables were kept cleaned at the close of business each day. Store oats were not wanted to any extent, at least no sales were reported. Closing: No. 1 white, 81½c; No. 2 white, 81c; No. 3 white 80c; No. 4 white, 79c, on track, through billed.

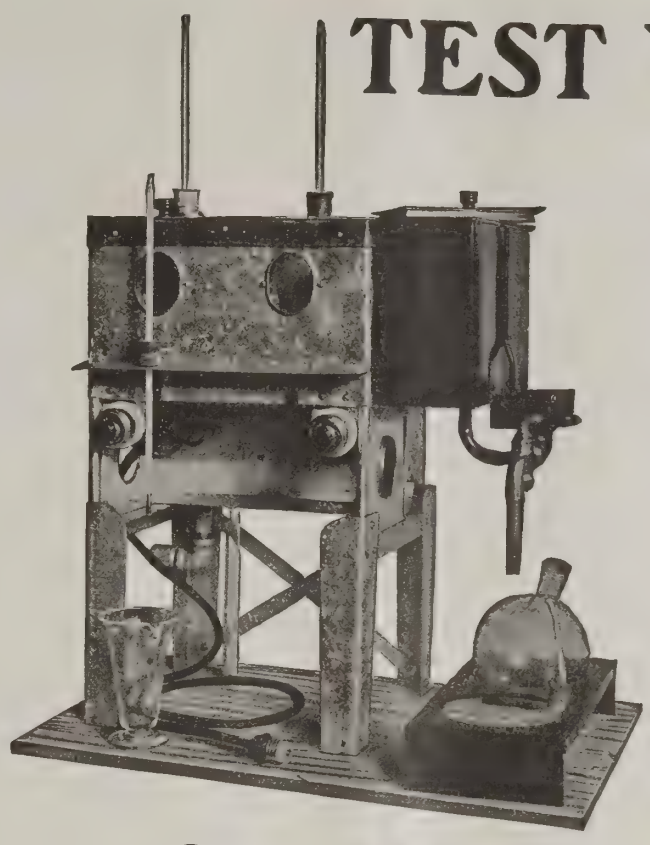
Wheat offerings were taken on arrival, the demand being good from local millers and other buyers. Receipts were quite liberal but nowhere near expectations or what could be sold if here. Sales were on the basis of $2.31 for No. 1 red; No. 2 red, $2.28; No. 3 red, $2.24; No. 4 red, $2.20; No. 5 red, $2.17, on track, through billed. Chicken feed mixers paid a premium for choice weight wheat and were good buyers until the latter part of the week.

There was some corn market here this week, it being almost impossible to find a selling price. Buyers were out of the trade when there was a decline of 10c from last Saturday and taking very few cars on the way up to $2.12 for No. 2 yellow yesterday. The corn was wanted late and receivers having anything on hand considered it worth the money asked. The price paid today was up to the top reached on the crop, which was July 29. There are not many bears on the final outcome of the cash corn market. Closing: No. 1 yellow, $2.18½; No. 2 yellow, $2.18; No. 3 yellow, $2.17; No. 2 mixed, $2.15@2.16, on track, through billed.

Inspection track receipts: Wheat—No. 2 red, 17 cars; No. 3 red, 77 cars; No. 4 red, 34 cars; No. 5 red, 4 cars; No. 2 soft white, 1 car; No. 3 soft white, 7 cars; No. 2 mixed, 3 cars; No. 3 mixed, 21 cars; No. 4 mixed, 6 cars; sample mixed, 1 car; No. 1 hard winter, 15 cars; No. 2 hard winter, 80 cars; No. 3 hard winter, 22 cars; No. 4 hard winter, 1 car; No. 2 dark hard, 21 cars; No. 3 dark hard, 1 car. Corn—No. 1 mixed, 1 car; No. 2 mixed, 5 cars; No. 3 mixed, 6 cars; No. 4 mixed, 1 car; No. 6 mixed, 3 cars; sample mixed, 4 cars; No. 1 yellow, 18 cars; No. 2 yellow, 31 cars; No. 3 yellow, 8 cars; No. 5 yellow, 1 car; No. 6 yellow, 4 cars; sample yellow, 15 cars; No. 2 white, 1 car; sample, 1 car. Oats—No. 1 white, 17 cars; No. 2 white, 42 cars; No. 3 white, 23 cars; No. 4 white, 1 car; sample, 1 car.

NEW ORLEANS, LA.

Thos. C. Robinson, Correspondent.



Oats felt the effects of the decline in corn and the low point was reached when No. 3 white oats sold, delivered New Orleans, at 75c. Recent sales have been made from 78c to 80c, delivered, New Orleans weights and grades to govern. Sacked No. 3 white oats have been sold at 86c and prices no ware quoted from 87c to 88c.

The continued slump in the corn market for the past week did not cause the cash market to decline and holders were exceedingly firm. Towards the end of the week the options have started to build up again and it looks as if they are going back to the price from where they started to decline. Number 2 yellow corn offered at $2.07 on outside terms and at $2.14 on New Orleans weights and grades. White corn sold at a premium of about four to five cents per bushel.

KANSAS CITY.

T. J. Tanner, Correspondent.

B. C. Christopher has returned from a vacation in the northern lake region.

R. H. Sturtevant of the Logan Bros. Grain Co. was elected to membership in the Board of Trade last Tuesday.

Wheat threshermen in the Southwest have received record prices for their work this year. In Oklahoma they are asking bonuses of $50 to $100 for early threshing, according to a report from Lawton.

E. J. Smiley, secretary of the Kansas Grain Dealers' Assn., has made the lowest estimate on the Kansas wheat crop. He makes the yield 140,504,000 bus., which is 1,303,000 less than the Government's August estimate.

While the United States Grain Corporation has bought 3,000,000 bus. of wheat from Kansas City elevator men, only one car has been tendered by sample on the Board of Trade. This car was sold during the week by a farmers' organization at Chanute, Kan.

While crossing the track of the Rock Island Railroad, near Lawrence, Kan., August 6, Wayne A. Ridgway of Kansas City, son of Charles H. Ridgway, manager of the Western Mutual Fire Insurance Co., was struck by a passenger train and killed. Young Ridgway was well known among millers and elevator men in Kansas City. He was a graduate of the Kansas and Harvard universities and had served in the navy on the destroyer Dent.

N. S. Shannon, president of the Shannon Grain Co., was the victim of a highwayman last Sunday night after he and Mrs. Shannon had returned to their home from a motor ride. A man concealed in the garage at 4540 Charlotte street took from Mr. Shannon a diamond ring worth $500 and a check for $100. The thief also robbed Mrs. Shannon of diamond ear-rings valued at $700. Mr. Shannon has not been successful in recovering the property.

Distribution of army food stocks in Kansas City is delayed only by the lack of the price list. The Moose lodge, under direction of Col. George Griffith, is ready to place an order with the Government and establish depots for the delivery of goods. Relatively low prices are expected, and it is likely that Kansas City housewives will buy heavily of bacon and other products. The desire for a break in living expenses is intense, as Kansas City people have been held up unmercifully by grocers and other distributors.

In accordance with instructions from the headquarters of the United States Grain Corporation in New York, D. F. Piazzek, zone agent in Kansas City, has begun an advertising campaign to sell flour in the zone at $10 a bbl., delivered in carlots, sacked in 140-lb. jute bags. The flour is the 100 per cent export grade, not considered desirable in this country, but good flour for ordinary purposes. Jobbers and wholesalers buying the flour are restricted to narrow profits in reseling it, and retailers can not sell broken lots for more than 7c a pound. Millers say the price set on the flour will not disturb the market.

E. A. Sullivan, field agent of the Vanderslice-Lynds Co., who returned from Salina, Kan., Saturday, said the farmers of central Kansas had suddenly become very bullish and were putting away every bushel of wheat for which they could provide storage. "The manufacturers of metal bins should have a record business this year," continued Mr. Sullivan. "Kansas failed to produce the record wheat crop expected, but the Government estimate for August shows 144,807,000 bus., which is the second largest crop for the state. There is a world of wheat yet to be marketed." The Kansas weekly crop bulletin says wheat threshing in the eastern third of the state is one-half to three-fourths done. In the central third it is half done. The work has just begun in the western counties.

Cash Grain Markets.

Wheat—Receipts for the week, 2,908 cars, against 4,650 a week ago and 3,154 a year ago. Conditions resulting from the railway shopmen's strike were responsible for a reduction of 37 per cent in the movement. Some of the smaller roads were compelled to cease entirely the handling of grain, and the operations of all lines were limited. Roads refused to handle cars from other lines, except on an exchange basis, but generally were successful in delivering cars to industries and mills on their own tracks. The termination of the strike on Friday marked the beginning of relaxation in restrictions, and a general embargo was avoided. The situation was expected to right itself during the coming week. Before Wheat Director Barnes checked the proposition of the Government to resell wheat at $1.50 a bushel as a step in the campaign to reduce living expenses there was a bad break in the market, nearly all grades of hard and soft wheat selling down to the federal guarantee basis. Recovery then began, and good premiums were reestablished, especially on the dark varieties of hard wheat. The two leading grades of hard closed 1 to 10c higher than a week ago, with No. 1 ranging from $2.23 for hard to $2.36 for choice dark, and No. 2 from $2.20 to $2.35. No. 1 red closed at $2.19, or 1c premium over the guarantee level; No. 2, at $2.16@2.17, or unchanged to ½c higher than a week ago. There was good buying of wheat at all times by millers and elevator men, but shippers were temporarily hampered. The elevator interests secured a large quantity at prices justifying mixtures for delivery to the United States Grain Corporation. Kansas City stocks are up to 6,370,000 bus., against 1,026,000 a week previous and 4,000,000 a year ago. Advices from the country point to an increasing determination to bin wheat and hold for a further advance. Southwestern farmers are said to be so bullish that they would submit to a repeal of the federal guarantee, believing a free market would be to their benefit in view of the smaller crop than was expected and the world's statistical position.

Corn—Receipts, 44 cars, against 84 a week previous and 269 a year ago. Prices of futures were sharply reduced by the developments in the first half of the week, but cash corn held up fairly on the lighter offerings. The market ruled strong after the passing of the labor trouble. Closing cash prices were unchanged to 6c higher, with yellow showing the chief advance. The final quotations were: No. 2 white, $2; No. 3, $1.98; No. 2 yellow, $1.96@1.99; No. 3, $1.93@1.96; No. 2 mixed, $1.95; No. 3, $1.91@1.92. Stocks decreased 39,000 bus., to 122,000, against 359,000 last year.

Oats—Receipts, 137 cars, against 106 a week ago and 139 a year ago. Curtailment of shipping facilities narrowed the demand to local dimensions during the greater part of the week. The effect was price depression and accumulation of stocks in elevators. Holdings increased 73,000 bus., to 914,000, against 349,000 last year. The market showed an improved tone at the close, and had made some recovery. Prices were unchanged on mixed, at 73c for No. 2 and 72c for No. 3. White oats were 1c lower to ½c higher, with No. 2 at 75½@76c and No. 3 at 74@75½c. Red oats closed ½c to 2c down. No. 2 red was worth 72½@73c and No. 3 sold at 71@72½c.

Kafir and milo—Receipts, 15 cars, against 29 a week ago and 7 a year ago. Sympathizing with the action of other cereals, the market for sorghum grains slumped about 15c per cwt. during the period of demoralized transportation. This loss was mostly recovered Saturday. No. 2 white kafir and No. 2 milo closed the same as a week ago, at $3.70@3.75. No. 3 kafir was 5@8c lower, at $3.60@3.65, and No. 3 milo was down 3@8c, at $3.60@3.65. Stocks increased 2,000 bus., to 9,000, against 223,000 a year ago. Dealers say the California supply of milo is dwindling, and that no surplus of kafir or milo remains in the producing territory of Kansas and Oklahoma. The next movement must be looked for in Texas, then in Oklahoma, where new production is approaching maturity.

KAFFIR CORN
MILO MAIZE GRAIN
B. C. CHRISTOPHER & CO.
KANSAS CITY, MO.

ST. LOUIS, MO.

E. E. Reeves, Correspondent.

Ed Sandbothe, from Martinsburg, Mo., representing the Ed Sandbothe Grain Co., was a visitor early in the week.

Sam S. Carlisle, a well-known dealer, was a visitor of the Merchants Exchange last Friday. Mr. Carlisle is with the S. S. Carlisle Grain Co.

L. E. Bowman, with the Baystate Milling Co., of Winona, Minn., was in St. Louis this week and visited the Merchants Exchange while here.

The Rockwood Milling Co. of Rockwood, Ill., was represented on the Merchants Exchange last Wednesday by John A. Noser, who is the manager of the firm.

W. F. McLaughlin, the special representative of the Hay and Grain Department, Federal Export Corporation, was a guest on the Exchange floor Wednesday. Mr. McLaughlin is from New York.

Manufacturers maintain that there is no immediate necessity for discontinuing operations of the flour mills as practically all mills have sufficient grain on hand to last for several weeks. Since, however, it is impossible to ship the flour, production is being curtailed so as to avoid congestion in the storehouses.

Although the recent railroad tieup and embargo in St. Louis have been keenly felt, it was announced by dealers of the Merchants Exchange that business was not damaged. It is generally believed that if the strikers will go back to work, the embargo will be raised and the wheat situation will resume its normal trend.

Although all shipments of wheat into St Louis, with the exception of those cars which were in transit at the time of the embargo, has ceased, it was estimated by B. F. Lang, grain control commissioner of the Food Administration, that there were about 4,000,000 bushels of wheat in St. Louis at the present time, and fully another million bushels on the way here.

The United States Grain Corporation has recently made public plans to sell flour at $10 per barrel. Details of the plan were given by Julius H. Barnes, United States wheat director, in which he announced that restrictions will be placed on the price to be charged by retailers, jobbers, and wholesalers. The plans are to sell the flour in 1,400-pound sacks on the basis of $10 a sack in the territory west of Illinois and Indiana line, and west of the Mississippi, south from Cairo to the Gulf of Mexico, not including the Pacific Coast region. In the remainder of the country the price will be $10.25. Jobbers and wholesalers must guarantee to resell to retailers at a price not exceeding 75 cents additional and retailers are confined to an increase of not more than $1.25 over the wholesale price for the original packages. Retailers must not charge in excess of 7 cents per pound for broken packages of any size.

INDIANAPOLIS.

Myron R. Green, Correspondent.

The Farmers' Elevator Co., of North Vernon, Ind., incorporated, with a capital of $40,000. Directors are C. C. Dillman, L. A. Catey and Dan Frantz.

The Tallewanda Grain Company, of Portland, Ind., incorporated with a capital stock of $10,000. Directors are C. S. Emerick, C. B. Wilson and C. B. Mooney.

The wheat crop of Madison county is estimated to be 750,000 bushels and the value $1,500,000 by County Agent H. S. Agster, who states that the crop fell one-fourth below expectations, due to scab and other diseases.

The banner month of the Indianapolis wheat market is July, 1919. Total arrivals were 2,415. July, 1918, the number of cars received by the Indianapolis Board of Trade for inspection was 1,949. August, 1918, held the previous high record in this market, when 2,191 cars were inspected.

Owing to the unsettled conditions in the corn market, Evansville grain dealers have refused to handle the grain until the market becomes steady. Paul Kuhn & Co., A. Waller & Co. and other large dealers are not buying at present. At the city grain market the price of a bushel of corn is $2.

Among the out-of-town grain dealers in the city last week were Elmer Hutchison, Arlington, Ind.; Geo. H. Lewis, Lawrenceburg, Ind.; C. B. Jenkins, Noblesville, Ind.; Carl W. Sims, Frankfort, Ind.; William Nading, Shelbyville; P. E. Goodrich, Winchester, Ind.; A. E. Betts, Frankfort, Ind., and J. P. Shoemaker, Daleville, Ind.

The following concerns have been elected to membership in the Indiana Grain Dealers' Ass'n.: Ross & Richards, Ridgeville, Ind.; Hungate Wholesale Co., Fountaintown, Ind.; Farmers Hominy Mill,, Seymour, Ind.; Farmers Co-operative Elevator, Peru, Ind., and the Carlisle Grain Co., Carlisle, Ind. Receivers elected are The National Elevators, Indianapolis, and the J. A. Manger & Co., Baltimore, Md.

Over 100 farmers, members of the Ta arack Grange, south of Mishawaka, In have organized the Grange Elevator C with a capital stock of $50,000. W. Huston is president and Edward Zeigler treasurer. The company has taken out permit to erect a frame elevator buildi 40 by 60 feet, with foundations of co crete. It will be located on the New Y Central tracks near Union street, Mish waka.

M. D. Helfrich bought the Borse & nold Flour Mill at Evansville, Ind., af spirited bidding, in which the Iglehe Milling Company and Charles Johnson, Mt. Vernon, Ind., took part. Johnson up to $19,000 and stopped. The prope went to Helfrich for $19,100. The mill one of the oldest in the city and was erated by Brose & Arnold until 1917, af which the business was conducted Brose. The property had been appra at $12,000.

A serious shortage of grain cars is ported in Lafayette and vicinity and grain dealers say that wheat and oats piling up in the elevators so rapidly t a serious congestion is threatened. W liam B. Foresman, formerly president the Indiana Grain Dealers' Associati said that the situation was very criti and that there seemed to be no explanat for it. Wheat threshing is practically co pleted in that county, and much of oats threshing is finished. Local m absorb some of the wheat, but there is such outlet for oats.

BALTIMORE.

Robert C. Neu, Correspondent.

It is reported that the South ne "chicken wheat."

Effective September 5 ex-lake rates grain to New York for Pennsylvania R road delivery are withdrawn on acco of the Pennsylvania Railroad eleva having been dismantled.

Receipts of new water-borne wheat the Baltimore market so far this sea amount to 490,000 bushels, compared w 645,000 bushels arrived up to the co sponding time last year.

W. E. Rich, of Indianapolis, Ind.; C. Doland, of Goodland, Ind., and M. H. H field, a miller of Minneapolis, Minn., w visitors on the floor of the Baltim Chamber of Commerce last week.

The "committee on hay and st quotations" of the Baltimore Chamber Commerce for the month of August c sists of Messrs. Robert D. Sinton, C ence A. Euler and Richard H. Diggs.

R. J. Fields, in charge of the priv wire of Bartlett, Frazier & Co. on floor of the Baltimore Chamber of C merce, left last week to spend his va tion on the Eastern Shore of Maryland

Robert Kjarsgaard, a New York gr exporter, called at the secretary's o of the Baltimore Chamber of Comm last week to sign the rules, regulati and by-laws of the Chamber, of which was recently elected a member.

The wheat crop of Maryland, which so promising in the early spring, proved very disappointing, and total ceipts of new wheat from the Eas Shore sections are 160,000 bushels less t up to the corresponding time last year

The United States Grain Corpora last week notified Baltimore receivers no export permits for grain will be proved where the grain has been bro here on domestic permits, even whe is the evident intention to export grain.

The drive to obtain funds for the bu of the Export and Import Board of T of Baltimore, a new organization to ploit the advantages of this city as a s ping center, has been under way for past ten days, and the amount desire in sight. The municipal government pledged $25,000 for this year and $1 each for 1920 and 1921, contingent $75,000 being raised for the fund by out subscriptions.

Regular sailings between this port and ie Pacific Coast will be inaugurated about eptember 1 by the Pacific Mail Line, one the largest and best equipped steam- ip companies in this country. A fleet of ur up-to-date oil burning steamers will e assigned to the Baltimore-San Fran- sco trade, and sailings to and from this ort will be made every three weeks.

It is reported that both the freight and assenger departments of the Merchants nd Miners' Transportation Company are oing very well and the traveling and ipping public are coming back in force this favorite line. Extra sailings from altimore to Savannah and Jacksonville e being made with sufficient frequency warrant belief in an early increase of e regular sailings to two each week. he prompt movement and consequent as- rance of time of arrival of shipments ove to be strong inducements.

CINCINNATI.

George Mosbacher, Correspondent.

Total inspections of grain at Cincin- ti during the week were: Wheat, 415 rs, compared with 568 a week ago; corn, cars; ear corn, 4 cars; oats, 37 cars; e. 5, and hay, 100 cars.

The Grain and Hay Exchange had a re- est this week from H. D. Irwin, second e-president of the U. S. Grain Corpora- n, to insert advertisements in local ily newspapers for the sale of govern- nt flour.

J. S. Bateman, popularly known as the ay Man," and who is among the largest receivers and shippers of hay in this rket, had as his guest his brother, ut. H. S. Bateman, connected with the artermasters' Department at Atlanta, Mr. Bateman is enjoying a brief fur- gh, following some business for the de- tment.

Charles S. Maguire, pioneer grain and merchant, attained his seventy-eighth thday last Thursday, appearances to the trary notwithstanding. In honor of the nt, Wm. R. McQuillan, in a neat speech ngratulated Mr. Maguire in behalf of exchange membership, who in turn re presented with an imported cigar by Maguire.

The strike of railroad shopmen seriously ected the movement of grain and hay Cincinnati on several days, but the end s in sight at the close of the week, ding a settlement of the wage con- versy by President Wilson. Most of men have decided to resume work on nday, and the removal of all restric- ns for the movement of freight is ex- ted to be announced by the railroads n thereafter.

The Hessian fly is becoming more and e dangerous, according to W. E. Stone, nilton County Agricultural Agent. A vey of the state of Ohio shows that the age to wheat by this insect increased n one per cent in 1918 to 10 per cent this r for the western part of the state, in- ling Hamilton county (Cincinnati), only control for the pest is to observe "fly free date," October 1, for the hern part of the county, and October 2 the southern part as the free dates for ing.

eo. F. Munsen, chief grain inspector of Grain and Hay Exchange, posted the wing showing total receipts of wheat Cincinnati during the month of July, ording to grade and condition: No. 1 5 cars; No. 1 smutty, 1 car; No. 2 517 cars; No. 2 smutty, 38 cars; No. 2 icky, 2 cars; No. 3 red, 585 cars; No. nutty, 66 cars; No. 3 garlicky, 8 cars; 4 red, 180 cars; No. 4 smutty, 18 cars; 4 garlicky, 2 cars; No. 5 red, 43 cars; ple red, 7 cars; sample smutty, 1 car. l, 1,473 cars. Cars containing dock- of 1 per cent or more were 44 cars.

arles E. Roth, manager of the John oth Pork Packing Company, expressed conviction that the Federal suits n against the large packers would be od move. "The Government evidently ample grounds on which to base the ution," he said. "Everybody wants f from present high prices. I am glad arn that almost a quarter of a mil- pounds of meat will be sold in Cin- ati. That is almost eight car loads. le will be able to lay in a supply at or six cents less than the market , and sufficient to last a week or so."

ral Michael Ryan, of the Abattoir Co., the contemplated suits against the ers are unjustifiable. The question is of supply and demand, and that the ed States should raise at least 50 per more hogs than are now produced.

Government Selling Flour.

e offer of the United States Grain oration to sell flour in carload lots to rs and wholesalers did not create flurry among Cincinnati millers, who that they were not afraid of the Gov- ent offer, as they can sell flour as or cheaper.

d. J. Dorsel, of the Dorsel Milling any, said: "We have been selling ame grade of flour that the Govern- is offering for prices ranging from to $10.75, and we can sell to the re- a better grade of flour at $11. It as if the prime object of the Govern- is to prevent any profiteering in for it was buying large quantities along at prices ranging from $9.85 to "

cinnati members of the Hay and Exchange wired H. D. Irwin, d vice-president of the United States Corporation, asking what brand of was to be sold by the Government. The answer was that it would be new wheat flour, known as standard 95 per cent.

Flour dealers declared that the 95 per cent standard is one of the lowest grades of flour and that it has been selling at $10.50 to $11 wholesale.

Cash Markets.

Wheat—The heavy movement of wheat received a check early in the week as a result of misinterpreted railroad orders to agents at country stations in reference to embargoes existing here and inability to secure cars at other points, due to the strike of railroad employes. This condition, however, was only temporary and toward the close the movement again became normal, and about in line with the recent daily average. The demand, though, was not affected, in fact, buyers were more eager for supplies under the decreased movement feeling that the strike situation would become general and traffic further interrupted. Prices were practically without change throughout the week, and though $2.24 was the best realized for good heavy wheat, lower grades sold better and at slight advances in some instances. No. 1 red winter, track, $2.25@ 2.26; No. 2 red winter, track, $2.23@2.24; No. 3 red winter, track, $2.19@2.22; low grades, as to quality, $2@2.18. Smutty wheat discounted from 2c to 4c per bushel as to grade.

Corn—Unsettled and irregular condition prevailed in corn throughout the week, and quotations on several days were entirely eliminated because of absence of trading, and inability to accurately quote prices or the condition of the market. The market, however, was easier and sharply lower, as compared with quotations of a week ago, until the close, when an active demand and stronger future prices caused an advance of 6c to 8c for all kinds. No. 1 white, $2.14@2.15; No. 2 white, $2.12@ 2.14; No. 3 white, $2.08@2.10; No. 4 white, $2.05@2.07; No. 5 white, $2.02@2.04; No. 6 white, $1.98@2; No. 1 yellow, $2.10@2.11; No. 2 yellow, $2.08@2.10; No. 3 yellow, $2.04@2.06; No. 4 yellow, $2@2.02; No. 5 yellow, $1.98@2; No. 6 yellow, $1.95@1.97; No. 1 mixed, $2.09@2.10; No. 2 mixed, $2.07 @2.09; No. 3 mixed, $2.03@2.05; No. 4 mixed, $1.99@2.01; No. 5 mixed, $1.97@ 1.99; No. 6 mixed, $1.94@1.96.

Oats—The weakness of corn was reflected in oats and prices were 4c to 5c lower than a week ago. The demand was slow, but equal to the moderate offerings. At the close the market ruled firmer and higher. No. 2 white, 76c; No. 3 white, 75 @75½c; No. 4 white, 73½@74c; No. 2 mixed, 73@73½c; No. 3 mixed, 72@73c; No. 4 mixed, 71@72c.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports for the week ending Aug. 8 were 435,522 bus. wheat; 20,111 bus. corn; 250,271 bus. oats and 155,300 bus. barley.

A year ago there were in public warehouses 94,015 bbls. flour, 563,014 bus wheat, 128,991 bus. corn and 292,356 bus oats.

Robert J. McKnight, of the old grain firm of Robert McKnight & Sons was run over by an auto truck and seriously injured.

Stocks in public warehouses on Aug. 1, 1919, were 140,165 bbls. of flour, 578,554 bus. wheat, 19,829 bus. corn and 715,023 bus. oats.

The Grain Corporation has also extended the time during which they will sign agreements for protection of the various trades, from July 31st to August 20th.

The following cars were unloaded at Girard Point Elevator during the month of July: Wheat, 543 cars; corn, 11 cars; oats, 202 cars; rye, 38 cars, and 181 cars barley.

Receipts for the week ending Aug. 9, 3,137,854 lbs. of flour; 1,195,310 bus. wheat; 20,137 bus. corn; 95,958 bus. oats; 2,101 bus. rye; 61,206 bus. barley; 10,000 bus. malt and 480 bus. of feed.

The many friends of B. Frank Eby, a prominent grain dealer of Lancaster, Pa., and member of the Commercial Exchange, will be glad to know that he is convalescent after being in a hospital for more than two months, dangerously ill with ptomaine poisoning and gastritis.

Exports of flour and grain for the month of July were 541,460 bbls. flour and none in July, 1918; 1,100,906 bus. wheat, compared with 15,660 bus. in July, 1918; none in July this year and 337,762 bus. the same month last year; 1,457,880 bus. oats, against 843,636 bus. in July, 1918; 353,313 bus. rye, as compared with 47,432 bus. the same period last year, and 521,748 bus. barley, against 199,394 bus. in July, 1918.

The U. S. Grain Corporation has issued Bulletin No. 5 to all licensees and other interested parties in Zone 9, in which the Grain Corporation announces that there will be no storage premiums added to the basic wheat prices in its buying scale, for the present, nor until there accumulates in the Grain Corporation's hands a sufficient reserve of wheat to assure a measure of protection for future home requirements.

The receipts of flour and grain at Philadelphia for the month of July were 269,180 bbls. flour, compared with 391,303 bbls. for the same time last year; 920,994 bus. wheat, against 719,890 bus. a year ago; 49,281 bus. corn, as compared with 57,941 bus. in July, 1918; 1,345,512 bus. oats, against 1,130,357 bus. last year; 91,618 bus. rye, compared with 15,075 bus. in July, 1918, and 247,174 bus. barley, against 3,750 bus. last year.

The following out-of-town visitors were registered at the Commercial Exchange during the week: L. W. McNamee, grain shipper, Gary, Ind.; G. A. Bennett, head of the Grafton Flour Mills, Grafton, Ohio; L. G. Bournique, of the firm of Taylor & Bournique Company, Milwaukee, Wis.; W. H. Hatfield, of the Cannon Valley Mills, Minneapolis, Minn.; W. Jackson Kaufman, grain shipper, Hagerstown, Md.; J. Frank Webb, Smyrna, Del.

A fire broke out in the Keystone Grain Elevator on Saturday morning last and did considerable damage, chiefly by water, the fire being of short duration. The elevator is owned by the Pennsylvania Railroad Company, and at the time the fire broke out contained 14,762 bushels of wheat, 3,063 bushels corn and 125,862 bushels of oats. The amount of loss sustained on building and contents is as yet unknown but it is believed will be very heavy on the grain stored.

In accordance with this policy, the wheat director is refusing proffered contracts which foreign buyers are desirous of making at the Grain Corporation's price level, these buyers being apparently anxious to cover their requirements for some months in advance. Apparent inability to secure wheat supplies from other sources makes them especially urgent in pressing for contracts with the United States, but these contracts cannot be entered into until a sufficient accumulation of wheat, in the hands of the Grain Corporation, furnishes assurance of reasonable prices to our own people.

TOLEDO.

Carl Bryant, Correspondent.

The Studebaker Grain Co., Bluffton, Ind., are remodeling their elevator and installing a 3,000-bus. capacity Randolph Drier.

"There were no visitors on 'change last week," says John Luscombe of Southworth & Co., "because everybody is too busy to visit."

L. J. Schuster of The Raymond P. Lipe Co. stepped on a ragged piece of tin while bathing last week and suffered a painful cut on his foot. Prompt attention by a physician forestalled any complications and "Len" is expected back on the floor within a few days.

Lack of news in this column this week cannot be blamed upon any "dull times." On the contrary, dealers here are enjoying the biggest trade in years. Wheat, of course, is getting most of the attention now as new oats are not moving in any great volume as yet. 'Change will have to buy more sample tables or put the samples on the floor as several times lately the large tables were inadequate to hold supplies.

Failure on the part of railroad agents to understand the Toledo permit system, together with the strike of railroad shopmen, were responsible for the light grain receipts here last week, although conditions were better toward the end of the week and the movement increased. Only 318 cars of wheat reached this market during the week. With the multitudinous duties of local railroad agents grain dealers can comprehend their lack of attention to the workings of the permit system, but why the railroad administration does not take the proper precaution to educate the agents before the big movement begins, is something they can find no excuse for. Grain dealers here have been rather fortunate lately with the help of Traffic Manager Macomber in assisting country shippers to secure cars, and at points where there is a shortage and the dealer here is notified investigation is immediately started, with the result that the shipper in most cases has been supplied. In cases where railroad agents do not understand the system of permits for Toledo shipments dealers here are advising shippers to "instruct your agent to wire his superintendent car service for authority to furnish and forward car." In other words, no permit is necessary, as shippers need only ask for a car, which is their "permit."

MILWAUKEE.

E. E. Meyer, Correspondent.

The Lyman-Joseph Grain Co. has dissolved business.

Receipts of grain at Milwaukee for the week ending August 9 were 162 cars barley, 77 cars corn, 324 cars oats, 53 cars wheat, 14 cars rye; total, 630 cars, against 872 cars the week before, 861 cars a year ago and 393 cars in 1917.

President Harry M. Straton, of the Milwaukee Chamber of Commerce, has appointed A. R. Taylor, H. H. Peterson, J. H. Manning, C. Kurth, and George A. Schroeder on the Grain Control Committee to co-operate with the U. S. Railroad Administration in carrying out the permit system on grain shipment.

Grain shipments from Milwaukee for the past week were 813,799 bus. oats, 125,459 bus. corn, 229,230 bus. barley, 10,160 bus. wheat, 5,400 bus. rye; total, 1,284,048 bus., against 615,708 bus. the preceding week and 870,402 bus. a year ago.

The Milwaukee flour mills produced 10,000 bbls. of wheat and 3,000 bbls. of rye flour during the past week. Milwaukee flour stocks on Aug. 1 were 35,437 bbls., compared with 23,595 bbls. on July 1 and 14,270 bbls. on August 1 last year.

The Johnstone-Templeton Co., of Milwaukee, has filed articles of incorporation with a capital stock of $60,000. The firm will deal in grain and cereal products. The incorporators are: A. L. Johnstone, A. R. Templeton, H. J. Templeton.

During the past week the cash grain markets generally were unsettled, oats closing ½@1c higher, rye 2c lower, wheat 10c, while barley advanced 1@2c and corn 5@7c. Business is restricted by the railroad strike, new grain arrivals being limited as yet and confined chiefly to oats. Demand good, domestic and export.

Lake shipments from the local ports this week included 360,000 bushels of oats loaded at Elevator A and the Updike elevator on the steamer Otto M. Reiss. The steamer Livingstone took 92,099 bushels of oats and 45,999 bushels of corn to Buffalo, loading at Elevator E. The steamer Lewiston took 105,750 bushels of barley to Buffalo, loading at Elevator E.

George A. Schroeder, manager of the freight bureau of the Milwaukee Chamber of Commerce, will attend the hearing on the question of readjusting grain rates in territory west of the Mississippi on the basis proposed by Milwaukee and Chicago grain shippers. The meetings will be held at Washington, Sept. 8, before the Interstate Commerce Commission.

The Cudahy Brothers Co.'s packing plant at Cudahy closed down Monday for an indefinite period as the result of a strike. On account of a decrease in production some of the employes were dismissed last week and 800 others, taking this fact as a grievance, walked out on Friday. Thereupon Michael F. Cudahy decided upon a complete shutdown as the walkout paralyzed the output of the plant.

Visitors registering at the Milwaukee Chamber of Commerce during the past week, included the following: P. J. Stupfel, Lomira, M. J. Kurtz, Hartland, Wis.; H. E. Cotter, Chicago, Ill.; R. Wenk, Marinette, Wis.; I. Gumm, Jackson, Wis.; J. E. Van Toor, Porto Rico; W. S. Adams, Rio, Ed. Brand, Cleveland, W. F. Goodman, Mukwonago, E. E. Price, Portage; A. A. Steer, Lomira, Wis.; N. Dougherty, New York; C. J. Kaiser, C. C. Carlin, Palmyra, W. B. Cartwright, Madison, A. E. Severson, Silver Lake, Earl Gillespie, Grand Marsh, H. Stokes, Waterloo, Wis.; H. L. Wurster, Chicago; G. M. Shannon, Minneapolis, Minn.; Nic Braun, J. F. Grahl, Eden, W. F. Jordan, F. Butlar, Waterloo, Wis.; W. E. Cochrane, Cleveland, Ohio; M. H. Fitzgerald, Janesville, Wis.; C. W. Gerstenberg, Chicago, Ill.

LOUISVILLE, KY.

A. W. Wiliams, Correspondent.

With a capital of $25,000 and a debt limit of $50,000, the Ferncliff Feed & Grain Co., Louisville, has been chartered by Joe. Schwab, Roy Schwab, Philip C. Myers and others, to handle grain, feeds, fertilizers, etc.

The Kentucky Public Elevator Co. has about 400,000 bushels of wheat in storage for local mills, but reports that other than wheat there is not much grain movement at the present time. Some seed rye is moving, and smal lots of corn and oats.

The new milling plant of the Wathen Milling Co., Louisville, which started operations in June, has an elevator capacity of 225,000 bushels, and is storing some wheat at present for local concerns. The plant has a daily capacity of 10,000 bushels of corn. It is now installing an oil mill.

Corn and oats are stronger and the demand is dull, there being some little milling demand for corn. No. 3 white corn is quoted at $2.18; No. 2, $2.16; No. 3 yellow, $2.12; No. 4, $2.10, and No. 3 mixed at $2.10. No. 2 white oats are quoted at 78c; No. 3, 77½c; No. 2 mixed, 76½c. No. 2 rye is quoted at $1.50.

Railroad strikes have resulted in the C. & O. Railroad being completely tied up on all shipments, while every road operating out of the city has embargoes laid at certain points or connections. So far grain movements have not been seriously handicapped, but movements to and from points on the C. & O., including Ashland, Maysville, Huntington, etc., are at a standstill. mills closing down for lack of grain, and

BURLAP BAGS
Bosworth Bag Company
MEMPHIS, TENN.

unable to get shipments out. Much is being heard relative to resumption of heavy shipping by water, but there is a considerable shortage of boats on the Ohio today.

Reports from Henderson, Ky., are to the effect that the big corn holdings have been cleaned out. The Walnut Bottom corn growers recently sold 48,000 bushels at $2 a bushel on the river bank to the A. Waller Grain Co., of Henderson. The Henderson Elevator Co. also purchased a large quantity of Diamond Island corn at $1.96.

PEORIA, ILL.

L. L. Eckard, Correspondent.

A. W. Harwood, president of the Peoria Board of Trade, returned from Michigan Sunday where he has been on a pleasure trip for the past week.

The greater part of the wheat threshing in this vicinity has been finished and the yield has been very disappointing, especially the spring wheat which turned out very poor.

Car shortage in this district shows very little improvement. A large majority of the country dealers have their elevators filled to capacity and are unable to receive any grain until cars are received to relieve the situation. Some dealers report they have not received a car for the past two weeks.

Peoria corn market Saturday very strong demand was in excess of the offerings. Total receipts were 4 cars with market quoted 5 cents higher, No. 1 yellow sold at $2.05, and No. 1 mixed sold at $2.00. Receipts for past week have been extremely light and there appears to be very little corn to move from the country. Oats receipts were 6 cars with good demand from local industries and sales were ½c higher than Friday's market, 2 white selling at 74½c.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

Signal lights will be installed on all cash grain tables to call cash grain salesmen to the telephones.

E. W. Ehlert, formerly with Armour & Co., Minneapolis, is now with the International Grain Co.

J. W. Robinson, of the International Milling Co., is passing cigars around in honor of the arrival of a daughter.

E. J. Schaack, of the firm of Ware & Leland, Chicago, passed through Minneapolis today on his way to Winnipeg.

Walter Poehler, of the H. Poehler Co., returned last week from a six weeks' vacation spent in the woods of Northern Minnesota.

While workmen were placing a large steel supporting beam in position on the new part of the trading floor it got away from them and fell to the floor. No important damage resulted.

H. E. Hughes, of the cash grain department of Van Dusen, Harrington Co., returned last week from a six weeks' vacation. Part of the vacation was spent in motoring through the east.

The following requests for transfer of membership in the Minneapolis Chamber of Commerce association have been posted: H. E. Braum to E. W. Ehlert; W. A. Johnston to Armin J. Reddelien; E. W. Ehlert to J. P. Hessburg; Aneurin Owen to Samuel J. Provan; M. W. Sowle to Laurence S. Gregory; Bonno Tapper to J. L. Borden.

The following applications for traveling representatives' licenses have been made to the office of the secretary of the Minneapolis Chamber of Commerce association: Kenneth C. Poehler to represent H. Poehler Co.; Albert Solberg to represent Getchell-Tanton Co; Guy Baker to represent C. C. Wyman & Co.; F. B. Beaupre to represent Wernli-Anderson Co.; M. J. Sheehan to represent Becher-LaBree Co.

Cash Wheat.—The cash wheat situation is very strong and prices keep gaining sharply. Receipts of old crop spring wheat are very light and in keen demand. Owing to the small supply of old spring wheat that is available there is a sharper demand for the offerings from the new crop. This new wheat is selling at the old wheat levels now. Only a small proportion of the new wheat has graded No. 2 Northern or better so far. Most of it is light weight and grades from 3 to 5 Northern. Some samples of excellent wheat have been received from Central North Dakota.

The demand for winter wheat has grown stronger from day to day and prices show moderate gains. Offerings are only fair and fears of the railroad trouble shutting off shipments from the Southwest cause a sharper demand for spot offerings to prevail. The demand for Iowa winter wheat is much better than it was a week ago.

No. 1 Dark Northern sells around $2.85, No. 1 Northern at $2.65@2.80, No. 2 hard Kansas and Oklahoma at $2.35 or better, according to color and weight, No. 2 hard Nebraska and Iowa at $2.25@2.28. Durum wheat is in better demand and strong in tone.

Corn.—The limited offerings of corn meet with a good demand from shippers and prices hold firm in tone despite the reactions in the futures. Choice corn is in sharp demand and sparingly offered. There is a better milling demand for white corn reported. No. 3 white sells around $2.00, No. 3 yellow around $1.96, other grades at $1.60@1.95.

Oats.—The demand for old oats is still the best and offerings of heavy stuff are picked up readily. New oats of good weight are also in good demand. Thin oats are in fair demand only. Prices firmer compared with the futures. No. 3 white, old, quoted at 1½@3c over September, new at September price to 1½c over. No. 4 white quoted at 1@4c less than No. 3 white.

Rye.—The demand for heavy old crop rye is good and mill buyers are the chief takers of that kind. Elevator buyers take most anything of No. 2 grade at September price while the millers pay a slight premium for the old rye. Offerings of new rye are quite liberal. No. 2 sells at September price to ½c over, No. 3 at 1@2c less. Thin and tough rye in slow to dull demand.

WESTERN CANADA.

A. Caldwell, Correspondent.

The past season's crop is now practically cleaned out of the country and there is little doing in the grain trade. Speculative trading is practically confined to October oats and barley and our future markets have followed closely the ups and downs of Chicago prices.

Wages of harvest hands are high but there is no lack of help. There has been during the past three weeks quite an exodus of farmers and laborers from Alberta and Western Saskachewan into Manitoba where they are looking for work in the harvest fields or with threshing gangs.

The personnel of the Canada Wheat Purchasing Board has been announced, James Stewart, former head of the purchasing commission for the allied governments is chairman. Mr. Stewart's appointment is generally favorably considered by the grain trade and his experience and knowledge of the European markets during the last three years of the war of the greatest value.

The past week has been one of disappointment to grain dealers and growers alike, for as harvest has progressed the shrinkage from the once brilliant crop prospects of Western Canada has become more and more apparent. Harvest is general and will soon be completed and what threshing has been done has revealed yields that were decidedly disappointing. Blight in Manitoba has been more widespread than was generally appreciated and damage from rust is also considerable. Manitoba will not have a yield above 12 bushels to the acre in the opinion of competent authorities. Yields in the two other prairie Provinces will also be very much below normal and the whole exportable surplus is small. Flax is, however, reported to be a good crop especially late sown and there will be some heavy yields unless frost intervenes.

CHICAGO.

Among newly elected members of the Chicago Board are W. T. McCray and Elmer E. Board, the latter with Bartlett-Frazier Co.

On the floor visitors in the past few days were C. M. Kennedy of Buffalo, J. B. McKee, Sheffield, Ill.; Dr. J. W. T. Duvel of New York and J. E. Bartlett of Jackson, Mich.

An employe of the Minnesota Grain Co., Harry Lamb, was suffocated to death Monday of this week when a grain chute of the elevator at Wade St. and Hooker Court was accidentally opened.

E. E. Buxton of Memphis, commenting on red rust proof oats, says most of their receipts are from Oklahoma, grading No. 3, selling about 5c under white. There has been exceptional interest in such oats this year.

A new rule has been posted by the directors of the Board of Trade to the effect that members of firms doing business on the Board of Trade with only one membership will have to secure seats for all members.

Chas. Dickinson, president of the Aero Club of Illinois, received some favorable newspaper publicity in connection with the progressive work of this club and the first flight of their new passenger air boat, the Seagull.

Chas. Suter following 16 months' army service, part of which was overseas with the motor transport corps, has returned to his old work with Hales & Edwards Co. He will continue to handle barley and general trade.

Commission men last Friday sent out notices to country shippers advising them to withhold live stock loading for Chicago until further notice, for practically all packing house machinery was at a standstill due to the general walkout at the Yards.

At a recent meeting of the Board of Directors of the Cudahy Brothers Co. the following officers were duly elected: President, Michael F. Cudahy; vice-president, John Cudahy; secretary, J. W. Bryden; assistant secretary, E. F. Lawler; treasurer, M. J. Connell.

At the close of the week there was considerable improvement in the railroad situation which caused winter wheats to be in better demand. The market Saturday was strong to ½c higher. No. 1 red and hard was ½c over the basic figure and No. 2 grades ½c@1c over.

Dealers have until August 20 to sign the contracts with the Grain Corporation which were distributed some time ago. This date is an extension of the original time limit but dealers are cautioned to attend to this detail at once as no agreements can be accepted after Aug. 20.

John H. Herron of the Elmore Schultz Grain Co., St. Louis, says their reports on corn show that probably most of the actual damage exists in southern Illinois. Generally speaking, however, they feel rather optimistic pointing to an indicated yield as they see it in the state of Missouri of considerably more than last year.

Chas. Sincere & Co. held open house in New Offices on the ground floor of the Board of Trade Bldg. Monday. The customers' room with all facilities for trading in stocks, bonds, cotton, grain and provisions and a fine layout generally is available for the many old friends of the Sincere boys and in their encouragement of new trade.

G. C. McFadden of Peoria, Ill., on his way back from a Michigan vacation trip, says the question of the size of the new corn crop overshadows a factor of equal importance in the farmers' realization that high hogs justify corn feeding. They are not so much concerned with the price except as it influences extra care in feeding operations. It is his belief that even if old corn is held on the farms and central Illinois it will not be offered under present high hog prices.

On Thursday instead of the 1,500 cars of grain that are usually received each day by the members of the Board of Trade only 500 cars came in, a result of the walkout of the railroad shopmen. The state grain inspection department has been unable to obtain samples from cars on the Chicago, Milwaukee & St. Paul tracks as the strikers will not permit the cars on track to be opened or closed. As a result of the strike all freight of every description will be accepted only when bills of lading are endorsed as follows: "This freight accepted subject to delay account of strike."

NEW ORLEANS DISADVANTAGED BY RATES.

A new rate on wheat from Oklahoma for export *via* New Orleans has been proposed by the Railroad Administration, which places that market at a decided disadvantage as compared with other out-ports. The Grain Corporation has filed its protest and the Railroad Administration has promised a hearing before the proposed rate shall go into effect.

The rate from Oklahoma to New Orleans has been 35c and the Grain Corporation was informed that it would be reduced to 31c, and upon that assumption the Corporation added 2c a bu. to the price of the wheat at the Gulf ports, giving shippers altogether about 6c more than last year. Now the Railroad Administration proposes, instead of a cheaper haul, to increase the rate 2c over that of last year making it 37c. The Board of Trade and trade interests of New Orleans generally have joined in a protest against the proposition.

EUROPEAN LIVESTOCK.

An official estimate of the number of swine in Denmark at April 10, 1919, was 588,939, being an increase of 156,000, or 36 per cent, compared with a year ago. Of this number, about 84,000 were brood sows, 189,000 were swine for fattening four months old and over, and 311,000 were pigs.

In Italy the latest report as to cattle bears date April 7, 1918, the total number then being 6,162,000, compared with 6,199,000 on March 19, 1908. The number of pigs on April 7, 1918 was 2,337,304, compared with 2,722,000 in 1914 and 2,507,798 the census of 1908. Sheep on April 7, 1918, numbered 11,752,000, compared with 11,163,000 March 19, 1908.

In the Netherlands an official census of March 5, 1919, shows cattle 1,969,000, compared with 2,027,000 in June, 1910. The number of swine 450,000 in March, 1919, compares with 1,260,000 June, 1910. These figures were compiled by the Bureau of Crop Estimates from latest estimates from abroad.

Dillon, Mont., reports all hay shipped out with prospects for all crops below normal on account of drought. Billings reports dryland crops practically gone. There will be a small shipping surplus of alfalfa, but oats, barley and prairie hay will have to be shipped in. Havre is already buying hay, mill and grain feeds.

Movement of Corn.

Following is a statement of the ceipts and shipments of corn at primary markets of the West for weeks named:

Likes Cottonseed Ration.

rding to E. S. Elliott, a large cat- der of Pettis Co., Mo., a light of corn and cottonseed cake as a trate is one of the most econom- mbinations per pound of weight taken on by the cattle he has ever used. Mr. Elliott employs this ration on practically all of his steers and reports good success. One particular lot of beeves at St. Louis recently fed out this way brought $15.25 per cwt. Mr. Elliott stated that the beeves were roughed through the winter on ensilage and then finished on the corn and meal ration. Beginning May 1 they also had access to grass. The feeder stated that approximately 3½ lbs. of cake was used per head.

Strong's Double Indexed Car Index

Is a record book designed to afford ready reference to the entry or record of any car number. Facing pages 11x14½ inches of heavy ledger paper are each ruled into five columns, those on the left-hand page being numbered 0, 1, 2, 3 and 4; while columns on the right-hand page are numbered 5, 6, 7, 8 and 9. Each column is ruled into three distinct divisions with the following sub-headings: "Initial," "Car No." and "Index."

The marginal index figure represents the right hand or unit figure of the number entered; and the column heading the second or tens figure. So that the required number can always be instantly found if properly entered.

ORDER FORM 20 contains 36 pages, bound in heavy canvas covers, with spaces for registering 9,000 cars. Price, $1.50.

ORDER FORM 22 contains 68 pages, bound in art canvas covers, with spaces for registering 17,000 cars. Price, $2.50.

[1]000 omitted. [2]Interpreted from condition reports. [3]Preliminary estimate. [4]Millions of bales; yield per acre in pounds of lint. [5]Census. [6]Condition relates to 25th of preceding month.

The amount of oats remaining on farms August 1 is estimated at 6.0 per cent of last year's crop, or about 92,508,000 bushels, as compared with 81,424,000 bushels on August 1, 1918, and 76,710,000 bushels, the average of stocks on August 1 for the five years 1913-1917.

Omaha Movement.

Sec'y F. P. Manchester of the Omaha Grain Exchange reports the following movement through that market in July (000 omitted):

	—Receipts— 1919.	1918.	—Shipments— 1919.	1918.
Wheat	3,092	2,904	745	814
Corn	1,854	2,723	1,907	2,201
Oats	1,214	1,218	762	868
Rye	106	21	163	4
Barlye	167	18	119	16
	6,433	6,884	3,696	3,903

H. A. Wickstrom, inspector at Galveston, reports shipments of wheat through that port for July, 1919, at 1,455,030 bus., also 70,000 bus. of barley.

[1]Preliminary.

High Prices and Wheat.

To our minds the very high prices guaranteed by importing nations (to stimulate home production) are a poor justification for the maintenance of a practical corner in wheat in this Country by the Grain Corporation. While it is true that bread constitutes the cheapest food that goes over the home table, nevertheless it is equally clear that the maintenance of the wheat price is the cue for manipulation in practically every other branch of trade handling food supplies, and the maintenance of prices that are scandalously high and involve many hardships on the consumer. These things, however, are hardly "a marker" to the extravagances among those who complain most bitterly of high costs, and make that the excuse for strikes and unrest in labor organizations. Industrial demoralization may create temporary scarcity, but it never was the forerunner of advancing prices.—*Pope & Eckhardt Co., Chicago.*

The Van Dusen-Harrington reports say that the rye crop has been disappointing in most places and yields are not up to expectations, running only from five to twelve bus. per acre.

STATE NEWS.

[Concluded from page 39.]

Mt. Gilead, O.—Earl Blair sold his elevator and flour mill to the Farmers' Co-operative Co. C. S. Coomer is president of the company.

Wellington, O.—The Wellington Flour Mills is doubling its capacity, installing self-raising pancake and buckwheat flour and food mixing machinery.

Hamilton, O.—Contract for the construction of a new addition to the Eikenberry grain elevator has been awarded. The building will be a concrete warehouse east of the elevator.

Salem, O.—The Purity Milling Co., operated by Benfield & Bailey was taken over by the Purity Milling Co. Inc., with O. W. Rechsteiner as president, and H. E. Rechsteiner, secretary-treasurer.

Fairview, O.—The elevator at this place owned by Grant Campbell of Atlanta was destroyed by fire. More than 4,500 bushels of wheat in the elevator and a car of wheat on the railway siding was also destroyed.

Columbus, O.—Articles of incorporation for the Simmons Milling Co., were issued at Columbus. The company will be capitalized at $50,000. Incorporators: J. S. Simmons, R. S. Simmons, L. S. Simmons, Wm. M. Simmons and Clara S. Simmons

OKLAHOMA.

Wetumka, Okla.—J. O. Sheppard has bought the Brazil Mill & Elevator Co. and will operate same under the name of the Wetumka Grain & Produce Co.

Buffalo, Okla.—The Buffalo Northwestern Grain Co. has been chartered with a capital stock of $16,000 by E. C. Johnson, B. E. Williams of Buffalo, and L. E. Wallace of Waynoka.

OREGON.

Salem, Ore.—The Cherry City Milling Co. of Salem, has filed articles of incorporation with a capital of $75,000. Incorporators: P. W. Geiser, Marion and E. S. Palmer.

PENNSYLVANIA.

Burgettstown, Pa.—The Farmers' Milling Co. has been incorporated with a capital of $20,000 by T. P. Weaver.

Philadelphia, Pa.—More than 200,000 bushels of grain, mostly oats, valued at about $170,000, were destroyed by fire on Aug 9, at the plant of the Keystone Elevator and Warehouse Co., in this city.

SOUTH DAKOTA.

Stickney, S. D.—Ruel E. Dana succeeds Wait & Dana.

Armour, S. D.—C. H. DeWald succeeds Ruel E. Dana.

Marion, S. D.—F. E. Way succeeds Farmers' Elev. Co.

Parker, S. D.—Shanard Elev. Co. succeeds J. A. Christopher.

Lesterville, S. D.—Christopher Diede succeeds Adam Wollach.

Lennox, S. D.—H. E. Schweiderhorn succeeds Monarch Elev. Co.

Bonilla, S. D.—Work on the new Bonilla Farmers' Equity Union Elevator has been started.

Davis, S. D.—The Davis Grain Co. has been incorporated with a capital stock of $25,000 by F. P. Creaser, et al.

Irene, S. D.—A new foundation to their plant will be put in by the Farmers' Union Livestock & Grain Association.

Parker, S. D.—The Parker Milling Co. has been incorporated by F. L. Clisby, G. C. Trull, B. L. Clisby; capital stock, $20,000.

Dolton, S. D.—A. A. Wollam of Freeman, the new owner of the Farmers' Elevator here is repairing his elevator this week.

Madison, S. D.—Zele Steele will superintend the construction of the Farmers' Elevator which he is erecting and hopes to have ready to receive grain in a few weeks.

TENNESSEE.

Memphis, Tenn.—The Shelby Mills has been incorporated with a capital stock of $50,000. A. J. Beurer, E. E. Hopkins, incorporators.

TEXAS.

Hamlin, Tex.—The Hamlin Elevator here burned with a loss of $12,000, covered by insurance.

Celina, Tex.—A warehouse belonging to the Collin County Mill & Elevator Co. was destroyed by fire July 25. Gibson Caldwell, mill manager, estimates the loss at $4,000.

UTAH.

American Fork, Utah.—The People's Mill & Elevator Co. has been incorporated with a capital stock of $50,000. W. H. Chipman is president.

WASHINGTON.

Irby, Wash.—The Odessa, Wash., Union Warehouse Co. has purchased the Farmers' warehouse at Irby.

Yakima, Wash.—Articles of incorporation of the Miller Flour Mills have been filed here for record. Incorporators are A. E. Knerr, M. R. Eoff and J. G. Miller. The capital stock is $50,000. The company will build a 300-bbl. mill.

WISCONSIN.

Brillion, Wis.—The F. Paustain Milling Co. has increased its capital from $15,000 to $40,000.

Burlington, Wis.—The Farmers' Terminal Elevator Co. will build a $50,000 addition to its plant which will double the present capacity.

Cumberland, Wis.—The American Co.-Operative Association of which W. A. Broetin is manager, has bought the grain, feed and fuel business of C. E. Hook.

Theresa, Wis.—The Theresa Farmers' Union has been incorporated with a capital stock of $5,000 to deal in lumber, grain, feed, etc. Incorporators: Jos. Koke, Andrew Greiner, Edwin Erdmann.

Holmen, Wis.—A. O. Casberg and Sons have incorporated with a capital of $30,000 to buy and sell grains, by-products, etc. The incorporators are A. O. Casberg, Clifford A. Casberg, Earling Casberg.

Luxembourg, Wis. — The Luxembourg Equity Association with a capital of $5,000 will conduct agricultural, dairy, mining, etc., on the co-operative plan. The incorporators are G. H. Moede, H. J. Ihlenfeld, Albert Dahlke, Joseph Thibadeau, Joseph Bucher.

Camp Douglas, Wis.—The Camp Douglas Co-Operative Warehouse Shipping Association have incorporated with capital of $6,000 to deal in agricultural products. Incorporators are: Jesse A. Gabower, Chris Wagenson, Joseph R. Schams, John Habelman, Carl Schwartz.

Cascade, Wis.—John and Otto Schlenter, brothers, who have conducted a feed mill and electric lighting plant here for the past ten years have dissolved partnership. John Schlenter will continue to operate the feed mill and is planning to greatly enlarge the plant.

Madison, Wis.—Persons employed in flour and feed mills are exempt from the provisions of a law recently passed by the Wisconsin Legislature which provides that every employer of labor must grant at least 24 consecutive hours of rest in every seven days to his employes.

Oconto, Wis.—The Oconto Milling Co., elected the following officers: William J. Hinker, president; Peter J. Larson, vice-president; W. M. Comstock, secretary; E. A. Watterich, treasurer. The mill will begin operations about August 16 with a daily capacity of 50 barrels. The flour will be marketed under "The Oconto Blue Ribbon Flour" brand.

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago increased 2,074,000 bu. last week, corn decreased 342,000 bu. and oats 603,000 bu. Details follow (last three ciphers being omitted, except in the totals):

	Public.	Private.	Total	Last yr.
Wheat	945	6,249	7,184,000	6,990,000
Corn	122	476	598,000	3,663,000
Oats	1,027	5,075	6,202,000	2,421,000
Rye	1,072	685	1,857,000	539,000
Barley	304	540	844,000	243,000

What the Cattle Country Thinks.

The cattle market for the past ten days or two weeks has been called upon to undergo some unusual and rather severe conditions. We have had "nigger" warfare in Chicago, strikes on the part of shopmen and threatened strikes by the balance of the railroad employes, congressional investigation of the high cost of living, together with the proposed senseless legislation, the Kenyon bill, etc. These agitations, investigations, etc., all have to be paid for by the producer; and for our p it looks as if we are not getting money's worth, as they never get where and simply upset conditi We feel it is about time our lawma realized that what we need is less not more bureaus for the regulatio livestock and livestock products.—*Prey Brothers L. S. Com. Co., Den Colo.*

It is announced from Bismarck, D., that track scales will probably installed in important junction po of that state and at state line stat at the eastern border with a view reducing loss of grain in transit. decision came as a result of a co ence of all concerned recently at marck at which the railroad men erally agreed that the loss was du unloading at the terminal elevator a rejoinder to which the terminal vator men said it would hardly likely that any considerable amoun grain at present prices would be le the car in order to save 25c wort labor.

Prof. G. I. Christie, who has serving as Assistant Secretary of culture on emergency work, has se his connection with that departm resignation bearing date June 30.

An Indiana man says unless the a late fall much corn between Chi and Monon, Indiana, will not ma because it is not yet in tassel. He in Chicago buying feeders.

Sec'y Smiley reports 87 new mem of the Kansas Association since June meeting, or 108 in 1919.

TRADE MENTION.

The Union Trust Co., a Chicago bank strength and character, is this year llowing its usual plan of direct con-ct with the grain, milling and allied ıdes with added impetus. They have ıg made a specialty of collecting bill lading items, they understanding is business as specialists, and they ould therefore be doubly valuable to ose requiring such financial service. ey have arranged a simple and st convenient method of clearing the nking transactions of our trade and ll submit data applicable to your oblems on request.

Gumbinsky Bros. Co., 2261 S. Union enue, Chicago, commenting on the rlap and bag situation and the high ing markets, say they believe ces will advance further. They sug-t an average for last week of 16⅛c light weights and anticipated 20c rket before long. The supply of ht weights particularly is short; and y urge millers, seedsmen, feed man-cturers, bean and grain dealers to esigate these conditions for them-ves; take stock of their present pply and needs and buy up for a con-erable future period.

The Guarantee Construction Co. of cago and New York is nearing com-ion a big job for the Corn Products at their Edgewater plant, N. J. It expected that the marine leg fully ipped with pneumatic features to dle 125,000 bus. of corn each 24 hour will be running by the end of gust. This installation for a firm ally leading in the mechanical fea-s of their plants is typical of present construction giving every opportun-for the intensified installation of hine equipment and the consequent uction of manual labor. A line ad-sed the Guarantee Construction Co., heir Chicago office in the Old Colony g., or the main office in New York , at 104 Cedar St., will bring in-ıation that will prove of real value hose desiring to enlarge their han-g facilities without increasing their oll.

Flanley Grain Co.

ıe early completion of another dley elevator at Sioux City, Ia., s the company with their present ıtor in Omaha distinct advantages ırnishing their trade with just the of grain wanted and making one dozen carlot deliveries on sched-time. As the wheat harvest has ressed with disappointments in es everywhere reported, the impor-e of cleaning and storing facilities e elevators through the wheat belt ot be over-emphasized. The per-el of the Flanley Grain Co. in-s men with long training in the ıase and sale of wheat as well ıarse grain, and it is their inten- and it is certainly greatly in the ests of their trade, to fully employ knowledge with the physical fa-es of their elevators to receive store this grain when needed and ip it out in the best possible con-ı and with least loss, on their mers' orders.

h the enlargement of the Flanley ess several changes in the organ-n have been found feasible. Carl oulton, who was well known in ade as head of the consignment tment at the Omaha office, is now ger of the Milwaukee branch. In on to this Mr. Houlton is now l vice-president of the company, ıgh it is but a few years ago ıe started out as traveling repre-ive for the company. His ır, Rex Houlton, who has enjoyed experience with the Crowell Ele-Co., is now calling on country for the Flanley Grain Co.; and ge corps of earnest workers is aining a heavy merchandising trade in the East, South and South-east. Chas. Flanley, of the Sioux City office, and C. W. Adams, an official of the company in charge of the Omaha business, are too well known to need special comment, but we venture the thought that they are typical of the great coming class of grain merchants in Western markets where initiative has played such an important part and the precedents of old trade have had such slight influence. These men have grown up with the Western grain trade. They understand its peculiari-ties and its opportunities, the latter particularly, opening up under the pres-ent crop movement with its question-able tonnage and doubtful grades, the assurances of profits from country grain shipments or milling purchases, providing it has good direction in its handling.

The Starnwill Grain Scalper.

Users of the Starnwill Grain Scalper are reporting the very satisfactory manner in which the machines are con-ditioning the light and off-grade grain which is being brought to market this season. Oat tests are being raised from 1 to 3 pounds per bushel. Smutty and rusty wheat is being put in tip-top con-dition to go on the market.

The following elevator owners have installed the Starnwill Grain Scalper & Conditioner in their elevators re-cently: The Farmers Grain & Live-stock Co., Stanton, Iowa; The Jenkin-son Grain Co., Sheldon, Iowa; J. H. Dobie, Mapleton, Minn.; The Carlton Elevator & Mill Corp., Carlton, Ore.; The Farmers Elevator Co., Alpha, Minn.

Threshing is well under way in Minnesota and will continue if the coal situation clears up so the thresh-ermen can procure fuel for power. The situation at present appears grave.

Cotton Seed Meal Situation.

A. E. Gutteridge, of the Chicago feed trade, located at 327 S. La Salle street, who has made five trips through the South since the first of May, has just returned to Chicago, having vis-ited the cotton seed meal centers. He reports a vast recent improvement in the cotton plant, and while the exces-sive rains in May and June retarded the growth, yet the fine growing weather of July will bring the crop to the ripening period about twenty days late and shipments of cotton seed meal on the new crop can be expected from the Mississippi Valley in early October.

What little buying has been done on the new crop from the Valley has been purely speculative, as the price for seed and oil still remains very uncertain. New crop 43% meal from Texas has sold as high as $77 f. o. b. Texas com-mon points. There was, however, dur-ing the past week, a drop in price of $3@5, due in a very great measure to the general public clamor for reduction in the H. C. L.

Southern planters have been anx-iously waiting for a revival in the ex-port trade, which is retarded at the present time, due primarily to the dif-ference in values of foreign money. In addition to freight and cost Eng-land pays 12½%, France, 25%, Italy, 50%, and Germany 53% more for our products, because of this fact.

Why High Prices?

The grain trade is frightened. High cost of living "hysteria" is theoretical, and it is all well and good to say that prices are high. To make lower prices a reality, it is necessary to have a sup-ply that exceeds the demand. Theo-ries cannot increase crops and high prices are not due to speculation but to a world-wide demand. Abnormal conditions are an outgrowth of the war and a return to normal is not possible for some time to come. Other commodities are proportionately higher than grain.—*Wm. C. Wiegand of Si-mons, Day & Co., Chicago.*

Field Seeds

Reports from Sheridan County, Mont., report that all early seed crops have been practically lost.

The Paxton Cereal & Seed Co., Paxton, Ill., has been incorporated with a capital stock of $20,000 by W. H. Westbrook, Otto E. Larkin and E. J. Westbrook.

The capital stock of Wood, Stubbs & Co., seedsmen of Louisville, Ky., has been increased by $300,000, the amount authorized now being $500,000. The limit of liabilities was increased by $150,000.

The seed potato growers at Moorhead, Minn., have organized the Clay County Certified Seed Potato Growers' Ass'n with 132 members. These men last year raised 375,000 bus. of seed potatoes.

Experiments on a dry land farm near Waterville, Wash., has been made with a new type of dry farming wheat known as Hard Federation, originated in the dry interior of Australia. The Station has produced seed enough to make an early distribution expected.

A Missouri seed firm writes C. A. King & Co. that the timothy crop is short, about the same as last year, but clover is 25 per cent better. Another dealer in the same state writes that clover is about half a crop and timothy only about one-fourth a crop. A Minnesota firm writes the acreage of timothy, clover and alsike is normal and in good condition, but most of the timothy is cut for hay.

Detroit Seed Prices.

Closing prices on grass seeds at Detroit Aug. 9 were as follows: Clover seed, cash, $29.50; October, $30.00; timothy seed, $5.50.

Chicago Seed Market.

The timothy market opened the week with a firm undertone but on Wednesday futures were decidedly weaker, making some recovery on Friday and Saturday. Old contract prime timothy was offered at $12.50 the close of the week with the 1917 seed commanding a premium of 25c.

Clover held a steady tone at the opening Monday but considerable strength developed Tuesday which was maintained throughout the week. Sales of alsike were reported at $37 a bag. Quotations follow on timothy and clover as follows:

Tim.—	September.		October.	
Aug. 4....	$13.75A	$.....	$12.25B	$12.75A
Aug. 5....	13.75A	.....	12.25B	12.75A

Cash	25.80	24.15	24.75	25.75
Oct.	26.05	24.40	25.00A	26.00
Dec.	25.65	24.40	25.00A	25.55
Timothy—				
Cash, old	5 50	5.40	5.40	5 50
Cash, new	5.50	5.40	5.40	5.50
Sept.	6.12½	5.92½	5.95	6.12
Oct.	5.90	5.75	5.80	5.90
Dec	5.95	5.90	5 90	5.95
March	6.10	6.02½	6.02½	6.10

Louisville Seed Market.

LOUISVILLE, KY., Aug. 11.—The seed market shows very little change, there being a better demand for timothy for fall planting, with alfalfa also in better demand. Clover is so high that demand is light.

Movement of Kentucky bluegrass and orchard grass seeds continues dull, farmers asking prohibitive prices, and cleaners and dealers refusing to take up seed. Bluegrass seed is quoted at around $1.60@1.75 by farmers for stripped seed, and orchard grass at around $3@3.05.

CHICAGO SEEDS MOVEMENT.

Following is a report of the receipts and shipments of grass seeds at Chic for the months and weeks named in 1919 and 1918, in pounds (000 omitted)

Kansas City Seed Markets.

KANSAS CITY, Aug. 9.—Progress of the crops of sorghum grains and forage seeds in the principal growing areas of Kansas, Oklahoma and Texas is being watched closely by Kansas City seedsmen and handlers. A good rain in the Texas Panhandle has insured fair yi there. Western Oklahoma also showers during the week, but in ot parts of that state there was seri complaint as to drouth. The latest c bulletin in Kansas says: "Grain ghums are generally from a fourth half in head in the south-central southwestern counties and beginn to head in the northwestern part. T are needing rain and their growth slow, except in the more western c ties. Some damage from grasshop is reported in the western half of K sas."

Interest in the new alfalfa seed c is increasing, but more time will required to get satisfactory infor tion on the acreage to be left for seed harvest. It is said that no a age from the first or second cutti was retained for seed. Dealers that practically all seed to be sown summer and fall must come from reserves, though a little new seed f Arizona, New Mexico and Texas be available for fall planting. market is strong, as a good deman expected. Growth conditions in K sas are thus described in the we crop bulletin: "Alfalfa and past are making little or no growth in eastern two-thirds of the state.

Duluth Flaxseed Market.

TH, Aug. 9.—Strength in the ed was the feature in the flax- arket during the last week. It a net gain of 6 cents during the s' trading, while September ad- 3 cents, October 3 cents, Novem- ent, and December weakened 2 A development in the market reak extending to 8 cents at the ng of the week and the under- trength shown later.

pts fell off, amounting to just ushels in the week, while ship- in carlots down to Minneapolis one lot by boat for the East o 57,601 bushels, leaving sup- 133,000 bushels remaining in ators.

is noted that linseed oil men n the trail of any seed that e pried loose, apprehension be- played by them as a result of ions that shipments from now the country will be limited e new crop starts to move.

rop of 3,000,000 bushels since in the estimated yield for the o 10,200,000 bushels, was about trade had expected, judging ports received from over the . It however resulted in xtending to from 6 to 9 cents ng on Saturday. Some of the specialists in the trade are now hopeful that the yield of 10,200,000 bushels, as forecast, will be realized in view of the recent rains over the West having revived the plant to a great extent. Other operators are less hopeful and express the fear that the final harvest returns for the season will not exceed 8,000,000 bushels.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and last year were:

	Saturday.	Week ago.	Year ago.
On track	$6.13-15	$6.07-10	$4.35
To arrive	6.13	6.07	4.35
September	6.10	6.07	4.38
October	5.90	5.87	4.31
November	5.82	5.81	4.28
December	5.70	5.72	4.24

Flax Condition.

The Van Dusen-Harrington Co.'s reports say that flax in the Northwest is apparently holding its favorable condition in the eastern and southern part of the territory. The bolls are well filled and without further damage the territory should show a good yield. There is fear, however, now in central and eastern North Dakota that grasshoppers which have already damaged some flax fields, may attack the remaining flax, much of the small grain having already been harvested. In western North Dakota the heat and lack of recent moisture has hurt the crop.

The Van-Dusen Harrington Co. reports say some barley and oats have been threshed in southern Northwest territory, the returns showing from 20 to 30 bus. to the acre. Early samples have good color but the grains are light in weight.

Red Top Seed Crop.

The *Seed Reporter* corroborates the general view of the red top seed crop given in these columns by our correspondent at Olney, Ill. It says:

"An extensive inquiry was made in the red top seed producing section of Illinois, and from reports received about July 25, it appears that the production this year will be about 5 per cent less than that of last year, because of a slightly reduced acreage. In general, the acreage in Wayne, Richland, and Clay Counties this year is about 10 or 12 per cent less than that of last year, but the decrease in acreage in these three important red top seed-producing counties is offset in part by the larger acreage than last year in Marion, Hamilton, Jasper and a few other less important counties.

"Last year's production in the red top seed area of Illinois, computed from figures received in seed surveys, is estimated to have been 160 to 175 carloads of recleaned seed. From incomplete figures obtained in the last general seed survey it is believed that approximately 25 carloads of seed were carried over by the cleaners and from reports received from correspondents it is estimated that there remain in growers' hands of the 1918 crop about 5 or 10 carloads. The carryover of red top seed in the United States on June 30 of this year and last year, according to incomplete figures from concerns reporting to date in the general seed survey of June 30, 1919, was 9,453,091 pounds of this year and 10,573,066 pounds last year. Despite the fact that red top seed was one of the cheapest kinds of field seed on the market the past spring, seedsmen did not have so ready a sale for it as they did for other field seeds.

"Harvesting had just commenced the week beginning July 21 and only one or two correspondents reported any seed as having been threshed as early as July 28. In most of the red top seed countries in Illinois, threshing of this seed will not be under way until the middle or latter part of August.

"Many of those who reported in the inquiry believe that the first purchases of red top seed will be made at 11 or 12 cents per pound for recleaned seed. Offers of 10 cents in localities where much timothy is commonly found mixed with red top, and of 11 to 12 cents in other localities have already been made, but it is not thought that many of the growers have sold any of their crops for later delivery."

SEED SITUATION.

RED TOP SEED CROP.

ILLINOIS (9).—The crop of red top seed, of which this section produces the entire supply, is about 25% greater than last year. The quality is bright, and as free from weeds as we ever saw it.

Prices to the grower will start about 10@12c for clean seed. No price, however, is set as yet. There are liberal old stocks of red top carried over, and we doubt whether there will be the usual demand, as there was four times as much red top marketed last year as there was the year before, and the excess is held by speculators who will unload as soon as their profit shows up. There seems to be an organized effort this year to boost prices and to start the short crop cry so as they can unload; but we believe that red top seed will be at least $2 a bag cheaper within the next six weeks.—*Schultz Seed Company, Olney, Ill.*

Clover Seed Quiet.

Clover seed marked time last week, the market has not been quite so erratic. Recent rains helped in some sections, but came too late in others. Some localities expect a good crop, but many are complaining of short acreage and thin stand. They do not export new crop freely till November or December. Present price is very high, but it may take liberal receipts to cause much decline. There is usually some new seed received during August, but receipts are never liberal till September.—*C. A. King & Co., Toledo.*

Clover Seed Outlook.

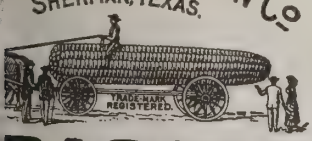
Scattered Michigan reports not enthusiastic over outlook; general complaint of lack of timely rains. Indiana reports run from very poor to fair and good, mostly in the former classes. A typical report from central Indiana gives condition 50 per cent of normal, with barely enough seed for home demand. Wisconsin reports only fair. Northern Ohio will do well if it has an average yield. Oregon yield is a disappointment. Dry weather is needed in clover from now on, to ripen seed and allow harvesting and hulling. Too much rain could do considerable damage.—*Southworth & Co., Toledo.*

Alfalfa Seed Outlook—Early Crop.

An inquiry was made about July 20 to determine, if possible, what would be the production of alfalfa seed in those states which normally produce the first alfalfa seed that comes on to the market. Considerable interest has been shown by dealers throughout the United States in the new alfalfa seed crop because an unprecedented demand for alfalfa seed in many sections has caused dealers' stocks to be reduced to a minimum after the spring sowing season was over. According to the incomplete figures from concerns reporting to date in the recent general seed survey there were only 3,959,281 pounds of alfalfa seed on hand on June 30, 1919 as compared with 9,999,664 pounds on June 30, 1918. Many dealers will have to rely on new crop seed or imported seed to meet their late summer and early fall demands for alfalfa seed.—*Seed Reporter.*

Timothy Seed Last Week.

Timothy was very active last week at Toledo with no great change in prices. The biggest trade was in December. Old Prime is being offered right along with some sales and several carloads have been shipped out. We notice a little increase in the demand for cash timothy. Samples are coming from several parts of Ohio, but the number doesn't suggest any large crop in this state, nor is the quality very good; most of the samples grading N. E. G.



As far as the price is concerned, it is not unreasonable. Hay at $25 a ton is the equivalent of $8 per bushel for timothy and the farmer knows this better than anyone else. Some hay, however, has been allowed to go to seed, because the farmer did not have help to cut the hay. Reports from Iowa, a large producing state, do not indicate a very large yield, but, of course, our reports may not be numerous or general enough to give a correct condition. As yet there doesn't appear to be much foreign demand, but there is likely to be some increase in the home, as many farmers will sow timothy with their wheat. Receipts and demand, and, of course, the action of holders, will be the important factors.—*J. F. Zahm & Co., Toledo.*

Minneapolis Flaxseed Market.

MINNEAPOLIS, Aug. 11.—The position of the flax market is very strong owing to the sharp demand and extremely light offerings. High prices of the past month or so drew practically all of the old crop seed away from farms and there is virtually nothing left in the country. The new crop situation was improved by rains recently, but at best only a light crop is expected by the trade. No. 1 seed on spot and to arrive sold today at 2@6 over the Duluth September price.

Minnesota No. 2 rye a new pedigreed variety developed by the University Farm is said to have been found to be 25 per cent better than rye commonly sown in that state. It is free from

The Corn Market.

It is not often that the trade is confronted with so many important influences. Seldom has a week brought such a rapid change of values. Agitation against high prices of food commodities has put all legitimate conditions in the background. The trade, in its desire to lower food prices, has overlooked all other factors that in the general course of events would have a legitimate bearing on values. Barnes' statement attesting to the present and prospective value of the price of wheat from a world-wide supply and demand standpoint did much to stabilize prices. Alarmists received a serious jolt and were brought to a realization that economic conditions are in no wise changed. The 32c decline in December corn has not increased the supply of corn. The movement continues light and farmers are not in position to relieve the situation by offering more freely, as old crop supplies are small. On the other hand, the cash demand is good and its presence is continually felt by the maintenance of premiums over distant deliveries.—*Simons, Day & Co., Chicago.*

The Real Meat Offender.

It has been demonstrated to the Government over and over again that the meat packers sell their products at the smallest margin of profit of any article of commerce put on the market, but it seems a popular idea to want to lower the cost of living by artificial methods, thereby setting aside the law of supply and demand. The selling of meat foods by the Government is widely advertised, but it would be well to reflect that these goods are in part unsatisfactory to the general consuming trade. . . . We are familiar with the meat food business, and we have in the past repeatedly said that the butcher is the great offender for the high cost of meats, and all that is necessary for the Government to do is to have an honest, systematic investigation made to verify these statements. We think the hysterical action of the market has about run its course. Hog products are selling in some instances under the cost of live hogs. Mess pork is not bringing as much per 100 as are live hogs. This is an unnatural situation and cannot continue. . . Swift & Co.'s average price of dressed beef during the month of July was from $16.63 to $17.63. The butchers are not governed by these prices. They select the high prices of the year and keep their prices there, regardless of any drop in the market.—*Press & Co., Chicago.*

Fertilizers for Wheat.

The Soil Improvement Committee has tabulated in a brief form logical and workable directions for the selection of the seven fertilizer analyses recommended by the committee, as follows:

How to make selection of "full value" fertilizers for winter wheat from the several grades recommended by the Soil Improvement Committee:

	I. With ammonia.	II. Without ammonia.
A. High potash.....	2-10-6 2-10-4	0-12-4
B. Low potash.....	2-12-2 2-12-0	0-12-2 0-16-0

Where no manure is used on wheat land, where wheat is planted late, or where land is not plowed for wheat, select from Group I.

Where plenty of manure is used, and where clover does well and is grown regularly and at short intervals in the rotation, select from Group II.

On muck and peat soils, on sandy soils, where manure is used but lightly, or where clover fails, select from Group "A."

On clay and clay loam soils, on soils which do not respond to potash, or where manure is heavily used, select from Group "B."

CLIMAX SUPERFINE BRAND.

You know there are lots of wise birds in this world, ranging from the owl down. We have made quite a study of birds because the scarecrows in the fields and the particular preference for certain seeds and crops evidenced by certain birds help us in our seed business.

Our friends above, an eagle and a crow, sitting on a fence overlooking a broad field of fine timothy, are sizing up the situation.

The crow says to the eagle, "You may be the king of birds, but look at the crop that Small's Woodpecker Brand produced."

Now, as a buyer of seeds, we ask you frankly whether you are willing to parallel your good judgment and seed selection ability with the crow? If you agree with him, ask your dealer for Small's Woodpecker Brand of timothy seed.

BRITISH VEGETABLE OILS.

It is stated that an unprecedented condition has come about in the vegetable oil trade in Hull, England, in consequence of the removal of official control. This is particularly true as regards linseed oil, which under official control was offered the consuming trade at approximately $278 a ton about six or seven weeks ago, but at last reports has been priced at $576 per ton. The increase, however, of 100 per cent in the cost of raw material has put the manufacturers and consumers in a bad position which the government is trying to solve, but is not likely to do, because overtures to America to control the trade here have not been responded to. The fact of the matter is that the British control had placed the price of oil at the mills too low and by holding on to the product as a war necessity had so congested the storage that it was practically impossible to store any more. The crushers have been faced with prospects of closing down unless the tank pressure was remedied. Under the circumstances the Minister of Food decided to dispose of the oil and offered it to home consumers at £ per ton. Very little, however, taken at this price, although large quantities were sold for e chiefly for northern Europe and I dia. It was even reported that tons were sold the Germans at £75 per ton.

The Attorney General of North kota has notified all the state's neys that he expects them to pro any elevator owner or grain buye in any way is found violatin standard grain laws of that state

Montreal—Receipts for week ending Aug. 2, nil bags against nil bags last year. The market is steady, chiefly American, which sell at $6.50 to $6.75 per bbl. for No. 1 and $3.50 to $4 for No. 2. A few new Canadians have sold at $2 to $2.25 per bag.—Trade Bulletin.

Pittsburgh—East'n Shore branded No. 1, $7.75 per bbl., c. lts. $7.50@7.75; N. J. Cobb., 150-lb. sk., $4.25@4.35 jobbing, c. lts. $4 per cwt.

St. Louis—New—H.-g. bulk Early Ohio, $3.15@3.50 per cwt.; bu. boxes, $1.75@1.90.—Market Reporter.

A grain grading service has been established in San Joaquin valley, Calif., by the Farm Owners and Operators' National Ass'n, headquarters at Stockton. The association has provided mechanical equipment for inspection and has employed an expert for the purpose of grading their own grain.

HEARING ON WESTERN GRAIN RATES.

The Commerce Commission on Aug. 5 announced that hearings will begin September 8, before the Commission in Washington, on rates on grain and grain products from points in Idaho, Montana, North Dakota, South Dakota, Minnesota, Wisconsin, Iowa and Nebraska, to destinations throughout the East.

After those rates were increased by the Director General of Railroads, it was complained both to the Commission and the Railroad Administration that the relationship of Western grain was seriously disturbed as a result of the advanced rates by Gen. Order No. 28, effective June 25, 1918. Director General Hines asked the Commission to make a thorough investigation of the rate and make recommendations to him as to what action should be taken by the Railroad Administration to restore the rate relationship existing before the freight rate increases was put into effect.

Feedstuffs

J. R. Woodfill, Jr., and Ernest Davis have opened a wholesale flour and feed business at Batesville, Ark.

The Hales & Edwards Co., of Chicago, Ill., will establish a distributing point for their products at Oswego, N. Y. Wm. C. Brown will be in charge.

The Denver *Farm & Field* says that in many parts of the mountain country timothy and clover are sown together for a hay crop, making a splendid feed.

An Arkansas county farm agent recommends to farmers "who are not receiving more for wheat than they are paying for corn to feed wheat as a good stock feed."

A stock feeder of Laurel, Neb., successfully marketing a bunch of 40 head of cattle, reports they were purchased in February, fed on corn, alfalfa and molasses feed with a little oats. The shipper is reported as "a strong booster for molasses feed." He says it not only saves both corn and hay but the cattle do much better in many ways.

The Railroad Administration announces emergency freight rates to points in Wyoming, Montana and western North Dakota for alfalfa feeds, barley, corn chop, cottonseed cake, meals, milos, malt sprouts, etc., from Mississippi River and western points. The rates will be subject to a minimum of 10c per cwt. except that points on the C. & N. W., C. B. & Q. and N. P. the minimum rate will be 20c. The reduced rates on hay, straw, etc., will expire on April 1 unless sooner cancelled, changed or extended. Special rates will be made also on cattle and sheep from Montana points to feeding grounds. It is also proposed to establish rates on cottonseed cake and cottonseed meal from points in Arkansas, Louisiana, on and east of the Mississippi River, Texas and Oklahoma to some sections of Wyoming and Montana. The tariff providing reduced rates to carry the following notation, "These reduced rates authorized by the U. S. Railroad Administration as emergency rates to afford relief in drought stricken territory to which they are applicable."

The Pacific Northwest is generally short in feeds. Some points report a surplus, but as a rule in the feeding sections there has been a resort to grain, hays and barley, a great deal of which has to be imported. At Olympia all feed grains are being shipped in. At Lyle mill feed and rolled barley are being bought, the demand strong on account of poor pastures. At Aumsville, Ore., some oats may be shipped, but large quantities of mixed feed will be brought in. Hay also will have to be purchased, although the hay crop is pretty good. Astoria, Ore., reports oats, barley and corn being shipped in and good demand for millrun feed from California. Condon reports no hay will be shipped but some feed grains will have to be bought. Harrisburg reports mill feed and rolled barley being shipped in; some wheat and oats going out. Island City reports all old oats and barley gone. Hermiston is buying oats, barley and mill feed; demand for feed grains very good. Moscow, Idaho, says new barley coming in. Consul reports barley and mill feeds in good demand, local grain crop short; hay however is better than last year. Ahston is buying hay with a good demand for feed. Usually this district ships out both hay and oats; both will have to be bought this year.

We are buyers of old and new crop Alfalfa Meal. Quote prices delivered to this market.

E. P. MUELLER

5 N. LaSalle Street, Chicago, Ill.

Declines in Cottonseed Feed.

KANSAS CITY, Aug. 9.—Declines of as much as $5 a ton occurred in prices for cottonseed cake and meal on the Kansas City market this week. Cake and meal for immediate shipment is practically unobtainable, while offerings for fall delivery are increasing moderately. For 43 per cent protein cottonseed cake, dealers are asking $71 a ton, basis mills in Texas, or about $77.50, Kansas City. Few sales are being made, buyers being reluctant to contract at the present basis of prices.

THE FEED SITUATION.

By Sanders Sosland.

Continued keen buying and a dearth of offerings in many places by mills grinding new crop wheat have forced the market for bran and shorts to near record price levels. The recent course of values has exceeded the forecasts of even the most bullish members of the trade. Not many weeks ago buyers were operating cautiously, looking forward to an unprecedented supply of feeds from the new wheat crop, which at that time promised to yield one and one-fourth billion bushels for the United States as a whole. Then, the trade, or at least a considerable portion of the trade, was exercised over a sufficiently broad outlet to dispose of the production of bran and shorts during the crop year. Today finds buyers competing keenly for the current offerings and paying sharply higher prices than prevailed at the opening of the crop year.

Shorts display the strongest tone, with prices having reached a top of $2.95 per cwt., in sacks, basis Kansas City market, for the gray variety, with St. Louis and Chicago quoting well above the $3-mark, on a freight differential with the leading Southwestern market, from which territory the bulk of offerings now originate. Brown shorts have reached a top of $2.75 in Kansas City, also a record figure. There is little tendency among mills to discount prices for shorts on late August or September delivery, sales for the latter month being generally made within $1 to $2 of the current delivery quotations. Bran is quoted at $1.95 to $2, the lighter mill offal having sagged off rather sharply from a top of $2.15 in the forepart of the week. Shorts, too, have weakened, but not to the extent that has been noticeable in the bran trade.

The market for bran and shorts was thrown into a flurry when it appeared evident that proposals by Washington legislators for a reduction in the resale price of wheat to $1.51 or $1.76 a bushel, basis Chicago, would be carried through. A reduction in the resale price would virtually require a fixed figure on bran and shorts, particularly to carry out the government's plan for a reduction in the cost of living. Buying was temporarily suspended, and not until President Barnes of the United States Grain Corporation announced his refusal to reduce the price of wheat did the trade regain its former strength.

While flour millers are grinding more actively than at any time on the crop, with prospects for activity among mills in the spring wheat belt this week, owing to the opening of the movement of the new crop grain in that territory, available market supplies of the offal feeds are light. Many mills, particularly those which have sold ahead on their flour for 30 to 60 days, have booked their bran and shorts output for a similar period. A number of mills have restricted their sales to current delivery, but prices have been too inviting to many millers. Still, it is asserted bran and shorts are selling on a low level compared with corn and other grains, and most feedstuffs.

Jobbers in the East, Central States and Southeast have provided a broad outlet for bran and shorts. Sales to smaller dealers selling direct to consuming interests have not been large, this class of trade limiting its purchases to immediate requirements. The bulk of feed, it is generally believed, is held by second hands, and close students of the trade manifest more or less fear that the market has been over-bought. Such a condition in the trade is usually the case on a rising market, and, generally, is followed by a sharp break in values. To resell on the present basis would show a rather handsome profit for many jobbers, who bought early in the crop year at sharply lower prices.

FEED MARKETS.

TAMPA.

Tampa, Fla., Aug. 8.—The highe ever known on the Tampa market feed was reached today when a quantity of white shorts were sold per ton. Gray shorts are being from $64.50@65. Demand fair. I meeting with the customary small at the prevailing price of $49 for al product. No. 1 alfalfa meal is wo today; No. 2, $40. Five per cent a cottonseed meal at $64.80.

NEW ORLEANS.

New Orleans, La., Aug. 9.—Th market has been very irregular. cline in coarse grains, no doubt, mill feed prices, and some mills h duced the price of bran from $2.35 and others have offered as low as 2.15 per hundred tagged. Shorts a scarce; quote market nominal fro @3.

BOSTON.

Boston, Aug. 9.—The demand fo of all kinds continues rather ligh prices quoted as follows: Bran, sacked, $48 per ton; bran, winter, $48; middlings, sacked, $60@65; mix sacked, $59@63; red dog, sacke second clear, sacked, $73; stoc sacked, $59.50; oat hulls, reground, $32; hominy feed, sacked, $80@90; seed meal, sacked, $82@87. Receipts week ending Aug. 9 were 215 tons.

LOUISVILLE KY.

Louisville, Ky., Aug. 11.—Feed is in price and demand, with suppl and millers behind in deliveries, qu being hard to secure. In cotton Louisville, the market is quoted: $52 per ton; mixed feed, $60; mi $68; hominy feed meal, $81.

MILWAUKEE.

Milwaukee, Wis., Aug. 9.—The lo feed market is easier after the sh vances for the past few weeks. has been good for prompt shipme orders for future delivery are eas Inquiries are fair. Bran is quoted last week while middlings are als Current quotations are: Bran, $42@43; standard middlings, $55@ middlings, $60@61; red dog, $64.5 hominy feed, $78; rye feed, $53; old oilmeal, $95.50; cottonseed meal, brewers' dried grains, $60, all in sacks.

BALTIMORE.

timore, Aug. 9.—There is a fairly tone to the spot feed situation, with ngs of both bran and middlings mod- and the jobbing demand good. West- advices are encouraging to holders. ations follow: Western spring bran. ton, 100-lb. sacks, $49@50; Western ings, per ton, 100-lb. sacks, $59@60; mills' winter wheat bran, per ton, . sacks, $60; brown middlings, per 00-lb. sacks, $60@62; white middlings, on, in 80-lb. sacks, $70.

PITTSBURGH.

sburgh, Aug. 9.—More feed arrived during the last week than for some is past. A total of 21 cars were bul- d, most of which consisted of No. 1 No. 2 white middlings. There were 2 cars of bran in the list. Late in eek 9 cars, on the tracks, had not graded. Demand is showing consider- increase and prices are well main- but at wide variations according to ions.

DULUTH.

uth, Aug. 8.—Quotations in ground shorts, red dog and Boston mixed were advanced again during the last Good demand was reported locally ill feeds continued scarce on account ited operations at the plants. Prices : Bran, per ton, $43.50; ground oats, No. 1 ground feed, $64.50; No. 2, No. 3, $57.75; shorts, $54; red dog, oston mixed, $57; cracked corn, $71; ed, $40.

MEMPHIS.

phis, Aug. 9.—The feed situation en very quiet and the railroad situa- as caused a number of the plants g mixed and sweet feeds to close entirely. They could not get in raw al supplies and shipments were also ible to some sections. The trade little and some of them ordered nts to be held up pending settling strike. Prices held steady except little easiness was shown by mill Cash wheat bran is quoted at $42, shorts dropped to $60. Cottonseed lso eased off to $76. The trade says n some quarters there are liberal gs of new crop meal, but business much of the speculative flavor to much being done. Offers for Octo- ipment 7 per cent meal are around ! $72.

NASHVILLE.

ville, Tenn., Aug. 11.—Mill feed con- in excellent demand, with mills d about 10 days on output of wheat and about 30 days on middlings. ground feed is in fair demand. ons: Wheat bran, 100-lb. bags, per 6.20; standard shorts or middlings, mixed feed, $53@58.

PHILADELPHIA.

delphia, Aug. 9.—The market for ffs is weak and unsettled under a emand and in sympathy with the lization in the grain markets, prices a lower tendency. The quotations feed to arrive, in 100-lb. sacks, at r ton: Winter bran, $47@48; spring 46@47; standard wheat middlings, flour middlings, $65.50@66.50; red 1@71.50; shorts, $60@61; low grade 71@72.50; rye middlings, $60@61; low hominy, $77@78.50; fine white $78@79.50; reground oats feed, 32.50; cottonseed meal, 36% protein, cottonseed meal, 41% protein, $86 cottonsed feed, 20% protein, $62@

NEW YORK.

York, Aug. 9.—Feed market remains n owing to the small offerings from s. Buyers, however, do not appear llowing the advance, as purchases t and are only such quantities as ded for immediate requirements. luring the week advanced some- id Western bran is now quoted at middlings, $61@63, and red dog, while city bran is placed at $49; s, $59, and red dog, $70.

MONTREAL.

eal, Aug. 8.—The market is quiet dy, sales of bran in carlots being at $43, and shorts at $45. Mixed oullie has sold $65@66, and mixed at $56@58; pure barley meal, $66@ n. Dairy feed has sold at $49@50 and oats middlings, $47 per ton.—ulletin.

CHICAGO.

o, Aug. 9.—The mill feed market ewhat easier last week due in part liberal offerings. Bran was quot- 43; middlings, $55@56 for spot de- with Aug.-Sept. delivery running less. Quotations on cottonseed, in light supply, are as follows: l, immediate delivery, $82, $5 less delivery. Linseed oil meal, $92.

MINNEAPOLIS.

polis, Minn., Aug. 11.—The de- millfeed slowed up some when tion against the high cost of liv- strongest, but during the latter he past week the interest im- nd the undertone of the market ger. Spot offerings remain very the bulk of the output is being d out at present than for sev- s past. Heavy grades are in the demand, but bran is selling well f the call from so many different Shipping directions are good. s in car lots, f. o. b. Minneapolis, cks:

d Middlings, $51@53; Flour Mid- 5@57; Rye Middlings, $50@52; 100 lbs. jute, $63@65; Bran, $39

Alfalfa Department

A stock shipper from Wayne, Neb., reports two cuttings of alfalfa with good pastures.

A large increase in the alfalfa area is expected in the neighborhood of Prineville, Ore.

It is reported that 50 cars of alfalfa and 13 of native hay have been shipped from Newark, Ark.

Walla Walla, Wash., reports second cutting of alfalfa not up to normal; movement rather slow.

Toppenish, Wash., is shipping new alfalfa hay to the coast; No. 1 offered at $25@26 against $29 for timothy; alfalfa meal bringing locally $31, feed barley $60.

Mt. Vernon, Wash., reports new hay being baled; surplus will be large, as the local trade is using wheat hay chiefly for feed purposes. No. 1 alfalfa offered for $30, compared with $23 for No. 1 timothy.

A stock shipper from Newell, S. D., reports the dry farming region as about only half a crop of wild hay but on the irrigated land there have been two cuttings of alfalfa running a ton each per acre and with recent rains, a third crop is assured.

Special reports to a Helena paper from Montana say that much grain is being cut for hay in Richland County where alfalfa is sold for $23 per ton baled f. o. b. In Yellowstone County the second cutting of alfalfa has been put up. In Stillwater County the second cutting of alfalfa was of excellent quality and of good yield. Broadwater reports hay prices still very high. In Lewis and Clark Counties the second crop of hay is to be made but considerable spring wheat has been cut for hay. The same may be said of Flathead County. In Missouri County the second cutting of alfalfa yielded about a ton to the acre.

Moderate Alfalfa Meal Trade.

KANSAS CITY, Aug. 9.—A slightly weaker tone was evident in the market for alfalfa meal in Kansas City this week, with prices showing a decline of $1 to $2 a ton, in sympathy with the lower level in the hay trade. Chicago territory provided a liberal outlet for alfalfa meal, and sales were made to the Southeast, South and East. Mill offerings were limited, with some of the larger plants reported sold up for more than 30 days. Grinding was more active in the West.

Choice alfalfa meal closed at $38 to $40 per ton, in carlots, new sacks, basis Kansas City; No. 1, $35@37.50; No. 2, $32@34; brown, $29@31. Kansas was a free seller in the Southeast.

A firm tone prevailed in the alfalfa mixed feed trade. Economic unrest and lower price agitation affected the demand, but before the close of the week sales were of a fairly liberal total. Prices showed little change, closing as follows: No. 1 alfalfa molasses feed, $41@42; No. 2, $38@39; brown, $35.50 @37; alfalfa grain molasses feed, $48@60.

ALFALFA PRICES.

The Bureau of Markets under date of August 8 has the following as regards alfalfa prices throughout various parts of the country:

SOUTHERN.—Atlanta — Good inquiry for ch. alfalfa from the West, $40 del. here, No. 1 is $3@4 less so interest in ch. is not great, No. 1, $36.50. Macon—Stks. alf. fr., rcts. fr., dmd. fr., ch. alf., $34.50; No. 1 alf., $32.50. Savannah—Ariz. quoting most attractive offers, ch. alf., $38; No. 1, $36. Tampa—Rcts. alf. lgt., ch. alf., $37.80. Jacksonville—Ch. alf., $33; No. 1, $31, most attractive offers from Kans. City. Vicksburg—Stks. alf. fr., dmd. lgt., New Mex. supplying bulk of alf., ch. quoted $30.50. Mobile—Bulk from Colo., ch. alf., $34; No. 1, $32, dmd. gd. Birmingham—Stks. gd., dmd. gd., offered alf. John. gr. mxd., $35, New Mex. has most attractive offers of alf., ch. alf., $36; No. 1, $34.50. Montgomery—Stks. alf. ample, ch. alf., $36; No. 1, $33.50. Greensboro—Stks. alf. vy. lgt., slight reduction in prices, dmd. vy. lgt. Wilmington—Dmd. alf. nil.

Alfalfa Substitute for Corn.

"Alfalfa will be used on a large scale as a substitute for corn and other straight grain feeds, owing to the acute scarcity and near record level of prices prevailing for these products." So emphasized E. B. Bruce of E. B. Bruce & Co., Kansas City, in discussing the strength of that market for this variety of hay. "Alfalfa mixed feed already is being used by hog and cattle producers on a large scale. In some sections of Iowa and elsewhere, it is reported that hog producers are marketing their corn and buying alfalfa mixed feeds, which contain a greater percentage of protein and sell at comparatively lower prices. Feed mixers report a broader demand for hog feeds than at any other time in history. Already the mixers are buying considerable alfalfa hay, a liberal proportion of the sales being made to the East and Southeast represent purchases by feed manufacturers. This demand will broaden further as the season progresses, and will play an important part in the strength of the market for the hay."

Hay Department

A price of $20 a ton in the stack is prevailing for hay in the Prickley Valley district of Montana.

It is reported from Choteau, Mont., that from 250 to 300 tons of hay on the Bonnell ranch recently sold at $30 per ton.

The irrigated section of Richland Co., Mont., is said to have one of the best hay crops ever harvested. The quality is very fine, perhaps running from $20 @28 per ton.

A stock shipper from King, in the Sand Hills region, Cherry and Grant Counties, Neb., says they will have a bigger crop of hay than last year. Both first and second cuttings of alfalfa were good and the third is coming on. Besides that it has been possible to cut more wild hay than was the case last year.

The hay acreage in Indiana shows a reduction this year of 5 per cent compared with last year. In point of quality however the timothy was one of the best crops produced in recent years. The clover and mixed hays are very weedy. The second cutting of alfalfa was extremely short. Average yield of tame hay is 1.2 tons per acre.

Minnesota Hay.

The acreage of tame hay in Minnesota, Field Agent Kirk reports, is slightly in excess of one year ago. This increase is largely due to increased acreage in alsike, timothy and alfalfa. The acreage of wild hay shows a reduction from one year ago, due to floods covering low lands and some new soil being broken for grain. The condition of all hay is still quite promising, being 94 per cent. The average yield of clover hay is 1.81 tons, compared to 1.40 tons last year. This has been a very favorable season for all hay and the major portion of the crop is of extra good quality.

Wisconsin Hay.

Hay crops in Wisconsin suffered little injury from the dry weather of July 1, according to the report of Joseph A Becker, of the Wisconsin Cooperative Crop Reporting Service. A total production (both tame and wild hay) of 5,437,000 tons is forecasted by Aug. 1 conditions. The 1918 production was 4,338,000 tons. The acreage of tame hay is 7 per cent greater than last year, or 2,763,000 acres compared with 2,587,000 acres in 1918; wild hay is 98 per cent of last year, or 344,000 acres.

The estimated yield per acre of clover grown alone was 1.90 tons, compared to 1.50 tons last year. The second crop has been cut only in a few places, but will be light. The total production of clover will equal 780,000 tons, compared to 395,000 tons in 1918. Quality of clover hay is 99 per cent, as compared with 93 last year and a 10-year average of 94. Of the total acreage of clover alone, it is estimated that 19 per cent of the total clover acreage, or 78,000 acres, will be cut for seed.

Condition of alfalfa on Aug. 1 was 90 This condition is for the second cutting, which suffered to a considerable extent from the drought.

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

Failure to receive machinery is delaying the opening of the alfalfa milling plant of North Bros., in Kansas City. The building already has been completed and other equipment installed. It is probable the plant will be in operation before the close of the month.

Chicago interests were on the Kansas City market last week making purchases of prairie hay. Among the dealers from the Windy City visiting the trade here was W. G. Moorehead, of Van Wie & Moorehead.

"Our principal demand for hay is coming from the South and Southeast," declared L. C. Worth of the L. C. Worth Commission Co. "Dealers are sharing a generally broad outlet for all varieties of hay from other sections, including the East and the Northwest, but the bulk of the buying orders originate in the South and Southeast. Large quantities of alfalfa and timothy are moving into these territories."

Continued hot and dry weather prevailed over Kansas the past week, with a few local heavy rains scattered over the eastern half and southwestern counties, according to the weekly weather and crop report for the state. The report continues: "Alfalfa and pastures are making little or no growth in the eastern two-thirds of the state. The third cutting of alfalfa has begun in the southeastern part and the second is finished in the western. Cutting prairie hay is well under way. Grasshoppers are still damaging alfalfa in the western half of Kansas." Rain aided crops considerably in Missouri, but the precipitation was light, and insufficient on the whole.

"More or less serious complaints are being heard from country hay shippers regarding difficulty in obtaining cars for loading supplies," reported Ganthus Peters of the Peters-Elliott Commission Co., former chief inspector of the Kansas City Hay Dealers' Association. "The car situation at the moment is the principal factor in the restricted hay movement to the Kansas City market, but it will doubtless become more serious as the season progresses. Much wheat is now being accumulated, owing to the operation of the blanket permit system limiting the loading of the grain in the country. Now, with the settlement of the strike and probability that railroads will be allotted more cars for wheat, hay shippers fear that carriers will discriminate against them in an attempt to clean up accumulations of wheat."

In traveling through the country, dealers generally report, it is surprising to note that practically no old hay remains in farmers' hands. Normally, fair quantities are to be found on farms, which feeders hold until fall and winter. This season, however, supplies were cleaned up more closely than ever before.

"Demand for hay is widespread and unprecedented for this period of the year," remarked W. B. Poindexter of North Bros. "Virtually the entire country is represented in the territories drawing hay from the Kansas City market. From the Far Northwest, into the drouth areas, the North, the Northwest, East, South, Southeast and Southwest, including Texas, shipments of hay, particularly alfalfa, are being made from Kansas City. There is hardly sufficient hay coming to market, however, to meet the broad demand. Kansas and Col are supplying the bulk of the al though much hay from the latter is moving in the drouthy areas c Northwest. Yields of alfalfa i Sunflower State have not been the third cutting being generally mated at not more than one-fifth second crop tonnage. In many se the growth was so light as to disco the cutting entirely, and it is do if a fourth crop will be cut. A portant factor in connection wit hay supply situation is the fact help is scarce in the country, larger amount of alfalfa than nor is being stacked, which will not m market until fall work has been pleted."

CHAS. D. CARLISLE,
Newly-elected First Vice-Presiden tional Hay Association, recogni alike the calibre of the individu and the importance of the Kansas City Hay Market where he conducts his business.

MIXED CARS A SPECIAL

nore or less clover in it, as clover ame in where none had been for ears. There is no sale for hay shipped n, but there will be a surplus to ship ut.—*N. G. Buck, Winthrop, N. Y.*

HAY CROP SHORT.

INDIANA (7).—The hay crop was hort here because the acreage was mall. We find that the quality is ood and the yield good. Farmers be- eve in high prices and will not sell ntil they see that they will not get 30 per ton. Over one-half the crop is mothy; very little clover; the rest bout half and half mixed. Very little eing baled. Do not expect a large ovement for some time.—*Burk Ele- itor Co., Decatur, Ind.*

HAY GOOD—ACREAGE REDUCED.

INDIANA (5).—The quality of tim- hy hay and clover and timothy mixed y through this territory is very od. In fact, we think it is above the erage, but the acreage is very short not over 75% of an average crop. ie quality of the clover hay is not so od, being of a poor color, on account heavy rains at time of cutting. Farmers have not baled a great deal hay in this territory, as they have en very busy and labor has been very arce and hard to get, but we think re will be a free movement of hay m this territory after Sept. 1st. Alfalfa hay is also poor quality on ount of too much rain during har- t.—*Cadick Milling Co., Grandview, '.*

New England Hay.

uly, with more rain, was less favora- for haying, but most of the hay has n put in in much better condition and of much better quality than in the t two or three years, though some it got too ripe. Rowen, except in ited drought areas, is excellent. Low ks of old hay, high prices, and e stock to feed have caused farmers harvest and save their hay more ely than in the past three years, and acreage cut is about the same as year, though about 5 per cent be- usual.

ie usual seeding mixture is timo- clover and red top. The amount lear clover is quite small; there is ewhat more clear timothy, though below 10 per cent below of the hay.

llet acreage (a minor crop) is tly increased over last year except hode Island; and the same is gen- y true of the roughage crops. Con- n excellent. Pasture, still quite generally declined somewhat in in Maine, New Hampshire and ont, but improved about as much e other three states.—*Field Agent ers.*

OMAHA HAY NOTES.

J. A. Pederson, Correspondent.

aha Hay Co. are completing re- ling of their warehouse and offices th and Nicholas. They are now ing all classes of feed and grain ave lined up with the livest mill- the country.

Frohardt is back from his ex- l Colorado trip. Looks healthy ats heartily. Is now leaving to intend stacking of hay on his in western Nebraska.

Olmstead is laying down on us ot weather. Spends most of his on the farm. Can't blame him. we had a farm like his.

ık P. Brown on the sick list Frank is the most consistent tis patient on the market. Hope covers shortly.

ector Pederson starts on the nals of the Hay Men's Golf ament Saturday afternoon. Bet of near beer to a coke he loses.

growers in Nebraska are trying their surplus hay in the stack d to Wyoming and Montana feed- om the drought territory. As great deals have been transact-

nt rains in Wyoming and Mon- ave caused some feeders to hold stock and encourages longer holding of their cattle. Railroad strike trouble is also keeping stock shipments down.

Chances are that all South Dakota, Wyoming, Montana, Northern Colorado, Idaho and Utah alfalfa will be needed at home and the markets will not see the great movement eastward that has occurred for the last few years. The Eastern and Southern trade will miss this nice green irrigated alfalfa.

No movement of Nebraska alfalfa is looked for until possibly October. First crop heavy but partially damaged, second crop good and recent rains have stimulated growth of the third.

Hay Markets

TAMPA, FLA.

Aug. 8, 1919.—No. 1 timothy is being quoted, delivered Tampa, at $37.50 to $38.50. Receipts total fifteen cars. Quality running fair and but very few rejections account grade. Stocks on hand are fairly heavy, but under good demand from the country it is expected that there will be steady buying for shipment from the hay belts.

BUFFALO.

Aug. 9.—Farmers are bringing in more hay in a day than can be sold in a week, all being anxious to sell. Loose hay is offered from $18 to $22 per ton for new. Baled is quoted at $22@24, but can be had down here from Canada at $20 and fine hay at that. No straw offered.

DETROIT.

Aug. 9.—Hay consumers are having trouble securing enough to meet their needs. Receipts have been small for over a week largely because farmers cannot employ enough help to do their work. The hay cannot be baled. The market is quoted firm and quiet. Quote: No. 1 timothy, $31@32; standard, $30@31; light mixed, $30@31; No. 2 timothy, $29@30; No. 3 timothy, $25@26; No. 1 mixed, $27@28; No. 1 clover, $25@26 per ton.

BOSTON.

Aug. 9.—With the exception of the best grades of hay, which is very scarce, the demand is very quiet. Receipts during the past week continued light, the market is held a trifle higher than the previous week with no quotable change in price. The lower grades of hay are unchanged. The market on the latter is dull. There is more inquiry for new hay with quality and condition satisfactory. Buyers show no hesitancy in taking hold at the ruling discount of several dollars per ton under prices of old hay. New hay is quoted at $35@36 for large bales with small bales quoted at $33@34. Old No. 1 timothy hay is quoted at $39@40 per ton for small amount offering, with some receivers claiming that fancy cars will bring still higher prices. No. 2 timothy ranges at $34@36. No. 1 Eastern takes a range of $32@35 with No. 2 Eastern unchanged at $28@30. No. 3 hay is held steady at $26@28. The range of clover mixed, all grades, is unchanged from last week, at $26@30. Fine hay takes a wider range at $23@26. Packing hay is quoted at $17@19 per ton. Receipts for the week ending Aug. 9 were: Local, 14 cars.

The straw market is dull with offerings fully equal to the demand. Choice rye straw is quoted at $16.50 per ton as an extreme quotation, with oat straw a shade firmer at $12@14. Receipts for the week ending Aug. 9 were: Local, 2 cars.

LOUISVILLE, KY.

Aug. 11.—The demand for new hay is improving. Receipts are good, quality good, and consumers are learning that it is dry and safe.

Principal quotations are: Timothy, baled, carlots, Louisville, $31.50; No. 2, $30; No. 1 mixed, $31; No. 1 alfalfa, $29.50.

NEW ORLEANS, LA.

Aug. 9.—Receipts of hay have been rather large lately, and dealers, in order to avoid heavy demurrage charges by the railroads, have cut Western markets considerably. No. 1 offered from $31 to $32; No. 2 from $29 to $30, and No. 3 from $28.50 to 29.

MILWAUKEE.

Aug. 9.—The local hay market is generally higher for the past week, prices advancing $2@3. Receipts of hay are light. New choice timothy is quoted at $30@33, being $4 over last week. Current quotations are: Choice timothy, $32@33; No. 1, $30@31; No. 2, $28@29; new timothy, $30@33; No. 1 clover, $20@23; light clover mixed, $25@27; red top and timothy mixed, $25@27; stained timothy, $12@15; marsh feeding, $11@13; packing, $9@10; rye straw, $10.50@11; oat straw, $9@10.

ST. JOSEPH.

Aug. 9.—The hay market continued strong during the past week, with liberal receipts of all grades and an advance on prairie from 50c to $1 on the upper grades. The alfalfa division held steady with unchanged prices. Hay quotations are as follows:

Prairie—Choice, $21@21.50; No. 1, $20@20.50; No. 2, $18@19.50; No. 3, $15@17. Midland—No. 1, $16@17.50; No. 2, $12@15. Alfalfa—Choice, $28@29; No. 1, $26@27.50; standard, $23@25.50; No. 2, $18@22; No. 3, $15@17.50. Timothy—No. 1, $24.50@25; standard, $23@24; No. 2, $22@22.50. Clover light mixed—No. 1, $24@25; No. 2, $21@22. Clover—No. 1, $20@23; No. 2, $15@20. Straw, $8@8.50.

The outlook is for an active demand the coming week, and dealers are advising shippers to keep hay rolling wherever possible.

BALTIMORE.

Aug. 9.—There has been a steady advance in hay prices in the Baltimore market during the past two weeks under steadily diminishing stocks of old hay and a very light inward movement of new. For the better descriptions of timothy and mixed there is a fair demand and owing to the scarcity of good old hay, all near arrivals of new crop, in good condition, would meet with advantageous sale. Heated and bad order stuff, of course, would have to be discounted.

Straw also is firmer under light spot stocks and a fair jobbing demand. Quotations follow (all quotations below for old hay nominal):

Timothy—No. 1, nominal, $45; standard, $44.50; No. 2, $44; No. 3, $10@42. Light clover mixed—No. 1, $42@43; No. 2, $41@42. Clover mixed—No. 1, $41@42; No. 2, $39@40. Clover, nominal—No. 1, $37; No. 2, $35. Straw—No. 1 straight rye, $16@16.50; No. 1 tangled, $14@14.50; No. 1 wheat, $11@11.50; No. 1 oat, $13.50@14.

KANSAS CITY.

Aug. 9.—Irregular price changes were recorded in the market for hay in Kansas City this week. Prairie advanced 50c to $1.50 a ton, while a loss of $1 occurred on alfalfa. Other varieties were unchanged, with a firm tone prevailing. Receipts decreased slightly, amounting to 939 cars, compared with 1,289 cars last week and 594 cars a year ago. The movement, both incoming and outbound, was considerably restricted by the strike of railroad shopmen in Kansas City. Hay shipments on most lines were embargoed, or were accepted subject to delay, which buyers sought to avoid. Dealers here are drawing timothy from Missouri and Iowa. Shipments of this hay are being made into the Northwest, also into the South and Southeast. Demand for all hay continued active. Straw declined $1.50 a ton.

Prairie—Choice, $21@21.50; No. 1, $20@20.50; No. 2, $18@19.50; No. 3, $11@17.50; packing hay, $6.50@9.

Midland prairie—No. 1, $15.50@17.50; No. 2, $10@15.

Alfalfa—Choice, $28@29; No. 1, $26@27.50; standard, $22.50@25.50; No. 2, $18@22; No. 3, $15@17.50.

Timothy—No. 1, $24.50@25; standard, $23@24; No. 2, $21@22.50; No. 3, $15@20.50.

Clover mixed—Light, $24.50@25; No. 1, $23@24; No. 2, $17@22.50.

THE FITZGERALD BROS. CO., CINCINNATI, OHIO

Clover—No. 1, $21@23; No. 2, $13@20.50. Straw, $8@8.50.

CINCINNATI.

Aug. 12.—Lack of locomotives for switching cars to the plugging tracks, due to the strike of railroad shopmen, and generally light movement caused by recent break in all hay prices was mainly responsible for the small volume of business recorded here the past week. There was practically no shipping outlet for several days, but prices were fully maintained to a substantial advance for choice timothy and mixed, due to the active buying for that account. Clover continued firm and decidedly higher prices are expected unless the scarcity is soon relieved. The decision of the striking railroad employes to resume work gave hope to the trade of renewed activity, and increased business for the next week. No. 1 timothy, $31.50@32.50; standard timothy, $31@31.50; No. 2 timothy, $30@31; No. 3 timothy, $26@29; threshed timothy, $19@21; light clover mixed, $32@32.75; No. 1 clover mixed, $31@32; No. 2 clover mixed, $28@30; No. 1 clover, $29@30; No. 2 clover, $26@28; No. 1 local alfalfa, $29@30; wheat straw, $6@7; rye straw, $11.50@13; oats straw, $6@7.

SPOKANE.

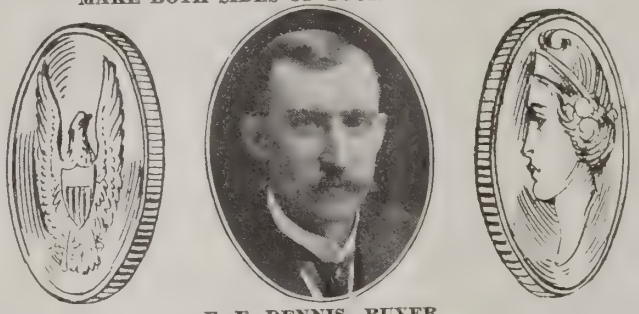
Aug. 4.—Timothy, $36 per ton delivered; $34 by carload; alfalfa, $32 per ton delivered, all wholesale prices to retailer.

MONTREAL.

Aug. 8.—It is reported that cars of old Canadian hay are being shipped to New York from country points. A dealer in Quebec city who has 250 tons of old hay to sell wanted $25 per ton f. o. b. Quebec. Most of the hay in this province has been harvested in good condition, the farmers having been favored with fine weather.

The receipts of hay during the last week at Montreal were 3,233 bales, against 7,470 bales for the same week last year.

The local market is firmer and as high as $28 and $30 per ton have been paid for best quality, down to $25 and $23. A holder of 250 tons of old hay in Quebec is asking $25 per ton f. o. b. there.—Trade Bulletin.



TOLEDO.

Aug. 9.—Movement of hay to market is rather limited, according to John Wiser of The Raymond P. Lipe Co., who says this is due to the fact that farmers are harvesting their grain crops. Scarcity of labor is also hindering the movement and this combination of conditions tends to hold prices up. No. 1 timothy, $30; No. 1 light mixed, $29.50; No. 2 timothy, $28; No. 1 alfalfa, $30; No. 1 clover, $28.50, basis Toledo rate point.

NEW YORK.

Aug. 8.—The New York Hay Exchange reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week	4,679	400
Receipts last week	5,154	360
Receipts Sept. 1 to date	213,243	13,668

There has been further recovery in prices this week, averaging close to $5 a ton on all grades, and market maintains a firm tone to the close. New invoices are running very light, the embargo on the N. Y. Central railroad against 33rd St. shed still being in force, and no river barges have come forward this week. Offerings of hay at all harbor points are working down to very small proportions and there was scarcely enough to go around during the fore part of the week but receivers reported slower trade on Wednesday and Thursday without any price change. At 33rd St. shed there were 61 cars unloaded from Aug 4 to 7 inclusive, and hardly sufficient in Brooklyn to fairly test the situation. A little new hay is coming forward by Catskill line boats, most is now free of heat defects, and it has sold in range of $33@40, the outside figure for No. 2 hay. Buyers prefer old hay, it constitutes the great bulk of offerings and our quotations as given in the subjoined table are only meant to cover old hay.

Very little No. 1 hay coming forward and several sales of large bales are reported at $48, though in Brooklyn it is doubtful whether $46 could be exceeded. No. 2 large baled hay has sold up to $46, with $45 generally top in Brooklyn, and some hay barely No. 2 in quality has worked out at $44. There has been corresponding improvement in No. 3 and shipping though just at the moment buyers seem to be backing up just a little at the outside quotations. In small baled timothy hay No. 1 if here would undoubtedly reach $46 at 33d St. though that is a very full figure to reach in Brooklyn. No. 2 hay has sold in Brooklyn at $43 and up to $44 at 33rd St. No. 3 and shipping in small bales is in ample supply and rather slow sale at the moment with the outside quotations regarded as rather extreme. A good deal of no-grade, musty and damaged hay is knocking around and sales are at all sorts of prices ranging all the way from $21@31 according to quality and some very poor stuff going out even lower. Light clover mixed working out well as quoted but heavy mixed is slow and irregular.

Rye straw very scarce at the moment with sales reported up to $16 for No. 1. Scarcely any oat straw here at present, last sales making at $11. Quotations, old hay:

	Large bales per ton	Small bales per ton
No. 1 hay	$46.00@48.00	$44.00@46.00
No. 2	44.00@46.00	42.00@44.00
No. 3	40.00@42.00	36.00@39.00
Shipping hay	36.00@38.00	33.00@35.00
No grade	24.00@31.00	21.00@28.00
Fancy light clover mixed hay	43.00@45.00	42.00@43.00
No. 1 clover mixed	39.00@41.00	35.00@38.00
No. 2	34.00@36.00	30.00@33.00
No. 1 rye straw	15.00@16.00	
No. 2	@14.00	
No. 1 oat straw	11.00@	

PITTSBURGH.

Aug. 9.—Demand and receipts are equally light in the hay market here. Prices remain unchanged but a decrease is anticipated in the event that demand does not grow. That receipts will be boosted during the next few weeks is said to be

ain. Some of the new hay arriving has been in poor condition and ship- are advised to take care that new hay ghtly baled and that bales should be ed on ends in the cars in order to pro- space for air circulation. The record of pts for the week was only 360 tons as pared with 388 for the same period a ago. New No. 1 timothy hay is selling 36@37 a ton, but arrivals are at their st ebb. Other prices range around nd $30 a ton.

MEMPHIS.

g. 9.—Dullness characterized the hay et for the past few days. Prices were ut change of consequence. Receipts small, in a measure due to the rail- strike and to the uncertainty as to s. Demand was also affected by the e, for outgoing shipments were not ble over some lines and on others was no assurance of prompt delivery. ations: Timothy—No. 1, $32; No. 2, Alfalfa—Choice, $33; No. 1, $30@31; , $24@25. Practically no other kinds y handled here yet.

DULUTH.

g. 9.—Receipts of hay on this market confined to a few cars. Dealers met no demand as consumers were being ied with loose hay coming in from mmediate district. Quotations weak- all round from $1 to $2 a ton as fol- Timothy—No. 1, $25@26; No. 2, $22@ Timothy mixed—No. 1, $22@24; No. 2, 0. Prairie—No. 1, $23@24; No. 2, $21 No. 3, $16@18. Midland—No. 1, $18@ o. 2, $14@16. Straw—Rye, $9@10; 8@9.

PHILADELPHIA.

. 9.—The market for hay continues with a fair demand and light offerings irable quality. Straw quiet but steady small supplies.

othy hay (according to location)— nominal; No. 2, $36@37; No. 3, $32@ lover mixed hay—Light mixed, $36@ wer grades, $31@35. Straw—No. 1 nt rye, $13.50@14; No. 2, $12.50@13; tangled rye, $13@13.50; No. 2, $12@12.50; No. 1 wheat straw, $12@12.50; No. 2, $11@11.50; No. 1 oat straw, $12@12.50; No. 2, $11@11.50.

OMAHA.

Aug. 9.—Receipts of both prairie hay and alfalfa light and demand quiet. Market steady with no change in prices.

Upland prairie—No. 1, $22@24; No. 2, $18@20; No. 3, $10@15. Midland—No. 1, $21@23; No. 2, $17@20. Lowland—No. 1, $15@18; No. 2, $12@14; No. 3, $8@10. Alfalfa—Choice, $26.50@27; No. 1, $25@26; standard, $21.50@25; No. 2, $17.50@21; No. 3, $14@17. Straw—Oat, $8@9; wheat, $7@8.

SAN FRANCISCO.

Aug. 8.—It has been very difficult to get cars after orders have been placed and even then only in a small way. Shippers have been compelled to accept gondolas (which are both expensive to load and unload) that bring about the only equipment that is available at the present time, although some stock cars are being furnished at some points. With the shortage of cars appearing so early in the season it is to be feared that it will become worse as the various other crops are to be moved.

The demand has been good and most of the receipts have been moved without difficulty. The majority of receipts by rail have been of alfalfa and wheat hay, most of the red oat hay having arrived by boats from the reclaimed districts.

Alfalfa has been in demand and is the leader in the market at present. Several round lots of hay are reported as having changed hands in the country districts during the past week at current prices.

No demand for straw.

CHICAGO.

Aug. 12.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Aug. 9, also the total receipts and shipments of hay from Jan. 1, 1919:

	Aug. 9, 1919.	Aug. 2, 1919.	Aug. 10, 1918.
Total receipts	2,370	1,935	4,061
Total shipments ...	203	202	667
Rcpts. since Jan. 1.	148,965	146,595	212,129
Shpts. since Jan. 1.	34,703	34,500	65,481

The smallness of the receipts and the uncertainties of transportation, with low stocks in warehouses and in individual hands, has made a very strong market—a famine market in fact for most qualities and everything has been marked up. We quote Monday's list as follows, as the established market, although a few sales have been made of choice qualities at about a dollar higher:

Timothy—New, No. 1, $38@40; Standard, $37@38; No. 2, $34@36; No. 3, $30@33; threshed, $15@20; sample, $28@30.

Clover—No. 1 light, $36@37; No. 1 Clover mixed, $30@33; Clover, $23@26.

Prairie—Kansas & Okla., $25@32; Ia., Minn., Dak., $24@27.

Marsh Hay—Feeding, $18@22; packing, $14@15.

Straw—Rye and Oat, $11@12; Wheat, $9@10.

The State Commissioner of Agriculture of Minnesota says the state is harvesting a heavy crop of hay and will be able to send a considerable quantity to Montana.

HAY NEWS.

Seattle reports another strong advance for both alfalfa and timothy.

Hay is expected to be short around Hemingford, Neb., the crop being only about 75 per cent of last year's yield.

Montana ranchers are buying hay in Minnesota, finding it more economical to buy the hay than to ship stock to the hay.

Harvesting of the big hay crop in the Chehalis and Newaukum Valleys of Washington is in full swing; tonnage is of splendid quality.

Timothy hay at Helena, Mont., is quoted at $27 in large quantities with reports from some sections of the state that hay is worth $40 a ton.

Stockmen from Wyoming and Montana are buying alfalfa, leasing pastures in western South Dakota, making headquarters at Buffalo Gap, S. D.

Farmers at Worland, Wyo., are holding hay at $25 a ton for first quality but stockmen are arranging to ship out the stock rather than pay the price.

Yakima, Wash., reports July 26 as the banner day in the history of hay trading in that section, prices reaching $25; growers sold freely at that level and heavy buying was the rule, the indications being for still higher prices.

The haying season in Kittitas County, Wash., is about completed. Considerable hay has already been baled. It is reported approximately 5,000 tons of old hay and 11,000 tons of new hay are ready for shipment, priced at $25@28 per ton.

The Iowa Weather Crop Bulletin estimates the tame hay yield of the state based on 582 reports at 1.8 tons per acre; wild hay 1.4 tons. Worth County reports the hay crop abundant. Plymouth County hay was saved well and pastures in good condition. Story County reports young clover and alfalfa greatly helped by recent rains.

The American Steel & Wire Co.'s crop report for the week ending Aug. 2 as to hay in Illinois says a good yield was safely put in the south; clover good. Indiana northern section is reported too dry for grass and clover; in eastern part hay lands are weedy; in northeast pastures are drying out and the hay lands are poor. In Iowa all pastures needed rain. In Kansas pastures were reported fine, with cattle doing well and ponds full of water. Some of the meadows are being cut and with a rain or two there will be a second cutting. Alfalfa has made a wonderful growth.

The National *Weather Bulletin* for the week Aug. 5 reports haying generally finished in New England. In Georgia haying has been much delayed and the baling of fodder has begun. In Oklahoma the grain sorghums, peanuts and sweet potatoes are generally in fair condition. In West Virginia haying is finished with a good crop. South Dakota alfalfa, wild hay and pastures mostly good except in the northwest, but all need rain. In Wyoming uneven showers have been beneficial to the water holes and some spring wheat practically abandoned will be used for hay. In Colorado a small amount of alfalfa has been damaged in the field and stack. In Nevada harvesting the second crop of alfalfa is well advanced with good yields in the west but poor and fair in northern and eastern portions; a large third crop of alfalfa was stacked in the extreme south. In California haying was about finished except old cuttings of alfalfa with a good crop.

Corn in Better Condition.

The Crop Report of the American Steel & Wire Company, under date Aug. 9, said in part:

CORN.—The prominent feature this week is the fact that much of the corn belt has had good rains, which has materially increased the prospects for a good corn crop. It appears that the dry spell has done only a little damage to corn in some localities in Illinois. In Kansas, Missouri and Nebraska, corn still needs rain to insure a maximum crop.

WHEAT.—All reports confirm the earlier findings on this crop, namely, that it is much lighter and of much poorer quality than originally estimated.

OATS.—Most of the oats in the country clearly reflect the results of hot, dry weather at the critical stage of its development; for this reason, they are only fair and of light weight.

POTATOES.—This crop leaves much to be desired. The indications are now that, taken as a whole, the crop will be short.

Severe dryness is still reported in Montana, Utah, Southern Idaho, Central and Western Washington, and in some sections of Wyoming. Paralleling this, we find dry conditions in Maine, New Hampshire and Vermont. Heavy storm damage is reported from Delaware and Maryland. It is too wet in Alabama, Georgia, Louisiana, Mississippi, North Carolina, South Carolina and Virginia. This is adversely affecting the cotton crop. In addition to above, Boll Weevils are worse than in years.

The outlook for sweet potatoes is excellent.

Stocks of Oats on Farms.

The Department of Agriculture reported the following estimates of the supply of oats in farmers' hands on March 1, and August 1, for a series of years, with the percentages of the crops:

Years.	Mar. 1.	%	Aug. 1.	Crop.
1919..	588,421,000	38.2	92,508,000	.....
1918..	599,208,000	37.6	80,504,000	1,538,359,000
1917..	394,211,000	31.5	47,834,000	1,592,740,000
1916..	598,148,000	38.6	113,728,000	1,251,837,000
1915..	379,369,000	32.6	55,607,000	1,549,030,000
1914..	419,481,000	37.4	62,467,000	1,141,060,000
1913..	604,200,000	42.6	103,900,000	1,121,768,000
1912..	289,988,000	31.4	34,872,000	1,418,337,000
1911..	421,535,000	37.4	64,342,000	922,298,000

Pressure is being brought upon State Grain Inspertor Hart of Kansas to enlarge his inspection quarters at Wichita where the service is proving quite inadequate. The inspector, we understand, complains that he has not money enough to make the service efficient.

Condition of Hay.

rage condition of hay and average per acre in tons as reported by u of Crop Estimates on dates in-l:

	Acres.	May.	June.	July.	Aug.	Yld.
...	71,224	94.3	94.1	91.1	91.0	[3]1.59

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Aug. 11.—Wild fluctuations in prices with a break and a partial recovery featured the provision market last week. At the close pork was $2.75 lower, lard off $1.45, and short ribs 80c lower than the previous week, sales being at intermediate prices for the week.

Action of President Wilson and of various congressmen and municipalities throughout the country, there being a Nation-wide movement against the high cost of living, as well as the Government's action toward the big packers, led to liquidation and short selling, particularly the latter, and prices declined nearly $2.30 to $2.85 on lard, nearly $6 a barrel on pork, and $1.65 on short ribs. A better feeling developed around the inside prices with more disposition on the part of shorts to take profits, and lighter offerings were responsible for the rally from the inside figure. It is the gossip of the trade that the Armour interests were bearish and short provision futures for some time past and were large buyers on the break. A decline in corn and oats of 24½ to 32c in futures from the high point of the previous week was a factor in depressing values.

The decline brought in inquiries and a little business for refined lard and a better call with fair purchases of English meats, which with the light receipts owing to labor troubles at the Stock Yards and with the railroads and the advance in grains brought about a good reaction.

Considerable selling was on early on the increase of 11,857,000 lbs. of lard at Western packing centers during last month, making the stock 62,221,000 lbs., or more than 5,000,000 lbs. in excess of last year's. In July last year there was a decrease in supplies of 5,779,000 lbs. Shipments were restricted by railroad conditions, the shopmen's strike forcing the railroads to decline to take business, and the total movement from here was 9,180,000 lbs., against 3,263,000 lbs. last year. Shipments of cured meats were 13,705,000 lbs., against 7,424,000 lbs. last year. Meat stocks at Western packing centers August 1 were 384,338,000 lbs., a decrease of 22,739,000 lbs. last month, compared with 6,737,000 lbs. last year, the total supply being a little over 1,000,000 lbs. in excess of a year ago.

There was buying of product on the break because hogs are $2 higher than the manufacturing cost of product. This was a factor in helping to sustain values toward the last and brought a good rally. The British government has commandeered supplies in Great Britain to prevent profiteering and to keep prices within reasonable limits. This was announced Saturday and was a factor in sustaining values.

Range of prices in June and previous and for the week follow:

Kansas City Provision Review.

KANSAS CITY, Aug. 9.—The strike of railroad shopmen in Kansas City and at nearby points greatly restricted the trade in provision products here this week. Railroads in most instances refused to take shipments, or accepted meats only subject to delay. The workers returned to work late in the week, but there was an accumulation of freight during the strike period and little improvement was apparent in the trade. A fair inquiry prevailed during the week. The agitation for lower living costs also affected the market to an extent, but this was less noticeable than would normally be apparent, owing to embargo difficulties. Prices were generally lower during the week.

Stocks of provision products in Kansas City at the opening of August amounted to 76,558,700 pounds, compared with 86,837,200 pounds on July 1, and 65,961,600 on August 1, 1918. Stocks of lard, included in the total, were 4,131,789 pounds, against 5,478,003 pounds on July 1 and 4,962,025 a year ago.

Exports of Meat Products.

The Bureau of Markets reports that for the week of Aug. 2 there were exported to Holland, England, France and Belgium from the port of New York the following:

	Week of Aug. 2	Total since Jan. 1.	Total since July 1
Beef—			
Fr. and frzn..	700,057	113,550,809	6,392,762
Cnd. and pkld.	951,865	78,619,747	4,965,250
Lamb, etc....	2,821	526,813	5,007
Pork—			
Fr. and frzn.	488,521	34,827,355	2,779,068
Bacon, etc...	15,009,053	441,854,128	43,387,887
Lard, etc.....	13,557,947	413,913,472	46,579,898
Sausage	548,544	10,039,532	1,189,217
D. s. and pkld.	10,454,416	415,660,155	42,318,565
Poultry, etc..	89,500	8,077,183	249,376

Also 766 cattle and 121 horses were exported to Belgium, 100 horses and 400 cattle to France.

Export of Hog Products.

The past week's export clearance of hog products, compared with corresponding time last year:

	Aug. 9, 1919.	Aug. 2, 1919	Aug. 10, 1918.
Pork, bbls.	2,060	1,090	610
Pork, lbs.	576,800	207,100	115,960
Meats, lbs.	37,256,000	47,003,000	29,133,444
Total meat	37,832,800	47,210,100	29,248,900
Lard	11,444,000	12,334,000	25,412,000
Total products.	49,276,800	59,544,100	54,660,900

Weekly Movement of Provisions.

Following were the receipts and shipments of provisions at Chicago for the week ending Aug. 9, 1919, and since Oct. 17, 1918, as compared with the corresponding time in 1918:

Past week	12,292	18,371	30,220
Preceding week	12,393	25,665	21,435
Last year	13,625	14,487	16,115

Sioux City as a grain center has been benefited by a decision in favor of the Traffic Bureau by the Milwaukee Road to supply all milling industries on Iowa and Dakota Divisions with better transit facilities. Under an agreement reached with the road Sioux City terminal elevators would be able to supply millers not only on the Iowa and Dakota Divisions but eastward to Peoria, Milwaukee and Chicago territory as well. The tariff changes necessitated by this new arrangement will be effected at once.

Hog Slaughterings.

Special reports to THE PRICE CURRENT-GRAIN REPORTER show the number of hogs packed since March 1, 1919, at undermentioned places, compared with previous year:

	1919. To Aug. 9.	1918. To Aug. 10.
Chicago	3,130,300	3,144,600
Kansas City	1,295,400	1,216,700
South Omaha	1,228,400	1,108,800

The total number of milch cows reported in Prussia March 1, 1919, 4,342,256, compared with 4,605,483 in March 1918. Total of all cattle in same state 9,098,000 in March 1919; 10,230,000 the previous year. All pigs 4,644,000 in March 1919, compared with 3,308,000 a year ago.

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, Aug. 11.—Trading in li stock was greatly interrupted by a p tial tieup of the railroads, owing to t shopmen's strike and to labor troub at the Stock Yards, a majority of t workers walking out contrary to th agreements, using the military and lice guard in Packingtown as a prete The unions have demanded that police, militia and deputy sheriffs withdrawn. This brought a better s ation at the close of the week. An provement in the railroad situation the close induced Stock Yard people advise conservatism in shipping at rate of 15,000 hogs a day and 90,000 the week, against 120,000 as the norm for this season. Cattle capacity is 000 a day or 50,000 for the week.

Light supplies of hogs and a w range of prices featured trad throughout the week. The top pr were $23.25, made Monday, while a cline of $1 was recorded from the h point by the middle of the week wit good rally toward the last. Pack were not anxious to buy because of labor troubles, and at times the ma was partly demoralized. Top price Saturday was $22.65 and the ave $21.20, or $1.16 higher than a week Average for the week was $21.05, or lower than the previous week and higher than last year. Receipts were only 75,158, against 105,852 96,201 last year. The eleven mar had 307,000, against 411,000 the p ous week and 442,000 last year. At 20 markets receipts were 366,600, a crease of 106,100 for the week. Pac bought sparingly throughout the w 66,000, but the pens were well cle at the close. Average for the week lbs., against 245 lbs. the previous and 242 lbs. last year.

Top prices on beef steers last were $19, made on Thursday, the est in several months. There wa advance of $2 on fancy steers wit average for the week of $16.85, o higher than the previous week $1.25 over last year. Medium to grades and yearlings secured the est advance. Quality on the whole better and more sold above $18 for many weeks. Labor troubles packers go slow, but despite th favorable condition comparatively beef steers closed below $14 an ferior grades were down to $12. lings brought $18.55. Supplies of ern range cattle were large, 17,50 7,500 less than the previous week prices were higher.

Cows and heifers gained $1 fo week with ample supplies. smaller than the previous week. shipping demand was good, helped to relieve the markets. Th trade was slow, but prices 25 higher. Calves were in small and $2 higher at the last. wi range $19 to $19.75 for the best. ers and feeders were in active with sales of the better grades $13.75, while the poorer kinds down to $7.50 to $9.50. The seve kets had 175,000, against 238,0 previous week, and the 20 marke 500, a decrease of 74,100 for the

Sheep and lambs were 25c with the top on native lambs 16. Western range lambs $17.15. sales of lambs was $15.75 to $ the average $16.50, or 5c better t previous week and $1.05 unde year's. Bulk of sheep sold at $ $10.50, the latter being the top, average of $9.85, or 15c lower th previous week, compared with last year. The twenty marke 386,500, an increase of 25,500 week, while the run at Chica 97,599, against 76,998 the p week.

Estimated receipts at Chicago week: Cattle 50,000, hogs 75,0

o 65,000. Last year's receipts were: e 68,765, hogs 112,449, sheep 83,-

ansas City Live Stock Market.

Sanders Sosland, Correspondent.

nsas City, Aug. 9.—Larger receipts of and more normal conditions in live- trading in general are expected to r this week's unsettlement in the as City trade as a result of a tem- y strike of shop workers of railroads the price agitation centralizing at ington. Price changes were abnormal veek, especially in the case of cattle ogs.

ch interest is manifest here in the re- l formation in Europe of an allied pork g organization, which may even pur- pork products in the United States ermany. This, together with the re- l resumption of restrictions on pro- trade by Great Britain, has resulted eculation as to whether a drive st American hog prices and pork ts is being engineered by Europe. harp downward tendency of the hog t this week increased speculation on oint, but there is no general agree- of opinion as to the influence of the oreign buying combination.

s closed $1 to $1.25 lower for the while pigs suffered a break of as as $2. On Tuesday alone the market c to $1.25, this recession being the on record for one day in the mar- Toward the end of the week prices but at the close today the top was 21.85, compared with the record of and a top of $23.15 on Monday. The e cost of droves around the close 21.60, against $22.88 a week ago. ıg demand checked by the railroad Receipts increased moderately, uality only fair.

changes in the cattle market were indicative of the trend of trade. closed mostly 25 to 50 cents higher, stockers and feeders, which were ged. A top of $18.90 was paid for). steers, the highest on record for and the best price since the early April. But the feeder who sold this ported a loss of $25 a head on the Kansas winter grassers sold up to but the bulk of Kansas grass sold at $11 to $13.50. Idaho, Oregon, ng and California contributed to the s, sending some dry weather cattle. alves sold up to $15, gaining $1. ows sold mostly at $8.50 to $9.50.)s and sheep were mostly un- d. Western lambs sold up to $16.50 ere quoted up to $16.75 nominally. es were quoted up to $9. Breeding vere affected by the difficulty in g out stock, including cattle, and fully $1 lower.

Omaha Live Stock Market.

ice McCullough, Correspondent.

ıa, Aug. 9.—After holding about on the heavy run of Monday and fat cattle advanced sharply at the f the week when receipts dropped edium to choice native beef is now largely at $16@18.25, an upturn of n some cases $1 as compared with ago. Butcher stock is fully 50@75c with the bulk of the good range ıd heifers selling at $9@11.

ers and feeders were sharply higher and Tuesday but the uncertainty portation shortened up the demand close. Light supplies enabled the to retain the early advance and s of the medium to choice stockers iers is selling around $9@12. Con- in the Western beef trade were he same as those in the natives. lly all of the 50@75c advance being on the closing days. Medium to rass steers are quotable at $10.50@ Total supplies this week are the of the range season to date, the s' receipts footing up only 31,000

eceipts for the week are the light- ıe year to date, the unsettled rail- ıditions being largely responsible cutting of receipts down to the y light total of 22,600 head. In to the lightest supplies of the year kets were most irregular and the f prices the widest seen so far in reaction at the close of the week l part of the early sharp decline ers today bought their hogs 40@ r than a week ago and shipping wed greater decline than that, the 21.25 being $1.25 lower than last . Bulk today sold at $20.40@20.75. een largely a quality market with choice hogs of all weights selling the same notches.

n of sheep and lambs this week eaviest of the season so far, the otal being 132,400 head. Since the days the trend of fat lamb prices toward higher levels and they are)@75c above a week ago with good kinds around $16@16.50. Aged eld about steady all week and closed at $9.75@10.50, wethers at und fair to best ewes at $6@8.75. tie-up on some roads early in was largely responsible for a big n feeding lambs. On the close vas broad and prices made some not being over 75c lower than the edium to choice grades of feeding e now selling largely at $12.75@

ouis National Stock Yards.

L. Wyatt, Correspondent.

l Stock Yards, Ill., Aug. 9.—Un- ry railroad conditions are re- for a lighter run of cattle this n usual for this season of the year. The receipts for the most part consisted of medium weight kinds with very few going over 1,250 pounds. A few scattered droves of good cattle were amongst them. The top for the week on heavy cattle is $17.90 and on yearlings, $17. The steer top was made on a load of 1,460-pound Missouri-fed steers which were about the best that we have had in the entire season. On an average the market for the week is around 50c higher than the close of last week, the biggest end of the advance being on the better grades.

The hog market has been very irregular this week. It began to decline on Monday and continued to do so until the middle of the week, then it steadied and at this writing has entirely recovered its loss and is fully steady with the close of last week. The quality of the offerings is not quite up to what they have been and while we are receiving a few good ones the average can only be called fair if that. The week's closing quotations are: Mixed and butchers, $22.75@23; good heavys, $22.75@22.90; rough, $18@20.25; light, $22.25@22.95; pigs, $17@21; bulk, $22.50@23.

The sheep and lamb market, while strong in tendency, does not show much change for the week. Good lambs topped at $16.50 and there is a demand for this kind. The feature of the market is the continued and growing demand for good breeding ewes. Best black faced ones sold up to $14 this week. If we can judge next season by what we have experienced this season the demand for breeding stock indicates greater increases in our receipts.

Fort Worth Live Stock Market.

Roy C. Murphy, Correspondent.

Fort Worth, Aug. 9.—Receipts of cattle this week have been of moderate proportions and salesmen have found comparatively easy sailing. Strength is observed in the general price list, beef steers being around 25 to 35c higher, with cows and heifers about 35 to 50c above last week's closing quotations. Calves had a good week, the market developing an advance of 75c to $1, heavy calves showing the big end of the appreciation. Bulls are selling a shade stronger.

Best fed steers here this week sold around $13, with the choice cake and grass south Texas cattle ranging around $12.50 @12.85. Heavy butcher cows brought $9.50 @9.75, and desirable heifers cleared around $10@10.50. Calves reached $14 on Friday's market, this being the extreme high range for the week.

Hogs sold at $23.30 on Monday's market, but prices dropped to $22.40 on Tuesday and $21.75 on Wednesday. Friday's market developed a little strength and choice hogs were quotable at $22, though the best here went at $21.75. The loss for the week amounts to $1.25. Pigs sold higher, regardless of the decline in hogs, the summit of the market being $21, though $20.50 was an outside quotation at the close.

No change in prices on sheep, lambs or goats developed during the week. Receipts were small and little of quality appeared. Best lambs sold around $16@16.25, with wethers going at $10.

Oklahoma Live Stock Market.

Thusnelda Haehnke, Correspondent.

Oklahoma City, Aug. 9.—Cattle receipts this week have not been up to expectations caused, we believe, by the threatened railroad trouble. Packers the middle of the week were running behind on their orders and at this time the market was good, steers being fully steady. In fact they have been steady to 25c higher for the week. We did not have very many quarantine steers on sale, quality being mostly common light weights, $7.50@8. Quite a few cake-fed cattle here, averaging 1,050 to 1,150 pounds, at prices from $11@12.50. On account of the very few receipts we had on our market this week packers are going short of time.

Canners were stronger for the week, shipper cows going 25c higher. Cow buyers were entertained largely with jackpot shipments and a lot of cheap goods coming. The middle of the week the bulk of the offering, however, consisted of common swaybacks, and on anything under $7 the market was slippery while canners and cutters were given a cold reception. Calves are steady for the week, closing with a top of $12.50 for the week. Stockers and feeders are scarce and steady. Bulls are also steady for the week.

The hog market was about steady for the week although lower than last week. Still very few hogs coming and many more are needed. Around $21.50 is taking the top here these days.

Denver Cattle Market.

Denver, Aug. 8.—As compared with the date of our last letter, the cattle market shows a little better, although the trading this week has been very uneven. On Monday the market was 25 to 40 higher on all killing grades, but on Tuesday prices were 25 to 40 lower, taking off Monday's advance. At the close of the week there is a better feeling to the trade and unless the market is prevented from recovering by some of the unsettled conditions, the chances are that we will have a little better trade next week. Quote common to choice killers, $7@13.50; stockers, $6,50@8.50; good feeders, $7.

Canadian Livestock Market.

Winnipeg, Aug. 9.—Select hogs were still bringing $23.50 when the market opened on Monday and this quotation ruled until Friday when there was a break of $1.50 per cwt. Packers bid $22 but sellers refused to listen to such offers. The result was a complete deadlock Friday and Saturday as well with absolutely no trading. It was feared that that figure would eventually get them on Monday. There was a good demand for good butcher steers throughout the week but the half fats were not wanted. Choice steers sold at $12 with good butcher stuff $9@10.50.

R SALE—Three grain elevators n State of Washington THOMPSON GILLIS CO. Spokane, Wash.

ENGINES FOR SALE.
SALE—Oil Engines. Slightly used. P. Fairbanks Morse. P. Fairbanks Morse. P. Fairbanks Morse. P. Otto. P. Fairbanks Morse. P. Fairbanks Morse. l small sizes. e engines are in first-class condi- nd operate on a low grade oil. for prices today. A. H. McDON- 543 W. Monroe St., Chicago, Ill.

MILLS FOR SALE.
BUSHELS CORN MILL for sale; or half interest—equipment first- Nordkye & Marmon machinery at Ala. Fine location; own side- nd warehouse electrically equipped, P. Cheap rates milling and transit tates—4 railroads. Write or wire. OWN, East Florence, Ala.

ACHINES FOR SALE.
SALE—One 25 H. P., one 35 H. P. 45 H. P. Miami Gas Engines, in t condition. Address The SHARTLE ERS MACHINE CO., Middletown,

ACHINERY WANTED.
TED—Bag closing machine for 140- ; stencil cutting machine and bag machine. ADDRESS BOX 1796, alls, Mont.

OFFICE SUPPLIES.
SALE—9 column Burroughs adding , $105; nearly new Underwood type- 50; brand new F.&E. Check writer, erty bonds accepted. Will ship on EIER SEED CO., Russell, Kans.

SALE—Burroughs, Wales, Amer- alton, Standard, etc., adding ma- half retail prices, fully guaranteed. ter bargains, all makes. Get illus- atalog and bargain list. MINNE- YPEWRITER EXCHANGE, Dept. 36, 4th Street South, Minneapolis,

HAY FOR SALE.
SALE—Elkhorn Valley Hay in car- . Write for prices. HARRY T. Ewing, Nebr.

GRAIN WANTED.
AND SCREENINGS WANTED— wheat, barley, corn or oats, reenings, corn screenings, corn t screenings, oat clippings, barley s, barley chaff or elevator screen- any kind wanted. Please send BEREND J. BURNS, 324 Cham- ommerce, Buffalo, N. Y.

Canadian Price Fixed.
PEG, Man., Aug. 18.—The Ca- Wheat Board has decided to fix the minimum price for the p, it was learned from an un- ource last night.

PROTESTING WHEAT DISCOUNTS.

The farmers of Missouri held a recent conference at the capital at which a protest was made on behalf of wheat growers "who are the losers," against methods and discounts of the Grain Corporation. Farmers, the clip sheet of the State Board of Agriculture says, "are urged to avoid shipping wheat direct to the Corporation for in so doing the grower at this time loses the premium which is paid practically every day by the mills and elevators." The conference protested that the discounts below No. 1 are unfair "because they nearly double the discounts established for these grades established by long custom of milling and grain buying."

The protest text is formulated at considerable length and is being circulated all through the state by the local press from the clip sheets of the State Board of Agriculture. The feature of the protest is as follows:

Under normal commercial conditions, provided the wheat is dry and reasonably clean, No. 2 wheat brings from one to two cents a bushel less than No. 1; No. 3 from two to four cents less than No. 1; and No. 4 from four to six cents under No. 1.

The discounts fixed by the Government are for No. 2, three cents under No. 1; for No. 3, seven cents under No. 1; for No. 4, twelve cents under No. 1; No. 5, fifteen cents under No. 1; sample grade, 25 cents under No. 1. The discount for grades 4 and 5 and sample are minimum discounts, and may run as high as 87 cents a bushel.

The July crop report for Missouri shows the quality of the wheat, taking the state as a whole, ten points under that of last year. Assuming there are 30 million bushels of No. 3 wheat in the state this year, the Government discount, if applied, would make a reduction in the value of this grain of four cents a bushel as compared with the discount in the open market, entailing a loss of more than a million dollars to Missouri farmers if sold according to the Government discount schedule.

BROOM CORN.

Temperatures in the Southwest still continue very high, with scattered showers, but not heavy enough to be of any material advantage to late-planted crops. Moisture is needed, but so far, *The Broom Corn Review* reports, the crops are holding out, but will require rain very soon to bring them to maturity.

It is estimated that but 200 cars of old corn still remain in growers' hands in the Southwest, which is being picked up gradually at $50@100 a ton, with the bulk ranging at $65@90. In the Lindsay district business was most active and receipts were increasing with prices ranging from $125@275, bulk of sales $225@250. The Wichita market was confined chiefly to old stock at prices ranging from $90@125, the highest price being one car of southern Oklahoma dwarf at $195. New Texas is offered at $150@250.

In central Illinois the crop outlook is very good. Harvesting is started and will be in full swing next week. New crop corn is selling at $100@200 with bulk of sales at $150@175.

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago decreased 512,000 bus. last week, corn 271,000 bus., oats 382,000 bus. and barley 175,000 bus. Rye increased 225,000 bus. Details follow, the last three ciphers omitted, except in the totals:

	Public.	Private.	Total.	Last yr.
Wheat	783	5,589	6,672,000	12,331,000
Corn	53	274	327,000	2,775,000
Oats	1,018	4,802	5,820,000	4,824,000
Rye	1,179	903	2,082,000	539,000
Barley	207	462	669,000	844,000

Farm Land Sales.

Farm sales, of all kinds, are heaviest in value in October, and lightest in May and June. On the basis of $10,000,000,000 as approximately the value of total yearly sales, the sales monthly approximate the following:

Jan.	$850,000,000	July	$ 640,000,000
Feb.	680,000,000	Aug.	690,000,000
March	740,000,000	Sept.	1,010,000,000
April	690,000,000	Oct.	1,260,000,000
May	610,000,000	Nov.	1,170,000,000
June	610,000,000	Dec.	1,050,000,000

Rye Situation.

September rye in Chicago closed a week ago at $1.60 and Aug. 16 at $1.57½. September corn in the meantime declined from $1.94 to $1.82. The comparison is of importance in showing a tendency of the rye market to break away from corn's influence and assume an independent position where its price will be governed by its flour value rather than by its feed value. A reported sale of 1,000,000 bus. of rye for export was the main feature of the week's trading.

The new crop is not yet moving in volume but with improved railroad conditions, receipts should increase.—*Blodgett-Holmes Co., Janesville, Wis.*

Export Wheat Licenses.

The Wheat Director gives notice that effective August 15, 1919, and until further ordered:

(1) Applications in duplicate for licenses for the exportation of wheat to all destinations in Mexico will be received for consideration at the office of the Wheat Director, 42 Broadway, New York.

(2) Applications in duplicate for licenses for the exportation of wheat to all destinations in the Western Hemisphere and East Coast of Asia, to which wheat flour shipments are now licensed, will be received for consideration, etc.

Quarantine regulations have been issued at Atlanta prohibiting the delivery in Georgia of seed wheat originating in New York, the Virginias and Maryland and any shipment of wheat from Jackson County, Ga., except by special permission. Quarantine of wheat is the result of the discovery of Nemanote or Welworm of wheat in many Southern and Eastern States.

RECEIPTS AND PRICES OF RYE.

Receipts of rye at the principal primary markets of the Central West for the week ended August 15, and for the corresponding week last year as reported by the Minneapolis *Market Record* were:

	1919. Cars.	1918. Cars.
Minneapolis	128	118
Duluth	88	...
Chicago	135	169
Omaha	20	2
Milwaukee	19	38
Total	390	327

Closing outside prices of rye of standard quality and spot cash for each day of the week beginning August 8, were:

	Mpls.	Dul.	Chi.	Oma.	Mil.
Aug. 8.	$1.45	$1.48¼	$1.49½	.....	$1.52
Aug. 9.	1.51¾	1.54½	1.58	$1.48	1.60
Aug. 11.	1.47½	1.49½	1.58½	.....	1.57
Aug. 12.	1.49⅞	1.52	1.57½	1.45	1.53
Aug. 13.	1.53⅞	1.55½	1.57½	1.49	1.60
Aug. 14.	1.47¼	1.50½	1.59	1.46	1.56
Aug. 15.	1.50	1.53	1.55	.....	1.56

"See How Simply It's Built"

The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.

Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

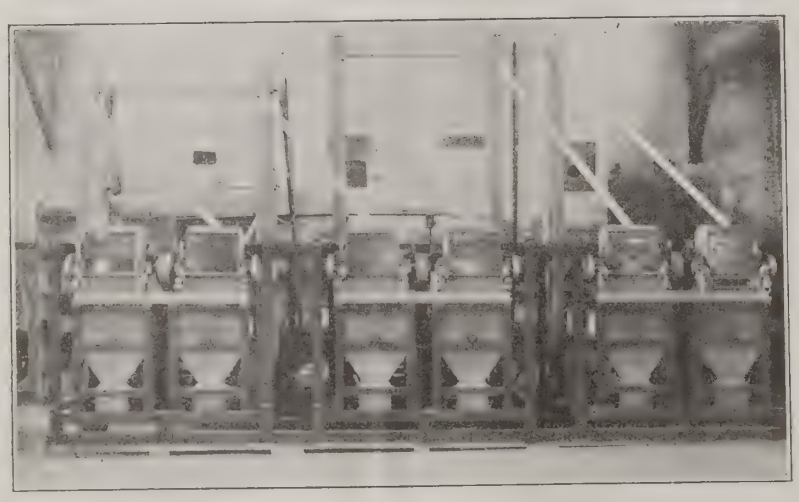
Work! Work! Work!

That's the motto of "Handy Andy." Never gets tired. Never strikes. Never lets up until you say so.

"Handy Andy," the practical, portable, adjustable elevator, is the strong armed workman that lifts and conveys bags, boxes, bales and other packages without a complaint. Loads cars, loads wagons.

Light in weight. Sturdy in construction. Simple to operate. Saves money.



There is another model of "Handy Andy" for handling material in bulk.

Send for particulars.

BUSINESS AND TRADE CONDITIONS

THE frantic efforts of the Administration to stop the advance in commodity and especially food prices and to reduce existing prices, has furnished the big type heading of the newspapers during week. Some seizures of foodstuffs in cold storage of sugar, with arrests of sugar brokers, have been made, and in various ways the district attorneys Attorney-General Palmer have been first-paged week. In many ways it reminds old timers of whilom shibboleth, "The Old Flag and an Appropriation." General Palmer has asked for a million a half extra for this work of ferreting out profiteers and prosecuting them. The Agricultural Department (of course) wants to waste $600,000 on one of its absurd "food surveys" which were the "cause to laugh" of the war period—reports of stocks second hands that were consumed long before the they reports of their existence appeared, tabulated painful degree of particularly for the benefit curious posterity and the puttering professors. the Federal Trade Commission, that triumvirate meddlesome nobodies, want half a million to find what is the cause of all this hullabaloo and of use to recommend another of their made-in-Germany remedies for a crisis that can be cured by no bumancy of incompetent bureaucrats and which cure itself only when men go to work again and the the gratification of their wants within the limits of earned incomes.

Ninety per cent, more or less, of human wants are merely artificial, so far as human existence is concerned. The gratification of artificial wants is entirely legitimate of course when legitimately done. Human progress depends on the increase of artificial wants which can be legitimately satisfied. The most incontrovertible fact of life is the inability of human nature to be satisfied with what it has. Given bread we want butter, like children we demand jams; given sails for propulsion, man is not content with less than wings. Wants are insatiable. As the capacity for production increases, the capacity for consumption increases even a little more. This is a law of nature. It has lifted men out of the cave into the steam and flat with plumbing and electric light. But it has not brought satiety. No working overtime will ever do that. No division of existing capital would ever begin to do it. During the war the men who got their wages or incomes increased naturally enough their consumptive wants. They could hardly do otherwise, being human beings; and they spent their new incomes with lavish hands, cultivating expensive needs. In this country the extravagance of the wage earner and the *nouveaux riches* became almost a proverb; the evidence of unrestraint of consumption being that while prices advanced to unlimited levels there was no abatement of purchasing. The politicians who may have realized it in time told the working people, when they were laying down fat pay envelopes and enjoying their new power of unrestrained consumption, and when the leaders were limiting the volume of production, the goods they were then buying so recklessly were not being replaced and that the end would come, at least that the time would come when there would be a general scramble for the things that are now to go round but which all want. That is the case in the world is today. There is not only scarcity of commodities but there is the general indisposition of people, especially those whose wages and salaries have been enlarged since the war began, to reduce their consumption to the condition of the commodities supply—to maintain a standard of living that is possible for all during the present period of scarcity. The war cultivated too many "champagne tastes" to enable all to live comfortably when the supply of champagne is not large enough to go round. Of course, prices are high.

The effort to mitigate, much less cure, such a condition by wholesale seizures of foodstuffs and their immediate sale at a low price, trusting to luck or worse for their replenishment somehow from somewhere when they shall be needed before a new supply can be made or grown, is a sure sign of official incompetency and cowardice. It is pure politics—a bluff to save the politicians of both parties. Even worse is the proposal of the Administration to continue the Food Control Law indefinitely and even to enlarge this war makeshift of licensing business. The President demands still more autocratic power to deal with profiteers and he would extend the principle embodied in the Food Control Act, the Kellogg, the McKellar, the Gard and Kenyon-Kendrick bills to foods, feeds, fuel and practically all merchandise in general consumption, beginning with clothing and then going on to the rest *ad libitum*. It is the indefensible makeshift of the opportunist, not the expedient of a statesman and may be followed by an act similar to the British Commons' act of last week (125 to 60) fixing wholesale and retail prices. It threatens a worse kind and degree of bureaucratic tyranny than any of the numerous invasions of the rights of the citizen which were tolerated under protest during the war when all understood that with the war they should end.

But there is no sign of that, the new Congress showing as rabid an intent to hamper and control business as did the old Congress at any time. The daily papers, quite unexpectedly—for they have fallen into the habit of approving, or at least of ignoring, even countenancing, these attacks on the rights of individuals, in their disinclination to protest against the popular side—have begun to show alarm at this disposition at Washington to rule like an autocrat by means of the license system. The Chicago *Daily News* at least has been asking business men what they think of it, as if there could be other than one answer. The opportunities for tyranny in such a system ought to be appreciated by even the most thoughtless. The experience of the grain trade with the system may not be generally known. It has not been alluded to outside the grain trade press, so far as we know; but the cancellation of licenses by the Grain Corporation on the mere allegation of profiteering and the arbitrary refusal to grant licenses, which it is quite within the power of the Corporation to do under the law at this time, with or without cause, show how precarious would be the situation of business men with such autocratic power in the hands of any one man or bureau. The Dominion of New Zealand has just such a law; and the recent experience of Armour & Co. in that country shows how it works there and how unquestionably it would work here.

This experience, which is told in a letter by J. Ogden Armour to Senator Gronna, under date Aug. 6, is substantially this: Armour & Co. of Australasia, Ltd., is a New Zealand corporation which had complied with all the laws of that Dominion, having been in business there for several years. But in December last a law somewhat similar to the Kenyon-Kendrick bills (these senators may have plagiarized it—our statesmen no longer seem capable of constructive initiative) was enacted, requiring exporters of meats to take out licenses. When the company named applied under the act for such license, it was informed by Macdonald, Minister of Agriculture, that,—

> I regret to inform you that I cannot grant this license. This decision has been arrived at after the perusal of the official summary of the report of the Federal Trade Commission on the meat packing industry," etc.*

Thus the license was withheld, not because any act of omission or commission by the company was alleged, or because the exportation of meats was prohibited or not desired, but simply because a document of questionable character had been officially endorsed by a commission representing the President, calling attention to a state of facts which at this time are allegations only and have not been adjudicated in any way by the constituted courts of the land. Does any one imagine for a moment, in view of the recent statement of Assistant Secretary Ousley, undoubtedly voicing the opinion of the Agricultural Department, that if the Kenyon act were now on the statute book, a similar license to Armour & Co. in the U. S. would not be revoked or refused in this country by the Secretary of Agriculture on the advice of the autocrat of the meat packing industry, created by that bill? The New Zealand attorney reporting this circumstance to Armour & Co. says: "I am not able to advise that there is any remedy in the law for . . . this piece of spoilation of private property." If this licensing principle is the best the new Congress can give the country in the way of business "reconstructive legislation" one may well wonder what it has advantaged this country to have "kanned the Kaiser," if the worst features of the Kaiser's system of bureaucratic government are to be transferred bodily to this country.

The Kenyon bill even goes so far in imitation of Kaiserism as to provide—

> SEC. 4. That no person shall engage in or carry on the business of—
>
> (c) Collecting in connection with a stockyard and distributing in commerce live-stock quotations or live-stock market news;
>
> unless he shall secure and hold a license issued by the Secretary of Agriculture, etc.
>
> SEC. 11. That the Secretary of Agriculture may make such rules and regulations as may be necessary to carry out the purposes of this act, etc.

and also, of course, to carry out any further purposes which the Secretary personally may think the act should have provided for specifically but does not. That is what "rules and regulations"—the bite of all this Agricultural Department law making—are for.

This attempt to throttle the commercial papers is a new idea in this country, where every sort of politically rotten high-brow publication advocating the breaking down of our Government and its reconstruction on proletarian and professor of sociology ideals has unlimited opportunity for mischief. It is peculiarly Kaiser-Prussian, and the possibilities of the license system with "rules and regulations" to match throttling the trade press ought not to escape the attention of the reader, who may confidently

---

*This report is printed by the government printer and is evidently circulated broadcast in this Dominion. Even with my own slight knowledge of the operation of your company and its many ramifications, I am able to detect the various inaccuracies in the findings of the Commission. I do not know, of course, what weight is attached to the report in the United States, but I can very well understand that a document of this character from a Commission called into existence by the august President of that country should produce considerable stir in a distant colony where the public are not able to judge of the facts passed upon by the Commission, and where there has been no opportunity for stating the case for the companies attacked.—New Zealand Attorney for Armour & Co. of Australasia, Ltd.

expect, after the Trade Commission, with Mr. Kenyon's connivance and that of Congress and the Administration, shall have emasculated the packing business and the market papers, it will turn to an attack on the grain trade, then proceed to the feed business and put other lines of business *seriatim* under the thumb of some commissioner with power to report to some bureau working with the acid of "rules and regulations," and like the New Zealand Minister of Agriculture confiscate private property with as little compunction as it would crush a rabbit, should the courts permit such destruction. The attitude of the American intellectuals and dilettante publicists toward this kind of legislation shows how great has been the influence over the Administration and our legislators of Kaiserism in government, adjusted by classroom theorists to work out the tyranny of the minority in a democracy; and unless ousted it will inevitably bring us to the status of the German before the war when the spirit of responsibility, self-help, self-reliance and intelligent initiative had been all but crushed out of the people, and their moral stamina with it.

BUY PROTEIN RIGHT

THE fact, called attention to in these columns a fortnight or more ago, that feedstuffs prices rich in protein are advancing at a time when feed prices should be declining, and in normal years would be, has begun to make an impression on the feed consumers generally, those particularly who must feed protein to make milk. Good cottonseed meal, it will be remembered, is running toward the $100 mark. The crop of cotton is not promising and European feeders who can finance purchases of meal and cake are buying again. Flaxseed has reached the highest prices on record in this country, and meal is sailing up toward $90. Bran, too, is climbing upwards, and alfalfa meal is not going to be plenty by any means. There are no more brewers' and distillers' grains. It will be a year for the scientific feeder who uses no "rule of thumb" methods but trusts his feed dealer to provide him with a balanced ration which will give him the results he is seeking at the lowest possible cost for protein. Only the competent feed manufacturers and dealers will be able to do this. And the feeder who trusts to the spurious advice of the county agent to mix his own feeds in preference to the buying scientifically compounded feeds will probably regret it when his balance sheet shows the season's results.

ANOTHER INTERIOR EXCHANGE

THE multiplication of interior grain exchanges, or receiving and distributing markets, is one of the recent developments of the grain trade. The number of these markets in the West, in particular, is now quite large, showing that the former concentration of the movement of grain at eleven or twelve "primary markets" is rapidly becoming ancient history. The distribution of grain for domestic consumption has become more and more involved, hence the assembling of the grain from producer-handlers has become more localized. As in all other expressions of human activity, progress does not mean simplicity in a superficial sense—rather the opposite. The new interior markets shorten the range of touch between the country dealer and his immediate market and so reduce his shrinkage by shortening of the length of the initial haul. It facilitates also movements between the producer and the interior consumer, and thus in fact contributes to distribute economy. The total economy thus effected is not inconsiderable—a fact which the increasing number of interior markets clearly attests, since no markets of that sort could long exist were there not an economic justification for it.

Des Moines, Ia., has perhaps the latest organization of this type. Its location is peculiarly fortunate. Des Moines railroads tap every part of producing Iowa and reach out into the grain country of the West and Northwest, while as outlets these roads penetrate the great Eastern, South and Southeastern consuming sections which absorb the greater part of the surplus of the West. The members of the Board of Trade are for the most part old and established firms, though new ones are moving in rapidly, who find that the co-operation of all for the advancement of the market as a whole, with the discipline which organization implies, will add strength and dignity and dependability to the market in greater degree than might be the case in a market growing as rapidly as Des Moines is without such organization.

MR. SHANAHAN REPORTS

THE report on European agricultural conditions made last week to the Wheat Director by John D. Shanahan on his return from Europe, as printed on another page, appeals to us as the only "real thing" in that line that has as yet been made public on this side. It has the versimilitude of truth because it presents a condition of things which it seems natural to expect. We are too apt to think of living and working conditions only in terms of the town, which is in evidence all of the time, and not of the country, which is not. It is inconceivable to us that the rural population, always accustomed to intense toil in order to make a living under the best of political conditions—in which *per se* they took little or no interest,—should follow the lead of the agitator-cursed working men of the towns in riots of sabotage and idleness to their own and their families' injury. So when Mr. Shanahan says that 90 per cent of the land suitable for cultivation is now under crops, he tells one just what he should naturally expect if one will but put himself in the place of the peasant and not ignore the fact that even in the towns the number of willing idlers among those who must make a living or suffer distress is always but a small fraction of those whom the agitators picture as ripe for "treason, stratagem and spoils." The crops for obvious reasons may be under average, but the land is in cultivation and yielding its quota in response to human labor.

"BRIGHT GREEN MEAL" CONTRACTS

THERE are moral obligations to all contracts, particularly important this year for the purchase of alfalfa meal, the quality of which is and will certainly continue to be very uncertain. It is not customary in contracts for No. 1 bright green meal to provide for delivery of lower grades at a discount, but the question has been asked if such clause could not be properly considered as to such contracts for the present crop of meal. There are doubtless many alfalfa millers whose operations may not be sufficiently broad to get No. 1 alfalfa hay even of the later cuttings, yet they entered into No. 1 meal contracts before first cuttings were made, with good intentions, and it seems a problem to determine their liability if they are unable to deliver No. 1 meal.

The trade will not confuse this enquiry with, and we do not overlook, the indefensible practice of those, found in every line of trade, who when they can do so will not make delivery on contracts when prices materially advance. We venture to suggest also that it is an unwise trade practice to oversell No. 1 alfalfa meal before the season opens and the quality of the meal that may be delivered is known. But it has been suggested that some relaxation of existing definite contracts might be permitted, which would recognize seasonable climatic conditions and yet be definite enough to prevent unfair practice, and which while enabling alfalfa millers acting in entire good faith to avoid the penalties forced by weather conditions only, would at the same time protect the rights of the middlemen and all types of consumers. Such an understanding exists as to deliveries of contract grain, which although not entirely satisfactory, it must be confessed, does meet trade necessities at critical emergencies when strict compliance with former contractual terms would be practically impossible.

We fully appreciate in this discussion the position

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures f various statistical exhibits appearing weekly in deta "The Price Current-Grain Reporter," these figures re senting the past week, the preceding week and co sponding time last year, here assembled for ready re ence:

of the Central and Eastern distributors who sold ahead the No. 1 meal against contracts fo livery to them and that they will have to "pas buck," so to speak, to their customers if they accept No. 2 meal or something even worse. proposed modification of contracts might be, of co inconvenient not to say embarrassing to the manufacturers also, whose products are adver as "bright green" dairy and hog feeds, the color of which is obtained only through bright meal, for the addition of artificial green col matter to stock feeds is one of a long list of tices under the ban at Washington; but doul these producers could in case of necessity, by er explanations of salesmen, protect the reputati their products with the handling agents and sumers by reference to seasonable conditions.

At any event, the patrons of the alfalfa trade must this year make up their minds to what they can get. But inquiries made at th fice justify our opening this discussion for the advice of our friends, so that we may in turn out the great alfalfa milling, manufacturing an suming trades, which are now so important which must not be permitted to decline in ar spect.

EDITORIALETTES

THE Government might try the old-time re for high prices—an open market—for a while first as an experiment and see would happen.

THE Constitutional Convention primaries place in Illinois early in September. If this st to have a new fundamental law that is not the position of cranks, theorists, socialists, labor tors and property anarchists, the voters of this should begin to take some interest in the cand who are nominating themselves. So far they queer as a job lot.

Foreign crops, in view of the
of fertilizer and other factors, are
kely to be as large as before the
or several years at least. National
cannot be enlarged continuously,
as such a step would in the end result in bankruptcy. Industrial unrest is the aftermath of the great war exertions.

Some improvement in the condition of corn is reported in sections of the big surplus belt as the result of lower temperatures and rains, and it is regarded as possible that the September Government report will indicate a larger crop than shown by the August report. If the August condition is maintained during the month the suggested crop would be around 2,900,000,000 bus., which would make it the fifth largest on record; and this country needs a large crop. Argentine corn is being exported freely, but has had practically no effect on domestic prices, even though sold for domestic consumption in the East at well below a parity with grain to be shipped from the West. Old corn has been scarce and the price is very high. The Southwest has raised a large crop this season and it promises to move early. Some new Texas corn has already been shipped, but practically none of it to the North. The demand from the Southwest promises to have considerable bearing on the price later in the season, as there was a heavy demand from there this year.

Threshing returns on wheat show no improvement, and the actual crop of milling grain is expected to show materially under the August estimate of the total yield. Good judges of conditions say that around 800,000,000 bus. is the correct figure. Much wheat promises to be used for feed, especially the lightweight grain of the Northwest. Some of the spring wheat weighs as low as 37½ lbs., making it practically unfit for milling. There is some wheat already being used as a substitute for corn in parts of the Central West, the corn being worth more than the wheat. Efforts to change the grading and to consequently give farmers a better price for their low grade grain are expected to come to naught. Good quality wheat promises to sell at a wider premium after the first big rush is over, especially the dark, hard winters and the dark northern. Broomhall's estimate of the world's surplus of 840,000,000 bus., with European requirements of possibly 680,000,000 bus., cannot be regarded as sensationally bearish in view of all conditions. This is a relatively small reserve that may be needed to offset the effect of reduced production, which seems certain when the guaranteed price is removed. So far exports of new crop grain from this country have been relatively small.

It is possible that part of the oats sold for export may be delayed in getting out of the country as the Government has need of the greater part of the Atlantic port facilities in order to handle its wheat. The demand of late has been slow, and prices have declined materially. Prices in the United Kingdom have dropped below the maximum without increasing sales to any great extent. Threshing returns are poor, and the grain of light weight.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the past week follow:

	Aug. 16, 1919.	Aug. 9, 1919.	Aug. 17, 1918.
Wheat	13,317,000	16,450,000	20,423,000
Corn	996,000	1,517,000	2,740,000
Oats	4,320,000	6,057,000	10,709,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	18,633,000	33,172,000
Preceding week	24,024,000	33,041,000
Since July 1	120,614,000	161,981,000

Corn market was decidedly unsettled, and fluctuated within a range of 14¾@17½, the latter on May. Highest prices of the week were made during the early days, and the lowest toward the last with the finish about the bottom with net losses of 12½@13⅝. Outside trade was very light and sentiment decidedly bearish, news being very favorable for a lower level of values. There were numerous sharp bulges as the result of covering, pressure coming almost entirely from short sellers. Crop and weather reports were much more favorable, and many of the former bulls were active on the selling side. The settlement of the railroad strike, weakness in foreign exchange, agitation over the high cost of living and a marked increase in country offerings to arrive had a depressing effect.

Oats held within a comparatively narrow range and showed much more strength than corn, closing 2¼@3¼c lower, the former on September. There was considerable buying at times that looked like against export sales, and liberal quantities were sold to the seaboard from the various markets. Country offerings were small, threshing returns disappointing, and the average weight of this year's crop is about 3 to 4 lbs. lighter than in 1918. Foreign financial situation is against a big export business, but there is no great pressure on the market at the time being farmers showing a disposition to hold back their grain.

Cash wheat prices are declining. Winters are selling at a slight premium over the basic figures for the greater part of the offerings, although dark hard is still well above the ordinary hard. This grade is being taken to mix with springs by the northwestern mills, as the weight of the grain in that section is light. Springs have declined sharply in all markets with the ordinary No. 1 northern much closer to the basic than heretofore. Dark northern has commanded as high as 30c over basic at Chicago, and much more in the northwest. Quality of the spring wheat crop this season is poor, with much light weight grain that is unfit for milling. Range of prices the past week follows:

	High.	Low.	Close Aug.16, 1919.	Close Aug.9, 1919.	Close Aug.17, 1918.
Corn—					
Sept.	$1.94¾	$1.80	$1.82	$1.94½	$1.62⅝
Dec.	1.57½	1.42¼	1.44	1.57	....
May	1.54	1.36½	1.38⅞	1.52½	....
Oats—					
Sept.	.76½	.72⅜	.73¾	.76	.70¾
Dec.	.79½	.74¾	.75¾	.79	....
May	.82½	.78⅛	.78¾	.81¾	....

Corn Stocks and Consumption.

Statement of the movement of corn, and consumption in primary markets, compared for three years:

P. receipts to Aug. 16	150,680,000	242,625,000	206,883,000
P. shipments to Aug. 16	92,646,000	125,790,000	112,111,000
P. stocks on Aug. 16	1,234,000	5,329,000	893,000
P. consumpt'n to Aug. 16	60,917,000	111,680,000	94,828,000

Wheat Stocks and Consumption.

Statement of the movement of wheat and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at July 1	2,942,000	226,000	4,289,000
P. receipts to Aug. 16	78,260,000	86,908,000	23,467,000
P. shipments to Aug. 16	27,859,000	29,232,000	12,860,000
P. stocks on Aug. 16	23,308,000	22,325,000	1,729,000
P. consumpt'n to Aug. 16	30,035,000	35,577,000	13,167,000

French Wheat Imports.

The quantity of foreign wheat and flour (stated as wheat) delivered in France for consumption during the first five months of 1919 and previous years is reported as follows, in quarters of 8 bus.:

	1919.	1918.	1917.
January	1,061,798	806,801	708,735
February	1,188,400	618,718	1,192,081
March	601,771	804,208	2,190,042
April	743,843	709,821	477,050
May	343,691	828,165	995,124
Five months	3,939,503	3,767,713	5,563,032

The chief grain inspector at Ft. Worth says the 1919 corn crop of that state is of the most excellent quality and largely in excess of any previous year as to quantity.

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to Aug. 16, 1919, with comparisons with 1918:

	1918-19.	1917-18.
Chicago	21,481,000	24,172,000
Milwaukee	417,000	551,000
Minneapolis	8,009,000	7,568,000
Duluth	568,000	42,000
St. Louis	12,322,000	16,719,000
Toledo	2,362,000	1,803,000
Detroit	304,000	257,000
Kansas City	22,545,000	24,009,000
Peoria	807,000	1,614,000
Omaha	5,431,000	6,105,000
Indianapolis	4,014,000	4,168,000
Total	78,260,000	87,008,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	Aug. 16, 1919.	Aug. 9, 1919.	Aug. 17, 1918.
St. Louis	1,343,000	2,159,000	3,671,000
Kansas City	3,556,000	4,431,000	3,707,000
Omaha	931,000	1,170,000	1,327,000
Toledo	347,000	508,000	277,000
Detroit	73,000	85,000	53,000
Indianapolis	456,000	813,000	627,000
Peoria	85,000	177,000	753,000
Chicago	4,921,000	5,100,000	7,377,000
Milwaukee	100,000	82,000	334,000
Minneapolis	1,442,000	1,888,000	2,292,000
Duluth	63,000	37,000	5,000
Total	13,317,000	16,450,000	20,423,000
Shipments	9,021,000	8,107,000	7,992,000

World's Wheat Exports.

Exports of wheat last week compared with previous week and year ago specially reported for this paper by George Broomhall's service:

	Aug. 16, 1919.	Aug. 9, 1919.	Aug. 17, 1918.
American	7,117,000	7,170,000	3,580,000
Indian	.....	.....	280,000
Argentine	4,103,000	2,248,000	3,342,000
Australian	74,000	2,450,000	760,000
Others	.....	84,000	40,000
Total	11,294,000	11,952,000	8,002,000

Exports of wheat since Aug. 1, 1919, commencement of European crop year, compared for three seasons:

	1919-20.	1918-19.	1917-18.
American	24,379,000	8,157,000	21,294,000
Indian	.....	770,000	1,963,000
Argentine	8,095,000	12,349,000	583,000
Australian	5,169,000	2,260,000	5,054,000
Others	84,000	102,000	123,000
Total	37,727,000	23,638,000	28,971,000
Season	.....	529,032,000	376,524,000

World's Corn Exports.

Exports of corn last week, compared with previous week and a year ago:

	Aug. 16, 1919.	Aug. 9, 1919.	Aug. 17, 1918.
American	.....	2,000	267,000
Argentine	3,664,000	2,844,000	806,000
African	89,000	112,000	30,000
Total	3,753,000	2,958,000	1,103,000

Exports of corn since Nov. 1, 1918, compared with last year and year before:

	1918-19.	1917-18.	1916-17.
American	3,504,000	25,971,000	41,499,000
Argentine	56,491,000	14,290,000	55,400,000
African	5,217,000	2,596,000	.....
Others	.....	94,000	2,516,000
Total	65,212,000	42,751,000	99,415,000
Season	.....	52,393,000	106,985,000

World's Oat Exports.

Exports of oats last week compared with previous week and a year ago:

	Aug. 16, 1919.	Aug. 9, 1919.	Aug. 17, 1918.
American	1,251,000	840,000	2,389,000
Argentine	269,000	9,000	418,000
Others	.....	.....	.....
Total	1,520,000	849,000	2,807,000

Exports of oats since Aug. 1, 1919, and comparisons for three years:

	1919-20.	1918-19.	1917-18.
American	4,514,000	5,739,000	8,742,000
Argentine	461,000	1,697,000	293,000
Others	.....	.....	.....
Total	4,975,000	7,436,000	9,035,000
Season	.....	113,282,000	140,826,000

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Aug. 1	13,185,000	4,048,000	539,000
P. receipts to Aug. 16	17,109,000	25,648,000	17,189,000
P. shipments to Aug. 16	11,647,000	12,600,000	9,367,000
P. stocks on Aug. 16	12,055,000	7,527,000	1,533,000
P. consumpt'n to Aug. 16	6,592,000	9,569,000	6,828,000

MR. BARNES ON THE H. C. L.

Duty of the American Housewife at This Time—It Is a Choice Between Thrift and Enforced Bread Subsidy a la England Today and Rome of the Cæsars

Revival of the American housewife's war-time conscience in the administration of the family table and the substitution of the wholesome loaf of bread for higher priced foods such as meats, eggs and butter, as a means of reducing the high cost of living are advocated by Julius H. Barnes, Wheat Director, in an interview on Aug. 11, during which he commented on the Government crop report for the month of July which shows the unprecedented loss in crop prospects of 221,000,000 bushels.

"The July crop report is very discouraging, of course," said Mr. Barnes. "For several weeks I have tried to get a more general appreciation into the public mind that our wheat prospect was no longer the fabulously favorable one still accepted by certain sections of the press. But it is well to remember that, however disappointing its shrinkage from our hopes, we still have secured a wheat crop above the average. It will fully supply us at home and probably sufficiently contribute to the food necessities of Europe.

"There is a close adjustment—too close for comfort—between the total world bread requirement and the total bread grain supplies, but there is sufficient with care. There can be no longer any doubt that the supply and demand position in wheat demonstrates our guarantee price as not maintained above a world level. Any further movement for a reduced flour price must be based frankly upon a policy of food subsidy. In effect this would force National charity on the table of every American whether he would or no. Its effect has been demoralizing to the sturdy self-reliance of every people on whom it has been forced, since the days of free circus and free bread in ancient Rome. Always it has benumbed production, while today only in stimulated and increased production lies a hope of real relief. Deliberate subsidy of food was not authorized by Congress in the Wheat Act.

"It is my conception of sturdy Americanism that it desires to pay its own self-respecting way, assured only of a market free from artificial influence and protected against abuse and extortion.

"The American housewife can, however, work out substantial relief in a natural way. The flour consumption of America fell from its normal of 235 pounds per capita to 171 pounds during the last year. This proves conclusively that bread was displaced in diet by higher priced foods. Two hundred and thirty-five pounds of flour per capita would furnish from 30 to 35 per cent of the necessary food values, and this return to normal flour consumption, with the consequent saving of higher priced foods, would work out an actual National saving for the year of one billion dollars in the national food bill.

"More than that, the reduction of strain on higher priced foods such as meats, eggs, butter would by that very reduction of demand probably secure a lowering of the price level in those foods. Twelve million housewives administered their table during war-times with a war conscience. The same twelve million housewives today could greatly lighten the strain of living conditions by a similar development of social conscience."

GEORGE BROOMHALL'S VIEW.

Mr. Barnes' solicitude about the reaching quality of the American wheat crop is not exactly supported by the latest estimates of the great European authority, George Broomhall. In the *Corn Trade News* for July 29 he says that during the last cereal year (which in Europe begins on Aug. 1) there were shipped for Europe 58,000,000 qrs. of wheat to which must be added 3,000,000 qrs. for ex-Europe. Of course, it is understood that these figures are not exactly as dependable as those compiled in pre-war times, for very obvious reasons; still the *Corn Trade News* thinks the total of 61,000,000 qrs. (488,000,000 bus.) is approximately correct, although it is sure to be exceeded in the season which started on Aug. 1, 1919.

In showing the resources of European importers Mr. Broomhall wrote prior to the Aug. 8 report of the American Bureau of Crop Estimates, and suggested that while the August report would undoubtedly show a sharp reduction, he said, "we hope at least for a 250,000,000-bu. crop." As a matter of fact, the Bureau of Crop Estimates gives only 225,000,000; and Mr. Broomhall's estimate of a total wheat crop of about 1,000,000,000 is reduced by the Bureau to 940,000,000, giving a surplus of 340,000,000 or about 43,000,000 qrs., instead of 50,000,000 qrs. as estimated by the *Corn Trade News*, to which the *News* adds 16,000,000 qrs. from Canada. According to recent official statement, Argentina still holds 14,000,000 qrs. of old crop wheat, and as the outlook for the new crop has been much improved, the surplus may reach 15,000,000 qrs. The Australian crop is not so good; and the *News* estimates new wheat from that quarter at not more than 4,000,000 qrs., plus 18,000,000 qrs. of old crop, which we think is probably somewhat excessive. The Indian crop is not taken into account at all.

The *Corn Trade News* therefore has in prospect the following surpluses for the season 1919-20 as corrected on the basis of the August report of the Bureau of Crop Estimates: United States 43,000,000 qrs.; Canada 16,000,000; Argentina 29,000,000; Australia 22,000,000, but we should think 20,000,000 would be the extreme limit, making altogether 108,000,000 qrs., against 117,000,000 estimated by the *Corn Trade News*, which would still give a total exportable surplus of about 860,000,000 bus., against a demand of say 680,000,000. "This quantity," says the *Corn Trade News*, "is big enough to allow a further reduction and still give sufficient material to supply all reasonable requirements of importers. With the exception of the Italian the stocks of importers are shaping rather better on the whole, and German reports are particularly optimistic, but we have not sufficient evidence to warrant us in altering our estimate of 80,000,000 qrs. for Europe plus 5,000,000 qrs. for ex-Europe,"—although Mr. Hoover's estimate is that Europe without Russia would require 87,000,000 to 106,000,000 qrs. of wheat and rye. "We much regret," says the *Corn Trade News*, "that the world's wheat crop has been cut down, but there is at present no reason to fear that any one in this country or in the Allied or neutral countries of Europe will go short of food in the coming twelve months. Mr. Roberts, our Food Controller, has just stated that the problem of supplies causes him less concern than the prevailing high prices.

"We have mentioned the optimistic reports of the German crops which may be officially inspired and possibly they are given out with a view of discouraging expectations of large imports. We cannot think that the crops are really good, although they may not have suffered so much from dry weather as those of France. In any case, we feel convinced the acreage must be short. Besides being wishful to influence opinion in exporting countries the German government may be desirous of preparing their own people for smaller imports than hitherto anticipated or possibly they would like to defer purchases in the hope of securing better terms in the future."

MR. SHANAHAN'S VIEWS.

Confident that Europe is willing and able to work out its own salvation and that its peoples, anxious to return to normal productive labor, are doing so as rapidly as possible, John D. Shanahan of the Grain Corporation, who returned on Aug. 11 from abroad, says that Europe's greatest need is the restoration of her transportation systems and the resumption of normal trade facilities between communities and peoples.

At the direction of Julius H. Barnes, Wheat Director, Mr. Shanahan went abroad last May to gather first-hand and expert data relating to the acreage and probable quantities of food grains to be realized from the European harvests this year for the information of the Wheat Director. Mr. Shanahan was accompanied on his trip abroad by Harry V. Harlan and E. G. Boerner, representing the Federal Department of Agriculture. Mr. Boerner returned with Mr. Shanahan.

Over 5,200 miles of European wheat territory was covered by Mr. Shanahan and his party in automobiles, starting from Paris and traveling to Mt. Cenis Pass in the Alps, thence across northern Italy, southeastern Europe, the Balkans, north through Poland and into Russia. Returning, they passed through Czecho-Slovakia, Austria, Germany, Belgium, Holland and northern France. Discussing social and economic conditions in Europe as they were brought home to him in his tour, Mr. Shanahan said:

"The two great needs of Europe today are the return to normal productive labor and activities and the establishment of diplomatic and trade relations between the various countries which will, of course, tend to counteract the more or less pernicious psychology developed by the war and hasten a realization of peace and stable government. Following, or closely connected with the foregoing, is the need for the immediate rehabilitation of the railways, canals and other means and facilities of transport and distribution which were all more or less destroyed or disorganized by the war.

"I was particularly impressed with the effects of broken and disorganized distributing facilities on the living conditions in the various sections of Europe," said Mr. Shanahan. "Some sections of the country districts of southern Europe, with the new harvest, are now fairly well supplied with food and prices are reasonable. In the cities, broken distribution channels create distress through high prices. A good average meal in Vienna costs from $3 to $5; in Paris from $3 to $3.50; in London from $2.75 to $3; while in Slavonia and the Banat country of old Hungary good average meals can be obtained in the smaller towns for from 75c to $1 and in the cities at from $1.50 to $2.

"We traveled in automobiles over more than 5,200 miles, found the roads generally good and were mired only once, at an approach to a ford where the bridge, which had been blown up during the war, was being rebuilt.

"When I left America," Mr. Shanahan said, "I had the idea, gathered from general reports, that all Europe was more or less a seething caldron of distress and anarchy and that things generally had gone to the dogs. It was, therefore, a source of constant surprise to me to find at least 90 per cent of the tillable acreage of Europe planted, although lack of fertilizers, unfavorable season in some sections, and the lack of proper tools for tillage will militate against a normal production on this acreage. The disturbances on which the thoughts of our people have been concentrated since the armistice are confined to a few congested centers, such as Budapest and a comparatively small section in eastern Galicia and eastern Poland.

"The salvation of humanity generally in Europe during the armistice, I am convinced, was the food relief provided through American initiative. The hope and backbone of Europe is the peasant, who, with the turmoil and stress of war raging about him, and in many cases without adequate implements and tools in whole sections, has succeeded, where it was at all possible, in cultivating at least 90 per cent of the tillable soil. In many places his work is in evidence right up to the trenches and firing lines. Broadly speaking, I think real distress in Europe, as far as food grains are concerned, will disappear after the present harvests. Some sections may need help before the harvest of 1920, but with improved distribution facilities and better trade relations, imports into Europe of food grains may be confined largely to the customary importing countries."

HANDLING THE CANADIAN WHEAT CROP.

The recent announcement that the Canadian government would handle the 1919 wheat crop has not been enthusiastically received by the farmers of the West. On Aug. 13 the first meeting of the Canadian Wheat Board, whose organization was noted in these columns a week ago, was held at Winnipeg and the United Grain Growers of Manitoba in the West filed general objections to the whole program.

The program, it will be remembered, contemplates that the government shall take over the entire crop and market it, paying (after the manner of the wheat pool in Australia) a certain advance on deliveries by farmers, in this case $1.7[illegible] per bu., with a guarantee that the wheat shall be sold at the world's market price and whatever is realized over and above $1.75 per bu., less actual cost of handling, the expenses of the administration of the Board, should be paid *pro rata* to the farmers who market the wheat.

This arrangement, however, is entirely unsatisfactory to the growers who in a statement made at the Winnipeg meeting said among other things: "In any event we demand that the minimum initial payment shall be on the basis of the previous guarantee of $2.[illegible] and not $1.75." This was considerable of a bombshell; but it was still more a surprise to the members of the Board present that they heard the statement in the same connection from the farmers that, "We frankly assert that we do not expect to obtain more than the initial payment as through incompetence and dishonesty grain growers expect to lose everything beyond the initial payment." The chairman promptly inquired whether the farmers considered the Board to be dishonest, but the representatives of the farmers did not reply. It is understood that the grain growers throughout the West are considering the question of holding the grain indefinitely and not selling under the present government plan. The price has since been fixed at $2.25 basis.

At the same meeting the official text of the government's Order in Council for handling the crop was made public. It is quite lengthy and includes provision for all of the technical details thought to be necessary under the circumstances. In other words, the Board shall have power to take delivery of wheat at any point in Canada; to make advances thereon and name the place of delivery; to sell wheat and to deliver it to millers in Canada "at such prices and subject to such conditions as the Board sees fit, the price of sale to millers being governed as nearly as may be by the price obtained at the same time in the world's market for wheat of equal value, regard being had to the cost of transport, handling and storage"; and finally to store and transport wheat in order to market same. The Board shall have power to sell for export wheat so delivered in excess of domestic requirements and in coöperation with the Secretary Purchasing Commission of the Department of Agriculture may retain grain for seed. The Board shall have power to fix maximum prices and margins of profit at which flour and other products may be sold, and fix standards of quality; to purchase flour from millers at prices fixed by the Board and resell same in Canada or elsewhere. It shall have power to take possession of and sell to millers and others any wheat stored in any elevator, warehouse, railway car or Canadian boat and deal with the same as to payment of advance as otherwise in the same way as if it had been delivered to the Board otherwise.

FROM WASHINGTON

The Fight to Repeal the Wheat Guaranty—Complaints as to the Standard Wheat Grades—The Statement of the Senate Committee on Agriculture

WASHINGTON, Aug. 16.—[Special Correspondence.]—The big idea in Washington this week has been the effort of Senator Gronna and his Committee on Agriculture and those drawing-room farmers who compose the National Board of Farm Organizations (a body which one of the most dependable farm papers repudiates absolutely as representative of real farmers—a notorious congressional lobbyist) to secure a repeal of the law enabling the President to pay a guaranteed minimum for wheat, which Senator Gronna contends is a maximum as well as a minimum. This view is rather rudely negatived by the following telegram from Mr. Gronna's own state:

"MINOT, N. D., Aug. 6.—Wheat raised on the North Prairie, north of Minot, is said to be the first wheat sold in the state and sold at $2.40, Northern No. 2. The wheat was raised by J. C. Watson, whose farm is five miles north of this city."

The grading rules also are greatly in disfavor; although it is remembered that the senators from North Dakota were only a short time ago aggressive opponents of Government inspection of grain. Perhaps they expected then that the grading might be controlled by the Senate Committee on Agriculture and wide light and easy when the crop should prove to be like the spring wheat this year, of light weight, shriveled and of poor quality generally. At any rate, the complaint now is that the Standard grades are now too stiff; and the entire Senate Committee—comprised of Chairman Gronna, North Dakota; Smith, South Carolina; Curtis, Kansas; Capper, Kansas; France, Maryland; Harris, Mississippi; Ramsdell, Louisiana, and McNary, Oregon—now demand that changes shall be made in the Standards used by the Wheat Director "so as to penalize every grower of wheat." This demand was made in a statement prepared by Chairman Gronna and representatives of certain queer farm organizations and published on Aug. 12 the committee. Chairman Gronna announced also that a committee would named to present the demands to President Barnes of the Grain Corporation, and representatives of the Department of Agriculture in the hope of having modified the various Government regulations by which, as the committee claim, "the producers are defrauded and consumers receive no benefit," by which the present regulations will rob the wheat growers of from 50 to 75 cents a bushel on hundreds of millions of bushels and deny producers living wages.

The Gronna committee hearing during the week prior to Aug. 12 when the committee's report appeared, T. C. Atkinson, representing the National Grange, said the farmer would receive an average of only $1.50 a bushel for wheat this year, that the Grain Corporation had made large profits from wheat which the farmer should have received. He proposed to have the Government buy all wheat at $2.26, and sell to the consumer at $1 a bushel would mean a subsidy to our blessed city popula-

The complaints against grading of wheat were made by Senators Curtis and Capper of Kansas, who said they had complained to President Barnes without re-

John A. McSparran, master of the Pennsylvania Grange, urged an organization to advise the American public of the facts in the food situation as it affects the farmers. "The Department of Agriculture should have done it, but has not," he said. "The people are paying' at paying $2.26 for wheat when they are paying $36 a bushel in the form of shredded wheat. Corn is selling at $2 and the people are paying $12 a bushel in the form of toasted corn

Senator Norris said that he thought it would be "a good idea" to introduce a bill for repeal of "every vestige of every statute" fixing wheat prices and Senator France, Republican, of Maryland, said quite sensibly that Congress passes laws in violation of every economic law at the dictation of men who don't know what they were talking about.

SENATE STATEMENT.

A proposal by Senator Norris that Chairman Gronna and the representatives of the grange organizations issue a statement to the public, giving the facts of the food situation, was approved by the committee. The statement is as follows:

"This statement to the public is made as the result of a settled conviction that city people should be told the plain, unvarnished truth with respect to agriculture. The senators and representatives whose names are subscribed to this statement feel the need of presenting the farmers' viewpoint and urging their claims, believing that grave injustice is being done the farmer, and may continue to accumulate and seriously injure not only agriculture but the entire nation as well. We believe that it is axiomatic that agriculture is the root of this nation's well-being. It is our privilege to have been closely associated with the farming industry. We have received thousands of letters and telegrams from farmers telling us of this season's shattered expectations of a bumper crop of wheat and reciting the effect of drought, insect and disease, as well as ungathered and ruined crops because of lack of labor.

"Moreover, we are in daily touch with the representatives of the great farm organizations of this country maintaining offices here at Washington and whose testimony augments and corroborates the facts as presented to us by our constituents. In coöperation with the accredited representatives of these great 'self-help' movements of farmers, we shall expect to issue additional statements from time to time.

PRODUCER'S POINT OF VIEW.

"The people of the farms are deeply concerned in the unrest manifest now in the serious protests against the high prices of the necessaries of life. While entirely sympathetic with the hardships which present prices cause the people of the city, farmers individually and through their organizations are no less concerned with their own economic situation and with the questions of production of the raw materials of food and clothing. The effect of the present agitation must be seen from the point of view of the producer in order to be understood. There is danger that city interests, by reason of their predominance in number and organization, may take unwise steps without understanding the almost self-evident result of such unreasoning acts as might ruin the farmer and seriously reduce farm production in the immediate future.

"The powerful machinery of the Government is now being set in motion to apprehend and bring to justice those who are guilty of conspiracy to restrain trade and secure undue profits. But it must be remembered that this drive is now coming at a time when the great staple products of the farm are going to market, and that in selling the wheat crop, for instance, the farmer is selling his entire season's labor. This is an experience with which the farmer is very familiar and he instinctively connects it with the interests which in the past have pyramided their profits upon his production at the beginning of the marketing season.

"Julius H. Barnes of the United States Grain Corporation, openly states his policy to resell wheat, curtail our foreign shipments and 'use the resale of wheat to help control the domestic market price against further advances.' The result of such policy, together with the manipulation of a system of grades and standards, has been to reduce materially the farmer's income and to deny him access to a free market where he can secure actual cost production. It has placed the city consumer in a position where he is now eating bread produced by the labor of the men, women and children of the farms of this country when they have not been able to count their time as a proper charge in making up the cost sheet of production.

FARMER'S ANNUAL INCOME.

"We believe city people should know that the average annual labor income of the farmer, including that of his wife and children, as shown by the last Federal census, was only $318.22. They should know that owing to manipulation in administering the grades and standards, together with the damage done by hot weather to the maturing crops, the winter wheat producers are selling wheat, not for $2.05 which Mr. Barnes gives as a theoretical average, but that this year's crop may average not over $1.50 per bushel net. In the production of wheat, as in other crops, labor enters in the last analysis as the chief item of cost, and city people should realize that the effort that is being made by the authority of the Government to restrict or still further reduce the price at the farm must inevitably lead to denying the farmer living wages.

"What has been said in detail relative to the wheat situation applies in general to every farm product and while we again express our approval of every reasonable effort to reduce the cost of necessaries, we wish also to emphasize that care must be taken to safeguard the farmer's labor costs.

"We at this time shall insist on a change in the wheat standards so as not to penalize every grower of wheat. Hundreds of millions of bushels of wheat have been shriveled by extreme heat this season which under the present grading and discount rules may not average the producer $1.50 per bushel. Authoritative investigators have found such wheat to be of the highest milling value and it is unthinkable that farmers should sustain a loss of from 50c to 75c per bushel by reason of the arbitrary standards that have been established. This wheat in large measure will go into the production of the best patent flours and be sold to the consuming public at prices based on No. 1 wheat. The producers are thereby defrauded and the consumers receive no benefit."

The President has told representatives of the farmers' organizations that he has no intention to interfere with present *status* of wheat in any way.

In the meantime the Bureau of Markets is sending its agents into the complaining states to show farmers how to grade wheat under the Standard Rules; and the Attorney-General of North Dakota (Leaguer) says he has received from Attorney-General Palmer of the United States two requests that he come to Washington for a conference on the North Dakota grain grading act, which Palmer claims to be in conflict with the Federal act and the operation of which he says must be suspended. Attorney-General Langer advised Attorney-General Palmer that the North Dakota grain grades would be strictly enforced in that state; and he gave state's attorneys instructions to prosecute any grain buyers or elevator men who attempted to evade or violate the state grain grading act or any grades promulgated under this law. And the Attorney-General of North Dakota intimated he would visit Washington when he "got d—d good and ready."

BARNES REPLIES TO GRONNA.

Julius H. Barnes, Wheat Director, has made public his reply to the statement issued by Senator Gronna, chairman of the Senate Agricultural Committee on August 12th, reflecting on Mr. Barnes and the United States Grain Corporation, in their administration of the Wheat Guarantee Act. Mr. Barnes' answer in part is contained in the following letter sent to Senator Gronna:

"I note through the public press your statement of August 12: I refer particularly to your statement: 'They should know that owing to manipulation in administering the grades and standards together with the damage done by hot weather to the maturing crops the winter wheat producers are receiving as low as $1.15 per bushel for their wheat, not the $2.05 which Mr. Barnes gives as a theoretical average, and that this year's crops may average not over $1.50 per bushel.'

"That $1.15 statement originated as the uneasy apprehension of a Kansas editor. It is as if distracted one anxiously sought insurance against one's home catching fire at the same instant that a cyclone wrecked it, lightning struck it, earthquakes shook it, and a flood swept it away. All might conceivably happen at once, but it is not likely. Out of 80,000,000 bushels of wheat marketed in the Southwest since July 1, our records fail to indicate even one thousand bushels of wheat so priced. Of 16,000 carloads of wheat received in Kansas City, only six cars sold below $2.00, and the lowest was $1.92. Less than six per cent has sold below the standard price for No. 3 at $2.11.

"The weighted average for the crops of 1917 and 1918 is $2.0459, and was the basis for my statement."

As to the producer receiving the full measure of the guarantee, Mr. Barnes said in substance:

"The wheat guarantee is expressed in standard grades promulgated by the express direction of Congress. If your suggestion is that the Grain Corporation prices on damaged wheat are relatively too low, fair discussion on that phase is welcomed. Those discounts are the judgment of twenty men of life-long grain experience, actuated by the same high ideals of national service as yourself. We aim to establish these discounts as generously as soundly possible in the relief of such producers as suffer from nature's disfavor and shall not hesitate to recast them when convinced of error. Nor shall we hesitate to provide correction and restriction by dealers in such cases as develop where the producer is not properly treated. The competition of thousands of individual mills and dealers affords additional security to the producer. This competition is real and active. Nothing in many years of private experience and nothing in two years of experience in public control warrants me in accepting, without protest, such expressions as 'manipulation in administering the grades and standards' or that 'the producers are thereby defrauded and the consumers receive no benefit.' It is a time for sobriety of speech and restraint of statement. Nothing is gained by applying such terms to transactions made, with few exceptions, as the sincere expression of fair business judgment.

"Today, reduced crops here and abroad indicate a world price level fully equal to the guarantee basis, and the consumer naturally is content to buy his bread on that level. The producer, secure at all times by the guarantees, should not insist he be allowed to seek a better market, without regard to the consuming public, lately facing the prospect of a one billion dollar tax.

"In this period of difficult reconstruction, the authority and influences vested in this office should hold the balance level, and you do quote me correctly in stating that by every natural and proper influence, particularly by the resale of wheat bought at the guarantee level, I shall try to establish the fair price level expressed in the guarantee, and no higher. I do not understand that any of your committee, nor even the representatives of the farmers' organizations, take issue with me on that position."

The Van Dusen-Harrington Report.

The Van Dusen-Harrington, Minneapolis, report for the week ending Aug. 13 says that threshing returns from the new crop are coming in slowly. Complaints of labor shortage are heard, and the expense of threshing and handling the crop are very high, some outfits receiving $30 an hour were in places where the yield of wheat is running only four to five bushels to the acre. New wheat coming on the market shows a very wide range of quality and only a small amount will grade No. 1 or No. 2. A large amount of it will be wholly unfit for milling purposes, being suitable only for feed.

N. Y. HAY AND GRAIN DEALERS MEET

The Syracuse Convention a Large One—Full Statement of Crop Conditions and Views as to Hay Prices—The Horse *vs.* the Auto Truck—The Work of the Traffic Department

Reported by ANDREW D. THEOBALD

SYRACUSE, N. Y., Aug. 16.—[Special Report.]—There is plenty of hay. The quality is above the average. But the price farmers are asking is too high. The producers are holding up their product in the hopes of getting still higher prices, and as a result they are likely to get caught should a decline come. This, briefly, is the opinion of half a hundred or more hay and grain dealers from New York, Pennsylvania, New Jersey, Maryland and other states who were here yesterday and today attending the fourteenth annual convention of the New York State Hay and Grain Dealers' Association.

Never before has there been such a large attendance at any convention of the state association as there was this year. There were nearly twice as many dealers, shippers and others interested in the business at the Onondaga Hotel as there are members of the Association. Dealers from other states "blew in" to find out what the New York state men were doing and thinking, and the New York state men were glad to meet them and swap reports. Also there were a number of producers.

THE MOTOR VS. THE HORSE.

Gossip around the hotel corridors dealt mainly with two things—the two things that were the main topics of discussion at the convention. Firstly, this year's hay crop and its price, and secondly, the inroad the automobile and the motor truck are making on the hay-consuming horse. The state association is "agin" the auto-truck and the auto-tractor and "agin" it strong. The members listened to several addresses in which a wealth of data and statistics was given them, showing how the motor truck is far more expensive than the horse. They heard men who have tried delivery by horse and delivery by truck say that the horse was more satisfactory and less costly; and so the association named a committee of three members to coöperate with similar committees from other state associations for the launching of a campaign of education among the farmers and others against the use of the gasoline-propelled machines. The walls of the convention rooms were liberally sprinkled with signs making a plea for the horse. "Eighty per cent of all trucking can be done cheaper by horse than by auto," read one sign, while another declared that, "For Economy Use the Horse."

As to Prices for Hay.

Sentiment among those attending the convention on the question of prices showed quite a disagreement as to what is going to happen to the market. I interviewed member after member and found them about equally divided on the question as to whether prices are going up or going down. Those who thought prices are going up declared that the farmers are holding back their hay for higher prices and that if they hold on long enough they may get it. The other half agreed that the farmer is holding on to his product but were confident that he is going to get stung in the long run and be forced to sell later at a lower price than he could get now. On one thing most all of them were agreed. The crop this year was a good one, in some sections of the state it is a bumper crop.

The men who say the price is going down predict it will reach $30 this fall. Here is the general argument most of them used: With the Government out of the market and the crop the heaviest in ten years, the average price in many of the big Eastern markets is $41.50, while the New York quotation is $48. A year ago the average price in this section was $28. The market must drop back to a normal level because there is an oversupply and fewer buyers. Besides, what buyers there are are not stocking up in as large quantities as formerly. The heavy demands for hay during the war brought prices up to their present level. The shippers and receivers are now facing the problem of educating the farmer to the lack of a continued demand and the necessity of selling cheaper in order to unload the overburdened market. Here are a few opinions picked at random on crop conditions and prices:

C. A. FAY, of Earlville, N. Y.: "There is a bumper crop in our section. Some of it was cut late and some farmers have not finished cutting yet. Most of them are holding for higher prices. New hay is selling on the farm for from $20 to $25 per ton. I think that the price will go lower unless the farmers are able to hold out. The old hay is pretty well cleaned out of the markets."

R. C. HUMPHREYS, of Stinton Brothers, Baltimore, Md.: "No. 1 timothy hay is selling at $42 and $43. It is likely the prices will go lower. Some people are predicting a drop of from $10 to $15. The old crop is all gone."

A. C. PASSMORE, of Chester, Pa.: "We have had bad weather for cutting in our section, but most of the hay is in by this time. We are now paying from $22 to $27 from the farm for our hay. Prices are going to drop, I believe, and it is possible they will go to $20 in New York state and $20 to $25 in Pennsylvania."

F. L. YOUNG, president of the National Hay Association: "The crop is good. Prices in the future are a puzzle to us all. The hay market at the present time is a free-for-all scramble and very irregular. I do not know whether it has ever been as irregular as it is at the present time."

MR. DILLENBECK, receiver, of New York: "The market is fluctuating. At the present time it is up. I expect a reaction and a drop in prices; but then there is no telling what it is going to do. Prices should come down. If the farmers and others get $30 for their old hay then they will want $30 for their new."

G. COLE, Ithaca, N. Y.: "The crop is about normal but of inferior quality. Fifty per cent of it was cut out of condition, some of it was over-ripe. I do not expect prices to go up. The farmers who are holding their hay will be disappointed."

F. J. BOWES, Syracuse, N. Y.: "The hay crop is good; wheat is normal; barley and oats will be light. Prices are high. They are starting in too high, and I expect they will eventually be forced down to some extent. Farmers who are holding back are likely to be sorry they have done so."

WM. TEETER, of Allegany County, N. Y.: "We have had a fairly good crop in our section. The prices are high, the farmers asking $25 to $30. The matter of prices is a puzzle. We do not know what they will do."

J. VINING TAYLOR, Secretary of the National Hay Association: "I believe the Government's figures on the hay crop are too high, but I feel sure we will have enough to fill our needs. The Government will be a light buyer this year and the export will be light. The acreage is short, as the farmers have turned to better paying grains. The yield as far as quality is concerned is excellent."

FIRST DAY'S SESSION.

The meeting was called to order by President J. L. Shultz of Skaneateles, N. Y., who expressed his pleasure at seeing all the members again and greeted the members. He called upon the Rev. Dr. Wallace Brown, pastor of the University Avenue Church, who made a prayer. The members were then welcomed to Syracuse by Mayor Walter R. Stone, who in a few appropriate words gave them the freedom of the city and expressed his pleasure at seeing them back here again. His greeting brought a response from D. S. Wright of Weedsport, N. Y., a former president of the New York State and the National Hay Associations.

W. B. Rupert of Newark, N. Y., then read the minutes of the previous meeting, after which Warren H. Dean of Auburn spoke on the transportation problem that confronts farmers and dealers alike, expressing the belief that the horse is a great deal cheaper and declaring that many dealers and farmers are returning to the horse. He said in part:

In speaking of the propriety of a more definite educational program in our association and our business as individuals, I realize that the subject of hay is so old that we do not consider the possibility of improving either the commodity or the method of handling it. But I believe that there are arising new conditions that require the best that it is in us to master.

A man attains real success only when he believes in his past. Great men have achieved because their very souls were bound up in the enterprise that made them great. We are not doing our best if we are doing it easily.

I have often dreamed of the accomplishment of the artist, of the composer, of the inventor; yes, and of the captain of industry. What has made him great? Was it alone the doing well of a day's work? It was his absolute concentration and his acceptance of his work as the most important thing and the giving of his very life blood that his ideal might be reached.

Compare these with the average men of our vocation. I do not wonder that the business of handling hay presents so many pitfalls, when I think of the loose manner in which it is conducted. A better program must be constructed. Did you ever compare our product with that of an up-to-date manufacturing plant? His product is sheltered, we find; callipered and burnished. Every piece in a well-managed factor has been fashioned to a pattern. A successful manufacturer will not allow his product to leave him until it has been inspected and checked and approved and usually guaranteed.

Hay is presented to man by the great Master Builder. It is a product from Nature's treasury house. What is more pleasing than a field of clover in bloom or a field of timothy just past the first blow or a field of alfalfa? But what may happen? Oh, what a tragedy. Weeds thrive. Ugly, useless grasses creep in. It is out of season, exposed or beaten about by the side delivery until the life is all gone. It is piled in the open to await some baling machine, all too often operated by a disinterested person. No wonder few shippers trademark their output.

Let us see new conditions. What can be done? Will the old product fit our new conditions? Or must we have an improved product to fit future use? To us the farmer intrusts the marketing of his product. I realize the scarcity of labor, the uncertainty of weather and the largeness of our crop, but it does seem unfortunate that we sit so idly by and do so little to improve our commodity. The fact is we are coming to have much less No. 1 hay than we used to have. I do not wish to criticise the farmer, I know his problems, and they are real. If we do not cooperate with him and urge him to see the good policy of a better product, can we expect him to prepare for us the best possible commodity? Let us work with him to improve our common interests? Let us encourage the use of better seeds and a more careful preparation of the seed bed.

I believe a great deal of good can be done in a revision of our buying plan in the country.

It seems almost impossible to bring this about, but if we could buy each lot of hay on its merits instead of whole crops at one price, we would help the grower to see the value of producing a better article and profit in better caring for his sale hay to secure the highest price for that kind of hay. It would also stimulate the storing of hay at harvest time. In short, we should buy our hay on grade in the country. Let us insist on better baling, and endeavor to keep the low grades back on the farm where they can be used more economically.

Ours, gentlemen of the hay trade, is to serve. We have no right to occupy our place unless we serve those with whom we trade. We are farmers' agents. We have a duty to perform and a service to render. Let us do our best and by our diligence make our place a continued economic necessity. The grading station and the transfer warehouse have proved to many of us that some of the evils just mentioned can here be overcome.

The Government tells us that we have a record crop of hay this year. Some of us seem to forget that the war is over and that Uncle Sam, who bought hay last year in the millions, has practically no horses to feed and that our boys who to lick the Kaiser would lie on a tick of straw or hay have now returned home and to its comforts and need no longer either hay and straw on which to make their beds. What shall we do with it all?

The average crop of hay, all grades, f the past ten years, is 90,000,000 tons, wi only 75,000,000 tons last year. This ye we have, according to Government report more than 111,000,000 tons. During th past ten years, the Department of Agr culture tells us, 66,000,000 tons were us on the farms and 24,000,000 were fed o the farms on which the hay grew. If th year we are to feed the same amount nay as usual on the farms we will have surplus for market consumption of 49,000 000 or twice the amount of market hu required for this year's feeding.

Is it not time to rescue the horse whi is now being forced from our city street There are 17 per cent fewer horses on o city streets than five years ago. Let encourage the retention of the brood ma on the farms. The Percheron Society America is preparing horse power der onstrations and the farm bureaus are c operating with suggestions of multip hitches to lessen the man power necessar

The dairy cow is largely our hope. B her we cannot find a substitute. Dr. Ho ton, who tells so many good things, sa that with all our research no substitu can yet be found for her milk. We of Ne York state, with her fertile fields, wi her wonderful climate and with every ri of freight rate, won in our favor, t cause of our nearness to the great Eas ern markets (her alfalfa fields are a gre asset) if we can but continue to impro our method of harvest, the dairymen the East will continue to prosper and honor the Empire State for her contrib tion of alfalfa hay.

A situation which most demands our a tention and which is driving us out business, which is tending to upheave an wreck our whole system of agriculture, the wild increase in the use of the au truck. We have been swept off our fe by the tide which using as its impelli force the war-time emergency argume which has inveigled many a conservati business man to invest his tens of tho sands of dollars in automobiles only so to find he had a heap of scrap and h money gone. One of your number tells a cartman in his town who had thr teams which he sold and bought an aut truck. Now, after two years, the tru is worn out and he has no money to b another. His present problem is wheth he shall mortgage his home to buy anoth truck or horses. He has decided to scr the old truck and go to work by the we that he may have his home.

See the great building full of abandon auto-trucks of the express companies New York. We have worried about t cost to feed the horses. Do not forget th at least some horse feeds will soon cheaper, while the auto has advanc sharply, again only recently. Will the au driver do the same amount of work a the same kind of work that will the hor driver? No. He must be a more or le skilled mechanic.

Each of us knows the auto buyer s dom buys an auto for cash. When trades he simply adds a fat sum to auto agent's valuation of the old c which, by the way, is almost never great than the agent's proposed profit. The au salesman has been allowed to get aw with our trade by his clever salesma ship. The auto salesman is clever but n always well informed. Recently a fa tractor salesman proceeded to induce m to buy a tractor for my farm. This w his agreement, that whereas I had ni horses I could sell eight and keep one the tractor would do the work of eig horses and I would need but one. So agreement, was it not? But no more i practical than some other arguments th I put over on our patient horse user b ginning to buy trucks.

Let us from this hour each resolve do his bit and this mighty Association stand together to tell the people the trut and let not this convention finally adjou until definite, positive action shall ha been planned whereby we shall beg though all too late, to present hones and in a forceful manner the comparati value of the horse. Some one has sa 80 per cent of all hauling can be do cheaper by horse than by auto truck. F economy's sake use the horse. Why thr up our hands. Let us advertise the tru of the matter. Let's not be afraid to u our money to protect the truth of the s tation and safeguard the agricultural i terests of the state and the farmer who we represent, to befriend the prospecti buyer of the auto-truck by being on t job with facts and figures. The time h come when we should have a hearing b fore the public and every one of us shou indent into every bit of his stationer some slogan favoring the horse. At t Chicago Stock Show this fall this will a prominent topic and feature. To th end, Mr. President, I ask your permissi to offer this resolution and to move i adoption:

Whereas, We, the New York State H and Grain Dealers' Association, realizi the increased use of the auto-truck, b lieve that economy of transportation h been lost sight of in the hurry of wa time conditions and the agriculture inte ests of the country overloaded; and

Whereas, Many users have come alrea to appreciate this and are discarding t auto-truck to return to the horse, or s planning to do so when their present au equipment is used up; therefore, be it

Resolved, That we urge upon our me bers to use their influence to present t facts to auto users and prospective bu ers; and be it further

Resolved, That our own Associati through its officers effect concerted pla to remedy this economic condition.

The convention after amending this solution so that it should include the ming of a committee of three mem- rs to coöperate with similar commit- es from other associations, unani- ously passed the resolution after sev- al other members had spoken briefly ong the same vein.

SECRETARY TAYLOR'S ADDRESS.

J. Vining Taylor, secretary of the tional Hay Dealers' Association, de- ered an address in which he first re- ewed current crop conditions and then artily endorsed Mr. Dean's attack on otor transportation and backed it up th a mass of data and statistics re- rding the comparative cost of horse d motor vehicles. In part he said:

am still of the opinion that the Govern- nt's figures on the hay crop are too high, t notwithstanding all of the reports re- ved I feel sure that we will have enough y to fill all our wants. The Government s year will not be a heavy buyer of hay, the export of Government forage will be ht. This will cut some figure in the ount of hay that will be marketed in s country. The acreage, of course, is ort, as stated at the Detroit meeting; stures have been sacrificed in favor of in, and this seemingly is natural on ac- nt of the fact that grains of all kinds l hogs are extremely high and the farm- can make more money with them than can raising hay. The National Hay As- iation is doing everything within its ver to encourage the farmer to keep ne part of his land in meadows. The ld, so far as quality is concerned, is ex- lent. I never saw as pretty timothy in life, but in some places it is thin. ver in some sections is carrying quite percentage of white top. Alfalfa, as I derstand it, in some sections the first and ond cuttings were almost an entire loss. with good weather from now on I think t can be overcome.

his, gentlemen, leads up to a matter ich has to some extent been a hobby mine for some time—comparison of the t of operating the horse-drawn vehicle against the motor truck and tractors. I ih I had the time to give you in full information that has come to me ough various sources on this very im- tant subject. I had the pleasure some ie ago of getting in touch with G. E. ntworth, superintendent of the Union ck Yards and Transit Co. of Chicago, in horse market department. I want to d to you some very interesting para- phs from some of his communications. instance, Mr. Wentworth says:

I presume that you have seen the com- ative figures issued by the packing se of Wilson & Co. on the cost of deliv- by truck and horse. For fear that you y not I enclose you a copy thereof and a copy of my resumé of the same ar- e. It is true that I have made exten- e investigations on motor trucks, but in er to obtain reliable figures from busi- s houses in this city I was compelled give my word that they were not for lication. But for this stipulation I uld long ago have had a testimonial ated and distributed. There is none who ies that the motor truck is much more ensive than the horse and most are very rly double. Many of them make the ex- e that service is the more important n, and others claim there is speed in the ck. On this question of speed I have ays found that it refers simply to the t load delivered in the morning, and nothing to do with the last load at ht. You can confidently assert that up date there has been no tin or top ma- nery made which can outwork the horse nis area for the money.

There is absolutely no record of any iness house which has replaced its horse ipment with a fleet of trucks that was compelled to buy additional trucks and ease the expense far beyond that of the oles. You can find proof of this in the ertisements of any auto-truck concern he country. All the transfer companies his city, all coal companies, all milk and ing companies prefer horse delivery to k. The same applies to laundries and ny other lines. There are concerns here ch use them because they hope to put of their competitors out of business. y claim that they get new business at reater distance from their places, which y admit is unprofitable by the use of os. In other words, the Chicago mer- nts think they can do business com- ng with the merchants of Aurora and in by giving those cities practically free very. Somebody is paying the piper.

My greatest objection to the tractor is t it tends to discourage and actually s impair breeding operations on the n. The farmer's place should be one production in every branch. There uld be no machinery taking the place iorses or other live stock. The farm is the place for sterility. All figures as he cost of the horse upon the farm are leading and without any foundation. A se costs the farmer nothing and by the e the animal is six years old and in a keetable condition he is always a net it whether he sells for $50 or $500."

Mr. Taylor then quoted letters from coal company, a department store, a nsfer company, a bakery company, a ry company and read a number of spaper clippings. He then quoted parative costs of purchase and up- keep of trucks and horses, giving these figures: Cost of two trucks, $2,550; cost of two horses, wagons and harnesses, $1,020. Equipment for the motor trucks, including depreciation the first year, $663, and the horses and wagons and harnesses $142.20. Variable charges, wages, chauffeurs, etc., $8,842, which add to the fixed charges brought the total to $9,505.

BOARD OF DIRECTORS' REPORT.

The report of the Board of Directors read by President Shultz reviewed the work of the Association and praised the work of the new traffic department which out of $100,000 in loss and damage claims, which had been presented to it, has collected more than $70,000 and would gather in a large proportion of the balance of $30,000. The report in part said:

This is a time when our country needs as never before the unselfish support of every true citizen, a time when every association of business men or interests should recognize that one of its chief functions is to assist as far as possible in bringing about a condition in business that will tend to better unite all classes of society.

In this undertaking our Assocation has found and will continue to find plenty of opportunity for service.

It has been the amibition of your directors to perfect a workable organization, and to that end you will remember at your last annual meeting you adopted an elaborate and efficient set of by-laws which clothed your officers with authority to appoint a vice-president in each county of the state, a traffic manager in addition to the usual committees. We are pleased to report the appointment of thirty vice-presidents.

The report then discussed the necessity for having a vice-president in each county of the state and continues:

We would recommend that your new board of directors appoint vice-presidents for the coming year at once, and then call them together for a conference and discussion of ways and means to promote the Association's interests. If this could be done before the close of this session it would facilitate their getting together and starting the year's work at the beginning with the pep that it deserves.

The report recorded the addition of 35 new members during the year and the loss of four by death and three by withdrawals.

The war has changed the normal condition of trade, the report continues, and of many articles of commerce. Manufacturers, jobbers and distributors have found it necessary to seek trade in sections that were little known to them before the war. This has been true of hay. Before last year New York state grown hay was largely marketed in eastern New York, northern New Jersey and the New England states. Little was ever shipped to the Southern States. The average Southern dealer and feeder was prejudiced in favor of hay grown in the Middle-Western states. The Government during the war purchased large quantities of New York state hay for shipment to camps in the South. This and embargoes and the scarcity of cars for the movement of the Middle-West hay attracted the Southern trade to New York state hay for a portion of their supply. But they have never fully gotten over the foolish notion that better hay is to be had in the Middle-West. Your president, recognizing this condition, visited all or nearly all of the principal markets in the South and presented the relative merits and value of the New York state grown forage. As a result of this educational program I look for a much larger demand from the South for New York state grown hay in the future.

The traffic department of the Association is a new feature and the splendid work that it has done would suggest that the directors' report would be incomplete if I did not make mention of a few of its accomplishments. There has been presented to the traffic department about $100,000 worth of loss and damage claims. Of this amount more than $70,000 has been collected to date and it is expected that a goodly portion of the balance of these claims will be paid. This department has audited thousands of dollars worth of freight bills and collected much overcharge in freight; has succeeded in having the arbitrary rate of from 50c to $1 per ton charged on all commodities by the N. Y. C. & S. railroad cancelled and new rates put into effect that are equal to the Auburn, N. Y., basis.

The report concluded with merited words of praise for the work performed by Traffic Manager Sims and Secretary Rupert.

The traffic manager, D. J. Sims, then presented his report showing what had been accomplished in the matter of reducing rates and bettering conditions for hay shippers. He said in part:

"Notwithstanding the railroad administration in September 1918 promulgated rules prohibiting the furnishing of embargoes to commercial organizations, Chambers of Commerce or any one other than accredited railroad officials, we were able by lodging a formal complaint with W. G. McAdoo to have the order rescinded, and this after numerous other large organizations had failed. As a result of this action this Association has been furnished daily with the embargoes of the various trunk lines and is in a position to furnish its members with prompt and accurate data.

"We lodged a formal and forceful complaint with the superintendent of transportation of the trunk lines because of the prevailing practice last fall of stripping interior points of equipment in order to assemble cars at the lake ports to accommodate ex-lake grain. We have tangible evidence that this complaint resulted in considerable care being taken by the railroads to see that cars were furnished hay and grain shippers in New York state and that there were subsequently relatively few complaints, especially considering the scarcity of equipment resulting from war conditions. We have within the past few days again called the transportation officials' attention to the urgent necessity of keeping our members supplied with cars and have received assurances that special attention will be given this matter, and we are requested to keep the general officers informed of any and all failures.

"We were able, during October 1918 to bring about a modification of the ridiculous permit system, enabling members to utilize a specific permit from any one of five shipping points and were assured that if after a trial of from thirty to sixty days it did not work out satisfactorily to the members, the system would be further modified to permit the use of a permit from any station on a division of the road intercepted. It is obvious that this would have been accomplished had not the signing of the armistice reversed all transportation problems.

"We have been able to arrange with the Railroad Administration for the establishment of through rates on all points on the C. N. Y. & S. Ry. to common points on identically the same basis to apply locally from Auburn *via* the Lehigh Valley and the New York Central. This means that shippers will no longer pay the arbitrary rate to Auburn, N. Y., and it is felt this will save thousands of dollars."

The report then detailed work of reducing rates and securing return of overcharges on a number of lines in central New York and continues:

"We have succeeded in bringing about a reduction on pancake flour, self-rising, from fifth class to grain products rate, effecting a saving to one concern of approximately $6,000 per year. We have succeeded in establishing milling in transit rates for one of our members, obviating the necessity of his paying combination rates and effecting a material saving. We are prosecuting before the Commerce Commission at Washington a claim for reparation for one of our members for $3,800 alleged excessive demurrage charges and feel confident of getting the refund with interest. We have discovered that the railroads have consistently for the past ten years charged from 80c to $1 per ton excess freight on shipments to the N. Y., N. H. & H. R. R. and it is roughly estimated that this will aggregate approximately $80,000. They are now refunding this money to the interested parties. The application of the provisions of the class rate minimum provided in General Order No. 28 since June 1918 is and has resulted in overcharges on thousands of cars of hay, grain, etc. This feature has been vigorously pressed through the various freight traffic committees of the Railroad Administration and is now before the Director of Public Service at Washington, who informs us this arrangement will not only be remedied promptly but that provision will be made to refund to interested shippers the additional charge accruing through the oversight.

"During the past year this department has received claims for loss and damage aggregating $92,460.63 and has thus far collected $69,748 and expect to collect practically all of the balance. We have also audited the paid freight bills of the members who have sent them in and have discovered overcharges paid the various railroads to the amount of $12,458, and practically all of this amount has been either collected or is now in the process of being paid. There is no doubt but that carriers generally have collected for a great deal more freight in numerous instances than they are entitled to and we are confident that if the members generally will avail themselves of this department that it will be found to be to their material interest.

"It is felt that the railroads will not be returned to their private owners at least until after the 1920 election, and certainly in the meantime it is futile to hope for much encouragement from the present chaotic conditions confronting the entire transportation system of the country. It is felt that the only way to accomplish any tangible result is to know exactly what you want and pound for it consistently and vigorously."

The first business session was adjourned shortly before five o'clock in the afternoon to meet again at half past ten on Saturday.

On Friday evening the members attended a banquet in the ball room of the Onondaga at which about 300 were in attendance. Addresses of a general nature were made by F. L. Young, president of the National Hay Association, and John C. Lacheson, president of Pennsylvania College for Women, Pittsburgh, Pa.

SECOND DAY'S SESSION.

The second day's session was called to order promptly at 10:30 and a round table discussion on various matters affecting the hay and grain trade begun, which lasted for more than an hour.

The discussion centered around two topics, the substitution of the tractor for the horse and ways and means of eliminating the damage claims that are filed annually with the railroads.

A score or more members participated in the latter discussion. One method suggested by Mr. Mitchell of New York City was to have a printed clause on bills of lading and freight bills permitting agents to adjust shortages or overweights immediately, thereby eliminating the necessity of a claim with the freight department of the railroad later on. It was pointed out that in scores of cases where receivers deliver hay to distributors they give them from thirty to sixty days to make their payments and that often the receiver is not aware of shortages or overweights in freight until the checks from the distributors come in. The scheme suggested by Mr. Mills would eliminate this evil and would work to the advantage of all concerned. It was pointed out that this plan is already in operation in some of the larger cities, but that the freight agents in some of the towns would not make the changes on the bills, believing that they did not have the power to do so and fearing that trouble for themselves might result.

Committees reported on various affairs, after which President Shultz named his select committees on resolutions, nominations, etc.

The nominating committee asked every member of the association who had a candidate for office to present his name to them for consideration. A number of candidates were thus selected, and the election was held resulting in the choosing of Burt M. Williams of New York as president and L. A. Bristol of Claverack as vice-president, the latter succeeding Jay B. Bradley of Interlaken and the former succeeding John L. Shultz of Skaneateles, who has served the Association faithfully as president for a number of terms. Last year Mr. Shultz was desirous of retiring but was prevailed upon to serve for another year. D. Clifford Jones of Weedsport, N. Y., was elected secretary-treasurer to succeed W. B. Rupert, of

[Concluded on page 17.]

The Letter Box

Some Dry.

Price Current-Grain Reporter: It's so dry and hot here you can't spit. They still carry Bromo-Seltzer at the soda fountains.—*Fred Miller, Enid, Okla.*

Purchased Business.

Price Current-Grain Reporter: As I have purchased the business of the Cash Supply Co., Greenville, Ill., please change the paper to me. They request me to have it done.—*O. M. Neathery, Greenville, Ill.*

Purchased Elevator.

Price Current-Grain Reporter: We have purchased the Glen B. Kent Elevator at Kalamazoo, Mich., and will make some repairs and install some new machinery.—*Wm. A. Coombs Milling Co., Coldwater, Mich*

Nice Run of Wheat.

Price Current-Grain Reporter: The grain country in this section is fine and we are at present having a very nice run of wheat and handle many cars of choice Rosen seed rye.—*White Brothers, Scotts, Mich.*

New Gasoline Engine.

Price Current-Grain Reporter: The Farmers' Grain & Fuel Co. have installed a new 10 h.p. gasoline engine in their elevator at this place. The Atlas Elevator Co. will not operate their elevator here this season.—*Geo. Leslie, Agt., Great Western Grain Co., Delhi, Minn.*

In Pembina County, N. D.

Price Current-Grain Reporter: The crop at this point, with the exception of oats and flax, is very poor. Wheat will go from 3 to 10 bus. per acre, rye from 3 to 7. Both are very poor samples. Barley is a very poor sample also, but I cannot give you an estimate on the yield yet. Flax and oats look good.—*Andrews Grain Co., per W. C. Brown, Agt., Drayton, N. D.*

Farmers' Association Buys.

Price Current-Grain Reporter: Dale McAdams has sold out his warehouse and grain business to the Farmers' Co-operative Association here. A large part of the grain from this section has been shipped through the association. They plan to handle all kinds of produce. There is some talk of building a new elevator next season.—*Theo. Trowbridge, Decatur, Mich.*

Scoby, Mont., Elevators.

Price Current-Grain Reporter: I suppose you have all the elevators at this point listed. At any rate I will list them: Montana & Dakota. Pete Helin, agt.; International Elev. Co., M. L. Buckland, agt.; Hanson Bros., O. Hanson, agt.; Scoby Grain Co., Wm. Lamson, agt.; Farmers' Elev. Co., P. Karlsund, agt.; Smith-Tyner Co., J. Smith, mgr. The last have a mill in connection. All these places have made their necessary repairs and are ready for the new season.—*M. L. Buckland, Scoby, Mont.*

French Clover Seed Crop.

Price Current-Grain Reporter: We beg to add to our last report of the 25th of July the following as to seeds:

CRIMSON.—Thrashings have taken place with fine weather. Important stocks have been brought on the markets and as all offers have not been taken some decline in price has taken place. Qualities are a little darker than at the opening; and as a part of the crop has been wet, lots of irregular color are now being offered.

RED CLOVER.—In spite of the rain the situation does not improve much, and we believe that the crop will not be important. Stocks are selling slowly at high prices. It is very likely that the new season will begin without much seed from carryover of last year.—*H. Fauchet & Cie., Paris, France.*

Elevators at Cullison, Kan.

Price Current-Grain Reporter: There has been only one change in elevator properties here this season, the elevator of the Kelley Mills Co. going to Reno County Mills Co. at Hutchinson. Mr. Farnsworth being local manager. Here at Cullison there are three houses, Kansas Flour Mills Co., of Wichita, J. W. Wolf, mgr.; Farmers' Elevator Co., Roy Miller, mgr.; and the Reno County Mills Co., F. Farnsworth, mgr. —*J. W. Wolf, Cullison, Kans.*

War-Time Wheat and Flour Prices.

Price Current-Grain Reporter: We should like you to send us some statistics on prices of wheat and flour during the Civil War and during the next three or four years after the Civil War. Also during and after the Franco-Prussian War and during and after the Spanish-American War. What we want is the highest price and the lowest price of contract wheat during these years, also on Patent Flour by the barrel.—*The Eikenberry Fitzgerald Co., Cincinnati, O.*

ANS.—The *Monthly Labor Review*, published by the U. S. Department of Labor, Bureau of Labor Statistics, published a few months ago an article on the prices of wheat and flour and other commodities during the Civil War. No doubt you can obtain a copy without trouble by addressing the Bureau of Labor Statistics. This is about the only data we have of this nature. Board of Trade figures lost in fire of October 9, 1871.

As to the period of the Franco-Prussian War we have the following prices: Cash prices for contract wheat and spot prices for choice spring wheat flour:

	Wheat		Flour	
	Low.	High.	Low.	High.
1871	$0.91½	$1.32	$5.50	$7.25
1872	1.01	1.61	5.25	8.50
1873	.89	1.46	4.62½	7.75
1874	.81½	1.28	4.25	7.00
1875	.83½	1.30½	4.00	6.50

For the period of the Spanish-American War, beginning with 1897 we have the following prices for contract wheat and spring wheat flour good to choice sample grades:

	Wheat		Flour	
	Low.	High.	Low.	High.
1897	$0.66½	$1.06	$3.70	$5.60
1898	.62	1.85	3.20	7.25
1899	.64	.79½	3.20	3.80
1900	.61½	.87½	3.00	4.30

Wisconsin Crops—Spring Wheat Fails.

Price Current-Grain Reporter: Since the July Government report was issued crops in Wisconsin have taken a decided slump, and many localities in this greatly favored state will come close to having a failure of small grain crops; and that is something that we have never yet experienced.

Long years ago Wisconsin was a wheat state and Milwaukee the leading flour manufacturing city of the Nation. Then came the chinch bug, and after a period of years the Wisconsin farmer had to admit that he could not profitably grow wheat. When the war came on, and to help along in the general desire to feed the world and to win the struggle against autocracy, he again tried his hand at spring wheat and with remarkable success. The wheat grown by our Wisconsin farmers last year was of splendid quality.

This year in many sections his efforts in growing spring wheat, however, have been a dismal failure, and instead of the nice, plump, perfectly shaped kernel of a year or two ago, a shriveled little runt of a berry is the result, good for chicken feed but little else. Some farmers have not even harvested it, for they claim it is not worth the labor.

Oats and barley are both very light, perhaps because they were planted late, and had not time to mature sufficiently before the extremely hot weather of the later days of June came.

Hay, both timothy and clover, is good, and was harvested in good haying weather, and Wisconsin will again furnish its share of good provender.

The alsike seed crop is of about normal size; the yield is good, and the seed of good color, and farmers are already selling freely, due to very high prices being paid by country dealers. Red clover too looks very promising, and a good crop is expected from a normal acreage.

The pea crop, along the shores of Lake Michigan and inland about thirty miles, is about 60% of normal, with about 25% of last year's crop being carried over.

While the grain crop was a disappointment, the Wisconsin farmer's income will be as great as ever, for prices of dairy products, in which we excel, are high, with prospects for a continuance of this altitudinal condition. As long as there remains a dearth of farmers, as is now the case, foodstuffs will continue scarce and costly notwithstanding all preachments to the contrary.—*Knauf & Tesch Co., per Wm. N. Knauf, Chilton, Wis.*

Loading Cars.

Price Current-Grain Reporter: Will you kindly let us know whether in loading cars of grain the cars have to be loaded to capacity or not? We a on the Michigan Central Air Line l vision.—*A. H. Reynolds, Centervil Mich.*

ANS.—The loading regulations of t Food Administration have been ca celled and the regulations now requ only the loading to the railway mi mums, which you will find in your t iffs.

Visible Grain Supply.

The following table shows the sto of grain in bushels in public and p vate warehouses at the principal po and in transit by water on the da named, with comparisons, as compi by the secretary of the Chicago Boa of Trade for the week ending Aug. 1919 (000 omitted):

BARLEY MARKETS.

MILWAUKEE. — Offerings at the Milukee barley market for the past ek were very moderate being curtailed the unsettled railroad situation. ere is a good demand from both instries and shippers for heavy malting ades, both old and new. Light ights and mixtures are neglected. ices for the week were subject to re or less fluctuation and malting sed 2@3c higher for the period. The eipts were only 99 cars, against 162 's for the previous week and 62 cars 1918. Current quotations are: Good choice, 48 to 50 lb. test, is quotable at 50@1.52; bright, $1.53@1.55; fair to od, 45 to 47 lb. test, $1.43@1.50; low, to 44 lb. test, $1.30@1.42; feed, $1.30 1.40. Iowa quoted $1.35@1.53 for ht to fancy; Wisconsin, $1.38@1.55; nnesota, $1.30@1.52; Dakota, $1.30@ 2; feed and rejected, $1.30@1.40.

DULUTH.—Receipts of barley on this rket dropped off heavily during the ek, the aggregate being only 42 cars. esh bidding for export and for feedg purposes developed from the East, d the market was strong, with closing ices up 1@5c to a range of from $1.24 $1.40. A lot of 100,000 bu. was shipped t from the elevators during the week Eastern delivery.

BUFFALO.—Barley dealers did quite good business this week in old barley t at a wide range, somewhere between .40 and $1.56. The difficulty was in lling the wild oat mixtures and there re quite a few lots heavily loaded with e black stuff. Maltsters wanted clean, mp old barley but could not see their y to paying the high prices asked. e new crop samples they claim are t worth considering.

KANSAS CITY.—Evidence that the new barley crop of the Southwest is moving more freely was shown in the week's receipts, which were 13 cars, against one a week previous and nothing a year ago. Without the restriction on the arrivals which the blanket permit system imposes on shipping, the offerings of barley might have been larger. There was a good demand for all that came, sales being mainly to feeders at scattered outside points. Apparently the raw barley was preferred over the ground feed. Prices were governed by reports of strong market conditions in Chicago and Minneapolis early in the week, but when prices in those centers weakened there was no recession here. Net gains for the week were 3@5c, No. 3 closing nominally at $1.41@1.42 a bushel and No. 4 selling at $1.40. Local manufacturers were not disposed to grind barley at the ruling prices. Dealers offered the Minneapolis product at $62 a ton, or $3.10 per cwt., sacked. Production in Kansas, as revised in the August crop report, is 16,945,000 bus., against a 1913-17 average of 5,639,000 bus. It is the largest ever grown in the state. Iowa has 8,294,000 bus. and Nebraska 7,880,000 bus.

CHICAGO.—The barley market opened the week very strong. Prices advanced from day to day until the middle of the week when the high point of the season was reached, after which there was a reduction, the market closing on Saturday very dull and uninteresting, although prices had not changed from Friday. There were during the week rather limited offerings and the principal buying was of the better qualities on malting account. Shippers also took some grain. New barley arrived in limited amounts but was not particularly inviting, the weight being very light, one car from Iowa early in the week testing only 34 lbs. After the turn of the week offerings were a little more liberal and buyers being able to discriminate prices generally settled down a little. The present week opened on Monday with a lower range of prices by 2@3c, only the very choice grain being at all steady. Old barley of course has been all the time in the better demand. Malting interests on Monday were the best buyers. There was some inquiry during the week for Pacific Coast barley and on Monday the news from that section was rather bullish, the crop out there being somewhat disappointing, both in California and especially in the northerly states. Monday's sales as reported covered 28 cars at a range of $1.35@1.43; screenings, 80c@$1.00. Futures closed weak, with September at $1.26; Sept. new at $1.34 after selling up to $1.35¼; December $1.31½, which was the top for that future for the day. No exports for the week were reported. The visible supply is shown elsewhere.

Shipment from Principal Grain Points in Washington, Oregon and Idaho

PORTLAND.—The barley market has taken a decided change in values. There is no denying the fact, says the *Commercial Review*, that the crop this year on the Pacific Northwest has been a disappointment. The yield shows some reduction, and the quality of the grain also is not so high as a year ago. Most of the barley received is light weight and in some cases more or less discolored. The demand at the same time has materially increased by calls for barley for cattle and hog feed, taking the place of corn, which is considerably more expensive. Quote No. 3 blue barley at $68, feed $67 per ton.

SAN FRANCISCO.—The market is in a waiting stage, looking to Washington for developments. Interest therefore centers mostly in the future market, and sales that are being made in the spot market are mostly of a retail character and in small lots. During the past week there was practically no spot market, all grains remained nominal in price. Country sellers, the *Commercial Review* says, still have fixed ideas as to prices they should receive.

New Barley Crop.

The barley crop summary by E. P. Bacon & Co., Milwaukee, shows a decrease in production in 1919 due to smaller acreage and lighter yield.

In Wisconsin there is a much smaller production than last year, due to lighter yield and decrease in acreage; quality, generally inferior, the berry light weight and shrunken, only a small percentage being plump. Color uneven, about two-thirds being more or less discolored, but no material unsoundness: acreage decrease of about 21 per cent; yield about 24 bushels, or about 11 bus. less than the crop of 1918.

Minnesota reports show a falling off in production; quality generally inferior, the berry is mostly light weight; color is uneven, but little material unsoundness; acreage a decrease of about 25 per cent; yield about 19⅓ bus., or 12½ bus. less than last crop.

Iowa reports indicate a smaller production; quality generally fair and suitable for malting; color uneven, but only a small amount unsound; acreage a decrease of about 24 per cent; yield 25.3 bus., or 8 bus. less than last crop.

South Dakota reports indicate a material decrease in production; quality quite variable; berry generally light weight or medium; color uneven, much being discolored but no material unsoundness; acreage about 20 per cent decrease; yield about 7½ bushels less than the crop of 1918.

The Van Dusen-Harrington report for the week ending Aug. 13 says that little barley has as yet appeared on the market and samples show a wide range in quality. Some of this grain is of good color, but practically all is of light weight. Some grain is of poor color and carries a heavy mixture of foul seeds and wild oats.

One of the foremost breeders of Duroc swine in Nebraska is recommending the use of barley feed. When checked against corn, barley is found to be a whole or partial substitute for that grain. Similar in its composition to corn, slightly lower in carbohydrates and fat, but slightly higher in protein. The grain, however, should be prepared for feeding either by grinding or soaking, or both. It should not, however, be ground too fine, but coarse enough to compel mastication without forming a pasty mass in the mouth. The only objection to barley is the objection also to corn at this time, that the price is considered high. In Europe, however, barley has long been considered one of the foremost feeds for the bacon hog.

BARLEY
The cheapest feed: saves corn and wheat.
It requires less barley than shelled corn to produce hogs and the cost is lower.
Ask for samples and prices.

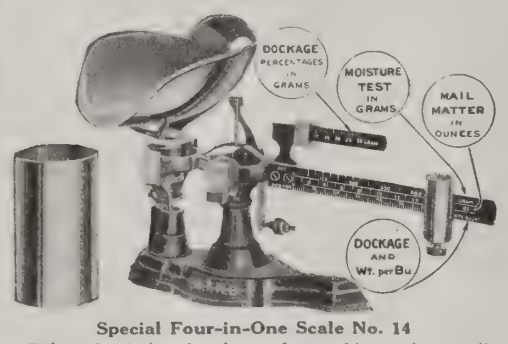
Before You Order That Moisture Tester and Other Grain Grading Equipment



Visit your nearest terminal market, supervision office or government grain laboratory and prove to yourself that SEEDBURO Official Brown-Duvel Moisture Tester, manufactured by Seed Trade Reporting Bureau, is the one used and recommended by ALL government offices.

THERE'S A REASON, and that is **QUALITY.** *You know* that all purchases made by the U. S. Government *must* conform to a certain standard and pass a strict examination.

SEEDBURO Equipment manufactured by the Seed Trade Reporting Bureau is used exclusively by all government supervision offices, grain inspection departments, mills and elevators from coast to coast.

It is the STANDARD—The kind you MUST have if you wish your tests to check with the terminal markets.

SEEDBURO (Trade Mark) OFFICIAL BROWN-DUVEL MOISTURE TESTERS for Whole or Ground Grains are made in sizes of 1-2-4-6 tests at a time, heated by electricity, alcohol or gas.

Special Four-in-One Scale No. 14

This scale, designed and manufactured by us, is a small, complete office scale for weighing samples for moisture test and for determining test weights per bushel, dockages, weighs for mailing samples, etc.

This "Four-in-One" Agate Bearing Scale is the most complete, compact, accurate and adaptable scale made satisfying these many needs. Effectively used in connection with grain sieves described herewith. Quick breaking and guaranteed accurate. Will do the work of four ordinary scales designed especially to satisfy any one of the above needs and at the small price of one. Used by thousands of country shippers, receivers and grain men everywhere. Price with weight per bu. cup, $23.00.

PORT COLBORNE DISASTER.

Superintendent F. W. Fawcett of the Port Colborne Elevator, whose ruin by an explosion was reported herein last week, has not as yet determined the cause of the explosion, which may have been due to spark caused by friction firing the inflammable dust in the house. But he and the architect, J. A. Jamieson, both say the house was clean. He has said that the men who could give an opinion on the subject, which would be worth anything, are either dead or too badly hurt to be questioned. The force of the explosion was tremendous, as it not only lifted the heavy reinforced concrete roof, hurling it in huge blocks for a distance of 200 feet into the harbor, but carried the entire three floors with it, including the distributing floor and the working-house machinery. Tons of debris were hurled into the storage spaces around the elevator, but most of it fell back into the elevator on top of the men in the work department, killing them if they were not already dead. The four walls of the top half of the building fell out. Grain from the elevator was carried for a mile across the canal and fell in showers. Every window in the near vicinity was smashed, even those in the ground floor of the elevator, called the bin room, which otherwise was scarcely damaged at all.

The elevator and dock were built in 1908 and a large addition was made in 1914. At the time of the disaster there were between 400,000 and 500,000 bus. of wheat and about 2,000,000 bus. of other grains in the house.

Apart from the loss of life the explosion was most serious, because it ties up the Great Lakes grain carrying system in Canada. Grain from the upper lakes was brought to the elevator and there transferred to smaller vessels to go through the canal to Montreal. There are no other facilities for doing this, so that the grain moving through Canada exclusively will have to be brought all the way from Port Arthur in small ships or by rail, which is much more expensive.

The elevator will not be ready for operation again for a year. Most of the 2,500,000 bus. of grain can be salvaged. It is all stored at the risk of the Canadian government. At present several large steamers are in the harbor to unload and several smaller ones to get cargoes. What will be done with the big steamer containing grain is puzzling the officials.

September Crop Reports.

The report showing the condition of the cotton crop on August 25 will be issued on Tuesday, Sept. 2, at 11 a. m. (Eastern time).

On Monday, Sept. 8, at 2:15 p. m. (Eastern time), a crop report will be issued which will give a summary of the condition and forecast on Sept. 1 (or at time of harvest) of corn, spring wheat, oats, barley, buckwheat, potatoes, sweet potatoes, flaxseed, etc., the yield and quality of hay (tame and wild), and peaches.

A supplemental report will be issued which will show the following: The condition on Sept. 1 (or at time of harvest) of vegetables, field beans, field peas, sorghum for feed, pasture, millet, fruits and nuts, broom corn, peanuts, etc., compared with a full crop of timothy and alfalfa hay; acreage, as compared with last year, and condition, of clover for seed; number of stock hogs on hand for fattening as compared with September 1 last year, and production of wool.

New York Oats Market.

There has been no particular change in the situation. In the local market (week's receipts 513,000 bus.), the spot situation was one of firmness, on account of limited offerings, and the insistence of higher premiums. Dealers continue to buy as necessity dictates, and avoid, as far as possible, the accumulation of stocks, preferring to enter the market frequently for supplies.—*L. W. Forbell & Co.*

YOU can do it by selling him the Ankorite Steel Drive Post. It gives him all of the advantages of other steel posts, PLUS THE PATENTED CRIMPED ANCHOR, which protects it against frost-heaving and side-thrust. That's the feature that clinches the sale every time, because it can't be bought in any other post.

Right now you have the opportunity of a lifetime to corner the fence post business in your territory. The demand is unparalleled—the post is right, the time is right, the sales plan is right, and all the resources of the Calumet Steel Company are behind you.

But you'll have to act quick. Farmers will be ready for the posts almost before you can get them, and territory is being closed fast. Dealers are ordering carload lots by wire, and can't get the posts fast enough to meet the demand!

Farmers know "the green post with the Crimped Anchor," and they won't be satisfied with anything less than Ankorite quality. Don't wait for your competitor to step in and secure exclusive sales rights—get in your initial order NOW, and clinch the Ankorite agency.

CALUMET STEEL CO., 208 So. La Salle St., Dept. 7, Chicago

NEW YORK STATE HAY AND GRAIN DEALERS' CONVENTION.

[Concluded from page 13.]

Newark. The following directors were elected: For one year to fill the unexpired term of Warren Dean of Aurora, W. E. Springer of Moravia; C. Sherman Paxton of Oakfield and Charles H. Pratz of Waterloo for two years, succeeding J. P. O'Hara and Charles S. Mead.

IN MEMORIAM.

The memorial address was made this year by Egil Steen of Baltimore, and was as follows:

As we pause in our deliberations to give a kindly thought for those who are with us today in memory only, we are confronted with the unsolved mystery of the ages, the secret of God. Death, that lays its quieting hand upon and lulls to sleep the fitful babe, unequal to the battle of life; or him in the vigor of strong manhood, who when the sun at meridian, is the beauty and glory of the day, lays us low, in the prime of life; or yet, in the evening of life, as the sun sinks low in Western, purpled night, bids we "Go West." Because the Almighty has spoken: "Dust thou are, and to dust thou shalt return!" the very first heartbeat of Life becomes but the opening note to the dirge accompanying that procession which leads to the City of the Dead. 'Tis but a heart-beat, a breath, that divides life from Death. None knows when will come the summons to yield up the breath of Life which the Almighty breathed into the nostrils of man, so that he "becomes a living soul."

During the year past and since last we met in annual convention it has pleased Him who doeth all things well to call from our midst Charles S. Mead, E. W. Bertholf, Charles Schaefer, D. W. Shults and M. E. Griffin.

While these have gone to "that undiscovered country from whose bourne no traveler returns," they are not forgotten, for we love to remember their friendly handclasp, their warm greetings, their cheery smile that was begotten of good-will to their fellow man. Most of us had learned to know these friends only through our business relations, through a community of interest in what the writer of "Blue Grass" called "the forgiveness of Nature, her constant benediction, Grass; that same Grass, which, lying in it among the buttercups and dandelions of May, are our earliest collections. And yet, when the fitful fever is ended and the wrangle of the market and forum is closed, Grass heals over the scar which our descent into the bosom of the earth has made, and the carpet of the infant becomes the blanket of the dead. Fields trampled with battle, saturated with blood, torn with the ruts of cannon, grow green again with Grass. Forests decay, harvests perish, flowers vanish, but Grass is immortal. Beleaguered by the sullen hosts of winter, it withdraws into the impregnable fortress of its subterranean vitality, and emerges upon the first solicitation of Spring.

And so this green shroud of Grass which covers the mortal remains of those whom we miss here today becomes to us an emblem that they but sleep with the deathless dead; this green Grass becomes to us an emblem of the "immortality of the soul, that nobler part of man, which survives the grave." He who said: "I am the Resurrection and the Life" did also promise that He would come again to receive us unto Himself, into that place which He Himself would prepare. That promise He fulfills when He sends His Messenger, the Angel of Death, to translate His children from this imperfect world into those Blessed Mansions of which it is written that "eye hath not seen, nor ear heard, neither have entered into the heart of men, the things which God hath prepared for them that love Him."

The only memorial to the dead worth while cannot be read or spoken—it must be lived. If we really care for those who have departed this life we will emulate their virtues, we will so live that when Death comes we will greet it as a summons merely to join old friends. Let us honor the dead by the way we live.

And so I would close this Memorial to the Dead by calling to mind the poet's "Psalm of Life."

President Williams' Views

"The New York State Hay Dealers during the coming twelve months will try to double its membership and do a lot of things that it seems to us are important," said Fred M. Williams, the newly elected president of that association at the close of the convention. "The Federal Government reports the hay crop for 1919 in round figures at 111,000,000 tons. This means, now that the Government is no longer a heavy buyer of forage, that there is available a larger quantity of hay for feeding and shipping to hay consuming centers than ever before. Of course, this will lower the price for this staple; in fact, the price for new, good hay on the farm is from $15 to $20 per ton; and our advice to the farmers is to feed as much hay as possible and in that manner raise more cattle. This will help to lower the cost of living in the long run.

"In addition to considering the prospects of the hay dealers' business for the coming months, we have taken into consideration the matter of educating the farmer in regard to the cheapness of haulage up to fifteen miles with horses as compared to the cost of haulage and work done by trucks and tractors. We intend to carry on an intensive educational campaign in order that the farmer may not make the mistake of exchanging the cheapest and best form of traction and work for something that is more expensive.

"We find that the country has harvested enough hay of fine quality to feed the cattle for the next eighteen months and are confident that if this great supply of fodder is used wisely it cannot but better living conditions for everybody. Our Association is, next to the National Association, the largest organization of its kind in the United States, and we have the feeling that it is worth while for us to do what we can to get the country back to a normal and safe business basis. We handle everything that is produced on the farm outside of dairy products.

"The meeting that has just been closed has been the most successful and largely attended we ever held. We expect to hold a mid-winter meeting here, but as yet the date has not been fixed. In the meantime, we have discussed matters that are of importance to the shippers and receivers of farm produce and have taken steps to solve the problems that have bothered us."

The Ogden Grain Exchange has been organized and members include representatives of three large Pacific Coast flour mills and other prominent buyers of the district. The mills included in the membership are the Sperry Milling Co. of San Francisco, the Globe Grain & Mlg. Co., Albers Bros. Milling Co., Holly Milling Co., and Taylor & Doon.

Australia to Control Wheat Sales.

Trade Commissioner Ferrin, Melbourne, reports that an important announcement respecting methods of disposal and marketing of Australian wheat was made June 7 by the chairman of the Australian Wheat Board. He said a tendency had recently been shown to break away from the scheme originated for the chartering of tonnage to remove wheat and flour, the effect of this tendency being seen in the demands of the shipowners for higher freights; and that already, as the result of competition among the states, it is becoming increasingly difficult in obtaining freight at payable rates. The commonwealth government has therefore decided that, in the interest of growers and of taxpayers, all overseas sales of wheat and flour are to be made by the Wheat Board alone, and the present arrangements whereby freight is secured for the board by the Commonwealth chartering agents are to remain undisturbed. This rule will apply to full cargoes; applications for shipments of parcels will be dealt with on their merits.

Grain Corporation Weekly Report.

The United States Grain Corporation's weekly bulletin giving the complete figures covering the wheat and wheat flour movement throughout the United States for the week ending Aug. 1, in comparison with the figures for the same period a year ago, is as follows:

Wheat—	1919.	1918.
Rec'ts from farms, bu.	50,441,000	42,662,000
Rec'ts previous week	51,665,000	40,283,000
Receipts from farms, June 27 to Aug. 1	158,380,000	148,094,000
Stocks, all elevators and mills, bu.	108,300,000	89,317,000
Stocks, previous week	80,638,000	64,544,000
Change for week, bu.	+27,692,000	+24,773,000
Flour—		
Produced during week, bbl.	2,121,000	1,947,000
Previous week	1,976,000	1,870,000
Produced June 27 to Aug. 1, bbl.	8,398,000	7,286,000

News of the Terminal Markets

CAIRO, ILL.

J. E. Clancy, Correspondent.

J. Q. Adams, of Chicago ,is now in charge of the supervision office at Cairo.

H. E. Halliday and family leave here on the 17th for Boston. They are making the trip by automobile and expect to be gone a month.

Receipts of oats for the first fifteen days of August have been very light. Shipments are light. Dealers do not look for the usual August business, which is usually very heavy.

Heavy rains have fallen throughout this section the past week, too late to be of any benefit to the corn. The rain will give the farmers a chance to plow their land for wheat. Rain on the 13th, accompanied by a fifty-six mile wind, did considerable damage throughout the city and on the river.

Friday the Cairo Trust Co., through George Parsons, agent, delivered to the city of Cairo deeds to the entire Ohio River Levee frontage and wharfing privileges and all reversionary rights on property deeded to churches, schools, libraries and parks. This settles a problem that has been before the people of this city for over fifty years.

NASHVILLE.

John Leiper, Correspondent.

Receipts of grain at Nashville last week were 346 cars. Stocks at the end of the week as follows: Flour, 40,600 bbls., increase of 5,200; wheat, 909,700 bus., increase of 37,700 bus.; corn, 81,900 bus., decrease of 600; oats, 129,700 bus., decrease of 39,300.

Corn meals in the southeast continue to do light business. Mills with capacity of 154,800 bus. reported output last week of 23,365 bus., or 15 per cent of capacity. Quotations for corn meal, sacked, per 100 lbs., f. o. b. Ohio River points: Bolted, $4.40@4.50; plains, 10@15c less.

Wheat movement has continued liberal in the southeast. The bulk of the crop in Tennessee has been moved. Mills are now buying considerable wheat in St. Louis and further west, and are piling up liberal stocks. There is a fair demand for oats Corn is quiet, with little change in prices. Quotations at the close of the week were: Wheat—No. 2 red, $2.25@2.28. Corn—No. 2 white, $2.15@2.17; No. 3 white, $2.12@2.14; No. 3 mixed, $2.10@2.12. Oats—No. 2 white, 83@84c; No. 3 white, 82½@83½c; No. 3 mixed, 82@83c.

Some improvement was noted in sales of flour in the southeast last week. The scare caused by agitation at Washington is blowing over and buyers are coming back into the market. Prices are not materially changed, quotations being as follows at the end of the week: Best patents, 98 lbs. cotton, f. o. b. Ohio River points, $11@11.50; standard patents, $10.40@10.60; half patents, $10@10.25. Southeastern mills, with capacity of 227,670 bbls., had output last week of 172,344 bbls., or 75.69 per cent of capacity, which compared with 63.5 per cent of capacity last year.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

New oats have practically replaced old oats in this market, but occasionally there is a car of old oats arriving and is disposed of at a premium over prevailing quotations. Best grades are selling around 83@83½c a bushel.

Corn is about stationery, with small amounts coming in and the demand hardly sufficient to move the few cars received. Quotations on shelled corn are slightly advanced over the last period, with No. 2 yellow moving at $2.13@2.15; No. 3 yellow, $2.10@2.11.

Among recent visitors on the floor of the local hay and grain exchange were J. H. Mathers, Lewiston, Pa., introduced by D. V. Heck; W. P. Anderson, of Chicago, introduced by President R. V. Harper, and H. L. Frisinger, Rockford, Pa., introduced by R. W. Young.

There is nothing to stimulate the market at present and demand is of a weak character. This applies to all branches and particularly oats and corn. Receipts are increasing somewhat and unless there is a corresponding increase in demand there will be a reduction of prices.

At the next meeting of the city council a decision is likely on a proposition submitted recently by the Pennsylvania Milling Company for the installation of a flour mill near the Brilliant cutoff. The company asked that the city deed to it a strip of public property at what might be regarded as a very reasonable figure. The company has bought a tract lying between the Leech farm hospital and the Lincoln avenue district and the city owns a strip between this tract and the railroad. The company, it is understood, would locate a siding and a part of the plant on the city property if it can be bought. Otherwise, the entire project may be held up, council was informed at its recent session with representatives of the concern. The property was bought by the city with funds secured by bond issue and was to have been used as a park. It is said to be unlikely now that the city will put it to this use, as it is on the opposite side of the railroad and boulevard from Highland Park. A special committee now has the matter under consideration.

Jefferson D. Hardin, Jr.
Foreign Grain Freights
Grain Forwarding
NEW ORLEANS, LA.

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

The Alfalfa Product Co. has put in a deputy weighmaster under the supervision of the Board of Trade.

The Scroggs Grain Co., formerly of Beresford, S. Dak., is now locaed on the fourth floor of the Grain Exchange, opening their office here on the 15th.

Mr. Bickel, of the Flanley Grain Co., returned the last of the week from a trip through Wyoming and Montana. "Bick" reports that that country he covered is in bad shape for feed.

The grain committee of the Board of Trade, owing to the light weight of barley this year, have put in feed grades of No. 1, feed and No. 2, feed barley, and discontinued the grades of No. 5 and No. 6 barley.

Visitors on the floor during the week were: Lee Wilsey, of the Wilsey Grain Co., Lincoln, Nebr.; Mr. Ewart, of the Ewart Grain Co., Lincoln, Nebr.; D. J. Kennedy, of the Atlas Elevator Co., Minneapolis; Chas. Corr, Salix, Iowa; C. P. Enright, Quimby, Iowa; Earl Peck, Laurel, Nebr.; Mr. Cumstock, of the Updike Grain Co., Omaha; Sam Lessen, Pierson, Iowa; Mr. Swenson, Vermilion, S. Dak.

MEMPHIS.

George Williamson, Correspondent.

W. H. Burtt, secretary and treasurer of the Centennial Milling Co., has made application for membership in the Merchants Exchange.

Ernest C. Merton, representing John T. Leonard & Sons, is an applicant for membership in the Merchants Exchange. The concern is already doing a big flour distributing business here and plans to extend it and also to go into the grain and feed department of the trade.

Oats have been in an uncertain state, but most of the trade seem to think they have gone about as low as they are likely to for the time being. Cash No. 3 white sold around 79c Friday, which was about a cent under the price the day before that. Holders are not disposed to make concessions and buyers are doing about as little as they can get by with. On call Saturday 80c was asked for No. 2 white, 79½c for No. 3, while No. 3 mixed was 69c and 73c asked. Cash No. 3 red were 69½c bid and 71¾c asked.

Business for the past week has been slow, with the trade mixed in their views on the course of prices. The attacks on the high costs have been regarded as passing influences, for the feeling here is that grains and feedstuffs are not inflated very much. The unsettled state of the markets, however, has checked business to some extent and making of quotations has been difficult. Corn was especially hard to quote, but within the past day or so some lower offers have been made. For instance, on Friday $2.14 was asked for cash No. 2 white, while on Saturday it was offered at $2.07. Cash No. 2 yellow was $2.08 asked and $2 bid, while $1.98 was bid for No. 3 yellow. On Friday No. 2 yellow sold at $2.05. Texas has been offering some new corn for ten days' shipment during the past few days, prices asked being in the neighborhood of those made by other sections.

TOLEDO.

Carl Bryant, Correspondent.

Philip Horn, of Monroeville, O., was a visitor on 'Change Saturday.

Kenton D. Keilholtz, of Southworth & Co., spent a few days of last week on the Chicago Board of Trade.

A. E. Bather, of Northrup, King & Co., Minneapolis, Minn., was a visitor at the offices of J. F. Zahm & Co., Saturday.

L. C. Eihler is in charge of the Hancock County Co-operative Co., at Findlay, O., in the absence of J. P. Marvin, who is on an extended vacation.

"Big Ed." Churchill, of the Churchill Grain & Seed Co., spent Saturday evening at Toledo Beach. He says the "scenery" put there is so invigorating and restful to one's eyes after a busy week on 'Change.

There is an urgent demand here for all grains, and with the light receipts last week and offerings on the sample tables were readily taken at values slightly lower than last week. The old crop of oats is bringing one cent premium. Light weight oats under 28½ pounds are inactive and not particularly wanted except at liberal discounts under graded oats. Corn is a scarce article and the few cars offered are taken at big premiums over the market quotation. Receipts for the week: Wheat, 224 cars; corn, 9; oats, 64; rye, 39; barley, 3.

Shortage of empty cars again hampered the movement of grain to this market last week and only 224 cars of wheat were received during the week. Dealers were informed of many instances where elevators were filled to capacity and unable to take in more grain because of the car scarcity. However, Toledo is not the only market to suffer from this condition, as receipts at other leading markets have greatly fallen off and the situation thought to be general. Dealers here are rendering considerable assistance to their shippers where specific cases are reported and some improvement is being obtained.

Although the proposition to inaugurate future trading in beans on the Toledo Produce Exchange has been considered for several months, it remained for George Forrester, of the E. B. Slawson Co., to take honors for having consummated the first deal. One hundred pounds of choice hand-picked beans were sold Saturday to Walton Stone, of the Churchill Grain & Seed Co., for delivery in November, at $8. When questioned by your correspondent, Mr. Stone refused to divulge the ultimate disposition of his unusual purchase, but hinted, in his good-natured way, that they were "sold for export."

DETROIT.

John Barr, Correspondent.

Joseph J. Wickens, of the Wickens Grain Co., Lansing, was a caller on 'Change last week.

There is nothing much doing in barley and the market is nominal at $2.40@2.50 per cwt. for cash No. 3.

Demand for beans has been satisfied to all appearances and the market is neglected at $8.25 for immediate and prompt shipment per cwt.

The local wheat market is inactive. Millers are not active buyers and report only a moderate demand for flour. Millfeeds of all kinds are in active demand and firm.

Rye is in fair shipping demand and a firm tone is quoted, although lower than the highest of the week. Millers are not buying in this market. No. 2 rye is quoted firm at $1.53.

Miss A. E. Reese, representing the Taylor & Bournique Co., of Milwaukee, appeared on the Board of Trade last week to sell grain. She is the first of her sex to attempt grain trading in this market.

Shipping demand for oats is fair, but the East wants something they cannot get in this market. They are asking for 36-pound oats, and these are not furnished by the present crop. The trade is chiefly local and the market is quoted firm at 81c for cash No. 2 white, 80½c for No. 3 white, 79½c for No. 4 white, 79c for new No. 2 white and 77½@78c for new No. 3 white.

The corn market was inactive all week and went a little lower in sympathy with the weakness in Chicago. Trading was lifeless owing to lack of supplies. Receipts amount to almost nothing and stocks here are small. At the close Saturday, after the market had ruled easy and dull, a local miller bid the market up 4c and got nothing. This gave the market here a tone of firmness, although there was nothing doing. Quote: Cash No. 3, $2.07; No. 3 yellow, $2.10; No. 4 yellow, $2.08; No. 5 yellow, $2.03; No. 6 yellow, $1.98.

BUFFALO.

E. Bangerser, Correspondent.

Lake traffic has come to a standstill as far as ore is concerned at this port, but quite a good amount of grain is coming down.

Rye sellers could do nothing here and were asking for bids for on track receipts, while lake receipts of No. 2 in store were quoted at ½c over Chicago September.

The bulk of the wheat for sale was red winter, which was quoted: No. 1 red, $2.31; No. 2 red, $2.28; No. 3 red, $2.24; No. 4 red, $2.20; No. 5 red, $2.17, on track through billed. There were sales as high as $2.65 for some grades of spring wheat.

Receipts of wheat were about 275 cars this week, while last year there were fully double that amount. All the wheat arriving here is readily disposed of when of good weight for this crop, but buyers would not pay as much for the lighter offerings.

Inspection week receipts for this week: No. 3 soft white, 15 cars; No. 1 red, 1 car; No. 2 red, 15 cars; No. 3 red, 29 cars; No. 4 red, 14 cars; sample red, 1 car; No. 2 mixed, 2 cars; No. 3 mixed, 12 cars; sample, 5 cars; No. 1 hard winter, 14 cars; No. 2 hard winter, 56 cars; No. 3 hard winter, 28 cars; No. 1 dark hard winter, No. 2 dark hard winter, 16 cars; No. 3 dark hard winter, 12 cars; No. 4 dark hard winter, 1 car; No. 2 northern, 3 cars; No. 5 northern, 1 car; No. 2 dark northern, 3 cars; No. 3 dark hard winter, 1 car; No. 1 yellow hard, 1 car.

Corn—No. 2 mixed, 1 car; No. 3 mixed, 1 car; No. 6 mixed, 1 car; sample, 5 cars; No. 1 yellow, 5 cars; No. 2 yellow, 23 cars; No. 4 yellow, 2 cars; sample yellow, 14 cars; No. 6 white, 1 car; No. 1 milo, 2 cars.

Oats—No. 1 white, 24 cars; No. 2 white, 37 cars; No. 3 white, 25 cars; No. 4 white, 2 cars.

UNION TRUST COMPANY CHICAGO
A BANK OF STRENGTH AND CHARACTER

THE B/L BANK OF CHICAGO

With the prospects of bumper crops, the strain of financing on the banks of the country is greater than ever before.

We solicit inquiries regarding facilities for IMMEDIATE CREDIT and DIRECT COLLECTION at MINIMUM COST of Bill of Lading items on all receiving points in the United States and Canada.

Such an arrangement provides the simplest and most convenient, as well as economical, method of crop financing.

UNION TRUST COMPANY CHICAGO
STRICTLY A COMMERCIAL BANK
Member Federal Reserve System

There were buyers for all the oats offered, sellers following the option as a rule, but cleaning up at the close of each day's business. Fee, as well as oatmeal mills, bought most of the offerings. Closing: No. 1 white, 82½c; No. 2 white, 82c; No. 3 white, 81c; No. 4 white, 80c, on track, through billed. Last year on this date No. 2 white oats were selling at 71½c.

After selling Monday at 20c under Saturday prices commenced a steady decline in the absence of buyers and practically nothing was done until the close of the week, which was 6 to 8c lower and dull. The only buyers were those forced to have a car or two, and there were few in that position. On the other hand, the offerings were very light. Closing: No. 1 yellow, $2.10¼; No. 2 yellow, $2.10; No. 3 yellow, $2.09, on track, through billed.

A year ago No. 3 yellow corn was selling at $1.85 here.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Oats receipts, 6 cars, with good demand from shippers, who took all offerings at prices 2½c higher than Friday's market. No. 2 white selling at 76c; D. W. No. 3 white oats at 75½c.

Very little change in the grain car situation and practically all country elevators are filled to capacity awaiting cars. With the railroad shopmen returning to work some relief is expected in the near future.

Saturday's corn receipts at Peoria were 11 cars, with market unchanged, demand very good and all offerings were readily taken. No. 1 mixed sold at $2; No. 2 mixed, $2; No. 1 yellow, $2; No. 2 yellow, $2. A heavy run of corn is not looked for until the threshing is entirely out of the way, although inquiries for bids have been more numerous the past week from the country dealers.

Officials of the Douglas Starch Works, Cedar Rapids, Ia., were in Peoria last week looking over the city for a possible site for their large plant. It has been announced by Peorians who have been entertaining representatives of the large plant that it will be decided within a few days as to the new location of the plant, and the chances of it coming to Peoria are good. Peoria is generally admitted by all manufacturers who use corn as a basis of their product to be the best location for plants of that description engaged in the manufacturing of corn products, mostly on account of being in the center of the corn raising state. The new plant will operate on a large scale, meaning an expenditure by the Douglas people of around $4,000,000.

NEW ORLEANS, LA.

Thos. C. Robinson, Correspondent.

Were it not for the fact that there has been a steady call for oats for export, the demand for this cereal would be very light. During the past week bulk No. 3 white oats have been sold from 81¼c to 82c delivered, New Orleans weights and grades to govern.

The W. L. RICHESON CO., Inc.
FREIGHT
BROKERS AND FORWARDERS
613-614-615 Whitney Central Bldg.
NEW ORLEANS

The gradual improvement in coarse grain prices, after the very heavy decline, has had no effect on buyers of corn. The demand is extremely light, and while offerings are small also there is no snap to the trade. Bulk No. 3 yellow corn has been quoted on New Orleans terms at $2.14 per bushel delivered, and on outside terms bulk No. 3 yellow has been offered at $2.09. Our big outlet for corn, Cuba, has been out of the market for the past several weeks; besides, the domestic business to our surrounding territory has also been very quiet. These two facts, coupled with the declining market, has made trading exceedingly slow in the corn line.

MILWAUKEE.

Ehrich E. Meyer, Correspondent.

F. U. Goodrich, Edward C. Christl, Carl V. Gerstenberg and Arthur K. Emrich have been elected members of the Chamber of Commerce.

The Chamber of Commerce, August 12, voted to appoint a committee to investigate why the executive internal revenue office should be moved from Milwaukee to Madison, as ordered by Commissioner Roper.

Receipts of grain at Milwaukee for the week ending August 16 were 99 cars of barley, 51 cars of corn, 177 cars of oats, 105 cars of wheat, 20 cars of rye; total, 452 cars, against 630 cars a week ago, 1,397 cars a year go and 547 cars in 1917.

The Milwaukee cash grain markets for the week ruled unsettled with more or less fluctuation. The demand is good for both old and new grain and all offerings are readily absorbed. Under improved railroad conditions an increased movement is expected next week.

Milwaukee grain shipments last week were 568,981 bushels of oats, 69,429 bushels of corn, 69,240 bushels of barley, 11,236 bushels of wheat, 58,250 bushels of rye; total, 777,136 bushels, against 1,284,048 bushels last week and 1,247,790 bushels the corresponding week a year ago.

Flour production at the Milwaukee mills for the past week reached a total of 15,300 barrels or approximately 53 per cent of capacity product. Of this 9,500 barrels were wheat flour and 5,800 barrels rye flours. This week's production showed a gain of 300 barrels of flour as last week's production totaled 13,000 barrels.

H. H. Peterson, W. A. Hottenson and Edward La Budde were appointed as a committee August 14 by President Harry L. Stratton, of the Chamber of Commerce, to draw up resolutions on the Owens and Kenyon bills for federalizing the packing house industry now before congress. It is believed the resolutions will take an adverse stand on the bill.

Visitors registering at the Milwaukee Chamber of Commerce during the past week included the following: E. Rein, Chicago, Ill.; J. E. Nagle, Lake Beulah, Wis.; W. C. Jakes, Merrickville, Canada; Ed. Recor, Marine City, R. K. Keeley, Otto Buedkert, Chicago; E. Steinhart, Beaver Dam, R. E. Roberts, Wawhesha; J. H. Parkesan, O. F. Newpert, London, C. Pickett, Malone, Wis.; R. G. Taylor, Lynchburg, Va.; F. Nelson, Grand Haven, Mich.; Hastings, Duluth, Minn.; M. Blumenthal, Cincinnati, Ohio; T. W. McGuigan, Beloit, Wis.; J. Stoppenbach, Jefferson, Wis.; D. S. Jackman, Wichita, Kas.; F. Shalek, New York N. Y.; F. W. Smith, Milton Jct., Wis.; J. B. Vaughn, Minneapolis, Minn.; J. H. Shannard, Bridgewater, S. D.; R. C. Bacon, Boston, Mass.; P. Hogun, Deerfield; J. L. Marx, Kewaskum, Wis.

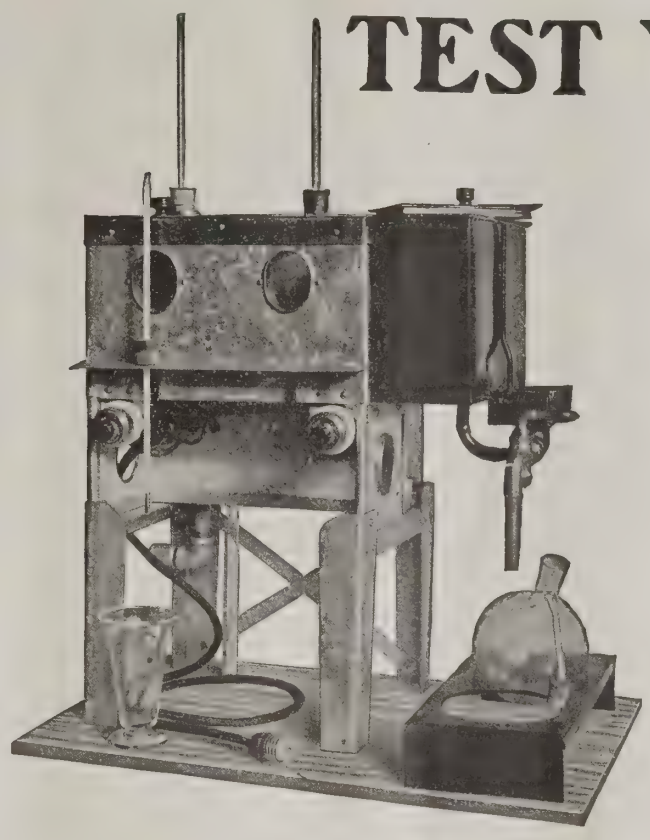
LOUISVILLE, KY.

Arthur W. Williams, Correspondent.

Flour mills are running full on old orders, but report new business as a little dull, due largely to disturbances resulting from food control talk.

Elevators as a whole are not very busy, though most of them are handling a fair run of new wheat, and a good deal of wheat is moving South.

There has been no demand locally for rye other than seed rye, which has been moving much better than had been expected, and indicating a good deal of fall planting.



J. A. Breaux, vice-president of the Ballard & Ballard Co., was in Nashville during the week attending a meeting of the Southeastern Millers' Association, at which general flour milling conditions were discussed.

Seed wheat is expected to start moving shortly, although many farmers are retaining their own seed. In some instances farmers produced low quality seed wheat this year and will probably buy fresh stock.

Oats during the week were stronger, the close of the week finding them two cents a bushel higher on the Louisville market than they were last week. A fair feeding demand is being experienced. Movement as a whole is quiet.

Corn did a lot of jumping during the week and Saturday found the local cash market six cents under last week all the way through the list of quotations. No. 3 white, yellow and mixed were quoted at $2.12 and No. 4 at $2.10 on Saturday, some quotations showing a slight differential in favors.

The general situation in the grain trade has shown little change as a whole over the week. The general trading is light, offerings being light, receipts light, demand light and shipments the same way. Business is far from active, due to the wild markets, and high prices. Corn is feeling every food rumor, especially as affecting flour.

Coal prices are steadily advancing, operators charging the high prices to car shortage, and failure of the Railroad Administration in keeping cars in repair. Director General Hines claims that the car shortage talk is a stall, but local shippers know full well that cars are in rotten repair, and that there is a serious open car shortage which has resulted in mines working less than fifty per cent full.

INDIANAPOLIS, IND.

Myron R. Green, Correspondent.

The Independent Hay and Grain Company, of Evansville, filed final certificate of dissolution.

Among the out-of-town millers and grain dealers in the city during the last week were: C. B. Jenkins, Noblesville, Ind.; H. W. Reiman, Shelbyville, Ind., and G. G. Davis, Tipton.

A. Waller Co., of Henderson, Ky., whose elevator was destroyed two years ago, has just closed a deal for the purchase of the Union Elevator in Evansville, Ind., and the company may move its general offices there. The Union Elevator, which was operated many years ago by the Kuhn company, is one of the largest in the state.

According to announcement of the Fletcher Trust & Savings Company, of this city, the Valier & Spies Milling Company, of St. Louis, have bought a tract of land at the northeast corner of Oriental street and the Pennsylvania tracks, where the company will build a warehouse. The ground has a frontage of 110 feet and a depth of 112 feet.

Farmers in the vicinity of Carmel, Ind., who were conscientious objectors during the war and who would not buy Liberty bonds, are facing a serious situation as the result of the refusal of thrashing crews to handle their wheat crop. North of Carmel, where great quantities of wheat have been cut and left in the field, the farmers have been unable to complete harvesting of the crops.

The price of bread in Evansville has increased from 1 to 3 cents a loaf, following the settlement of the bakers' strike. The master bakers say that they have not raised the price and assert that the increase is due to the retailer who is taking advantage of the situation created by the strike to raise the price. Wholesalers predict that they, too, will have to raise the price if they cannot "break even" under the new wage schedule paid to the employes.

The thrashing crews are said to be unanimous in refusing to assist those persons who are accused of not carrying their full share of the war burdens. The only practicable solution if the crews do not change their minds, will be for the farmers to resort to the old-fashioned method of using a flail or trampling the wheat out, it is believed. During the war the farmers who are now being refused any assistance in thrashing were greeted daily with "Have you bought a bond?" They also were requested to leave many stores and other places of business and were told that their trade was not wanted.

Weather conditions throughout Indiana for the past week are as follows: Warm weather continued during the first part of the week, and, though maximum temperatures were not so high as during the previous week, they passed the 90 degree mark quite generally on Tuesday and Wednesday afternoon. The latter part of the week was much cooler, and night temperatures read in the forties at a number of northern and central stations on Friday, Saturday and Sunday nights. Light thunder showers occurred generally during the first part of the period, but no rain fell during the remainder of the time and the weather was for the most part clear. Corn and other crops were somewhat improved by the cooler weather and light rains, but good general rains are needed badly. The corn conditions are variable, though most reports show corn to be from fair to good and earing fairly well. Pastures are in poor condition. Considerable oats are still unthrashed, but the bulk of the wheat crop has been thrashed.

DULUTH.

S. J. Schulte, Correspondent.

Charles F. Macdonald, secretary of the Duluth Board of Trade, received condolences from members at the end of the week on his return from St. Cloud, Minn., where he attended the funeral of his father, Colin F. Macdonald, editor and publisher of the St. Cloud Times, over a period of nearly 45 years.

The Duluth Board of Trade membership of B. E. Baker has been transferred to P. B. McTaigue. Mr. Baker was one of the veteran members of the board, and he was a prominent trader for many years. He has retired to devote his attention to the supervision of an oil well enterprise in which he is now interested in Louisiana.

M. L. Jenks, manager of the Itasca Elevator Co., has returned from a three months' trip to Shreveport, La., where he superintended drilling operations on an oil

property, in which he and other Duluth grain men are interested. The syndicate has already brought in two good producing wells, and another producer is expected to be brought in any day.

Rye trading featured market operations here during the last week. Prices varied sharply from day to day under the influence of rumors regarding possible government action to regulate prices of foodstuffs Quotations in spot No. 2 rye moved within a range of from $1.49½ to $1.55½, and the close was 1¼c off from a week ago at $1.53. Receipts fell off from country points during the week as a result of disarrangement of transportation facilities. Advices were received from over the West to the effect that supplies in growers' hands have been cut down to small proportions.

Benjamin Stockman, president of the Duluth Board of Trade, has returned from a five months' trip to Europe, during which he visited at his old home in Scotland, and ran over to Belgium and Holland in order to study food conditions at first hand. The quality of flour and other foodstuffs being offered in Great Britain and in the European countries is poor and prices average up high, but not as stiff as one might suppose, he asserted. It is mainly a case with the public of ability to obtain supplies, and they are disposed to put up with conditions as best they can. Mr. Stockman is of the opinion that Europe will require large quantities of flour, wheat and other grains from this country during the coming year, as crops over there were generally far below the average. From what he could gather, the restoration of anything like normal conditions will be a difficult proposition.

BALTIMORE.

Robert C. Neu, Correspondent.

Salvatore Savarese, a prominent macaroni manufacturer of this city, has been elected a member of the Baltimore Flour Club.

The receipts of new water-borne wheat in the Baltimore market so far this season amount to 575,000 bushels, compared with 710,000 bushels arrived up to the corresponding time last year.

Senator John Walter Smith and the Maryland representatives in Congress are expected to wage a vigorous fight for increased allocations of Shipping Board vessels to the port of Baltimore to carry cargoes over regular routes.

Mrs. Fannie Murdoch Dennis, mother of J. Murdoch Dennis, of Dennis & Co., Inc., grain commission merchants and brokers of this city, died on the morning of August 14 at Biltmore, N. C., where she had been spending the summer with her daughter.

As a result of the fight of the Baltimore Chamber of Commerce and local merchants, the Baltimore and Ohio Railroad has announced that it will open its warehouse at Brown's wharf to the receipt of less than carload lots of freight.

Colonel Harry C. Jones, of H. C. Jones & Co., Inc., grain and hay commission merchants of this city, who has only recently returned from overseas, was the toastmaster at the banquet of the New York dealers at the Hotel Onondaga on the evening of the 15th.

The following Baltimore hay firms were represented at the annual convention last week of the New York State Hay and Grain Dealers' Association at Syracuse, New York; H. C. Jones & Co., E. Steen & Bro., Chas. England & Co., Clarence A. Euler & Co., W. F. Macneal & Co., G. A. Hax & Co.

Superintendent of Elevators J. A. Peterson, of this city, left Baltimore on August 13 for an inspection of the great concrete elevator at Port Colborne, Canada, which was recently destroyed by fire, believed to have started from spontaneous combustion. Mr. Peterson will make a report of his findings to the Railroad Administration.

William Mackeller Brittain, for years secretary of the American Steamship Association, will leave New York on Sept. 15 to assume the duties as secretary of the Export and Import Board of Trade of Baltimore, a recently formed organization to develop this port's trade with foreign nations. Mr. Brittain is regarded as an able student of maritime affairs and was the representative of the United States Shipping Board at the peace conference.

Egil Steen, head of the grain and hay commission house of E. Steen & Bro., of this market, delivered the memorial address at the 14th annual convention of the New York State Hay and Grain Dealers' Assn., at Syracuse, N. Y., on August 15. Mr. Steen's effort was a splendid one, his references to those in the association that had passed to the Great Beyond being couched in language and sentiments peculiarly fitting to such an address.

At a special meeting of the Board of Directors of the Baltimore Chamber of Commerce, held last week, the following resolution was adopted, viz.: "Resolved, That the Board of Directors of the Baltimore Chamber of Commerce heartily endorses the memorial to the Congress from the National Association of Owners of Railroad Securities." This memorial directly opposes the "Plumb plan" for the operation and ownership of the railroads, and is in support of the Securities Association plan, which is better known as the "Warfield plan."

G. Stewart Henderson, assistant traffic manager of the Baltimore Chamber of Commerce, who has been acting traffic manager of the organization since Herbert Sheridan resigned to become traffic manager of the Merchants & Miners Transportation Company, was promoted to the office of traffic manager of the Chamber at the regular monthly meeting of the Board of Directors, held August 11th. By his uniform courtesy and by the exceptional ability he has shown in handling transportation matters for the members of the Baltimore Chamber of Commerce, Mr. Henderson has won the approval of them all, and his selection as the head of the corporation's traffic bureau is therefore a most popular one. In addition to his connection of four years with the Traffic Department of the Chamber of Commerce, Mr. Henderson has the advantage of eleven years' experience in railroad traffic work through his previous connection with the Baltimore, Chesapeake and Atlantic Railway, and the Maryland, Delaware and Virginia Railway.

CLEVELAND.

F. R. Sowers, Correspondent.

Some very interesting facts have been set forth by H. W. Robinson, Vice President and General Manager of the Union Elevator Company, on the question of the high cost of living. Mr. Robinson is opposed to any governmental effort to break the price of wheat, believing it would lead only to disturb business conditions without effecting a real economy.

Cool co-operation, sound thinking and deliberate consideration of the true causes of the situation are necessary rather than threats or talks on wheat of any other specific commodity. If a surplus of foodstuffs is being held by speculators for the purpose of making the public pay, it is indeed high time that those in authority arise to their duty and make an earnest and thorough investigation for the purpose of clearing the injustice rather than gaining personal or political notoriety, and thus disturbing other lines of business.

If the railroads would cooperate with the newspapers by reporting the refusal of perishable foods which are merchantable, publishing the names of the offenders, it is obvious such practices would correct themselves in short order, but why the raid on wheat, which is not being hoarded or allowed to go to waste, nor is it being milled at an unreasonable profit? Flour is comparatively cheaper today in this country than most other staple foodstuffs, and the price of wheat is not above the world basis.

The billion dollar appropriation was not made to reduce the cost of living, but for the purpose of protecting producers and to hold the definite minimum price guaranteed during the war period and the 1919 crop. Therefore, the use of it or any part of it for any other purpose would be contrary to the intent of the act. At least as far as understood by the general public.

Increase in production rather than continued investigation of the high cost of living is urged by Mr. Robinson as the real solution of the present difficulty.

An investigation of general crop conditions with reference to the grain situation in northern Ohio develops that most of the wheat from this section is grading No. 3 and No. 4, due to excess moisture and shrunken kernels, which are the result of the hot weather in June. The recent heavy downpour of rain has caused considerable damage to wheat and oats in shock. Some of it sprouting and developing moisture from 18 to 20%.

Lots of new hay of all qualities is coming in to this market, and this week will show the heaviest grain movement in this market experienced during the summer.

The Cleveland Grain Drying Co. reports their Cleveland drying plant operating to full capacity, notwithstanding prohibition. This concern has made a specialty of drying brewers' grains, and at the time prohibition was first agitated they were in doubt as to the effect on their business, but present indications point to the fact that this company will continue to dry as much grain as in the past when John Barleycorn held sway.

CONSIGNMENTS AND C.I.F. OFFERS SOLICITED

PRODUCE EXCHANGE NEW YORK

The Arbitration Committee of the Grain and Hay Exchange have under consideration a very interesting controversy between the J. E. Wells Company, Sidney, Ohio, and the Cleveland Grains Drying Company, which will be decided in the near future in strict accordance with the National Grain Dealers' Rules.

On August 1st, 1919, the members of the Grain and Hay Exchange entertained at luncheon in the Chamber of Commerce, the grain control committee of this district and the traffic commissioner of the Chamber of Commerce. This meeting was arranged by the Exchange that its members might familiarize themselves with the requirements for the handling of wheat under the permit system. The meeting was a success in every particular.

Announcement has been made that Abel Brothers, one of the oldest grain concerns in this city, instrumental in forming the present Grain and Hay Exchange, are retiring from the grain and hay business, having sold their warehouse and yards to Mr. Sheinbart. Abel Brothers will now branch out in an extensive brokerage business in both grain and hay.

The outing of the Grain and Hay Exchange has been postponed until the latter part of August or the first part of September to allow all the members to participate, some of them being away on their vacations for the summer. The entertainment committee for this outing have under consideration several desirable places along the lake shore where a clam bake would be proper.

D. F. McIntosh of the Canton Grain Co., Canton, Ohio, was in this office recently. Mr. McIntosh for the past year and one-half has been with the 135th F. A. in France.

P. A. Murphy, sales manager of the Cleveland Grains Drying Co., was in Chicago last week on business.

F. E. Watkins of the Cleveland Grain Co. has just finished a tour of inspection of their elevators at Cincinnati, Champlain, Indianapolis and Chicago.

F. C. Cain of E. I. Bailey Co. has just returned from an extensive business trip.

NEW YORK.

J. M. Nugent, Correspondent.

The following gentlemen visited the floor of the New York Produce Exchange during the past week: E. A. James of Chicago, M. A. Lund of Philadelphia, Geo. Tanguay of Quebec and H. G. Spere of Columbus, Ohio.

A. L. Russell, head of Russell's Commercial News Bureau, and a statistician and crop authority of note, who was recently connected with the Food Administration, believes that the corn crop in the United States has been made, and that barring an early frost the out-turn will aggregate three billion bushels.

Supplies of cash corn in New York are at a minimum and the demand continues quite active. Offerings, however, are of negligible proportions. Prices as quoted are purely nominal in the absence of trade: No. 2 yellow, $2.16; No. 3 wellow, $2.15; No. 2 white, $2.19; No. 3 white, $2.18; No. 2 mixed, $2.14, and No. 3 mixed, $2.13.

John Ince, for many years the manager of the floor of the Exchange, has resigned to become connected with the firm of B. F. Schwartz & Co., of New York and Chicago. Mr. Ince's many friends wish him success in his new venture and feel confident that his services to this firm will prove invaluable. In his long connection with the Produce Exchange—over thirty years—Mr. Ince has had the opportunity of gaining an experience in the different commodities that comes to few men, and he is now generally regarded as an authority on grain, cotton and cotton oil.

Despite the lowering of values in the spot market here during the week, foreign buyers do not appear anxious to come into the market, and apparently the demand from foreign sources will not improve materially until either prices in the United States go considerably lower from the present level, or the foreign exchange situation becomes more favorable to the European buyer. The domestic demand for cash oats is stagnant at present, as buyers are expecting the Government investigations to force reductions in prices, at which time purchasers can make more advantageous commitments. Prices at the close of the week as follows: No. 1 white, 80½c; No. 2 white, 88c; No. 3 white, 87½c; No. 4 white, 87c.

Trade in flour during the week was on a narrow scale and was confined to small lots of Kansas straights. Toward the close of the period, however, there appeared to be a slight improvement in the inquiry and firmer prices were in evidence. Mills still maintain relatively firm quotations owing to the continued high premiums of spring wheat and the firmness of hard winter wheat. Developments in Washington as to the possibility of the removal of the wheat guarantee or a reduction in price are being watched with interest. Delegations from farming states contend that through the present system of grades they are losing considerable money on their wheat and that the farmer will not get an average of $2.05 a bushel and in some instances farmers will not receive above $1.50 on account of the shriveled condition of the grain. No definite announcement has been made by the Grain Corporation regarding the total amount of flour bought on bids during the week, but prices, it is understood, range from $10.20 to the top of $10.45. These prices show a substantial advance over quotations of the previous week.

KANSAS CITY.

T. J. Tanner, Correspondent.

James N. Russell, president of the Russell Grain Co., who was thought to be a confirmed bachelor, took Miss Daisy Jennings, of Kansas City, for a bride August 9. Mr. and Mrs. Russell are spending their honeymoon in Chicago and at the northern lake resorts.

One Kansas farmer who has no complaints to make is R. Sibbitt, of Comanche county, who was in Kansas City this week. Mr. Sibbitt said he sold his wheat crop from the thresher at $2.05 a bushel. He had sufficient grain to bring a total of $16.000. His crop made 26 bushels an acre.

L. W. Bixler, for many years connected with the Hall-Baker Grain Co., as an expert in buying and selling grain, has retired from the business and will make his home in Atchison, Kan. Mr. Bixler's membership in the Board of Trade will be transferred to Paul D. Bartlett, of the Hall-Baker Co.

The Southwestern Millers' League, which has headquarters in Kansas City, has established a traffic department, with C. V. Topping, secretary of the league as manager, and E. H. Hogueland, of Topeka, Kan., as counsel. It is said that the league is dissatisfied with the differential in rates on wheat and flour destined eastward.

Farmers in Smith county, Kansas, which is in the north central portion, are said to be so disgusted with the way their wheat and corn turned out this year and last that they will hereafter give their chief attention to the raising of alfalfa, kafir, milo cane and millet. They are also making calculations for a larger interest in poultry and dairy products.

The first instance of the feeding of wheat to live stock in Kansas this year has been noted at Madison. H. D. Freeman, who came to Kansas City this week, said he was fattening a large number of hogs on

BURLAP BAGS
Bosworth Bag Company
MEMPHIS, TENN.

ow grade wheat. He predicted that hundreds of thousands of bushels of wheat would be fed in the state if corn held round the two-dollar mark.

John A. Wilson, of the Southwestern aboratories, in his second analysis of this ear's wheat crop in the southwest, says ne hard variety shows a variation in luten from 9 to 12 per cent, with an average of 10.75 per cent, or .75 below normal. he red wheat runs from 6 to 10 per cent, ith an average of 9 for the better grades. The crop is a good one when measured y itself," says Mr. Wilson, "though not qual to the strong wheat of last year."

Dr. J. W. T. Duvel, of the United States rain Corporation, spent a day in Kansas ity this week. It was reported that Dr. uvel's mission was in connection with an nvestigation ordered by Wheat Director arnes into charges by Governor Allen of ansas and other politicians that the maority of wheat in the southwest is being raded too low and selling at inordinate iscounts under No. 1. D. F. Piazzek, ansas City zone agent, has sent several undred inquiries to the country to ascerain the exact prices paid for wagon loads. eturns thus far received seem to refute ne charge that farmers have been mulcted. ecords of carlot sales in Kansas City are rgely in favor of high grading and good ices.

The Kansas City Northwestern Railroad, small line running into Nebraska, which as tied up completely during the recent opmen's strike, was still idle this week. ut arrangements were made for a reumption of traffic by Monday next. The orthwestern had other troubles besides ose occasioned by the shopmen. It is in ne hands of a receiver and has been beind with its payroll for several weeks. he road is not under Government control, ut the railroad Administration has come the rescue and will advance money and uarantee a diversion of freight to the emarrassed line. The Northwestern is a ifferer from the fact that Government ontrolled roads have taken away much of s business.

Drive at High Living.

Efforts of the Government to break ices of foodstuffs in Kansas City are raply taking definite form. Beginning next eek, large supplies of cured and canned eats, beans, flour, canned tomatoes, ices and other articles will be distributed orders placed through the post office. some cases the cost to consumers will cut down radically. It is said that the st of living necessities in Kansas City as not risen as much in the last year as some other cities, but there is great dissatisfaction here. The first seizure of arded food stocks by the Government ok place Saturday, when United States puty marshals took charge of 88,000 unds of beans held by the Brokers' Office Warehouse Co. In the stock were 448 cks of Manchurian pinto beans, said to owned by the Western Import Co., of n Francisco. Several hundred cases of nned green beans were credited to the ount Nebo Canning Co., of Spanish Fort, ah. The entire lot was said to have en held here for nearly a year. All will thrown upon the market.

Cash Grain Markets.

Wheat—Receipts for the week, 2,740 rs, against 2,908 a week ago and 2,758 a ar ago. The movement had a further dease, owing to the control exercised by ilroads through the blanket shipping perit system. Holding by farmers, who are llish, is another reason for moderate arrals. The agitation against high prices foodstuffs and the seizure of hoards roughout the country do not seem to imess wheat producers, who regard the rket as in legitimate position in view of duced yield and world requirements. lls in Kansas City operated heavily, aking 81,400 barrels of flour, mostly to ply on old orders. However, there were r new sales of both hard and soft wheat ur. Government offerings of the straight ade for resale in the Kansas City zone $10 a barrel found few buyers, as the lls of the southwest are able to sell eaper or in packages smaller than the)-lb. jute bags. In the Government's oposed distribution of army supplies of ods there is some flour of good quality, t it is marked at $8.06 per cwt., which only 1c a pound under the retail price small packages. Dark samples of the ree upper grades of hard wheat were atively scarce and readily taken by mills and shippers, the best No. 1 showing premium fo 18c over the federal guartee price. At the close the market for rd wheat generally was 3c lower to 2c gher, with quotations as follows: No. 1, 20 to $2.38; No. 2, $2.18@2.37; No. 3, $2.12 2.30. The bottom prices represent ordiry and yellow wheat, some of which nt to elevators to be mixed with low ades into an export grade for delivery to United States Grain Corporation. Red eat had slight variation in prices, but better qualities ruled a cent or two er the federal minimum level. There s good buying by millers and shippers. liberal quantity of the lower grades went elevators for mixture and delivery to vernment. Final prices were about ½c gher than a week ago, as follows: No. 1, 19½c; No. 2, $2.16½@2.17½; No. 3, $2.09 .14½. Stocks of wheat in public ele- ors increased 2,233,000 bus., to 8,603,000, ainst 5,261,000 a year ago. Most of this supply is red wheat, owned by the Government.

Corn—Receipts, 42 cars, against 44 a week ago and 179 last year. The offerings were not in excess of local milling and feeding requirements. Shippers were unable to do any southern business because of new crop Texas offerings. Prices ruled steady to a little higher, closing unchanged to 1c up, as follows: No. 2 white, $2; No. 3, $1.98@1.99; No. 2 yellow, $1.99; No. 3, $1.97; No. 2 mixed, $1.96; No. 3, $1.92. The stocks of corn decreased 19,000 bus. to 103,000, against 837,000 a year ago. Rains were a great benefit to growing corn in Iowa, Nebraska and portions of Missouri and Kansas. In the latter state the moisture came too late to help much. It is not believed that Kansas will harvest the 80,000,000 bus. indicated in the August crop report.

Oats—Receipts, 132 cars, against 137 a week ago and 365 a year ago. The offerings of white oats met a good shipping request, especially when showing normal weight. There was much light weight oats in all varieties, and for some the elevator men were the only buyers. Prices were strong early in the week, but receded later, closing with white unchanged to 1c higher, mixed 2c lower and red 1@1½c off, as follows: No. 2 white, 76c; No. 3, 75@75½c; No. 2 mixed, 71c; No. 3, 70c; No. 2 red, 71@72c; No. 3, 69½@71c. Elevator stocks decreased 5,000 bus., to 908,000, against 326,000 last year.

Kafir and Milo—Receipts, 8 cars, against 15 a week ago and 8 a year ago. The big movement of California milo has begun to dwindle and dealers here say it is nearing exhaustion. The next hope is for shipments from the new crop in Texas, offerings for next month's delivery having begun. Shipping demand continues good for poultry feed manufacturing account, but the market is not as strong as formerly. It closed unchanged to 5c per cwt. lower, with No. 2 white kafir at $3.65@3.70; No. 3, $3.60@3.65; No. 2 milo, $3.65@3.70; No. 3, $3.60. Local stocks were unchanged, at 9,000 bus., against 204,000 a year ago. Kansas and Oklahoma crop advices continued favorable. The fields are generally in head. There is no uneasiness over frost.

ST. LOUIS.

E. E. Reeves, Correspondent.

Good rains throughout this section last week materially improved the crop outlook for corn and oats.

Numerous reports of the appearance of Hessian flies in the wheat fields are being received by local grain men, and these reports are particularly persistent from Illinois.

The freight embargo which has been seriously crippling the business of grain and commission merchants in this market has been lifted on several lines and conditions show a great improvement.

B. H. Lang, vice-president of the United States Grain Corporation, last Wednesday recommended to the Grain Control Committee that the embargo against wheat shipments to St Louis be lifted immediately and this was done.

Arthur A. Holthaus, Secretary Eugene Smith's private secretary, spent a quiet day fishing at Pond Lake last week, but the stories he tells of his catch do not correspond with the capacity of his automobile in which he is supposed to have brought the fish home.

George Kelly, a hustling cash grain salesman for the J. H. Teasdale Commission Co., was introducing his brother, Walter Kelly, formerly a market reporter on the Merchants' Exchange, who fought with the Marines in France for two years, but returned Saturday.

S. C. Chandler of Carbondale, Ill., has reported to the St. Clair County Farm Bureau at Belleville that he has completed a survey of the fields of the county and that he had found more Hessian flies in the "flaxseed stage" in the stubble fields than for many years. He said that similar conditions existed in Jackson, Randolph and Monroe counties and advises farmers to sow their wheat late this fall.

Edward M. Taylor, one of the picturesque old-time figures on the Merchants' Exchange, has been elected an "honorary member" of the Exchange. Many members signed the petition to make Mr Taylor an honorary member and the petition was favorably acted upon at the last meeting of the board of directors, although Mr. Taylor at present is spending the summer at Petoskey, Mich. He has been a member of the Exchange for forty years and at one time was a prominent figure in the grain business in St. Louis. He has an office with Morton & Co., with whom he has been more or less closely associated for a number of years.

The St. Louis grain trade is making enthusiastic preparations to make the coming annual convention of the National Grain Dealers' Association, which will be held at the Planters' Hotel in St. Louis, October 13, 14 and 15, the greatest convention in the history of the organization. President E. C. Andrews of the Merchants' Exchange has appointed the following hustlers to take charge of the preliminary arrangements for the convention: Marshall Hall, chairman of the executive committee; Aderton Samuel, chairman of the entertainment and reception committee; Charles L. Niemier, chairman of the speakers' committee, and Roger P. Annan, chair-

man of the finance committee. The hustling abilities of these chairmen insures the success of the convention.

CINCINNATI.

George Mosbacker, Correspondent.

Fred. Winkler, of Henry W. Brown & Co., has returned from a business trip through Ohio and Indiana.

Edward A. Fitzgerald, of the Eikenberry-Fitzgerald Co., suffered intense pains as a result of an ulcerated tooth and was confined to his home for several days.

The railroad strike has ended insofar as Cincinnati is concerned, and nearly all men have returned to work. All trains discontinued during the strike were placed in service at the end of the week.

A. C. Gale, of the A. C. Gale Grain Co., accompanied by Mrs. Gale, motored to Indianapolis early in the week to spend several days with his brother, Pliny M., who returned the visit for the week-end here.

John B. Helwig, who has been actively engaged in the mill feed business here, with offices in the Neave Building, will become a special partner in the grain and hay firm of the D. O. Cross Co. as manager of the feed department. "Jack" Gartner continues to participate in the firm's affairs as manager of the hay department.

The Central Territory Freight Traffic Committee has requested permission of the Cincinnati District Freight Traffic Committee to include velvet bean meal in list of articles shown in tariffs as taking grain by-product rates, or, in the absence of such rates, the grain product rates between all points in central territory and from central territory to eastern territory. The committee has set August 25 for a hearing.

Testimony in the police court here the past week showed that careless and rough handling of freight cars causes considerable losses by leakage of wheat from cars. A railroad detective testified that probably 250 bushels of wheat were lying about the Big Four yards. A railroad employe who has some knowledge of the number of railroad yards in the country said he believed that several million bushels of grain were lost in this way every year.

Alfred Brandeis, official of the United States Grain Corporation, was in Cincinnati the past week. He interviewed W. H. Albers, secretary of the Kroger Grocery and Baking Company, who demonstrated to him that a five-cent loaf of bread is a possibility at the present price of flour. Brandeis was given duplicate cost sheets on bread-baking and distribution in the Kroger stores, which he plans to submit to a meeting of the United States Grain Corporation.

The small movement of hay to the Cincinnati terminals, according to Edward F. Dennis, who devotes his entire time to hay purchases for The Van Leunen Co. and who has just returned from an extensive trip throughout Ohio and Indiana, is due to the fact that farmers are giving all their time to harvesting and marketing of their wheat crop, and that receipts here will not materially increase until the big run is over. Scarcity of cars and labor for baling will, however, also effect the movement for some time

H. D. Irwin, second vice-president of the United States Grain Corporation, has advised the Cincinnati Grain and Hay Exchange that storage premiums will not be added in Zone 9, Cincinnati, to the basic wheat prices in the buying scale until the grain corporation has accumulated sufficient reserve of wheat to assure a measure of protection for future domestic requirements. In accordance with this policy the Wheat Director is refusing preferred contracts from foreign buyers at the present price level. The foreign buyers apparently are anxious to cover their requirements for months in advance, Mr. Irwin stated in his letter. The grain corporation also has extended the time during which it will sign agreements for protection of the various trades to August 20. The previous time limit was July 31.

Cash Markets.

Wheat—The break of the shopmen's strike and lifting of freight embargoes on all local roads had considerable influence on the movement of wheat here the past week, though comparatively, receipts were only fair because of scarcity of cars in many places, and difficulty of shippers to secure permits. The demand, however, was excellent and prices steady to a full cent higher for No. 2 of heavy weight and good quality. Low grades also ruled firm and a shade higher, while offerings of smutty grain were quickly absorbed at discounts of 2c to 4c. A liberal run is expected for two or three weeks longer under improved railroad conditions. The demand is active and elevator and milling interests in need of larger supplies. Receipts for the week were 405 cars. No. 1 red winter, track, $2.26@2.27; No. 2 red winter, track, $2.23½@2.24½; No. 3 red winter, track, $2.19@2.22; No. 4 red winter, track, $2.15@2.17; No. 5 red winter, track, $2.11@2.14; low grades as to quality, $2.05@2.18. Smutty wheat discounted from 2c to 4c per bushel as to grade.

Corn—Local corn market conditions remained largely nominal in the absence of sufficient offerings, and prices on most days were governed entirely by future fluctuations. Buyers were less disposed to take hold under the firmer conditions, and holders in most instances were obliged to lower values to effect sales. The milling inquiry for white and top grades of yellow was fair, but mixed and lower grades were dull and neglected. No. 1 white, $2.09@2.10; No. 2 white, $2.09@2.10; No. 3 white, $2.07@2.09; No. 4 white, $2.03@2.05; No. 5 white, $2.01@2.03; No. 6 white, $1.99@2.01; No. 1 yellow, $2.08@2.09; No. 2 yellow, $2.07@2.08; No. 3 yellow, $2.05@2.07; No. 4 yellow, $2.02@2.04; No. 5 yellow, $2@2.02; No. 6 yellow, $1.98@2; No. 1 mixed, $2.07@2.08; No. 2 mixed, $2.06@2.07; No. 3 mixed, $2.04@2.06; No. 4 mixed, $2.01@2.03; No. 5 mixed, $1.99@2.01; No. 6 mixed, $1.97@1.99.

Oats—The oats market was steady to firmer with choice heavy grain scarce and in good demand. Receipts continued small and were mostly absorbed by local feed interests. New oats are running light in weight. The general average is from 29 to 30 lbs., or 3 to 4 lbs. lighter than last year. No. 2 white, 78c; No. 3 white, 77c; No. 4 white, 76c; No. 2 mixed, 76@76½c; No. 3 mixed, 75@76c; No. 4 mixed, 74@75c.

was very wet and muggy over eastern Manitoba—just the weather to cause sprouting. The rains were, however, followed by a cool north wind that should eliminate this danger. Wet weather at this time of year is very likely to be followed by frost and a frost now would do much damage to late oats, which promise well for a heavy crop.

Not much is doing on the market here, as there is very little coming in. Winnipeg oats have shown a certain independent strength. Weather conditions have been the chief factor affecting futures. Trade has been confined mostly to the professionals. Speculators are afraid at the outcry raised against the cost of living and have been turning their attention to the stock market in preference to grain. The cash grain market has been erratic. Some days there is a keen demand, on others very little enquiry. Offerings of all grains are very light.

The Canadian Grain Board has been holding sessions daily during the past week working on the details of crop handling. On Wednesday open sessions were held and opinions heard from representatives of the organized farmers, the consumers and the grain and milling trades. Representatives of the farmers made it plain that nothing less than the United States minimum, $2.26 per bushel, would be acceptable to the farmers as an initial payment. The Grain Board has, however, refrained from announcing its intentions as regards prices. The price will probably be announced early in the week.

Nothing very reliable can be said about this year's yield in Western Canada. It will be only a half crop anyway. Some estimate the total as low as 140,000,000 bushels, others as high as 175,000,000. A peculiar fact is that there are odd patches of excellent grain in the districts that are counted as total failures. It is the same old story that the farmer that really farms always has a crop. Rust in Manitoba spoiled what was at one time a splendid prospect, as it is, the sample will not grade high. May samples have been received at the grain exchange that contained a very large proportion of shrunk grain. Reports indicate flax prospects as good, but the best fields are late, perhaps not later than usual, but late compared with other grains, which are after all unusually early.

SPOKANE, WASH.

J. B. Jones, Correspondent.

C. P. Bryan, of Albion, Wash., one of Albion's big farmers, delivered the first grain of the season at the Farmers' Union warehouse. It was Forty Fold wheat and tested No. 1.

The warehouses at Busby, between Johnson and Pullman, are about ready to receive the grain for storage and the one recently burned at the Staley siding is being replaced. This section of the Palouse country has a wonderful crop.

The first wheat of the season was delivered at Elberton, Wash., by G. A. Draper of the Evergreen Stock Farm to the Elberton Milling & Power Co. It was Volunteer Club wheat and it made 25 bushels to the acre. It was No. 1 quality.

At Johnson, Wash., F. W. Hooper of the Farmers' Union Elevator Co., says he is prepared to handle about 100,000 bushels in bulk. He says that there are almost enough tanks for each farmer to store his grain separate from all the rest. Some grain already has been brought to the elevator and it tested No. 1. The amount of smut in the wheat this season is unusually small.

A prominent grain dealer of Colfax (Wash.) believes that the previous estimate of 11,000,000 bushels as the yield of Whitman county wheat this season will be exceeded, and that 12,000,000 is, he thinks, a conservative estimate. The quality is above normal, excelling last year's crop both in quantity and quality. Hauling is in progress to all warehouses west of Colfax, but has not begun in Colfax yet.

Within the next three months Pullman will have an operating flour mill of at least 100-barrel capacity, the Community Milling Co. having purchased the Pullman flour mill, which has been idle for several years. The capacity of the mill is but 50 barrels daily, but it is to be remodeled under a 200-barrel design, with two separate 100-barrel units. One of these units will be installed at once and will be in operation by November 15, while the second unit will be completed as soon as conditions warrant. Pullman residents, principally farmers, are taking a keen interest in the new enterprise, and practically enough stock has already been promised to insure the success of the undertaking on a co-operative basis. Both local wheat and imported hard wheat will be milled, only enough of the latter to be shipped in to blend for local consumption. Quantities of wheat will be ground here to be shipped to blending plants at other points. Residents are asked by the parent company to take stock in the concern equaling one-half the cost of the mill, each community in which the mills are operated to be an integral part of the parent company. The head office of the Community Milling Company is maintained at Spokane and through that office all of the surplus flour milled will be marketed. A. H. Perkins, general sales manager of the Community Milling Co., is in Pullman completing arrangements for the sale of the stock necessary to insure the success of the undertaking, while the purchase of the old Pullman mill, which was held by the Pullman State bank, was negotiated by V. D. Williams, of Spokane, president of the company.

The controlling interest of the Nez Perce roller mills, located in Lewiston (Idaho) has been purchased by Mark P. Miller of Moscow, James G. Wright of Nez Perce and J. L. Rogers of Lewiston. Mr. Miller has been elected president of the company, Mr. Rogers vice president, and Mr. Wright will serve as manager of the milling company, and will have as assistant M. F. Brownfield. The property consists of the flouring mills and elevators at Lewiston, the East End warehoue in Lewiston and elevator and warehouse at Nez Perce and warehouses at Olson, Grangeville, Christian, Summit and Cottonwood. The properties were developed by the late L. W. Robinson, who operated a mill at Nez Perce for a number of years, later moving the plant to Lewiston. The mill is located on a site on the Northern Pacific and Johnson railroad tracks and on the Snake river water front. The plant has a capacity of about 175 barrels a day. Mr. Miller, the new president of the concern, is one of the best known milling men in the northwest, being president of the Mark P. Miller Milling Co. of Moscow and the Colfax Milling Co. of Colfax, which two plants have a joint capacity of 1,000 barrels daily. Mr. Wright is a prominent grain dealer who has been located at Genesee and at Nez Perce for the last 16 years. He will move to Lewiston to reside, this place having been selected for headquarters for the company. Mr. Rogers has been the representative of the Kerr-Gifford company in Lewiston for years and is known as an expert grain man.

BOSTON.

R. S. Wallace, Correspondent.

Exports of grain for the week ending August 16th were as follows: Oats, 229,308 bus.; barley, 96,546 bus.

Stocks of grain in elevators August 11th were: Wheat, 22,905 bus.; oats, 227,535 bus.; rye, 13,601 bus.; barley, 462,288 bus.

The following were visitors on 'Change during the past week: Louis B. Sisson and W. F. Wright, Toledo, Ohio; C. O. Bennedetti, Syracuse, N. Y.; W. E. Ross, Chicago, Ill., and W. L. Haskel, Milwaukee, Wisconsin.

The market on corn is much lower than last week, with offerings more liberal and a very light demand reported. The following prices were quoted at the closing: For shipment, No. 2 yellow corn, $2.17 to $2.18 per bushel; No. 3 yellow corn, $2.16 to $2.17 per bushel. Receipts for the week ending August 16th were, none.

In appreciation of his ten years' service as secretary of the Boston Chamber of Commerce and in behalf of the board of directors and the Chamber as a whole, Secretary James A. McKibben was presented with an automobile luncheon kit by the board of directors last Thursday evening. Secretary McKibben left Friday on a month's automobile trip.

The demand for oats continued only fair, with prices a little easier than last week. Prices being quoted as follows: Fancy 40/42 lbs. clipped white oats, 89½c to 90c per bushel; fancy 38/40 lbs. clipped white oats, 89c to 89½c per bushel; regular 38/36 lbs. clipped white oats, 88c to 88½c per bushel; regular 36/38 lbs. clipped white oats, 87½c to 88c per bushel. Receipts for the week ending August 16th were 188,310 bus.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports for the week ending Aug. 15 were 188,770 bus. wheat, 159,360 bus. oats and 247,296 bus. of barley.

Frederick J. Faber, a popular young salesman for S. C. Woolman & Co., grain receivers, has gone to Atlantic City to spend his vacation.

William J. Rardon, treasurer of the Philadelphia Flour Club, and Mrs. Rardon are spending the balance of the summer in Atlantic City.

Receipts for the week ending Aug. 16 were: 1,596,359 pounds of flour in sacks, 884,507 bus. wheat, 20,417 bus. corn; 266,593 bus. oats, 1,325 bus. rye, 38,293 bus. barley, 13,750 bus. malt, and 300 tons of feed.

John B. Matthaei, general traffic manager of the Commercial Exchange, was in Washington, D. C., on Thursday last conferring with Daniel E. Roper, Commissioner of Internal Revenue, in connection with the war tax on grain exports.

A. J. Dando, elevator agent at Girard Point, has issued notice to the grain trade that no musty wheat will be received into the Girard Point elevator except for drying, and instructions from the inspection department to dry will be considered sufficient orders to do so.

Lieutenant Charles W. Kolb, formerly one of the grain inspectors of the Commercial Exchange, and who after enlisting in the U. S. army was made Government inspector of hay at Newport News, and serving three months in the supply department at Chicago, has just been mustered out after sixteen months' service.

Samuel B. Arnett of Minneapolis, representative of the Minneapolis Seed Co.; W. F. Lippert of the Kraus Milling Co., and C. E. Dingwall, grain shipper of Milwaukee; W. D. Holly, representative of Rosenbaum Bros., grain shippers, Chicago, and J. Frank Webb, Smyrna, Del., were visitors at the Commercial Exchange during the week.

In the early part of the year the Commercial Exchange board of directors appointed a committee of seven, consisting of L. G. Graff, G. G. Omerly, Wm. M. Richardson, M. F. Baringer, F. K. Miller, G. M. Warner and A. F. Gruber, to urge upon the Philadelphia and Reading R. R. Co. to build as they had promised a new modern elevator of about 3,000,000 bushels' capacity, but so far the railroad company has failed to act.

The U. S. Grain Corporation is prepared to divert from its flour purchases and to sell and deliver to wholesalers and jobbers straight wheat flour in 140-lb. jute sacks, basis $10.25 per barrel delivered in carload lots on track in territory east of the Illinois and Indiana line and east of the Mississippi river from Cairo to the Gulf. Wholesalers and jobbers in purchasing flour from the U. S. Grain Corporation must guarantee not to sell at more than 75c per barrel additional, and the wholesaler and jobber in turn must require a guarantee that the retailer will not sell at more than $1.25 per barrel over the wholesaler's price, in original packages and at a price not higher than 7c a pound for broken packages of any size.

At a meeting of the Grain Committee held Aug. 12, 1919, the following schedule of charges for inspection, etc., of grain was unanimously adopted and, in accordance with the grain rules, will become effective thirty days from date, or Sept. 15, 1919: Inspection on cars inbound, 50c per car for export and 60c per car for domestic; cars inspected out of elevator, 60c per car; grain inspected out for export, 45c per 1,000 bushels; grain inspected afloat, 75c per 1,000 bushels, domestic or export—minimum charge, 75c. Re-inspecting cars for either export or domestic, 80c per car. Sampling cars, 30c per car. Opinions on samples, 40c per car to members and 75c to non-members. Mixing charges, 60c per 1,000 bushels. Cleaning charges, 60c per 1,000 bushels. Drying charges, 75c per 1,000 bushels; $1.50 per 1,000 bushels salvage grain. Inspecting cars outside of Philadelphia left to the discretion of the chief grain inspector and the chairman of the grain committee.

Because of the lack of elevator, and the necessary port facilities, Philadelphia lost a shipment of 1,000,000 bushels of grain last week, which went to Baltimore, which has double the grain elevator capacity of Philadelphia. This is only one instance as an illustration of the great need of better facilities at this port for the storage and shipment of grain. It is said that private enterprise would build new elevators here but the railroads reserve to themselves the right to furnish terminal elevators at tidewater. The reduced efficiency of the railroads is another source of complaint, as it is impossible to get good results when political appointees are in control of the railroad management. Philadelphia's elevators have about 3,000,000 bushels capacity, the Girard Point elevator holds 2,000,000 bushels, while the one at Port Richmond, an old wooden structure, holds 1,000,000 bushels. The insurance rates in this are excessive and almost prohibitive. Baltimore has 6,000,000 bushels capacity and elevators that will hold 4,000,000 more are now under way. Many new lines of steamships are now coming to Philadelphia and with the lack of shipping advantages for handling grains the situation is becoming acute.

CHICAGO.

Recently elected members of the Chicago Board of Trade are R. E. Cutten, J. S. Sproules, B. Joseph and W. B. Lewis.

Some local shippers are refusing to guarantee that shipments of oats will exceed 30 lbs. Oats are running light in weight, the average being from 29 to 30 lbs., or three to four lbs. lighter than last year.

The flour market is rather easy in tone and millers report local business rather slow. Some carlot business is reported with the interior with standard brands quoted $11.65 in carlots; brokers' grades, $11.15@11.90; soft winters, $10.30@10.65, in jutes, and hard Southwestern 95% patents, $10.35@10.65; rye flour, white patent, $8.05.

Grain that has been consigned to primary markets will have to have individual permits when reconsigned to destination from said primary market. This covers grain shipped from one country station to another and then reconsigned to a primary market, the grain shipped to a primary market and later reconsigned to another primary market.

Among visitors to the Chicago Board of Trade the past few days were: C. W. Graham, Streator, Ill.; L. E. Hughes, Memphis, Tenn.; H. A. Moore, Logansport, Ind.; C. E. Baird, Omaha, Neb.; Harry D. Gibbons, Washington, D. C.; C. A. Bennett, Grafton, O.; R. Williams, Memphis, Tenn.; H. E. Paddock, Prophetstown, Ill.; Ronald Booth, Marion, Ia.; J. W. Bettendorf, St. Anne, Ill.; H. B. Mayhew, Bradford, Ill.; and Henry B. McVeigh, New Sharon, Ia.

Considerable interest has centered in the history of the Star Cereal & Mlg. Co., a small concern at 410-20 North Western avenue, which last week was declared insolvent when its president, Herman J. Blumson, skipped town, having defrauded several Chicago banks and others to the amount of approximately $400,000. Much of the money was obtained by the manipulation of forged bills of lading. Attorney Merrick A. Whipple, acting in the interests of the Central Trust Co., which has been appointed receiver for the milling company, lists the assets in sight roughly at $245,000. Although the authorities are on his trail, no trace of Blumson has been discovered and it is deemed probable that a reward will be offered for his arrest for he is thought to be in this country or Canada.

Representatives of the Montana Milling Co. have been in the East during the past week presenting arguments for a half rate on flour and wheat from outside states into Montana in order to keep their mills running.

PACIFIC COAST GRAIN CROPS.

The Portland *Commercial Review*, in the issue of Aug. 14, has published its annual survey of the wheat, barley and oats crops of the Pacific Northwest. The recapitulation is as follows (000 omitted):

	Oregon.	Wash-ington.	Northern Idaho.	Total bus.
Wheat	15,000	36,000	5,150	60,150
Barley	3,000	3,000	2,500	8,500
Oats	9,500	8,500	3,000	21,000

The production this year of wheat compares with 49,500,000 for the same states a year ago.

"Hedging."

Rollin E. Smith, now with the Bureau of Markets at Chicago, has published on his own account a 16-pp. pamphlet entitled, "Hedging in the Future Markets." It is one of the most illuminating expositions of this to many people puzzling and iniquitous business. The subject is treated strictly from the practical point of view, dissociated from any theoretical consideration of speculation as an art. It explains the business purpose and value of hedging and its influence on and indispensability to the conduct of the grain-handling business and the milling industry and the merchandising economics effected by it. This is done by explaining in detail every step taken by the hedger, why he hedges, how he hedges and what hedging does. One might hope that a copy of this pamphlet could be put into the hands of every editor of an agricultural paper and indeed into the hands of every farmer in the country. It would from "many a foolish notion free them."

Crimson Clover Seed Situation.

The *Seed Reporter* estimates the crimson clover seed crop to be about 2,400,000 lbs. This includes the production of all hulled seed produced in Tennessee, Alabama, North Carolina, Delaware, and Maryland but does not include 115,000 lbs. of seed in the chaff reported harvested in North and South Carolina. Of the 2,400,000 lbs. of hulled seed produced it is estimated by those reporting that 865,000 lbs. will be required for planting within the counties where produced, leaving 1,535,000 lbs. for shipment to counties that are wholly consuming counties. About 75 per cent of the seed has been threshed and less than 25 per cent of that that has been threshed or about 18 per cent of the total quantity produced has been sold by the farmers.

There was a sharp decline in the price offered by dealers during the month of July. A few shippers are reported to be buying seed from farmers at $11.50 to $12.50 per 100 pounds, basis country-run, while in some other less important producing counties shippers are paying $14.00 to $15.00 per 100 pounds. Farmers were reluctant to sell their seed earlier in the season when dealers were offering $15.00 to $16.00 per 100 lbs. and now that the price has declined practically no sales are reported except where the farmer finds it necessary to sell in order to meet current financial obligations.

The heavy importation of crimson clover seed during June and July is no doubt the cause of the decline in price. Dealers are quoting imported crimson clover seed to the trade at $12 to $12.50 per cwt. New York and Baltimore. Stocks in dealers' hands on June 30, 1919, as shown by returns in the general seed survey were 1,264,600 lbs., which is about the same as that reported by the same concern for July 1, 1918. This added to 516,400 poun imported during July and appro mately 2,150,000 pounds still in far ers' hands on July 1, gives a to available supply of approximately 900,000 lbs., including that required planting in seed-producing sectio which is about 300,000 lbs. more th the total available supply reported this time last year.

Canadian Winter Wheat Yields.

The preliminary estimate of t yield per acre of winter wheat Canada is 28¾ bus., as compared wi 19 bus. last year and 22½ bus. decennial average for the years 19 1918. The yield per acre for 1919 therefore the highest average reco the previous record being 28½ bus. 1915. Upon the harvested area of 79 750 acres, the total yield is 22,875,9 bus., as compared with 17,942,800 l year and with 29,320,600, the record wheat yield of 1915.

Cash Prices of Short Rib Sides.

Trade Mention

The XXth Century Mill Mfg. Co., De-tur, Ill., advises that W. L. Hutche-n, formerly with the Anglo-American ill Co., is now on their staff.

The Elmore-Schultz Grain Co., St. ouis, is now betting out its mar-et letter in the form of a 4-page folder, iving in addition to the daily letter arious news notes and suggestions to ippers, which the latter will appre-ate.

Geo. F. Housman, grain, hay, feed and ur broker, 51 First National Bank dg., Davenport, Ia., reports a firm hay arket, and a growing business in lines ndled. This has made necessary oadening his brokerage business, and F. Schoening, former manager of the avenport Flour, Feed & Commission ., will be associated with him after pt. 1.

The Merchants Elevator Co.'s storage cilities at Davenport, Ia., will be dou-ed shortly. They have had an eleva-r of 325,000 bushels for many years d have added an equal storage in con-ete tanks. They have also fully rinkled the old house; and with a 0,000 storage to be ready early this l they will have not only a model int, but one sufficiently large to han-e enormous business.

Scientific Squibs says that, "It is not iat you pay for what you get so much what you get for what you pay." ey then go on to list the attributes of e Bauer "Scientific" Ball Bearing At-tion Mill as follows: Rigidity, ength, belt driven, motor driven, ick release, power economy, lubricant ving, long service plates, safety re-f springs, evenly ground meal, acces-ility to interior and ball-bearing oothness. The Bauer Bros. Co., 513 uer Bldg., Springfield, O., are in po-ion to furnish millers facts on their inding problems.

W. H. Bartz & Co. is a new firm re-tly announced in Des Moines with ces in the Hubbell Bldg. They are mbers of the Des Moines Board of ade and Mr. Bartz will be recalled as ntified with Harper & Sons and later h the Mid-West Consumers' Grain for some time. He advises that the n contemplates branch offices in other portant centers through Iowa, where corn has matured in great shape, spite of the apparent efforts of cer-n uninformed members of the trade kill it. Mr. Bartz is an enthusiast the Des Moines Board of Trade and possibilities and hopes to hear from friends and customers and thus ve the mutual advantages of busi-s with the new firm.

The Guarantee Construction Co. of cago and New York has about com-ted an installation of considerable in the macaroni plant of the Ar-ur Grain Co., Battle Creek, Mich. processes necessary to this work ke the pneumatic conveyance of ma-ials particularly desirable. There no possibility of chipped or broken ts entering into the food products might be possible under the old ns of handling grain and the va-is macaroni mixtures. Conveyance air has proven highly satisfactory work of this class, and the far-ted plans and business experience he Armour Co. were back of their ction and the equipment sold and alled by the Guarantee Construction This is only another of many jobs ntly announced by this company, ch with its present special advan-s it is able to handle promptly in spite of present labor difficulties and high prices ruling over the entire country. Those in the market for similar equipment will be furnished full particulars by addressing Old Colony Bldg., Chicago, or 104 Cedar St., New York City.

LIBERTY MILLS, KANSAS CITY.

Work on the mill and elevator of the Associated Mill & Elevator Co., a $5,000,000 corporation at Kansas City, Mo., is well under way, the Lahrack Contracting and Engineering Co., having the construction contract. The plant, which will add greatly to the milling capacity of that territory as it will be capable of grinding 2,000 bbls. daily, is situated on a 9½-acre tract, in what is known as the East Bottoms. It is expected that the elevator, having 300,000 bus. capacity and capable of unloading 25 cars daily, will be completed in time to handle this year's harvest. The entire plant involves an expenditure of $650,000, but it is said that the buildings now under way constitute but the first unit, as the structure is so planned that in a few years a unit of equal size can be added, thus doubling the capacity. Needless to state the equipment of both mill and elevator will be of the best and latest design, Sprout, Waldron & Co., of Muncy, Pa., having been awarded the contract.

This mill will be known as the Liberty Mill, for although it will be operated by the Associated Mill & Elevator Co., the plant is being erected by a subsidiary of the Liberty Milling Co. The plans of the company are said to contemplate the acquisition of a chain of mills and elevators, and already an elevator at Wilsey, Kans., has been secured. The personnel of the company comprises men long and prominently identified with the grain and milling business. H. C. Nunn, president, was former chief grain inspector in Missouri; E. R. McDonald, vice-president, was well known in Kansas, where he operated a few years ago the McDonald Mlg. Co.; while Paul Noble, secretary-treasurer, has made hosts of friends in the trade, having been associated with Western interests for many years and until the present change with the Union Grain Co. of Hutchinson, Kans.

The Des Moines Elevator and Grain Company.

The Des Moines Elevator Co. has been reorganized under the name of the Des Moines Elevator and Grain Co., and began doing business as such on June 1, 1919. The company has a paid-up capital stock of $500,000, and will continue the business as heretofore conducted, operating its terminal elevator of 750,000 bushels capacity at Des Moines, also a line of country elevators located in Iowa. The officers of the company are William Simons, president; S. E. Squires, vice-president, and Frank Pagett, treasurer.

The active management of the business will be in charge of S. E. Squires and Frank Pagett. William Simons, president of the company, will continue active management of the Sawers Grain Co. of Chicago, of which he is also president. He is interested in the country elevator business at Kentland and vicinity, and has had a successful career in the grain business, enjoying the utmost confidence of both the terminal and country grain trade. S. E. Squires has always been engaged in the grain business in Des Moines, and is well and most favorably known among the dealers in the Des Moines territory. F. Pagett has had an extensive experience in the grain and banking business in Indiana and is well qualified to assume his duties in connection with the management of the Des Moines Elevator and Grain Co.

The company will continue to specialize in the commercial distribution of oats throughout the South and it may be expected by the Southern trade that high standards of quality and reliability will be maintained. The company will also continue to be in the market at all times for car lots of grain, and sales or shipments to them will receive the most careful and efficient attention.

A Berlin cable says the harvest in Germany, contrary to expectations in May and June, threatens to be badly damaged by weather and lack of labor, which is almost impossible to get even at the high wages offered.

The Iowa Weather Crop Bulletin says that during the week of Aug. 12 there was some firing of corn in the southwestern counties and the rain came too late to fully restore it, but only a small part of the state is thus affected.

Am. S. & W. Crop Report.

The crop report of the American Steel & Wire Co. for the week ending Aug. 16 in part says: The corn crop, although damaged, still promises well. Figures on the oat and wheat crop indicate a heavy reduction in the estimated yield. Cotton has not improved materially. The same is true of potatoes, while sweet potatoes promise good to extra good. Local rains have improved general crop conditions since last week.

There are some sections where corn has been damaged to the extent of 35% by the hot, dry weather coming just at a critical time. Speaking generally, however, the crop is in good shape and has been much improved by local rains during the past week.

While forage crops in various sections of the country are in need of rain, they range from fair to good, which is reflected in the dairying sections by good returns from this branch of agriculture. In Kansas and Oklahoma kafir corn and milo maize promise to save the day, as they are from good to extra good. Cowpeas and velvet beans are short, owing to the scarcity and poor germination of seed. Great attention should be paid by farmers of the South to guard carefully the seed of these valuable legumes, as care in this direction will prevent a recurrence of this year's short acreage.

It is reported from Ogden, Utah, that farmers of the Intermountain States are refusing to sell their wheat at the Government price and several mills in the Ohio district are shut down because they are unable to buy grain. Farmers generally demand a premium of 20@25c a bu over the Government prices.

Caution to Licensees.

It is reported that unscrupulous persons are taking advantage of licensees to defraud them by representing themselves as being U. S. Government inspectors, who have been instructed to inspect the Wheat Director's licenses and the stocks of licensees, and who are exacting for this pretended service such sums of money as they think they can collect.

Howard Jackson, vice-president, calls attention to the fact that there is absolutely no fee or charge connected with the issuance of the Wheat Director's license and that no one is authorized to collect any money, and that any one approached will confer a favor and perform a duty to the community by promptly reporting any person trying to collect money in connection with the Wheat Director's license. If possible, have the party arrested, notifying the nearest vice-president of any such action by telephone.

Need Permits to Reconsign.

Grain that is included in permit regulations, when reconsigned from destination originally named to a primary market, will require an individual permit from the primary market to which reconsigned. This will include:

. Cars shipped from one country station to another country station, and reconsigned thence to a primary market.

. Cars shipped from a country station to a primary market on road or market permit basis, and before reaching that market reconsigned to a different primary market.

. Cars shipped to a primary market and afterwards reconsigned to another primary market.

Peoria Rates Adjusted.

In *Peoria Board of Trade* vs. *A., T. & S. Fé Ry. Co.* et al., the Commerce Commission (55 I. C. C. 42) has found that (1) joint rates on grain, in carloads, from points in Illinois *via* Peoria, Ill., to points in Eastern trunk line territory have been and are unreasonable to the extent that they have exceeded or may exceed the aggregate of the corresponding rates subject to the act contemporaneously in effect to or from Peoria; (2) that the adjustment of the joint rates is not found to have been or to be unduly prejudicial to complainant or Peoria or unduly preferential of competing grain markets.

Strong's Double Indexed Car Index
Is a record book designed to afford ready reference to the entry or record of any car number. Facing pages 11x14½ inches of heavy ledger paper are each ruled into five columns, those on the left-hand page being numbered 0, 1, 2, 3 and 4; while columns on the right-hand page are numbered 5, 6, 7, 8 and 9. Each column is ruled into three distinct divisions with the following sub-headings: "Initial," "Car No." and "Index."
The marginal index figure represents the right hand or unit figure of the number entered; and the column heading the second or tens figure. So that the required number can always be instantly found if properly entered.
ORDER FORM 20 contains 36 pages, bound in heavy canvas covers, with spaces for registering 9,000 cars. Price, $1.50.
ORDER FORM 22 contains 68 pages, bound in art canvas covers, with spaces for registering 17,000 cars. Price, $2.50.

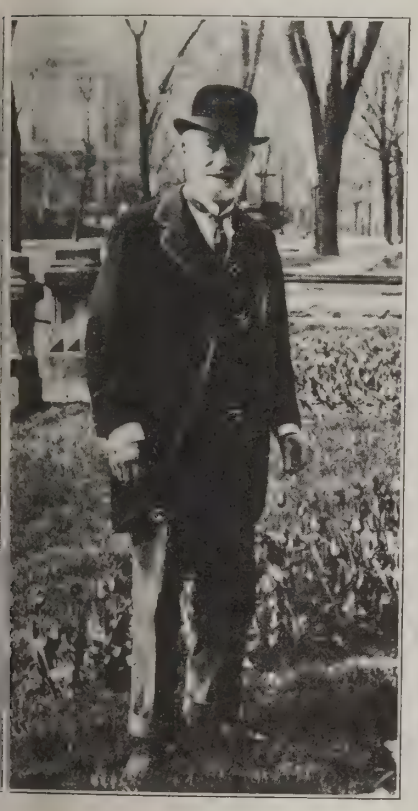
Sheep and the Weather.

While there is a larger percentage of lambs coming on the feeding order than ever at this time of year, the packers are compelled to kill lots that ordinarily go to the country; therefore, the large supply of feeders that a great many people are expecting will fail to materialize. Also we must not overlook the fact that shipments of range sheep and lambs in June and July, and so far in August, have been the heaviest we ever had. The ranges in the West have been so very dry every one was anxious to unload as soon as possible. This will surely prevent the congested conditions we get here late in the season sometimes.—*Knollin Sheep Com'n Co.*

Quality Cattle in Demand.



Of late high-qualitied cattle have been enjoying a market pretty much of their own. The heavy liquidation during May and June is mainly responsible for this feature of the trade while the fact that feeders neglected laying in their usual quota for summer feeding, due to the recent depressed market on prime cattle, also accounts in a large way for the short runs and good markets we are having on the finished product. Receipts at Chicago have been of greatly reduced volume of late on account of the recent strikes in packingtown and also the walkout by railroad men.—*Clo. Robinson & Co.*

FREDERICK LAYTON DEAD.

Frederick Layton, famous for a half century or more as a Milwaukee meat packer, and said to have been the oldest man in that occupation in the United States, died on Aug. 16 after a week's illness, at the age of 92 years.

Mr. Layton and his father, J. Layton, established the Layton Company as J. & F. Layton in 1845. In 1852 the firm name was changed to Layton & Plankington, a firm that subsequently became the Plankington Packing Co., but in 1863 by the elimination of Mr. Plankington the firm returned to the name of Layton & Co. The business was continued under this name until 1900 when it was incorporated as the Layton Co. Mr. Frederick Layton retired from business a few years ago.

Mr. Layton was one of the best known and most respected of Milwaukee's citizens. Spending his entire life here, he was known to all of its people, to whom he had endeared himself by beneficences in various forms. Among others he gave a large sum of money to the Layton Home for Incurables, a

THE LATE FREDERICK LAYTON,
Milwaukee, Wis.

part of the Milwaukee Hospital, and presented the city with the well known Layton Art Gallery. For many years he kept personally in touch with every business proposition, or civic, that interested the people of Milwaukee as a whole. His generosities have undoubtedly reached a million dollars and perhaps more, and have been of infinite value to the people of that city. In spite of his great popularity and his interest in public affairs, he always declined public office, although he continued throughout his lifetime to have the public interest of Milwaukee in his mind always.

The photograph herewith was taken of Mr. Layton in 1914 and is, so far as we know, the latest photograph taken of him.

Will Not Contract Wheat.

It is encouraging to note, and the public will approve, the policy of the Millin Corporation not to contract wheat for its products extensively for export until substantial stocks assure an abundant supply at fair prices to consumers in this Country. That policy will probably also prompt importing nations to buy more energy and more tonnage to secure supplies of the cheaper wheats in other surplus countries.—*Pope & Eckhardt Co., Chicago.*

THE BRITISH BREAD SUBSIDY

An Enquiry by a Parliamentary Committee Into the Bread Industry from Grain to the Loaf—Recommendations to Reduce the Loss

By JACK BROOKS.

LONDON, Aug. 1.—[Special Correspondence.]—A scheme whereby the government would save $6,000,000 a month by a modification of the existing control of the milling industry and a restriction of the present subsidy on flour, which now costs the government of Britain $235,000,000 a year, has been put forward for consideration by the House of Commons Select Committee on National Expenditure. At the present time the market price of the 4-lb. loaf is 27c, which, thanks to the government's flour subsidy, is reduced to 18c a loaf to the consumer. As this subsidy is costing the government 9c per loaf and the United States is supplying most of the flour imported, the loss on which is estimated to amount to $8 a sack (280 lbs.), it does not need a great stretch of the imagination to visualize the urgency of some sort of revision.

This Select Committee has gone into the matter of the subsidized flour and the milling trade and the baking end of the industry very completely. It has heard a lot of evidence and sifted an immense amount of "chaff from the wheat," as it were. Its conclusions are broad in conception and of considerable moment both to the trade and to the public. The latter undoubtedly has not realized to what extent the subsidy has burdened the treasury, inasmuch as it is a subsidy on flour for use not in making bread only, but for the manufacture of pastry cakes and "smalls." The latter, unlike bread, are not controlled, and therefore have resulted in the making of handsome profits for the bakery trade.

The Committee's proposals would confine the subsidy to flour used for bread making only and would reduce this subsidy by two-sevenths, or $6,000,000 per month. As was shown in the evidence heard by the Committee, sufficient grain is produced in the world excluding the United States to supply the whole of the British Empire with flour, but owing to tonnage difficulties at the present time, it is absolutely necessary to import very large quantities from the United States. In addition to the 9,500,000 tons of wheat supplied for bread, it is estimated by the Committee that 7,000,000 sacks of flour (the equivalent of 1,166,666 tons of wheat) will require to be imported during the coming year. The loss on imported flour, as mentioned previously, is estimated to amount to $8 a sack, representing a total value of about $56,000,000. According to the Committee the increased charge involved in the use of imported grain at present amounts to $4.50 per sack, and the Committee among other things urges that imports be cut down to as small a total as possible since 15 per cent of the milling capacity of the United Kingdom is at present unused. One of the proposals of the Committee is as follows:

A modification of the existing control of the British milling industry under which all wheat would be sold at a price calculated to allow the sale of bread at not more than 18c a 4-lb. loaf. The present control of the milling industry would be removed, and the flour and bread prices order withdrawn. This proposal was made in the expectation that the system would set free competitive forces which would tend to reduce the price of flour and bread. As a safeguard, it was suggested that the power of reimposing maximum retail prices might be retained.

So far as can be forecasted at the time of writing this scheme will come into operation next January, it being understood that the millers already have received notice of this. As regards the subsidy, by its restriction all flour would be sold at a flat rate covering the cost, and the subsidy would be restricted to a rebate to bakers on flour used in bread making only, and to housewives for flour used in baking bread at home.

The custom in Britain today is to sell British-grown wheat to millers on a commission. The Committee disapproves of the rate. Merchants and dealers supplying the mills with the "home-grown" wheat receive a commission of 25c per quarter (8 bus.). The Committee considers this too high, and proposes that the rate be reconsidered and revised.

The only purposes for which the use of subsidized flour is prohibited, and which are known as "precluded purposes," include ship stores, the wholesale manufacture of biscuits, the manufacture of edible mixtures, such as custard powders, sweetened cake flours and babies' foods. To bring the price of flour sold for "precluded purposes" up to actual cost an additional charge of $9 is made. There was a proposal submitted recently by the Food Ministry for the remittance of this extra $9 charged for flour supplied to the wholesale biscuit manufacturers, but the committee opposes the new addition to the subsidy cost on the grounds that it would entail a further loss of $6,250,000 to the state.

There is no doubt that the privilege given bakers to make pastry and fancy cakes with subsidized flour has resulted in some very handsome profits for these people; hence the desire to confine the subsidized flour to the manufacture of bread only. The Committee finds after careful investigation of the bakers' end of the argument that an increase to the bakers of 25c per sack in the price of flour would result in a saving in the bread subsidy of $10,000,000 per annum. The Committee is aware, however, that big profits are no longer forthcoming from the 18-cent loaf, owing to the increased cost of coal which has just been advanced $1.50 per ton and the higher cost of labor. As a matter of fact, the bakers of the nation are preparing for a strike, since they refuse to consider the demands of their employes for shorter hours and larger wages until the Ministry of Food reconsiders its decision not to grant the master bakers better prices on flour or bread. Either the loaf must be increased to 20c or the flour subsidy must be increased so as to reduce the cost of flour to them, the bakers say. High cost of labor and materials since 1917 is urged as a reason for this demand. So far the Ministry of Food sees no need for a revision of the existing prices; hence the deadlock in the baking trade and the threatened national strike the first week in August.

Objections to the Committee's proposals heretofore have revolved around the establishment of decentralized accounting machinery, the registration of bakers with flour retailers and an increase in the retail price of flour from 66c to 95c per stone (14 lbs.). These ob[je]ctions were considered by the Fo[od] Council recently, which finally dec[ide]d there could be no possible advantage i[n] the scheme of subsidizing flour o[nly] bread making only. The Committee o[n] the other hand, advises strongly i[n] adoption and looks for its immedi[ate] reconsideration and revision with a[n] end in view. As the investigators s[ay]

"This national saving of $72,000,000 a year cannot be lightly set aside. [The] scheme is administratively quite fe[a]sible; and it was given in evidence a[s] the cost of administration would o[nly] amount to more than $1,000,000 per [an]num. No doubt there would be a c[er]tain leakage and a tendency to fa[lse] statement, in some cases, on registra[-]tion. On the other hand, if it is de[-]cided that the price of the loaf shall b[e] limited to 18c, the period during wh[ich] the subsidy may continue may be a lo[ng] one. No one appears to be able to fo[re]cast the effect upon world prices o[f] readmitting central Europe to competi[-]tion for food supplies, and in any ca[se] the guarantee of the United States Gov[-]ernment to growers of wheat, so long a[s] it continues, will keep the world's pr[ice] high."

The Committee found upon investiga[-]tion that there is a very wasteful ex[-]penditure in delivering bread from [the] wholesale bakeries. It estimated the cost per sack of flour as varying fro[m] 45c to $2.31 and in a few cases as m[uch] as $3 and $3.25 per sack. It urges th[e] regulation of the delivery of bread fro[m] bakeries to those areas to which it [is]

News of the Country Grain Trade

ARKANSAS.

Little Rock, Ark.—L. H. Bowen has applied for membership in the Little Rock Grain Exchange, representing the Bowen Mill Products Co.

Flippin, Ark.—Tice & Son have completed the installation of a small flour mill which is now in operation. This mill will take care of the wheat raised in this section of Marion county.

Van Buren, Ark.—T. P. Minton of Bonanza has purchased a site near the Van Buren compress where he will erect a modern mill to serve the wheat growers of Crawford and Sebastian counties.

CALIFORNIA.

Los Angeles, Cal.—Fire, said to have been caused by spontaneous combustion, threatened to destroy the Los Angeles Milling Co.'s plant at 326 Commercial street, recently.

FLORIDA.

Jacksonville, Fla.—The Pillsbury Flour Mills Co. of Minneapolis, Minn., has established a branch here, believing this to be a good distributing center.

INDIANA.

Albion, Ind.—The new feed mill of Rimmell & Son has been completed and is now in operation.

Earl Park, Ind.—Chas. Ruple, who has been in the grain business here for the past year or so, has sold the business.

Mishawaka, Ind.—The Grange Elevator Co. will build an elevator to cost approximately $30,000. M. H. Huston is president of the company.

Indianapolis, Ind.—Excavation work has been started on the transfer grain elevator to be erected for the Springer McComas Grain Co. The site is on five and a half acres between 22nd and 23rd streets, on the Belt Ry.

Delphi, Ind.—The Beach Rothenberger Mlg. Co. has been incorporated with a capital stock of $20,000 to manufacture flour and food products. The incorporators are Wm. Roach, Levi Rothenberger and Harry E. Roach.

North Manchester, Ind.—The Farmers Elevator Co. has filed articles of incorporation at Wabash. Officers of the company are as follows: C. C. Dillman, president; A. C. Humke, vice-president; L. A. Catey, secretary; and Daniel Frantz, treasurer.

Vincennes, Ind.—The Atlas Mills and elevator, owned for half a century by the Emison family, have been sold to O. T. Stout of Indianapolis and John Stout of Memphis. The plant, which is one of the largest of its kind in southern Indiana, was sold for $40,000.

ILLINOIS.

Atlanta, Ill.—At the annual meeting of the officers of the Eminence Grain & Coal Co. a healthy business was reported.

Clinton, Ill.—The Harrison Ward Grain Co.'s north elevator, located at Heyworth, was totally destroyed by fire recently.

Rosemond, Ill.—The Rosemond Farmers' Co-operative Ass'n has purchased the grain elevator of J. F. Umpley which will be operated by the association.

Pesotum, Ill.—Work will soon start on the erection of a new elevator for Garner, Davis & Burton to take the place of the one recently destroyed by fire.

Decatur, Ill.—The Herman Farmers Co-operative Co. of Herman was incorporated under the laws of Illinois to deal in grain, seeds, cement, lumber, lime and livestock.

Arcola, Ill.—The Illinois Central tracks in the neighborhood of Bethany had 1,000 bus. of grain scattered over them when the elevator owned by the T. W. Abrahans Co. burst.

Muncie, Ill.—The new banking company of Fithian has purchased the Minor elevator here as well as the residence of E. V. Minor and a farmers' elevator will be organized.

Walshville, Ill.—Articles of incorporation have been filed by the Walshville Farmers Grain & Live Stock Co. to the amount of $15,000. Incorporators named: T. M. Barlow, Otto Hauser and Arthur Hoisington.

Farmington, Ill.—The Middle Grove lumber and grain business of W. Courtney has been purchased by W. I. and Elmer Jackson and H. H. Payne. Possession Sept. 1. Mr. Payne will manage the new business.

Okawville, Ill.—The Farmers Elevator Co. of this place has been incorporated under the laws of Illinois, the incorporators being Wm. Grewe, Otto Hasheider, H. H. Brockmier, Fred Liammier and Julius Going; capital stock, $40,000.

Arlington, Ill.—Thomas Manning, who has been managing a grain elevator at this place for the past two years, has taken a traveling position with McCarty Bros. of Chicago, grain commission merchants. McCarthy Bros. operate elevators in Chicago, Milwaukee and Duluth.

Paxton, Ill.—The Paxton Cereal & Seed Co., which has been operating for the past year on North Market street, has been incorporated with a capital stock of $20,000, incorporators being Chas. R. Cruzen, Wm. H., Wm. A., and E. J. Westbrook, Otto B. Larkins, Miriam E. Risser and Isabel Risser.

IOWA.

Emerson, Ia.—The Farmers Co-operative Union is making plans to erect a grain elevator at this place.

Mt. Auburn, Ia.—St. Clair & Son have sold their grain elevator business to the King Wilder Grain Co.

Doon, Ia.—The Farmers Co-operative Products Co. is making improvements to its elevator costing $3,000.

Storm Lake, Ia.—H. D. Brickman has purchased the interests of M. T. Blessing in the Rolfe Grain & Mlg. Co.

Davenport, Ia.—The Western Flour Mills on East River street will have an addition to cost approximately $30,000. Contractor of the job is William Walsh of Minneapolis.

Newell, Ia.—The R. B. Galbraith & Co.'s elevator here is undergoing extensive alterations. The capacity has been so enlarged that 2,000 bus. per hour may now be handled.

Northwood, Ia.—The Anglo American Milling Co., one of the largest concerns of its kind in the country, has been investigating this territory with a view of establishing a flour mill at this point.

Council Bluffs, Ia.—Building permits issued for the month of July totaled the sum of $88,810. The largest permit issued covered $50,000 for the addition to the Farmers Terminal Elevator at 26th and Fourth streets.

Sioux City, Ia.—Temporary offices of the newly organized Farmers' Terminal Co. will be maintained at 414 Trimble Bldg. Mention of their $1,000,000 elevator, which is to be built at Riverside, was made in these columns last week.

Le Mars, Ia.—Work will be started at once to build a concrete elevator at Oyens to replace the one destroyed by fire recently. The Plymouth Milling Co. states that the capacity will be 20,000 bus. and a concrete storage for flour will also be built.

Des Moines, Ia.—Sargent & Co. have filed incorporation papers, amount of capital stock being $100,000, to deal in hay, grain, coal, cereal products, farm products, lumber, etc. Headquarters will be maintai in Des Moines, and O. J. Meredith, V Sargent, T. S. Heggen and A. E. Sar are the incorporators.

VERMONT.

Swanton, Vt.—One of the four units of the Park & Pollard Co.'s elevator burned last week. This plant at Swanton was built about a year ago when the company's plant at Oswego, N. Y., had been destroyed by fire.

WASHINGTON.

Yakima, Wash.—The Miller Flour Mills have filed articles of incorporation with a capital stock of $50,000. The company, of which A. K. Kneer, M. R. Eoff and J. G. Miller are incorporators, will build a 300-bbl. flour mill on the site of the former Yakima Mlg. Co.'s plant, which burned down a number of years ago. Mr. Eoff, formerly of the Pendleton Roller Mills, will become manager of the new company.

WISCONSIN.

Columbus, Wis.—Waxer & Free will open a flour and feed business at this point.

Brillion, Wis.—The F. Paustian Mlg. Co. has increased its capital stock from $15,000 to $40,000.

Rhinelander, Wis.—Joseph Goldberg has sold his flour, feed and grocery business to E. Elkon.

Weston, Wis.—The Elmwood Lumber & Grain Co. has bought out the business of A. H. McCabe.

Waterford, Wis.—Harry Berger has sold his third interest in the Waterford Mlg. Co. to his partners, A. S. Titus and Geo. Healy.

Augusta, Wis.—The Dells Milling Co. of this city has received bids for the construction of a new dam at its mill site near Rodell.

Marion, Wis.—A modern grist mill will be erected here, Fred Ruchs having sold water power rights to Harvey Luschow and Att'y Doering of Milwaukee. Consideration involved was $3,000.

Madison, Wis.—John H. Richards, well known here, died recently at Los Angeles. For many years Mr. Richards was a member of the grain-buying firm Richards, Robertson & Graves, at Oregon.

Bangor, Wis.—The Bangor Milling Co. has been incorporated with a capital of $40,000 to operate a flour mill and buy and sell grain. The incorporators are Oscar Hussa, Frank Haack and Henry Soltan.

Schleisingerville, Wis.—Louis Nigh, after acting as manager of the Armour Grain Co. branch at this city for the past three

Field Seeds

A Kansas seed firm writes that that state will have enough timothy for her own needs, which is rather unusual.

A Dutch firm writes C. A. King & Co. that Holland is always a buyer of red clover seed and hopes that America will be able to export this season.

An Oregon seed firm writes C. A. King & Co., Toledo, that alsike and clover are yielding well in the West, although the acreage is very short. The alfalfa crop promises large.

The La Crosse Seed Co., of La Crosse, Wis., has been incorporated with capital of $25,000 to plant, cultivate, grow, raise, produce, etc., seeds. The incorporators are: J. E. Higbee, Roy R. Hattman, Albert F. Loeffler.

The Van Dusen-Harrington report says: "We are still receiving reports of damage by grasshoppers to flax fields of eastern and southern North Dakota and some damage in western Minnesota. Undoubtedly a considerable proportion of the crop of North Dakota will be lost in this way."

The annual meeting of the A. A. Berry Seed Co. was held at Clarinda, Ia., recently at which time the capital stock of the company was increased to $500,000; shares of the new capital to be $100 and to be fully paid in in cash.

Alfalfa seed in Arizona is reported the best yield in several years.

Chicago Seed Markets.

There was a rather firm tone noticeable in the timothy market all last week. Old contract prime which closed at $12.50 on Monday, however, at the close Saturday stood at $12 bid and $12.40 asked. Cash sales were reported during the week at $10.50@11.60, and it was reported that 1917 seed brought a premium of 25c. Clover was without change during the week. Sales of alsike reported at $37 a bag; country lots of clover, $32@42 for seed of fair to good quality. Daily range of prices follow:

Timothy—	Sept.	October.
Aug. 11	$13.75A	$12.25B $12.75A
Aug. 12	13.75A	12.30B 12.60A

Louisville Seed Market.

LOUISVILLE, KY., Aug. 16.—Some little demand is being experienced for orchard grass seed, but such new crops and orchard grass and bluegrass are not showing much. It is claimed by several seedsmen that the orchard grass crop may exceed 200,000 bushels in Kentucky, as yield is larger than had been expected, with good fields making eighteen to twenty bushels to the acre. Stripped blue grass is drying out rapidly, and growers are working somewhat on price. At the same time the seed is steadily getting lighter at the expense of the growers. Cleaners are quoting growers $1.50 a bushel for stripped seed. Orchard grass is quoted at $3@3.05 a bushel delivered. Onion sets are firm but show no demand. Four and one-half cents a pound is asked by growers for whites and four cents for yellows.

CHICAGO SEEDS MOVEMENT.

Following is a report of the receipts and shipments of grass seeds at Chi for the months and weeks named in 1919 and 1918, in pounds (000 omitted

Kansas City Seed Market.

KANSAS CITY, Aug. 16.—Seed dealers have become very bullish in their views on alfalfa seed. They predict a very short crop, because both the first and second growths were taken entirely for hay, and it is not clear that a great of the third crop was left for Grasshopper damage to alfalfa in ern and southwestern Kansas has great. Dry weather caused a growth in the eastern half of the for the third crop, but rains this were beneficial, especially in the n eastern quarter. Dealers say the duction of seed in New Mexico, Ari and Texas, which often becomes a able for fall sowing in Kansas, not up to normal, and that old must be depended upon, as the crops of Kansas and Oklahoma wil mature in time. Seed is quoted in sas City, as from first hands, at $ 21 per cwt., sacked.

Threshing of the large amoun rough blue grass seed bought month by Kansas City houses ha gun. The seed averages good qu and dealers say there is a big de for the cleaned product. Prices the country for seed in the rough $10@14 per cwt. and $19@23 is of for cleaned seed.

Only one or two houses are pa pating in the meadow fescue seed owing to the small acreage that harvested. The market is very st owing to export possibilities, w have arisen since the war. See said to have sold at $25@30 per cw.

Threshing of timothy seed is re ed in Missouri and Iowa, but re rains checked the work, and not m seed has been offered to Kansas houses. Most of the buying has done through traveling agents of seed houses. Thus far only the seed prices have been quoted. The $9.50@11 per cwt.

Clover, millet and cane seed quotations, because old seed is o the market and new crops are y be harvested. The clover crop pre a moderate promise, but is being largely for hay. There will be seed saved in Missouri and possib

othy, lbs...	.....	55,056	.....	.....
er, lbs.....	7,788	62,193	.....	4,900

SEED SITUATION.

SOME SEED MOVING ALREADY.

. LOUIS.—Am prompted to tell about present condition of the seed market t. Louis.

is early as yet to expect much trade, we are selling some rye, barley and at already, as well as redtop, timo- and red clover. The prospect is we have a normal demand.—*Chas. E. ity, St. Louis, Mo.*

JERSEY SEED CROP.

EW JERSEY (3).—Jersey seed crops not looking at all good, owing to avy rain, which lasted for a week. early crop of tomatoes is the short- in years; peppers and egg plants been drowned out in low places; mbers, watermelons, squash, pump- , field and sweet corn are looking y good. With a late fall we expect ir crop of these items.—*Geo. R. ich & Son, Pedrichton, N. J.*

SEEDS DULL

UISVILLE.—There is no news of any rtance in regard to the seed trade we know of. There has been no firm started since the report you shed in regard to the firm of Card well. Things are rather dull now, e are between seasons. We are ng our fall and spring supplies of rd grass, Kentucky blue grass and r two other minor crops, otherwise re not very busy.—*Louisville Seed pany, Louisville, Ky.*

BLUEGRASS CROP.

NSAS CITY.—There is not much in- ation in the seed trade line at pres- which the writer can give you, with exception that the bluegrass crop been pretty well bought up in Mis- , and there are very small holdings remaining in the country. nothy has commenced to move ly. Prices in the country have up well around $5 per bushel and arger points report a good percent- f the crop already traded on.—*J. G. ard Seed Co., Kansas City, Mo.*

CENTRAL ILLINOIS SEEDS.

INOIS (5).—Clover seed prospect on a very small acreage. Small crop of timothy of fair quality. Soy beans promise a good yield with a larger acreage than last year. Oats and wheat crop not up to expectations, and quality poor. There is a demand for good seed wheat. The corn crop in this county is a trifle late, but with a favorable fall there will be a big yield.—*Guy W. Stanner Seed House, Champaign, Ill.*

Duluth Flaxseed Market.

DULUTH, Aug. 16.—Liquidation was in evidence in the flaxseed market during the last week, and on persistent selling pressure declines extending to from 9 to 19 cents were recorded in the five days' operations. The spot market and the near future were relatively strong as a result of bidding by crushers to obtain supplies to cover their outstanding linseed oil contracts. At a result, the spread between the September and October futures widened out to 28 cents, as compared with 20 cents a week ago.

The recessions in the seed market are attributed by experts to a great extent to the campaign inaugurated by the government in the direction of a reduction in the costs of living, and it being figured out that the linseed oil market would come under scrutiny along with other commodities. Under those conditions operators for the linseed oil interests showed a disposition to go slow in the way of increasing their commitments. It was noted though that their operations were in evidence on all the weak spots.

Reports from over the Northwest regarding the flaxseed crop are more discouraging than ever, and estimates of yields are being reduced still further. It is asserted that grasshoppers are playing havoc with the flax crop in districts in Minnesota and North Dakota that looked well and promised good yields up till recently.

Receipts of seed came straggling in during the week, and a great proportion of the cars were bulkheaded, indicating that growers were cleaning up their remaining supplies. They aggregated just 16,868 bushels, compared with 62,836 bushels during the preceding week. Supplies in the elevators were brought down to 95,000 bushels.

Closing prices of flaxseed on the Duluth market on Friday as compared with the previous Saturday and last year were:

	Friday.	Week ago.	Year ago.
On track	$6.05-6	$6.13-15	$4.48
To arrive	6 05	6.13	4.48
September	6.00	6.10	4.48
October	5.72	5.90	4.40
November	5.64	5.82	4.35
December	5.51	5.70	4.28
May	5.50	5.75	.....

St. Louis Seed Market.

ST. LOUIS, Mo., Aug. 16.—Grass seeds are beginning to come in slowly and there is little business in spot seed, but offerings to arrive are increasing and prices on good to fair country run seed are as follows: Timothy, $10@12 per 100 lbs., according to quality; clover, fair to choice, clean seed, $35@40 down to as low as $20 for low-grade; alfalfa, $15.50@27, according to quality; millet, golden, $3@5; common, $2@3; Siberian, $2.50@2.60; sorghum cane seed, $2.50@2.60 per 100 lbs.; redtop, choice, clean seed, $13 per 100 lbs.; inferior or chaffy, less.

FORT MORGAN, COLORADO

Toledo Timothy Seed.

Timothy continues easy. Reports on new crop very mixed. Some say it is very badly hulled and that the old timothy should bring a premium. Around here timothy is running 3 to 4 bus. to the acre. First threshing returns from Michigan average less than 3 bus. Movement of new seed should increase this week.—*Southworth & Co.*

Toledo Clover Seed Market.

Feature last week was the increased trade in March, and the fact that it is selling at a big premium over the December. The premium is just about big enough to cover the cost of carrying. When hedging or making short sales, it looks like March would be the best future at the big premium over December. October continues to sell from $1@1.25 over December. There is still a fair open interest in the October, and most of the trading now is the closing of old deals. Doesn't appear to be much new trading. Crop reports from parts of Indiana, Ohio and Michigan are coming a little more favorable lately, and we have had some good ones from Wisconsin. The weather has been favorable but everything points to a short crop, although it may not be nearly so short as indicated a while ago. Practically no new seed has been received. There was a carload of old prime here last week from the East. The comparatively low price, and the thought there may be a little more seed than figured on, is the reason some are taking the short side. The reports of very short acreage and yield, and no carry-over, are reasons given for buying.

Alsike firm and unchanged.—*J. F. Zahm & Co.*

Alfalfa Seed Crop.

Based on incomplete returns to the *Seed Reporter* it is estimated there were only 3,959,000 lbs. of alfalfa seed on hand on June 30, compared with 10,000,000 lbs. a year ago; so that many dealers will have to rely upon new crop seed or on the imported article to meet late summer and early fall demands.

The 1919 crop in Texas is expected to be only about 25% of normal, or 40 to 50% of last year's crop. This from the early crop, but with favorable weather it is possible that a good crop might be obtained from a third cutting but the seed will doubtless be poorer in quality on account of the rains. Prices of $16@17.50 per cwt. are being offered to growers. Threshing should be in progress now. In New Mexico the crop will be later. It is thought the acreage for seed will be smaller than last year, perhaps as low as 50% only; but with normal rainfall the crop will compare favorably with a normal year Bids for new crop run from $15@16.50 per cwt. but growers are asking $18@20. No threshing is expected before Aug. 15. In Oklahoma the early crop is only about 80% of normal, but very little of this will be ready for early delivery. The production of the state as a whole, including all cuttings, will be probably about 90% of a year ago on account of the worms, grasshoppers, drought and excessive rainfall. The acreage cut or to be cut for seed this year is smaller than usual, the best growths having been cut for hay. Some reports come in of bids of $10@13 per cwt., but very few sales have been made. In Arizona the bulk of the seed is produced in the Salt River Valley and generally from the second or third cutting. This year the Valley crop is reported to be about 75% of normal, the high prices paid for hay having induced making of hay instead of seed. The quality of the seed is expected to be at least that of last year. Offers of $16.50 per cwt. are reported, but growers are not contracting to sell at that price. In the Yuma project a production of 700,000 lbs. of Chilean and somewhat more than 1,000,000 lbs. of Peruvian alfalfa are reported. About one-third this year's crop was reported threshed by Aug. 1. Offers of $26@27 per cwt are reported made for Chilean and $32@33 for the Peruvian varieties.

Seed Oats and Rye in the South.

The supply of local grown seed oats and rye in the South Atlantic and Gulf States is reported by shippers and growers to be 25 to 50 per cent less than last year. Reports from several counties in southeastern Alabama, central and southwestern Georgia, northeastern Louisiana, central Mississippi, and in North and South Carolina, where a surplus of those varieties especially adapted to these sections normally is produced, indicate that many of these counties will have to ship in oats and rye, and that others have only a sufficient quantity to supply their own planting requirements this season. Reports from northeastern Texas indicate that there is a heavy surplus of the Texas R. R. P. variety of oats in several counties in that section, and a few scattered counties in other Southern States report a small surplus of local varieties of oats and rye.—*Seed Reporter.*

Texas Corn.

A sample of new crop Texas corn was received at St. Louis on Aug. 13 and classed as being the finest grain ever seen. The total yield there was 100,000,000 bu. greater than last year, and some white corn is reported offered at $2.09 per bu.—*St. Louis Market Reporter.*

Which leads Logan & Bryan, Chicago, to say: "This Texas corn is liable to prove an important factor as soon as car situation is relieved, as Texas has a big surplus which must be shipped as it will not keep in that climate owing to weevil.

Timothy Seed Outlook.

Reports received from approximately 700 shippers, growers and regular correspondents, indicate that the production of timothy seed this year will be somewhat larger than that of last year, says the *Seed Reporter.* Last year's commercial production, however, was considerably below normal, being about 80 per cent of the 1917 production and about 45 per cent of the large 1916 production, judging from the same kind of reports completed in December.

Many seemed to be of the opinion that much of the acreage originally intended for hay purposes might be cut for seed because of the high price of farm labor and because growers were able to obtain their tonnage of hay on a smaller acreage than usual due to the excellent growth that meadows had made during the spring. On the other hand, prices for hay have been so attractive that many growers, no doubt, have been influenced to harvest their timothy crop for hay rather than for seed. In the heaviest seed-producing section of the country, namely in southern Iowa, the acreage is estimated to be 15 to 20 per cent below normal, but about the same as that of last year. A normal acreage for seed in northern Iowa and northeastern Missouri offsets in part the decrease in southern Iowa, northwestern Missouri, and southern Minnesota. The yield per acre in most of the states where timothy is commonly harvested for seed will be good, and not much below normal. In portions of Idaho, North Dakota, Montana, and in a comparatively few small scattered localities in other states where the drouth was severe, the yield will be considerably below normal, if not a complete failure. These states and localities are unimportant from a timothy seed production standpoint and are almost entirely discounted by other states where weather conditions have been favorable for the timothy seed crop and where a considerably better yield per acre than last year is expected this year.

While the carry over of timothy seed this year is considerably less than that of a year ago and also of two years ago, seedsmen are not inclined to raise their bids materially at the present time because the foreign demand has not absorbed stocks of this seed to the extent that was expected by many of them. Incomplete figures obtained from the general seed survey of June 30, 1919, show a carry-over of nearly 20,000,000 pounds less on June 30, 1919, than on June 30, 1918. During the fiscal year ending June 30, 1919, approximately 3,000,000 pounds more timothy seed was exported than during the fiscal year ending June 30, 1918, the exports for these two fiscal years amounting to 11,673,221 pounds in 1919 and 8,520,373 pounds in 1918.

Hongkong Flour Shortage.

Con.-Gen. Anderson, Hongkong, reported, June 19, that the flour situation in Hongkong had begun to give occasion for worry, indications being that there would be some difficulty in maintaining a fair supply for this market through the season at living prices. The stock of flour on hand in the colony was then about 200,000 sacks, a very small margin compared with the stocks usually on hand at this time of the year.

The worst feature of the situation, however, was that only small supplies are in sight, and other markets on which Hongkong has been drawing during the past three years are more or less closed to Hongkong demand. Shipments of flour from North China had fallen off in line with reduced supplies and increasing prices, while Japanese flour had been practically out of the market for several months. A fair amount of Australian flour was on hand, but freight rates and accommodations from Australia were such as to hold back supplies from that source, and American flour was too high-priced to secure a foothold, being quoted at $3.85 Hongkong currency ($3.18 gold) per sack, as compared with $2.35 gold for No. 2 Shanghai and $2.48 and $2.26 gold for the two grades of Australian flour on sale. The probability of lower prices in the course of a few months prevented much future trading, and the entire situation was considered very unsatisfactory.

The Garvin County Broom G Growers' Ass'n has been formed at a Valley, Okla., "to protect Garvin Co against low prices and discriminat buyers of broom corn." Members Association pledge themselves n sell their crop "unless offered a price." This association, it is said coöperate with similar associatio Lindsay, Maysville and Purcell. moving cause of the organization association was a price of $120 p at Lindsay. The association will the whole crop if necessary.

You know there are lots of wise birds in this world, ranging from the owl down. We have made quite a study of birds because the scarecrows in the fields and the particular preference for certain seeds and crops evidenced by certain birds help us in our seed business.

Our friends above, an eagle and a crow, sitting on a fence overlooking a broad field of fine timothy, are sizing up the situation.

The crow says to the eagle, "You may be the king of birds, but look at the crop that Small's Woodpecker Brand produced."

Now, as a buyer of seeds, we ask you frankly whether you are willing to parallel your good judgment and seed selection ability with the crow? If you agree with him, ask your dealer for Small's Woodpecker Brand of timothy seed.

White potatoes in Illinois on Aug. 1 show a condition of only 61 with an indicated crop of about 10,000,000 bus., the weather generally having been unfavorable for this crop.

The field agent of Michigan reports that beans have suffered less than most other crops of July in that state. Only a few fields show yellow leaves, the first sign of maturing. The outlook on Aug. 1 was for a 77 per cent of normal or approximately 3,262,000 bus. This is a decline of 13 points during July compared with a one-point decline in New York, four-point decline in Colorado, two in New Mexico and four in California. The crop generally in New Mexico indicates 90 per cent and in New York 90 and is generally under normal.

The *National Weather and Crop Bulletin* reports beans seriously damaged in New England by worms. In Colorado beans are now being picked. In California beans near the Coast are reported good, in the interior the condition is only fair.

The American Steel & Wire Co.'s report for the week ending Aug. 16 says the bean crop promises fair to good in all producing sections. Reports from the far West indicate that most of the beans produced last year are still in growers hands and starting to move at higher prices.

The Michigan Weather and Crop Bulletin said beans during the week Aug. 12 were podding nicely and generally promising a fair crop.

The general condition of potatoes as reported by the *National Weather and Crop Bulletin* for the week Aug. 12 is somewhat as follows: In New Jersey some rottage reported. In Pennsylvania late potatoes mostly good. In Maryland and Delaware early planted late potatoes doing well. Those that were planted late are two weeks behind. In Oklahoma sweet potatoes are holding up but need rain. In West Virginia the yield is disappointing. In Michigan late potatoes are setting well. In Wisconsin late potatoes made satisfactory growth, having been helped by recent rains. In Minnesota the crop was improved generally but the tubers are small and the yield light. In Iowa the crop was in poor condition. In Nebraska potatoes and all garden vegetables were injured by drought. In South Dakota the crop deteriorated somewhat during July. In North Dakota the crop has been damaged by grasshoppers in all sections south of the forty-eighth parallel. In Arizona potatoes are doing well. In Utah the crop has improved. In Nevada the crop is suffering from drought. In Washington the late crop has been benefited by rain. In Oregon the crop is suffering from drought. In California the crop on irrigated land is doing well, otherwise only fair.

Geo. S. Colby, grain inspector and weighmaster at New Orleans, reports July shipments of wheat from that point 685,100 bus.; of corn, 114,964; of oats, 117,480; of barley, 1,368,889 bus.

Feedstuffs

Seattle reports mill feeds scarce and strong with no change in prices.

Great Falls, Mont., reports local mill feeds exhausted, with Washington stock offered at $50.

Spokane reports the mill feed market strong and steady. Local mills will begin grinding probably in a week.

Interstate Feed Co., of Dallas, Tex., has been chartered with $10,000 capital by C. R. Garner, R. C. Ware and J. J. Bond.

Webber & Sons of Martins Ferry, W. Va., are building an addition in order to double the handling capacity of their feed business.

The Riley Feed Mfg. Co., of Pine Bluff, Ark., has filed notice of increase in the capital stock of the company from $20,000 to $50,000.

In New York considerable damage was done during the week of Aug. 12 to meadows and pastures by grasshoppers and the milk flow is falling off.

The Economy Feed Store will be opened at 1100 North Sixth St., Cedar Rapids, Ia., by Geo. Scurlock, well known in the feed trade of that city having been connected with the Eureka Feed Co., and other concerns in that line.

The Agnew Farmers' Elevator and the Galt Grain Co. at Sterling, Ill., are furnishing members of the Farm Bureau in Whiteside County mill feeds on a basis of 75c and $1 respectively per ton net profit to them. The Farmers' Elevator requires that each member take at least one ton and pay cash on delivery, the Bureau paying the freight. In the case of the grain company the understanding is that orders shall be in car lots only, and that upon proper notification buyers will remove the feed from the cars and pay cash on delivery. Buyers will be held responsible for any demurrage charges accruing for negligence in the matter of removing feed within 48 hours.

FEED MARKETS.

COTTONSEED MEAL WILL BE HIGH.

LOUISIANA (5): It is our opinion that the by-products derived from cotton seed will command a very high price; in fact, higher than prevailed during the past season on cotton seed meal. This has been brought about by the fact that there was no meal carried over from last season: and because further there will be large quantities of this product exported, thereby further decreasing the supply for consumption in this country. Cotton seed hulls loose, we estimate, will sell from $7.00 to $12.00 per ton, depending on the quality of product and condition in different sections. Our opinion is that consumers of cotton seed meal should cover their requirements as far as possible at prevailing market.—*Alexandria Cotton Oil Co., Inc., J. H. McCain, Manager, Alexandria, La.*

FEEDS AND NATURAL LAW.

NEW YORK (3)—It occurs to us that one man's opinion of the grain or feed market just now is hardly worth considering, as there does not seem to be any natural law that is permitted to work itself out in connection therewith.

If economic factors can be seriously considered, all feeds should sell at higher levels; but in view of the fact that there seems to be a tendency to attempt to upset natural laws, we would not be at all surprised to see feed values lower than they are at present.

We really think, however, that the coming winter is going to show some decided hardships in various parts of the country, as we do not believe there is going to be a sufficient amount of feeding stuff stored to commence to take care of the natural demand.—*Ames-Burns Co., G. W. Hosie, Jamestown, N. Y.*

GROUND FEED STOCKS.

The Bureau of Markets reporting under date of Aug. 16 has the following as regard ground feed stocks throughout various parts of the country:

CENTRAL.—Terre Haute—The market is strong and demand good.

EASTERN.—Clarksburg, W. Va.—Dmd. offerings fr., spg. bran, $47; std. middlings, $61; reddog, $70.75. Scranton—Dmd. lgt., sup. norm. of mill fds., other concentrates such as linseed c. s. gluten, etc., in gd. dmd. St. Albans, Vt.— 36% protein c. s. meal Oct., $80; Nov., $79.50; wh. fds. dmd. fr., bran, $47.25, middlings, $57.50; dairy fds. dmd. gd., 22%, $71; stk. fd. dmd. lgt. offered $69.50. Washington, D. C.—Dmd. gd. especially for middlings.

SOUTHERN.—Atlanta — General dmd. lgt., rcts. wh. fds. ample, with easier prices except on concentrates. Spg. bran offered $47, middlings offered $60 @62. Supplies c. s. hulls lge., offerings meal ltd., $36% meal Ga. rate points $72.50, hulls $8@10 bulk, 36% peanut meal $73, new crop c. s. meal deferred shpt. $70, prices other grades meal based on $10 each per cent ammonia. No offerings vel. bean fd. although millers are inquiring; alf. meal from West $42 for No. 1 del. Savannah—Dmd. c. s. meal fair to gd., stks. lgt.; bran $52, 20% c. s. fd. $60. Jacksonville—Dmd. gd. for bran and middlings, bran $48.40, 36% c. s. meal $72.60. Pensacola—Dmd. vy. active, bran $47, brown shorts $58. Miami—Bran $54, shorts $71. Tampa Sup. bran gd. quotable $50, middlings $63@70, grey shorts $69, fd. $61.55. Birmingham—Middlings $56, 7% c. s. meal $68. Mobile—Bran $44.60, middlings $50, brown shorts $50, 20% c. s. fd. $56. Dmd. for middlings lgt. Gd. dmd. peanut meal, 36% quoted at $65. Montgomery—Dmd. c. s. meal gd., middlings vy. gd., bran $47@48, middlings $63@68, brown shorts $61@62, peanut meal $65. c. s. fd. $60@61. Greensboro —Dmd. lgt., fd. vy. scarce, dmd. active for wh. fds. bran $50@54. Charleston—Dmd. gd., dmd. bran and peanut meal vy. slow, dmd. gd. for middlings, bran $49, middlings $64. Meridian—Dmd. pr. for bran $48.40, middlings $60. Vicksburg—Stks. gd., dmd. gd., bran $43.60, middlings $64. Chattanooga — Dmd. bran-middlings gd., for peanut meal and c. s. meal lgt., no dmd. for vel. bean meal except from millers. Flour customers get bran, shorts, etc., at local mills $3.25@3.50; quote bran $47@48, middlings $64, 30% peanut meal $66.

FEED MARKETS.

PITTSBURGH.

Pittsburgh, Aug. 16.—Receipts of feed show a slight increase with mill feeds in the larger quantities. Ten cars of all grades were the receipts recorded for the last period, 8 of mill feed, 1 of white middlings and 1 not graded. There are no regular quotations established as yet. Only 1 car of rye was received at the local terminals and this covered a period of several weeks. No bran is coming into the market here and some could be readily placed at good figures.

NEW YORK.

New York, Aug. 16.—Prices for mill feed during the week were marked down about $1 a ton owing to the limited demand. Stocks are small, however, and mills therefore are firm in their views at present levels. On the whole the inquiry is very quiet. City bran is quoted at $48; middlings, $58, and red dog, $69, while Western bran is quoted at $48; middlings, $60, and red dog, $70@72 per ton. New crop supplies will not be in New York in good quantity for a month at least and consequently the situation is expected to remain quite firm.

BOSTON.

Boston, Aug. 16.—Very little demand reported for feeds of all kinds with light offerings and prices ranging as follows: Bran, spring, sacked, $47@48 per ton; bran, winter, sacked, $48; middlings, sacked, $57 @58; mixed feed, sacked, $56@59; red dog, sacked, $72; stock feed, sacked, $73; oat hul's, reground, sacked, $32; hominy feed, sacked, $78.50; cottonseed meal, sacked, $81@83. Receipts for the week ending Aug. 16 were: None.

LOUISVILLE, KY.

Louisville, Aug. 16.—The feed market shows no change, although some mills are better up with deliveries and orders are being filled more promptly. There is no surplus stocks and stocks as a whole are at an irreducible minimum.

Quotations are: Bran, $50 a ton; mixed feed, $57; middlings, $62; hominy feed me $81.

NEW ORLEANS, LA.

New Orleans, La.—Mills and Western sellers have not been active here on bi for the past week, due to the fact that threatened railroad strike situation m tated against their being active in our rection. However, the loss of this supp did not interfere with buying of bran, New Orleans resellers are now in a posit to discount the Western market and h been doing it. Quote tagged bran from $ to $2.25 per hundred delivered. Sh scarce and hard to obtain; market nomi about $2.90 per hundred for gray shorts livered.

MILWAUKEE.

Milwaukee, Wis., Aug. 16.—The local feed market is steadier, holding well to peak it reached last week. Bran showed increase of 50c while middlings are hold firm. Buying is practically limited to m the immediate demand because of the settled price situation. Current quotati are: Bran, per ton, $42.50@43.50; stand middlings, $55@56; flour middlings, $60@ red dog, $64.50@65.50; hominy feed, rye feed, $53; old process oilmeal, $91@ cottonseed meal, $86@93; brewers' dr grains, $60, all in 100-lb. sacks.

NASHVILLE.

Nashville, Tenn., Aug. 18.—The dem continues heavy for wheat bran and sho with output of mills sold several we ahead and prices strong. Other gro feeds are in good demand at steady pri with stocks moderate. Quotations: Wh bran, 100-lb. bags, per ton, $45.20; mi dlings or shorts, $61.20; horse and m feed, $51@67; dairy feed, $53@68; hog fe $68; poultry feed, $76@80.

DULUTH.

Duluth, Aug. 16.—The market in feeds was lifeless during the last w Demand was curtailed with consumers b buying from hand to mouth at the pres high price levels and in view of the ag tion for reduced living costs. The m however, had only small supplies to c and they reported that they could find b ers outside the district for everything t had to sell in the feeds line.

Quotations Saturday were as follo Bran, per ton, $43.50; ground oats,, $5 No. 1 ground feed, $64.50; No. 2, $61.25; 3, $57.75; shorts, $54; red dog, $66; Bo mixed, $57; cracked corn, $71; rye feed,

MEMPHIS, TENN.

Memphis, Aug. 16.—Quietude has r in the feed market during the past days but the ending of the railroad st has enabled manufacturers of mixed f to resume operations and go ahead fi their orders with more degree of pro ness. They are having a fine demand

SUCRENE FEEDS

In Their 20th Year of Popularity

One dealer, who has handled Sucrene Feeds for many years, writes: "We have had increasing sales on Sucrene Feeds each year. When we sell a feeder Sucrene he is generally a regular customer. Have handled a number of other feeds but they are hard to start and generally fall off. In the long run we consider Sucrene our best seller."

QUALITY FIRST AND ALL THE TIME
THE SUCRENE FEED SLOGAN

It gives you a grip on the feed business which competition can not break.

Our new feed mill at Peoria, Ill., the greatest and most modern plant in America, devoted exclusively to the manufacture of mixed feeds, will soon be ready for work. In the meantime our Owensboro, Ky., plant is running double shifts to keep up with the demand for Sucrene Feeds.

We solicit your order for Poultry Scratch Feeds in any quantity. The late fire did not affect this branch of our manufacturing facilities. Address Main Office at Peoria, Ill.

AMERICAN MILLING COMPANY

Main Office and Mills: Peoria, Ill.
Southern Mill: Owensboro, Ky.

prices are well maintained. In cottonseed meal business is very quiet and buyers and sellers appear to be jockeying over prices for new stuff. Neither side appears willing to do very much, especially while there is so much unsettlement in markets in general.

PHILADELPHIA.

Philadelphia, Aug. 16.—The market for feedstuffs is quiet but supplies are moderate and prices are nominal but steadily held. Quotations below present carlots, in 100-lb. sacks, to arrive, at so much per ton: Winter bran, $47@48; spring bran, $46@47; standard wheat middlings, $60@61; flour middlings, $65.50@66.50; red dog, $72@73.50; shorts, $60@61; low grade flour, $73@73.50; rye middlings, $60@61; fine yellow hominy, $77@78.50; fine white hominy, $78@79.50; reground oats feed, $31.50@32.50; cottonseed meal, 36% protein, $80@82; cottonsed meal, 41% protein, $86@88.50; cottonseed feed, 20% protein, $62@64.

BALTIMORE.

Baltimore, Aug. 16.—There is a rather easier tone to the general feed situation and demand for both bran and middlings has slowed down some in the past week. Offerings are not excessive, however. Quotations follow: Western spring bran, per ton, in 100-lb. sacks, $47@48; Western middlings, per ton, in 100-lb. sacks, $59@60; city mills' winter wheat bran, per ton, in 100-lb. sacks, $60; brown middlings, per ton, in 100-lb. sacks, $60; white middlings, per ton, in 80-lb. sacks, $70.

MONTREAL.

Montreal, Aug. 15.—With an active demand for mill feed and light supply the market has an all round strong tone, straight carlots of bran being quoted at $42@43, and mixed cars at $47@48 including bags. Straight cars of shorts are quoted at $45@46. Mixed grain moullie has sold $65@66, and mixed moullie at $56@58; pure barley meal, $66@68 per ton. Dairy feed has sold at $49@50 per ton; and oats middlings, $47 per ton.—Trade Bulletin.

CHICAGO.

Chicago, Aug. 16.—Very little change reported in the mill feed market last week. Middlings are very scarce and quotable $1 higher, or $57; bran in fair supply at $44, in sacks; cottonseed meal firm at $81, with a fair demand reported.

ST. LOUIS.

Aug. 16.—Spot feeds of all kinds are fairly steady with offerings light and demand fair, but futures are offered more freely and the market is weak, particularly on wheat feeds. Corn feeds continue scarce and high priced. Quotations are as follows: Bran, $40@43; middlings, $58.50@61; mixed feed, $53; white hominy feed, $73@74; oat feed, $26; No. 1 alfalfa meal, $38.50@39; No. 2 alfalfa meal, $34.50@35 per ton in 100-lb. sacks.

Expect Late New Feed Movements.

KANSAS CITY, Aug. 16.—Dealers in cottonseed cake and meal report a surprisingly light inquiry for new crop feed. Crushers continue to offer liberal quantities for September and late fall shipment, but prices are out of line with the general views of members of the trade in Kansas City. It is probable that the actual movement of new crop feed will be some weeks later than normally, owing to present crop conditions in the South. Practically no cake and meal of the old crop is available.

THE BY-PRODUCT CORN FEEDS.

The following article on the feeding value of the by-products of the corn industries is not new having been read at a meeting of The American Corn Millers' Federation some time ago, but it is worth repeating in order to familiarize our trade with the meaning of corn millers' being applied to the feeds and with these feeds themselves.

There is in the first place some confusion in the public mind regarding what corn millers mean when they speak of "hominy feed." This understanding, said Mr. E. S. Miller, author of the paper in question, is due to a careless and indiscriminate use of the terms applied to the various by-products obtained in milling corn and among which we find the following: Corn bran, corn feed meal, corn germ meal, gluten meal and feed, hominy meal, hominy chops, hominy feed and corn hearts.

The real difference in the meaning of these terms is determined by the different process of milling. Corn germ meal, gluten meal and gluten feed are by-products obtained by the starch maker and because of this fact we are not concerned in its further consideration, excepting to keep clearly in mind that these terms are applied only to corn separations made by what is commonly termed the "wet process" of corn when milled for starch.

HOMINY FEED.

Hominy feed, hominy meal, hominy chops, corn hearts are synonymous terms used to designate the by-products of corn when milled by what is commonly known as the degerminating process. Hominy feed, then, consists of a re-ground mixture of the bran coating, the germ and a portion of the starchy part of the corn kernel obtained in the manufacture of hominy or hominy grits for human consumption.

Under normal conditions hominy feed should carry about 10 percent to 12 percent moisture, 9 to 11 percent crude protein, 8 to 10 percent fat and 4 to 5 percent fiber. This is a yard stick that may safely be accepted in determining a good grade of hominy feed and is sanctioned by years of trade custom.

Corn bran and corn feed meal are by-products obtained by milling corn by the non-degerminating process and the difference between the two commodities cannot be sharply defined. Pure corn bran is the outer coating or hull of the corn kernel and is put on the market either whole or re-ground; it does not possess high feeding value. It runs low in protein and fat and very high in fiber. But when there is any considerable quantity of the germ and starchy part of the corn kernel ground into the bran, the commodity merges into what is termed corn feed meal.

MISNOMERS OF FEED.

Recently some novices in the corn milling business have misnamed this corn bran "hominy feed." It is a misnomer and should be promptly branded and condemned as such. The reputation of all corn feeds has suffered in the recent past from inferior milling just as much as corn meal and corn flour have suffered. The percentage of fat and fiber in corn feed meal varies with the character of milling or rather the grade of table meal produced. When the non-degerminating corn miller grinds 20 to 25 per cent into the feed he produces on the one side a very pretty piece of table meal, and on the other side, his corn feed meal carries just as much protein, slightly less fat and somewhat more fiber than his neighbor who mills by the degerminating system. These differences mark the boundary line between corn feed meal, and hominy feed. Corn feed meal appears on the market in increasing quantities, with the increased demand for corn goods and to the growing popularity of the non-degerminating system of corn milling, this system being well adapted to the manufacture of straight corn meal and is more economical in operation than the degerminator system.

As already stated, the feeding value of corn feed meal depends almost entirely upon the percentage of extraction. If 20 per cent of the corn ground goes into by-product it will show about 9 per cent protein, 5 per cent fat and 9 per cent crude fiber. If the by-product percentage is increased its feeding value correspondingly increases; if the by-product is decreased its feeding value diminishes correspondingly. The percentage of protein remains almost stationary, but the percentage of fat increases and crude fiber decreases as the volume of feed advances above 20 per cent; the inverse follows when the percentage of by-product is reduced below 20 per cent. The commercial value of corn feed meal is, therefore, entirely dependent upon the character of the milling process followed.

The good name and reputation of hominy feed has not only suffered at the hands of the novice but its feeding value has been somewhat impaired by the degerminating corn miller in recent years, many of whom are now extracting 3 to 4 per cent oil or fat from the corn germ, thus impoverishing the residue as an animal food to that extent.

Just as the modern meat packer uses profitably the hair, the hoof, the horn, the bone and the blood of the animal he kills, which formerly went to waste, so the present day corn miller is finding ways to use profitably much of the stock that formerly enriched his by-product. Doubtless this is good milling and good business, but it adds nothing to the feeding value of his by-product. But abused as it has been by friend and foe, hominy feed still commands a high place among the lower priced animal feeds. Its relatively high percentage of fat, low percentage of crude fiber and moisture are paramount virtues that appeal strongly to the intelligent feeder of farm animals.

Animal Feed Products Defined.

Jewell Mayes, as executive officer of the Missouri commercial mixed feed licensing law, announces the legal or standard definition of this state as to live stock and poultry feeds produced from packing house products, as follows:

"Digester tankage" is the residue from animal tissue, exclusive of hoof and horn, specially prepared for feeding purposes by tanking under live steam, drying under high heat and suitable grinding. If it contains more than 10 per cent of phosphoric acid it must be designated "digester meat and bone tankage."

"Meat scrap and meat meal" are the ground residues from animal tissues exclusive of hoof and horn. If they contain more than 10 per cent of phosphoric acid they must be designated "meat and bone scrap" and "meat and bone meal." If they bear a name descriptive of their kind, composition or origin, they must correspond thereto.

STATE NEWS.

Alfalfa Department

Alfalfa in Colorado is reported grow- very fast.

The second growth of alfalfa in Mon- a is reported yielding low in certain alities.

lo, Ida., reports that alfalfa hay will in demand later on. Just at present hing is being shipped in.

'olfax, Wash., reports that there will more alfalfa and grain hay in that ghborhood than last year.

Spokane reports an easier tendency alfalfa hay with the large buyers porarily out of the market.

'athlemet, Wash., reports this year's crop better than last, although very le is as yet moving. Alfalfa is quoted $26@28.

The alfalfa market at Seattle is ra- r unsettled with an easier tendency, ces being about $2 per ton under se of the previous week and No. 1 ing at $28, standard $26, No. 1 $21.

Alfalfa Prices.

The Bureau of Markets reporting ler date of August 16 has the fol- ing in regard to alfalfa prices in ious markets of the country:

OUTHERN.—Atlanta—Stks. are heavy h No. 1 alf. quoted $36@36.50; std. , $35@35.50. Purchases have fallen in last two weeks acct. high prices high freight rate of shpts. from thwest, 22 cars No. 2 alf. and 5 cars alf. inspected last week. Savannah lo dmd. nor rcts. of alfalfa here, ted ch. alf., $38; No. 1, $36.50. Jack- ville—Stks. mod., rcts. lgt., dmd. ch. alf., $33.50; No. 1 alf., $32.50. sacola—Ch. alf., $34.50; No. 1, $33.50. npa—Stks. fr., rcts. lgt., dmd. fr., alf., $36.50. Birmingham—Dmd. gd., stks. gd., bulk coming from New Mex., ch. alf., $35.50; No. 1 alf., $34. Mobile—Rcts. gd., dmd. gd., Colo. shipping bulk alf., ch. alf., $36; No. 1, $33.50. Montgomery—Alf. rcts. lgt., dmd. lgt., Kansas City supplying bulk of alf., ch., $35; No. 1, $33. Greensboro —Stks. lgt., rcts.-dmd. fr., No. 1 alf., $36@37. Charleston—Stks. lgt., rcts. lgt., dmd. pr. on acct. high prices, Ch., $37; No. 1, $35.50. Meridian—Bulk supplied by North Mississippi, prices unchanged from pre. wk. Vicksburg—Stks. sma., rcts. lgt., dmd. lgt., New Mex. supplying bulk arrivals, ch. alf., $32. Chattanooga—Stks.-rcts. fr., dmd. gd., ch. alf., $34@35.

THE ALFALFA SITUATION.

ALFALFA FINE—FEEDS ACTIVE.

OMAHA.—Crop conditions on the whole in this state are exceptionally good. The last rain was made to order, and came just at the right time. We naturally keep better posted on the crops that interest us most in the manufacture of our feeds, and the information we give you may be relied on as coming from dependable sources.

CORN.—Condition fine, present outlook indicates a production of 185,000,000 bu., nearly thirty millions in excess of last year.

OATS.—Exceptionally good at time of harvesting, indications are for a seventy-five million bushel crop, fifteen millions better than last year.

The alfalfa outlook is splendid. The first crop was a "humdinger" for tonnage, yet the color is brown on the average. The second crop not so large but of better color and texture. The third crop if weather conditions continue good will be a "corker" in every way. The writer has seen some mighty good green hay from the second cutting, but for quality of texture the third cutting will excel as usual.

The sugar beet acreage is the largest in the history of the state, which means a good supply of beet molasses.

The demand for feeds have been unusually brisk for this time of the year. High prices do not seem to scare off the trade.

We believe that general conditions point to the largest feed season we have ever had.

We are regular subscribers to PRICE CURRENT-GRAIN REPORTER, its wealth of general information coming regularly, would indeed be hard to dispense with. —*Washco Alfalfa Milling Co., John R. Talbert, Sales Manager, Omaha.*

Buying of Alfalfa Meal Lags.

KANSAS CITY, Aug. 16.—An easier tone was noted in the market for alfalfa meal in Kansas City this week, despite the higher range of prices noted in a majority of the quotations sent out by the trade. Buyers were inclined to hold off, anticipating usual declines in August and early September. Moderate sales were made over a scattered territory, mostly to the Southeast and East. Oklahoma is reported making liberal sales to the Southeast. Offerings from Kansas were freer in Kansas City.

Choice alfalfa meal was quoted nominally at $38.50@40 a ton in carlots, new sacks, basis Kansas City; No. 1, $35.50@37.50; No. 2, $32.50@34; brown, $31@33.

High prices for grains and other feedstuffs are aiding the market for alfalfa mixed feed. Large quantities of feed are being sold to hog producers, and dairy interests are good buyers. Trade is confined almost entirely to the West and Southwest. Prices were unchanged, closing as follows: No. 1 alfalfa molasses feed, $41@42; No. 2, $38@39; brown, $35.50@37; alfalfa grain molasses feed, $48@60.

MINNEAPOLIS, MINN.
General Receivers and Shippers of
GRAIN and FEED STUFFS

Natural Law Still Holds.

The advance in live stock in face of the agitation against the high cost of living shows that supply and demand still rules. And while we are on this subject of the high cost of living, it might be well to call attention to the fact that publications which gave so much space to the Government's threatened attack on the packers for their part in the high cost of living are now devoting columns to the outrageous prices charged by the retailer, whom they find to be the real bandits, and we now hear little about the packers being to blame. We have always claimed that the retailer was the real cause of the high priced meats, but we neglected to say that the housewives are also to blame in part.—*W. G. Press & Co., Chicago.*

English Wheat Crop.

The London *Grain Reporter* July 25 says the weather has become "deplorable" and unless there should be an immediate change the harvest would be delayed and the grain garnered in poor condition. The crop owing to spring drought is 5% below average in even the best districts and on the whole may run as high as 10% below the average. The old native crop is practically exhausted, except for the lots in millers' hands.

Unrest Conference.

The Illinois Manufacturers' Ass'n has called a conference at the Congress Hotel, Chicago, on Sept. 8, to consider the causes of our National unrest. Program will appear later.

Are You Handling Feeds?

TRADE BICORN MARK REG. U.S. PAT. OFF.

Do you know that there is a great, unsatisfied demand for a real good hog feed?

BICORN Hog Feed surprises the farmer with its growth-speeding efficiency.

One dealer in Ohio has placed NINE REPEAT ORDERS for carload lots in the past two months.

BICORN is what YOU want—a self-selling, quick-moving hog feed, with satisfied farmers recommending it to their neighbors.

BICORN is the most up-to-date, correctly-made feed for growing pigs and breeding stock.

Write us for prices and full information. Will be glad to send our representative. The hog-feeding season is on—act now.

Hay Department

Seattle is quoting No. 1 timothy at $33.

At Cathlemet, Wash., timothy is offered at $30@34 per ton.

The first cutting of oats in Washington is being made into hay.

Ranchers in some parts of California are putting up barley hay.

The Utah alfalfa crop is reported improving, but still is only in fair condition.

Spokane, Wash., reports good inquiry for timothy, prices of which are stronger.

The hay crop in West Virginia is now about all made, the clover and alfalfa being very good.

Alfalfa and the meadows and pastures generally in South Dakota are reported in good condition.

Alfalfa crop in Nevada is reported fair to good in all portions of the state except in the northeast.

Colfax, Wash., reports the timothy yield in that neighborhood much in excess of local requirements.

Newport, Wash., reports no local hay or grain on that market as yet, although the hay crop exceeds that of last year.

Kalispell, Mont., reports the hay crop very short and that it is doubtful if there will be sufficient for local demand.

Grandview, Wash., reports hay being shipped out from that neighborhood, the crop being above normal and of very good quality.

Alfalfa hay in the Beaver Valley of Wyoming has been selling at $15 per ton stack measure, equal approximately to $25 per ton baled.

Hay buyers in North Dakota are paying $14@16 for upland hay on track for shipment to Montana, while it is bringing about $30 a ton delivered.

Silverton, Ore., has large surplus of hay, one-half to two-thirds of which will be available for shipment. It is now being baled and held at $18@20.

Clover hay in Ohio this year according to the Coöperative Crop Report Service averages 1.33 tons to the acre or an acreage of 85 per cent of normal.

Hillsboro, Ore., reports the hay crop surplus far above that of last year. Growers are offering freely of both wheat and hay. Oats offerings moderate.

The state treasurer of North Dakota, who is also a farmer and rancher in Bowman County, says recent rains have made plenty of grass, enough to take care of cattle until cold weather.

Savage, Mont., reports drought conditions there bad. There will be some alfalfa in the valley, but not enough for local demand, and farmers are cutting thistles for feed and contracting for straw on the irrigated lands.

Dubois, Ida., reports the hay crop shorter than last year and cattle are being shipped to the Middle West points for feeding, buyers not being disposed to pay the prices asked for hay. Grain crops there are practically a failure.

Field Agent Fessenden of Illinois reports that about 85 per cent of the usual acreage of clover was harvested this year in Illinois, the average being 1.42 tons per acre. The quality of the hay is 94 per cent of a high medium grade.

Southeastern Wyoming has a fair crop of hay but will have none to ship, as the supply of straw on which feeders depend a good deal is short. It is probable the amount of fodder will be able to carry the stock through the winter.

Field Agent Ramey of Mississippi estimates about 37,000 acres of alfalfa in that state, an increase from a little over 9,000 acres in 1909 or in ten years. In 1918 the total production was 133,000 tons, averaging about $29 per ton in value.

The Shoemaker Co. at Auburn, N. Y., has been incorporated for the purpose of buying and selling hay with $50,000 capital. The directors for the first year are Wm. Shoemaker, Florian W. Shoemaker of Oakwood, N. Y., and Newton D. Arthur of Jersey City.

Toberman, Mackey & Co., St. Louis, report that the demand for hay in that city and for shipping is mainly for top qualities which have been steady and strong with indications of even better prices. Medium low grades are in surplus with the market dull.

Farmers in the neighborhood of Great Falls, Mont., are working through county agents to secure Minnesota hay. Some farmers have even gone to Minnesota to help harvest. Freight rates now on hay and feeds are half rates. Upland hay is being offered at Great Falls at $23.

The field agent of Michigan reports the hay crop was secured in that state in excellent condition and it is estimated at about 5,300,000 tons, although the total acreage was 5 per cent less than last year and clover 14 per cent less. The yield of clover runs about 1.15 tons per acre.

A stock grower from Encampment, Wyo., reports the grass on the lowlands in that vicinity as burned up, but on the higher ranges fairly plentiful. On the irrigated land a normal crop of hay was raised. On the whole the number of cattle forced out of that part of the state by drought is very small.

KANSAS CITY HAY NOTES.

SANDERS SOSLAND, CORRESPONDENT.

Compared with a year ago, the hay market in Kansas City is unchanged to $9 a ton lower. Alfalfa prices range between $2.50 and $5 a ton lower than a year ago. Prairie is $5 to $8.50 a ton lower than a year ago. Clover shows recessions of $4 to $9, clover mixed is unchanged to $5 lower and timothy is $2.50 to $6.50 lower.

Rains fell two evenings in Kansas City last week. Rainfall in the forenoon interrupts trade in hay under the plugging system. The weather has therefore been friendly to the trade in Kansas City lately. But increased moisture in recent weeks would have enlarged the yield of alfalfa to the profit of the Kansas City market so far as volume of trade is concerned, so it could afford to have interruptions from rainfall even during its trading hours. A general, heavy downpour in the Southwest would help increase the available surplus of hay for shipment to Kansas City.

"Despite the critical condition of pastures in the drouthy areas of the Northwest, graziers of that territory are not buying hay in large quantities on the Kansas City market as yet," reported Roy D. North of the Midwest Hay Co. "But it is probable that the cattlemen and flockmasters of Montana, Wyoming, Idaho and other states included in the drouth territory will be heavy buyers during the fall and winter period. In fact, some already are inquiring as to the outlook for prices and supply for the winter period, anticipating large purchases at that time.

Kansas, the first state in prairie and alfalfa shipments to the Kansas City market, is not reporting as favorable feed conditions as hoped for by dealers who want to draw heavily on her hay. The state received some scattered rains the past week, but her corn has deteriorated rapidly, and the prospect is now for a crop of only 86,000,000 bushels. It is doubtful if such a harvest is realized. "Pastures are making little or no growth," said the state weekly crop report for Kansas. "The third crop of alfalfa has been cutting the southern counties and is making little growth elsewhere. Grain sorghums are generally reported in good shape despite the drouth." Additional rainfall is needed over Kansas to improve pasturage and the condition of alfalfa fields. With dry weather, it is only natural to find Kansas growers of hay, especially alfalfa, less eager than expected to make sales on the Kansas City market. Prairie is a large crop in the state, but the volume of sales is affected by the production of other feedstuffs.

"Cutting of prairie hay in Kansas is becoming general," declared C. D. Carlisle of the Carlisle Commission Co. in discussing the prairie market outlook. "The quality of the wild hay this year still is weedy, and it is probable that much of the offerings to be received on the market from the cutting now in progress will be of brown color owing to the high and dry temperatures during the late growing period. Farmers of the state have been rushed with other work, particularly that of gathering and threshing the near record crop of wheat, and prairie making this season is later than normal. Yields of prairie are large this year, the abundance of rainfall early in the growing period causing rank growth with a heavy undergrowth. So much commercially unmarketable roughage is being produced in the Southwest this year that I believe we will see increased offerings of prairie in the face of the deterioration in corn and recent

ather in Kansas. The farmers of nsas who raise prairie have learned substitute commercially unmarket-e feeds for prairie and to sell the y."

What effect will price agitation in d markets have on the trend of tations on hay? If markets for hogs d cattle and corn continue to decline rapidly as in the past week, this stion will become vital to the hay de. There is a relationship between n and alfalfa and between these ducts and hogs which is close, it is parent. Alfalfa advanced last week ause of the bullish supply situation, ile corn futures and hogs broke. If tle recede further, there is a likeli-d of heavier marketing and less ding, which might affect hay. In the e of hogs, prices have not yet ched a sufficiently low level to act a depressing influence on alfalfa, corn has been affected to a degree. is probable that cattle and hog prices remainder of the year will average siderably below the quotations of past seven months. For the pres-, hay prices do not appear high when pared with corn, cottonseed cake l millfeed. Sentiment among pro-ers as to the hay market has not yet nged materially enough to bring ut increased selling.

OMAHA HAY NEWS.

J. C. PEDERSON, CORRESPONDENT.

I. J. Hyland of the Omaha Hay Co., ived home from his trip East having n gone 3 weeks and reports that he had a fine time.

oy North of the Midwest Hay Co., Kansas City, Mo., was a visitor this k on the market.

eceipts of both prairie and alfalfa e been light and the demand is not y brisk so there is no life to the ket at present.

HAY SITUATION.

NO SURPLUS OF HAY.

NDIANA (4): Hay in this vicinity is in any great amount above what be fed—possibly 20 cars. — *W. T. non, Kewanna, Ind.*

HAY DAMAGED.

ANSAS (5)—The first cutting of hay e while quite heavy was damaged continued wet weather and but little ice hay was made. The second crop been quite light owing to the severe weather and worms, there is prac-lly none left for a seed crop.—*The gwick Alfalfa Mills, W. M. Congdon, gwick, Kans.*

HAY IN CENTRAL MONTANA.

IONTANA (5).—The new hay crop e is practically all timothy and a y large per cent is of good quality well made.

he generally good condition of the makes hay buying look apparently and therefore has brought out a e number of inexperienced buyers. s fact has had a tendency to advance price level above a safe business s. This high price level to the pro-er, coupled with the inexperience of y buyers and the present erratic ket, no doubt, will be followed by e experiences long to be remem-d by some of these new buyers long r some have forgotten that the mar-had a severe setback during the au-n of 1919.

he J. M. Carmer Co. has sold out and quit business. But the individuals doing some hay business. The er, who was manager of the old pany, is in the business here and shipped a number of cars to nearby kets. This hay has arrived at des-tion in very good condition—none t having heated.—*E. C. Walker, Au-a, Mont.*

Hay Stocks.

he Bureau of Markets reporting er date of Aug. 16 has the following egard to hay stocks throughout vari-parts of the country:

Hay Markets

PITTSBURGH, PA.

Aug. 16.—Conditions are practically unchanged from last week. The market is dull and there is more than enough hay of various grades coming into the market at present to meet the indifferent demand. Good grades are holding steady, while the lesser grades are moved with concessions in prices. Buyers, however, do not appear to be attracted by present conditions and are taking only what they need for the immediate future. Shipping advices are increasing, according to Supt. Alexander, of the local exchange, and unless there is a corresponding increase in demand lower prices are bound to be quoted in a few days. No. 1 timothy, which is scarce, is selling at $36.50@37.50 a ton. Other grades range from $33.50@34.50 down to $24.50@25 a ton. About 720 tons were bulletined as against 338 tons for the corresponding period in 1918.

BOSTON.

Aug. 16.—The receipts of hay during the past week continued light, partly owing to the embargo placed by the railroads on account of labor troub.es, and also to the fact that shippers show no inclination to move hay to this market. Receivers are, therefor, short of good hay, which if obtainable would sell even higher than prices quoted. As the above situation is only temporary, prices no doubt will rule lower as soon as the labor differences are settled and more hay is sent to the market. There is more inquiry for new hay. As quality and conditions are satisfactory, buyers show no hesitancy in taking hold at the ruling discount of several dollars per ton under prices of old hay. New hay is quoted higher at $37@39 for large bales with small bales at $35@36. Old No. 1 timothy hay is quoted at $40@42 per ton for the small amount offering, with some receivers claiming that fancy cars will bring still higher prices. No. 2 timothy ranges at $36@38. No. 1 Eastern takes a range of $33@37, with No. 2 Eastern unchanged at $30@32. No. 3 hay is held steady at $28@30. The range of clover mixed, all grades, is unchanged from last week, at $26@30. Fine hay takes a wider range at $24@27. Receipts for the week ending Aug. 16 were: Local, 32 cars.

The straw market is dull with a good demand and offerings light. Choice rye straw is quoted at $16@16.50 per ton as extreme, with oat straw at $12@13. Receipts for the week ending Aug. 16 were: Local, 1 car.

LOUISVILLE, KY.

Aug. 16.—Hay prices are firm and the market shows no change. Receipts are light and demand fair. Farmers are busy in the fields and transportation has been poor.

Quotations are: Baled, No. 1 timothy, carlots, Louisville, $31.50 per ton; No. 2, $30; No. 1 mixed hay, $31; No. 1 alfalfa, $29.50.

NEW ORLEANS, LA.

Aug. 16.—Our market at this time has sufficient consigned and bought hay to keep the consuming trade supplied. No. 1 timothy has been offered as high as $40, while others have quoted as low as $33. Receivers here are selling No. 1 at $33, No. 2 at $32, and No. 3 from $29@30. Market on prairie hay is swamped; very little demand; shipping prices range from $18 per ton delivered. No. 1 alfalfa being quoted at $33 per ton weighed up.

MILWAUKEE.

Aug. 16.—The local hay market continues in its upward course with prices generally advancing $2@3 with receipts of hay light. According to state reports the hay crops in Wisconsin suffered little from the dry July weather, the crops being cut generally over the state before the drought became severe and the weather was ideal for harvest. A total production (both tame and wild hay) of 5,437,000 tons is forcasted by Aug. 1 conditions, as compared with July forecast of 5,713,000 tons. The 1918 production was 4,338,000 and the five year average, 4,470,000 tons. The new timothy is quoted at $30@35 as compared to last week's quotations of $30@33. Current quotations are: Choice timothy, $35@36; No. 1, $33@34; No. 2, $30@32; new timothy, $30@35; No. 1 clover, $20@23; light clover mixed, $28@30; red top and timothy mixed, $28@30; marsh feeding, $18@20; packing, $11.50@12; rye straw, $10.50@11; oat straw, $9@10.

DETROIT.

Aug. 16.—There is no increase in the supply of hay in this market and the tone continues strong. Consumers have difficulty securing a sufficient supply owing to the fact that farmers have not enough help to be able to market freely. Quote: No. 1 timothy, $31@32; standard and light mixed, $30@31; No. 2 timothy, $29@30; No. 3 timothy, $25@26; No. 1 mixed, $27@28; No. 1 clover, $25@26 per ton.

NASHVILLE.

Aug. 18.—Fair demand is noted for hay. Quotations: No. 1 timothy, $31.50@33.50; No. 2 timothy, $30@32; No. 1 clover, $33.50 @34.50; No. 2 clover, $31.50@32.50; alfalfa, $32@35. Receipts of hay at Nashville last week were 32 cars.

DULUTH.

Aug. 16.—Conditions improved materially in the hay market during the last week, a better demand being reported from dealers and feeders. The market in both timothy and prairie hay showed improvement and it firmed up $2@3 a ton in the former. Midlands were advanced $1. Receipts were light during the week, amounting to only five cars, but considerable loose hay came in from points in the district. Prices are as follows per ton: Timothy—No. 1, $27@28; No. 2, $24@26. Mixed timothy—No. 1, $25@26; No. 2, $16@20. Prairie—No. 1, $23@24; No. 2, $21@22; No. 3, $16@18. Midland—No. 1, $19@20; No. 2, $14@16. Straw—Rye, $9@10; oat, $9@10.

MEMPHIS.

Aug. 16.—Hay continues quiet and receipts have been moderate all the week. There is a firmer feeling in alfalfa on that account, as offerings have not kept pace with demand. Buyers and sellers are still somewhat apart, but demand is not pressing enough to induce much business. On call today no bids were made for timothy, but No. 1 was offered at $33, with $30 asked

THE FITZGERALD BROS. CO., CINCINNAT OHIO

for No. 2. Cash No. 1 alfalfa was $31 bid and $33 asked, $29 was bid for standard and $26 for No. 2. Some little clover mixed is coming and $31 was bid for No. 1 light.

CINCINNATI.

Aug. 19.—The general improvement reported in the railroad situation was not reflected in the local movement here the past week, and offerings were below the daily requirements of the trade on all days. Car scarcity was held responsible. As a result a stronger market prevailed and advances of $1.50@2 were recorded for all descriptions. Clover hay, of which there exists an extreme scarcity, was especially in urgent request, and probably considerably better than quoted prices would have been realized for any available. Choice timothy and mixed were in eager demand, but common and ordinary also sold well. The demand was wholly local as shipping is still curtailed by the relatively higher prices current here.

Timothy—No. 1, $33.50@34; standard, $33@33.50; No. 2, $32@33; No. 3, $27@31; threshed, $19@21. Light clover mixed, $32@33. Clover mixed—No. 1, $31@32; No. 2, $29.50@30.50. Clover—No. 1, $31@32; No. 2, $28@30. Local alfalfa—No. 1, $31@32; standard, $30@31; No. 2, $26@28. Straw—Wheat, $10@11; rye, $11.50@13; oats, $10@11.

PHILADELPHIA.

Aug. 16.—The market continues quiet but firm under light offerings. The demand is fair for desirable receipts which are well cleaned up, and No. 1 hay is so scarce that a premium could be readily obtained on any that might be offered.

Demand for straw is limited but stocks are small and prices well sustained.

Timothy hay (according to location)—No. 1, nominal; No. 2, $36@37; No. 3, $32@33. Clover mixed hay—Light mixed, $36@37; lower grades, $31@35. Straw—No. 1 straight rye, $13.50@14; No. 2, $12.50@13; No. 1 tangled rye, $13@13.50; No. 2, $12@12.50; No. 1 wheat straw, $12@12.50; No. 2, $11@11.50; No. 1 oat straw, $12@12.50; No. 2, $11@11.50.

BALTIMORE.

Aug. 16.—There has been a continued firm tone to the local hay situation the past week, with receipts and offerings really insufficient for trade wants, old hay of desirable quality being hard to get hold of, while the few cars of new crop thus far to hand have been mostly in warm condition. New hay arriving in good order would sell well up to corresponding grades of old.

Straw of all descriptions is in moderate supply on spot and firm under a fair jobbing demand. Quotations follow (for old hay nominal):

Timothy—No. 1, nominal, $45; standard, $44.50; No. 2, $44; No. 3, $40@42.

Light clover mixed—No. 1, $42@43; No. 2, $41@42.

Clover mixed—No. 1, $41@42; No. 2, $39@40.

Clover, nominal—No. 1, $37; No. 2, $35. (New hay, if in condition, sells at from $1@1.50 per ton under corresponding grades of old, as to kind and quality.)

Straw—No. 1 straight rye, $16@16.50; No. 1 tangled rye, $14@14.50; No. 1 wheat, $11@11.50; No. 1 oat, $13.50@14.

BUFFALO.

Aug. 16.—The big hay crop in this state and Canada is worrying the farmer as he is unable to get buyers to bid. He also knows that speculation was the main cause of the high prices valued on the old crop. Prices must go away lower before anything will be done. There is no market here at present.

OMAHA.

Aug. 16.—Receipts light on both prairie hay and alfalfa, while the demand is fair to good on the better grades of hay. Alfalfa continues steady. Market some higher on prairie hay.

Upland prairie—No. 1, $23@25; No. 2, $20@22; No. 3, $10@15. Midland prairie—No. 1, $22@24; No. 2, $18@20. Lowland prairie—No. 1, $15@18; No. 2, $12@14; No. 3, $8@10. Alfalfa—Choice, $26.50@27; No. 1, $25.50@26; standard, $21.50@25; No. 2, $17.50@21; No. 3, $14@17. Straw—Oat, $8@9; wheat, $7@8.

SEATTLE.

Aug. 11.—Eastern Washington timothy, mixed, $36@37; double compressed, $40; alfalfa, $31@32; straw, $15@16.

SPOKANE.

Aug. 11.—Timothy, $36 per ton delivered; $34 by carload; alfalfa, $32 per ton delivered.

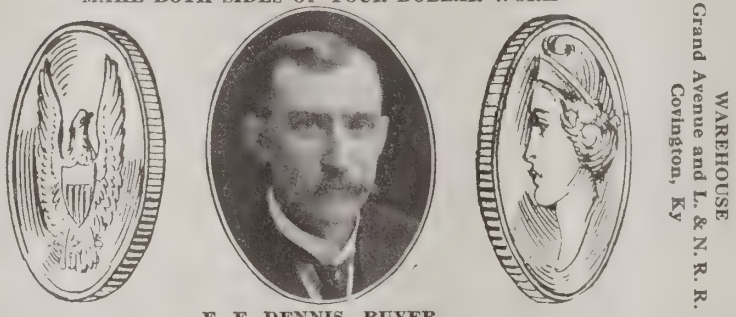
MONTREAL.

Aug. 15.—It is stated that a country dealer who could not get a bid for three cars of No. 3 hay in this market, shipped the lot to New York on commission where it was sold for $40@41 per ton. This lot of hay cost the shipper $20.75 f. o. b. at point of shipment, showing an ample margin of profit. The shipper declares he made $8.25 per ton on the three cars after paying commission. A Montreal firm also received account sales of $42 per ton on a lot of No. 2 hay from its New York correspondent. It seems strange that values should reach such exorbitant prices at the commencement of the new crop when there are less horses to feed, owing to the automobile craze, driving so many of the noble animals out of the market.

The old crop of hay in this province is pretty well exhausted, and the new crop is not yet in fit condition to ship. The market is quiet but firm. Sales have been made at $29@30 for No. 2, and at $25@26 for No. 3. Quite a few loads of loose hay are arriving from nearby points and helping to meet the demand.

The receipts of hay during the last week at Montreal were 6,675 bales, against 8,726 bales for the same week last year.

The firmer feeling reported by us last week has gained further strength, No. 2 being quoted at $30 and No. 3 and under, $25.—Trade Bulletin.



NEW YORK.

Aug. 16.—The New York Hay Exchange reports as follows:

	Hay tons	Straw tons
Receipts for week.....	4,537	290
Receipts last week.....	4,679	400
Receipts Sept. 1 to date.....	217,780	13,958

The market has shown a weaker tendency the past week and prices have declined on all grades, the situation as a whole being in buyers' favor with marked weakness shown on medium and low grade small baled hay. Receipts have not been heavy but the trade has held off and the removal of the embargo against 33rd St. shed has had a natural sentimental effect on buyers and resulted in an increase in invoices toward the close. Most of the hay arriving is still old goods, though there are a number of cars of new in transit and a little new hay has arrived by Catskill Line boats. At 33rd St. shed there were 105 cars unloaded from Aug. 8 to 14 inclusive, trade slow at all times, and, while there has been a fairly steady holding of large baled hay which is scarce at the moment, the small bales have dragged and prices on low grades are very materially lower. There has been a fair supply of hay at Brooklyn points, trade fair and prices on a par with 33rd St., small baled hay averaging even higher on the sales reported.

There has been very little No. 1 timothy available. If here it would probably reach $46 at 33rd St. and in Brooklyn, and one car of small bales sold the past day or so at $45. No. 2 in big bales is also in light supply with sales at $43@44, one or two

KANSAS CITY.

Aug. 16.—Slightly higher prices marked the trade in hay in Kansas City this week. Prairie closed with a gain of 50c a ton, while alfalfa, timothy and clover mixed show a rise of 50c to $1. Receipts fell off rather sharply, amounting to 704 cars, compared with 939 cars last week and 788 a year ago. Scarcity of cars and labor in the country, together with a tendency to hold supplies for higher prices, accounts for the slackened movement of hay. Demand for alfalfa and timothy, in fact all varieties of hay, continued keen, with the South and Southeast supplying a broad outlet. Shipments were made to the Northwest, but not in a large volume. Clover was unchanged. The scattered offerings of straw sold at steady prices.

Prairie—Choice, $21.50@22; No. 1, $20.50@21; No. 2, $18.50@20; No. 3, $11.50@18; packing hay, $6.50@9.

Midland prairie—No. 1, $15.50@17.50; No. 2, $10@15.

Alfalfa—Choice, $28.50@29; No. 1, $27@28; standard, $23.50@26.50; No. 2, $19@23; No. 3, $16@18.50.

Timothy — No. 1, $25@25.50; standard, $23.50@24.50; No. 2, $21.50@23; No. 3, $16@21.

Clover mixed—Light, $25@25.50; No. 1, $23.50@24.50; No. 2, $18@23.

Clover—No. 1, $21@23; No. 2, $13@20.50. Straw, $8@8.50.

ST. LOUIS.

Aug. 16.—Timothy hay market is strong, with an active local demand for the better grades of timothy and high prices are paid for anything offered of that kind. The medium and lower grades are rather quiet and slow, due to lack of shipping demand. Quote:

Timothy—No. 1, at $31@33; standard, $29@30; No. 2, $25@28; No. 3, $21@23; threshed timothy, $29@21. Light clover mixed—No. 1, $29@30; No. 2, $26@28. Heavy clover mixed—No. 1, $28@29; No. 2, $26@27. Clover hay—No. 1, $29@30; No. 2, $26@28. Alfalfa hay—Choice, $35@36; No. 1, $33@34; standard, $31@32; No. 2, $28@29. Prairie hay—Choice, $26@27; No. 1, $24@25; standard, $23@24; No. 2, $20@21. Straw, $7.50@8.

SAN FRANCISCO.

Aug. 15.—As has been the case for the past two weeks the most of these receipts, 2,727 tons, came by water. The car situation throughout the country seems to be becoming more acute daily. Very few box cars being furnished for hay movements, and although some gondola cars are to be had yet as this equipment cannot be used to carry hay where tunnels have to be encountered this makes it difficult to ship hay to many points where it is required.

The market has been well maintained and prices are about as quoted. Occasional shipments of fancy red oat or fancy wheat hay at times bringing in excess of our quotations.

There has been a good demand for alfalfa, especially throughout the country districts; this with the grinding of so much alfalfa hay into meal has had the effect of making a very firm market.

There is no demand for straw.

Fancy wheat hay (light 5-wire bales), $17.50@18; No. 1 wheat or wheat and oat hay, $15@17; No. 2 wheat or wheat and oat hay, $12@14; choice tame oat hay, $15@17; other tame oat hay, $12@14; wild oat hay, $10@13; barley hay, $12@15; alfalfa hay, $17@21; stock hay, $9@11; No. 1 barley straw, 50@80c per bale.

CHICAGO.

Aug. 19.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending Aug. 16, also the total receipts and shipments of hay from Jan. 1, 1919:

	Aug. 16, 1919.	Aug. 9, 1919.	Aug. 17, 1918.
Total receipts	2,122	2,370	1,801
Total shipments	47	203	184
Rcpts. since Jan. 1.	151,087	148,965	213,930
Shpts. since Jan. 1.	34,750	34,703	65,665

Although the record shows a slight decline in volume of receipts, the hay came in in a bunch as the railroads "cleaned up" after the turn of a week and prices suffered somewhat. The over-Sunday receipts also were heavy—116 cars of timothy and 32 of prairie, and prices did not recover, although the trade think the situation is temporary only and expect an improving market. Quote Monday as follows:

Timothy, new—No. 1, $34@35; standard, $33@34; No. 2, $31@33; No. 3, $26@30; sample, $20@26; thresh., $15@20.

Clover—No. 1 light clover, $33@34; No. 1 clover mixed, $28@31; clover, $23@26.

Prairie—Kansas and Okla., $24@27; Ia., Minn., Dak., $24@27.

Marsh hay—Feeding, $18@22; packing, $14@15.

Straw—Rye and oat, $11@12; wheat, $9@10.

Hay in New England.

The American Steel & Wire Co.'s report for the week ending Aug. 9 says of hay and fodder in New England states that in western Maine hay is fair; pastures and clover good; southern part hay and clover very good, pastures fair; in the west, pastures dry, but the hay crop better than in 1918, dairying satisfactory; in the northern part, hay crop extra good, pastures and clover good. In New Hampshire hay was below the average in the central parts and pastures drying up, dairying below average; northern part, pastures, hay and dairying good, clover fair; in western part, pastures and hay lands were drying up, first crop of clover was good, no second crop, condition of pastures reflected in the falling off of milk production. In western Vermont pastures and hay good, clover excellent; in southwestern part, pastures good, hay fair, nearly all harvested, some second crop of clover, dairying good; in the northeast pastures were dried up and the hay was a poor crop, dairy cattle suffering for want of grazing; in the northern part, pastures are dry to extremely dry; hay, however, was a bumper crop harvested in fine condition. Throughout Rhode Island the hay and clover very good to excellent, pastures good. In Massachusetts hay and dairying good in the western part, hay bringing $28@30 per ton, ample supply and good demand; northeastern part, hay and clover fair, dairying about an average; southwestern Massachusetts, clover pastures good, hay fair. In northwestern Connecticut pastures are in good condition but hay was damaged by rains, although the crop was large, dairying was up to standard; in the northeast, pastures very good, hay was a good crop but considerable lost in harvesting on account of rains, dairying good.

Corn Crop Saved.

The corn crop is saved; recent rains over the important part of the belt have been sufficient to insure a bumper crop; it should be three billions or better. Corn is maturing very fast and there is little danger of damage from an early frost. Our reports are most optimistic. The trade were surprised at the heavy offerings of old corn last week; nearly half a million bushels sold to arrive from Iowa and Illinois at a considerable discount under spot prices. This is the best proof that the new crop is all right. —*W. H. Perrine & Co., Chicago.*

Visible Supply of Oats.

Official statement of the visible supply of oats weekly, compared with same weeks of previous three years:

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, Aug. 18.—Lowest prices of the season were made for hog products last week and hogs sold at the lowest in many months. The close on lard and ribs was at practically the low point with lard off $2.15 to $2.35, the latter on October, and short ribs were off $1.45 per 100 lbs., while pork after a decline of $2.60 reacted and was 75c above the low point at the close with a net loss of $2.85. Hogs showed a loss of $3.50 from the high point of the week, taking the general average.

New speculation has been out of the buying side of provisions for some time past and the constant agitation by the government for lower food prices, combined with threatened seizure of stocks of meats, butter, eggs and poultry were not conducive to increased speculative buying support, despite the fact that prices had dropped to the lowest of the season. In thirty days there has been a decline of $8.60 per barrel on pork, $6.20 per 100 lbs. in lard and $3.87½ on short ribs.

A great deal of liquidation and short selling was on as a depressing influence, while the buying support at times was fair and sharp rallies followed the break. Packing interests were sellers on bulges and buyers on declines. Export business was limited and advices from England were discouraging, although there was a little inquiry for lard at one time and some business closed. Domestic trade was light and existing conditions tend to restrict purchases. One of the leading packers asserts that the people who formerly bought the cheaper meats are not content with them now, but insist on having the higher grades, which increases the demand for the latter and cuts sales of the cheaper grades. A small lot of meats seized by the Government at Louisville, Ky., is said to have been hog ears which have been used by the negroes there in past years when their visible supply of money was limited, but now they have passed the hog ear period and want pork chops.

Lard stocks August 15 decreased 3,665,000 lbs. from August 1, and compared with 43,223,000 lbs. a year ago, while two years ago they were 56,891,000 lbs. Short ribs decreased 482,000 lbs., while last year there was a reduction of 1,095,000 lbs., and extra clears decreased 500,000 lbs., against 349,000 lbs. last year and all show material under a year ago. Few short ribs are being made and the run of lard is said to be lighter. Prospects are for a larger supply of hogs during September and some of the hog people predict an early movement of spring pigs.

Range of prices in July and previous and for the week follow:

Kansas City Provision Review.

KANSAS CITY, Aug. 16.—Radical declines in hog prices were followed by sympathetic losses in the provision market in Kansas City this week. Owing to the continued agitation against the cost of living and governmental investigation of stocks of food, buyers appeared nervous and many withheld purchases until more settled conditions prevail. The bulk of the fresh and frozen pork shipments from this market were made to the East. Eastern buyers also displayed an eager demand for frozen pork offal. The South was a moderate buyer of dry salt and heavy smoked meats, but sales to that territory showed a slight falling off. Fancy hams and bacons were in fair demand, local sales being of fair volume.

Above and all others	14,362,000	14,054,000
For the week	358,000	445,000
Preceding week	359,000	453,000

Weights are reported as follows: 247, 262, 187, 230, 207, 198, 207. Reports of quality: Two "good," one "fair to good mixed," two "fair," and one "common to good."

Cash Meats.

There was a decidedly weaker feeling in the hog products market Monday, influenced by the decline in grains and Wall street securities. Offerings of mess pork were large, but trades were mostly in the September future. Demand for lard was negligible, offerings liberal and a decline in prices of $1.20 @1.35 on the range, later rallying about 30c. Short ribs shared in the general slide, declining $1.70, with but a slight rally at the close. Quotations as of Aug. 18 follow:

Live Stock Market

CHICAGO LIVE STOCK.

CHICAGO, Aug. 18.—Cattle and shippers experienced one of the periods they have ever had the week. Hog prices advanced ear $23.50 as the top, or within 10c o record level. Saturday saw the l prices in months with the top figur or $2.50 below the highest point o week and the general average under that of Wednesday. Declin $1 were made on three separate and on Friday the loss was $1.50 on the various grades. The big of packers cost $17.85 to $19 on S day, the bulk of them being below $ Shippers were fair buyers and th packers bought commoner groves. ity was poorer with a liberal perce being heavy and mixed packing most instances light hogs suffere worst decline.

Supplies early in the week were but increased latterly. The sam fluences that depressed values of product had a depressing effect hog prices at the Yards. There 19,000 left over on Friday and 7,0 the close Saturday. Receipts her the week were 101,817, against 75,1 previous week and 112,449 last Average price was $21.25 for the or 20c lower than the previous and $2.25 above last year's. Pa bought 87,200 hogs for the week, a 66,000 the previous week and 1 last year. Average weight was 24 compared with 244 lbs. the pre week and 237 lbs. last year.

The eleven markets had 345,000 for the week, against 327,000 the ious week and 391,000 last year. twenty markets had 398,000, an in of 27,000 for the week.

Cattle prices dropped $1 to $3 the high point last week, the he decline being on the better g Choice beef steers sold early at to $19.35, some yearlings bringin inside figure. Latterly, however was considered a good price for lings. Improved railroad conditio creased the receipts and with sh indifferent buyers and the agitatio beef supplies and prices by the G ment had a depressing influence.

So far the Government has no ceeded in cheapening the cost of to the consumer and has caused s losses to the country shippers and raisers. Average price of beef for the week was $17.30, against the previous week and $15.30 last The high average was due to the prices secured early in the week. ern range steers were off 75c fro highest. The supply was not larg indications are for a better run. ceipts for the week were 62,261, a 42,171 the previous week and 58,7 year. Shippers operated to a li extent, and shipments fell off 5,1 the week and 1,400 from last year. and heifers declined $2 with t mand slower and quality larger grade. Choice heifers sold up to and yearling steers mixed brough At the close good cows were arou and few heifers were good enou bring over $14, with the common and heifers down to $8.50. Bull up to $10 early and were off $1 Canners and cutters lost only 25 with sales at $6 to $7.50. With supplies of calves and a good d prices advanced $2 with the top $

Stockers and feeders were a traded in with supplies liberal sales were at $9 to $13 with fancy ing flesh that could be turned quickly to $13.75. Selected st brought $10 to $11. The eleven m had 314,600 cattle for the week, 100 more than the previous week.

Sheep and lambs did better. Top on lambs were $18 with the b sales at $16.25 to $17.75. Top on was $11.25 with the bulk of sa $9 to $10.75. Average was $10,

ıer than the previous week and com-
·d with $13.75 last year. Lambs
aged $17.05, or 55c higher than the
ious week and compared with $18.10
year.

Omaha Live Stock Market.

·uce McCullough, Correspondent.

ha, Aug. 16.—Supplies of corn-fed
were rather liberal all week for so
the summer. General quality was also
ılly good. The week opened with ad-
on all classes, but a reaction soon
on all but the prime lots, and even
:ere carried down towards the close
week. Prices at the close were 25@
:er than at the high time. Best grades
ll selling strong to 25c higher than a
ago, all others being barely steady
e week. At the best time prime
steers reached $18.50@18.85, the
price a new record here. Good to
grades closed at $16@18.50. Butcher
was in urgent demand all week, and
l an average advance of 25@50c, good
ice cows and heifers showing the
st advance. Corn-feds, only a few
:h are coming, move at $11@14, with
ıle range cows and heifers at $9@12,
n kinds at $8@9, and canners and
at $6@7.50. Calves advanced $1@2,
; good light and medium weight
up to $12@14.50. Heavy runs of
:d Western calves have been respon-
)r the relatively low levels in veal
Bulls are unchanged with bolognas
3.25, and butcher grades at $8.50@12.
:· and feeder demand exceeded the
again this week, and prices scored a
0@75c upturn. Good to choice feed-
bringing $12@14, medium to good
12, and the best stockers $10@11.50.
beeves were in light supply after
r, and desirable kinds closed steady
tle higher than a week ago. It was
)ing all week on plain cattle, though
showed no great change. Receipts
little larger than a week ago, but
ther moderate, totaling 34,800 head.
heavier runs are expected for the
·o weeks owing to the improvement
rail situation and the attractiveness
ient prices. Good to prime grass
are selling largely at $12@15.25,
ıs around $10@11.50, and Southerns
in Westerns on down to $7.
hog trade has been an extremely
affair, fluctuations being the most
ever seen here even in panic times.

Prices ruled higher on the light receipts of the early days of the week, but the sharp declines on closing days left values a big dollar lower for the week, with the bulk at $19.25@19.60, and top at $20.25. The slump appears to be due mainly to the wide agitation relative to the high cost of living, and the trade considers that psychological rather than actual conditions are responsible for it. The week's receipts were larger than for a week ago, six days' arrivals totaling 40,900 head.

Higher appeared to be the only word in the sheephouse vocabulary this week, prices advancing steadily in the face of a run that totaled 163,692 head. Feeders made up 75 per cent of the arrivals, but demand was very broad, and prices gained $1@1.25 during the week, fair to choice feeding lambs closing at $14@15.60. Killing demand also was broad, and in their scramble for the little fat stuff that showed up packers boosted values 75c, good to choice lambs moving up to $16.50@17.25. Old sheep scored advances of 50c@$1, yearlings going at $11 @12, wethers at $10@11, and ewes at $8@ 9.75.

St. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

National Stock Yards, Aug. 16.—We had a rather liberal run of cattle this week and the quality was fully up to the average, if not a little better. There were a good many heavy corn-fed cattle in the run. The steer top reached $18.60 early in the week which was the highest price of the summer. At this writing, however, the market registers a very heavy decline. On beef steers it is 25@50c lower than the previous week. On medium and common cattle the decline is $1@1.50 and in spots as much as $2 lower than a week ago. The break is in all classes including butcher stock.

Regardless of a very light run and better quality than we have had for months, the hog market declined this week from $1@ 1.25. The only way to account for the decline is because of the uncertain conditions, legislative and otherwise, that threaten the trade. Normally, in our judgment, the market should be steady if not higher. At this writing the price of corn has gone off some and we think that the decline in the hog prices has had much to do with it. We think that corn has gone down because hogs have, rather than that hogs have gone down because corn has. The week's closing quotations are: Mixed and butchers, $20.75@21.25; good heavys, $21@21.25; rough, $17@18; light, $20 @20.90; pigs, $17@20; bulk, $20.75@21.15.

The sheep and lamb market closes the week with high prices and a stronger tendency. Choice lambs topped at $17. All aged fat stuff has been in demand and sells promptly at advanced prices. All of our commission houses and order buyers have unfilled orders for good breeding ewes. The demand for this class is the greatest in the history of the market.

Kansas City Live Stock Market.

Sanders Sosland, Correspondent.

Kansas City, Aug. 16.—Hogs stood out in the trade in live stock in Kansas City this week, giving a display of bearishness of a character rarely if ever before witnessed. After selling up to $23.15 on Wednesday, the market began to tumble and suffered a break of as much as $1.50 on Friday. Cattle were weak, closing mostly unchanged to $1 lower. Sheep were higher. The receipts of cattle increased, while arrivals of hogs and sheep fell off.

Agitation over the high cost of living, together with the reports of seizures of foodstuffs in store at various points, were the bearish factors in the decline in hogs. While the market declined $2 to $2.50 the latter half of the week, the earlier advances made closing prices show a net loss of around $1 per hundredweight. The claim was also made that the extreme weakness in foreign exchange was a factor in depressing hogs. The average cost of droves at the close was around $20.72, compared with $21.01 a week ago. The top price at the close was $21.50.

More Kansas and Oklahoma grass cattle arrived than in any other week of the season, and the total run amounted to 61,400 head, against 50,000 the preceding week and 46,300 a year ago. Corn-fed cattle, which are extremely scarce, sold up to $19, being firm. Sales of grass cattle, however, were largely between $11.25 and $14, with cattle fed cake on the grass bringing up to $16.25. Grass cows ruled between $8.50 and $9.50, being around 25c lower. Veal calves were sought eagerly and rose as much as $2, closing with a top of $18. Stockers and feeders were in comparatively limited supply, and ruled strong early, but closed weak. Stock cows and heifers developed an increased demand and closed about 75c higher, and some cows which have been going to packers went to this trade. The market as a whole closed with a weak tone, and, while the bulk of the Kansas and Oklahoma grassers now moving are losing money to graziers, further declines will not be surprising.

Light local receipts sent sheep and lamb prices up 25c to $1, with lambs up 50c and the the extreme price changes on sheep. Western lambs sold up to $17, ewes closed up to $19.25 and yearlings up to $12.50. Wethers closed between $10 and $11. Larger receipts are expected from the West.

Among other places the Milwaukee market is embargoed on wheat. Movement of corn and oats is limited to 50 cars a day.

Movement of Cattle.

Weekly receipts and shipments of cattle and calves at Western centers week of Aug. 16, and totals with comparisons for corresponding time last year, compiled by THE PRICE CURRENT-GRAIN REPORTER:

WANTED and FOR SALE
GRAIN DEALERS' MARKET PLACE

For Buyers and Sellers of Elevators, Equipment, Grain, Seeds, Hay, Feed, Flour, Millfeed, Beans, Produce, etc.

25c Per Printed Line

ELEVATORS FOR SALE.

GRAIN BUSINESS FOR SALE — Includes a large elevator with the best improved machinery, in a thriving city in Massachusetts, covering a population of 5,000, including suburban districts. Has good retail business, also a mixed car business with milling in transit privilege which can be increased to any amount of business desired. Has three other retail stores in connection. Business established over 40 years. Reason for selling, have large outside interests and unable to give proper attention. An exceptional bargain. Will take part cash down and the balance on easy terms to the right party. For full particulars address THRIVING BUSINESS, Box 7, Price Current-Grain Reporter, Chicago, Ill.

For Sale—Elevator and malting plant located at Davenport, Iowa; grain elevator 70,000 bushels storage capacity; malt house, 1,800 bushels daily capacity, situated on the C. R. I. & P. Ry. tracks, and C. M. St. P. and C. B. & Q. roads are available; transit privileges are granted for eastern and southern points and the location is very favorable for distribution of feeds and grain to those points, as well as the central feeding district; the location is in one of the best farming districts; plant is in good physical condition and was operated until now. For particulars apply to **Davenport Malt & Grain Co.**, Davenport, Ia.

25,000-BU. ELEVATOR, electric power, good coal and feed business, located in best farming district in Iowa. Address DAL, Box 2, Price Current-Grain Reporter, Chicago, Ill.

ELEVATOR FOR SALE—Capacity 25,000 bushels. International farm machinery contract goes with the deal. Price $12,000. Cash $7,000, balance terms. Big grain point and good machine business. Max. N. D. Address E. BALSUKOT, Plaza, N. Dak.

ENGINES FOR SALE.

FOR SALE—Oil Engines. Slightly used.
50 H. P. Fairbanks Morse.
50 H. P. Fairbanks Morse.
40 H. P. Fairbanks Morse.
40 H. P. Otto.
25 H. P. Fairbanks Morse.
32 H. P. Fairbanks Morse.
and all small sizes.
These engines are in first-class condition and operate on a low grade oil. Write for prices today. A. H. McDONALD, 543 W. Monroe St., Chicago, Ill.

MILLS FOR SALE.

2400 BUSHELS CORN MILL for sale; entire or half interest—equipment first-class. Nordkye & Marmon machinery at Talla, Ala. Fine location; own side-track and warehouse electrically equipped. 1 H. P. Cheap rates milling and transit to 5 states—4 railroads. Write or wire. J. BROWN, East Florence, Ala.

MACHINERY WANTED.

WANTED—Bag closing machine for 140-lb. bags; stencil cutting machine and bag printing machine. ADDRESS BOX 1796, Great Falls, Mont.

OFFICE SUPPLIES.

FOR SALE—Burroughs, Wales, American, Dalton, Standard, etc., adding machines, half retail prices, fully guaranteed. Typewriter bargains, all makes. Get illustrated catalog and bargain list. MINNESOTA TYPEWRITER EXCHANGE, Dept. C. 236, 4th Street South, Minneapolis, Minn.

BEAN PICKERS FOR SALE.

FOR SALE—Giant Bean Pickers, new style. Machines in first-class condition. GIANT CANNING CO., 310 Coml. Bk. Bldg., Grand Rapids, Mich.

HAY FOR SALE.

FOR SALE—Elkhorn Valley Hay in carload lots. Write for prices. HARRY T. KLEIN, Ewing, Nebr.

GRAIN WANTED.

GRAIN AND SCREENINGS WANTED—All grades wheat, barley, corn or oats. Wheat screenings, corn screenings, corn screenings, oat clippings, barley screenings, barley chaff or elevator screenings of any kind wanted. Please send samples. BEREND J. BURNS, 324 Chamber of Commerce, Buffalo, N. Y.

SITUATION WANTED.

WANTED POSITION in Michigan as elevator manager or assistant manager in large of sales. Years of experience. Grain, beans, hay, coal and builders' supplies. Can invest some money. Address MICHIGAN, Box 9, Price Current-Grain Reporter, Chicago, Ill.

Coming Conventions.

Oct. 13, 14, 15.—Grain Dealers' National Ass'n, annual meeting, St. Louis, Mo.

Australian Corn Crop.

The Australian corn crop is not material, internationally speaking, but it may be interesting incidentally to know that in New South Wales the crop is very poor as a whole; in Victoria moderately successful—22,559 acres with a prospect for 1,240,000 bus. all told.

New Crop Cotton Received.

New Orleans on Aug. 21 reported receipt of first new Louisiana bale of cotton received that day. Last year the first bale was received on July 27, nearly a month earlier, denoting the lateness of the crop and subjecting it to serious damage in event of early killing frost this fall.

SPREADS THE WRONG WAY.

The Wheat Commission at London has fixed the following prices for imported wheat: For 480 pounds (8 bushels) Canadian, $12.60 to $14.40; United States, $12.96 to $14.40, untreated $14.64; Argentine, $14.16. This fixes a minimum of $1.575 and a maximum of $1.80 per bushel for Canadian wheat, and $1.62 and $1.80 per bushel for United States wheat. The price of wheat per bushel guaranteed to the farmer in Canada is $2.15 west of Fort William. The price fixed in the United States is $2.26 and $2.30, and the rate set by British experts for wheat imported from the U. S. A. is $1.63 to $1.80.

Who pays the difference? The Canadians want to know. A Toronto banker commenting on the problem said:

"It may mean that the prices refer to wheat already in stock in the Old Country. The probable explanation is that Great Britain has decided to keep down the price of bread, as she has been doing in the past. The prices referred to might mean that the British government has fixed them for imported wheat (that is, wheat which has been imported, is in stock, and is to be sold to the millers in England at that price) so that the price of the loaf in England, which has been set for some time, will still remain at that price. If that is so, then Great Britain will have to find a great amount of money to make up the difference between the prices fixed and the market price, if newly imported wheat is to be sold to English millers at the rates mentioned.

"If it means that these are import prices for this year's wheat—and Canada sends almost all her crop to Great Britain—that would be a very different matter, both for Canada and the United States. Great Britain will naturally have to pay the market price to get the wheat. If it should turn out that Great Britain has large stocks of wheat, or could get large stocks of wheat from somewhere, it would make all the difference in the world. Then the import prices referred to would be very important. This would be contrary to all knowledge on this side of the Atlantic. Australian grain is going to India, and India is not exporting. The armistice came at a good time for this year's crops and it is understood that the crops will be a little better in central Europe than was imagined. But all on this side of the water have been working under the impression that Great Britain would need the wheat. I cannot conceive it otherwise. The cable needs explaining. Perhaps the figures are not right."

Floods in Argentina.

The law of averages as regards weather conditions has, during the past few months, been rudely shot to pieces. The soft weather in early June, the repeated rains and the absence of frost provided seemingly sound reason for the belief that the beginning of July would bring a decided change for the better. Such a change has not, however, materialized. Rains are still frequent and rank growth is being encouraged to an alarming degree. Plowing operations have been seriously held up, as for many weeks past the farmers in the eastern districts of Buenos Aires have not been privileged with one single sequence of dry days sufficient to bring the land into working condition. Just as that condition was being reached, fresh rainfalls have invariably intervened to postpone operations. Unless we have a steady run of dry and frosty weather by the end of this month planting operations will exceed the limit of delay to an extent which cannot fail to reflect most unfavorably upon next season's crops. Oats and barley already sown are not doing at all well as a result of the present sodden condition of the land.

At the moment of going to press we find that the previous accounts of conditions in the South are mild in the light of latest developments. The floods many now be looked upon as a national catastrophe.—*Times of Argentina, July 14.*

Total Wheat Visible.

The combined aggregate wheat visible supply statistics in bus., as completed by *Bradstreet's* since May, 1919:

"See How Simply It's Built"

The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.

Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

BUSINESS AND TRADE CONDITIONS

THE doctrine of "open agreements openly arrived at" has an alliterative quality that in no way detracts from its idealism. Yet in treaty mak- it seems to have been as far from the practicable dealism usually is. The cold fact is that the matic practice of the past in the old world can- easily be set aside nor be greatly modified. The has deepened the feeling of nationality, not ned it. The President was, of course, quickly dis- ioned of his preconceived benevolent purposes his plans for realizing them on reaching Paris he first time; and the world at no time probably any real belief that the "town meeting" method reaty making would have any status whatever. fact that the Treaty, in which all the world is ested, was secretly made by fewer men than any y in modern history, save perhaps those dictated ismarck to Austria and to France, is known to one. Why the President should not have dly conceded that fact and his failure to have it wise and to achieve his ideals in all respects, ot clear, since no one has been deceived, nor any one have criticised a failure which thought- persons felt was foreordained. The Senators ing the treaty could hardly expect therefore to edit the President by insistence on his failures, t as the President himself should persist in g to conceal what everyone knew must sooner or be revealed.

is probable therefore that the conference *intime* week of the President and the Senators at the e House has brought the Treaty and the Cove- around to the point where ratification with in reservations, perhaps, in the nature of inter- tions, may now be expected within a reasonable

Just what will happen when Japan is noti- hat the U. S. Senate directs that she shall re- Shantung to China instanter remains to be seen, e Senate persists in its apparent purpose now der such return. It certainly will be "some" ion.

e final disposal of the Treaty and the Covenant e League is a consummation devoutly to be d. It may not be the one means, however, as resident expects, of "bringing the Country back rmal conditions of life and industry." The Pres- 's perspective is obscured. He has had the y and the Covenant so long in his thought to the sion of domestic matters that he has acquired tatesman's sense of disproportion as to results. epidemic of strikes everywhere and of extrava- s at home is due less to the delay of the Senate perhaps to the insistence that ratification of it factor at all will act as a cure for everything out of joint, which encourages the belief that law making of itself can remove popular dis- t, whereas it is not within the nature of man ne should be contented at any time absolutely. worker's lot had grown better in amazing meas- the last half century before the war began; but he alleviation of his condition his desires and increased to such an extent that his discontent ly remained but became even greater than ever. war increased his income and also his wants portion but instead of making "a noble dis- t a path to Heaven," accompanying discontent dislike of one's own deficiencies and a determi- to do better individually, to work harder in to progress more rapidly, the educated and the nt alike have only placed the blame for all nd imaginary evils alike, not on the shoulders of the people themselves, with their follies and wasteful habits, but upon the form of Government. The professors and the pulpiteers openly advocate that the Government and the social system alike are all out of gear, hopelessly partial and unfair, and must be changed *in toto*. The social demand is not for a distribution of the good things of life according to individual merit and services rendered to society or for personal industry, sobriety and thrift, but on the score that merely because a man exists he is entitled of right to certain good things, whether he earns or can earn them or not, forgetting that while it is a far cry from the ample conveniences of modern life back to the naked destitution of our forefathers yet poverty still belongs to the struggle for existence and that there can be held out to mankind, as individuals or as a race, only one sure hope of better and happier living—that which lies in an enhancement of the industrial virtues: industry, skill, self-denial, temperance, and the avoidance of indolence and vice. This is the "doom of the sinless life," a sentence all men have had passed upon them, and they only work it out who achieve for themselves a place in the world by hard work and so come to content at the end.

The present discontent (every age and generation has its "present discontent") is in large part the aftermath of the war but largely also the fruit of false popular education. Even now no one is seriously seeking to fathom the cause to base a cure on a sure diagnosis. Few are studying, but many are talking, mostly nonsense. Labor has conceived this to be the hour to make its "killing" just as some business men, fearful that the end of flush times may be near, are ready to compromise, even to yield next to everything and "pass the buck" on to the public, in the hope of being able to keep going a little longer before a smash may come, before somehow at some time and in some way now unknown a "peaceful readjustment" may be arrived at; because it is obvious that the present "vicious circle" cannot go on much longer. Wages are being consumed in extravagance, and the rainy day savings are forgotten by some because they cannot save; by many because they will not, but are looking for continuance of increased wages and for relief from the necessity of self-denial by nationalizing the railways and coal mines, fixing prices, raising the tariff to make foreign goods scarce, working less hard and for shorter hours to make domestic goods scarce and dollars cheap.

These outbreaks of the discontented, in spite of the absence of passion and bitterness on the part of the public, who so far have had to carry all the discomfort and burden of cost, are at last beginning to seriously affect business. *Bradstreet's* says: "Labor unrest, seeking reflection in a virtual epidemic of strikes, still bulks largest among the influences affecting and clouding both the present and the future of business. While all branches of trade and industry feel the uncertainties springing therefrom, the visible effects vary with the lines considered, and despite the feeling that the situation is well-nigh intolerable, there are not lacking evidences that there is considerable optimism underlying the situation which will manifest itself more clearly providing the sober second thought of labor can be aroused to the drawbacks and disadvantages which some of its demands involve to the business fabric as a whole."

Steel operations, hitherto considered the key industry to all industrial prosperity, have been less active than in June and July. The threatened strike of this industry, to make the Steel Corporation's works a "closed shop," with general disruption of the continuous working program of the corporation's mills, which would entail enormous expense for the lost heat hours, may mark the beginning of the end of more wages for less output. The object in view is not one of rational corrective of working conditions, which the Steel Corporation has made as tolerable as possible, consistent with economical working of their plants, the benefits of which the buying public must share in, nor for better wages which have been voluntarily doubled in the past four years; but under whatever name it may be called, it is the purpose of labor to dominate this and all other industries and trade, although labor as such has never shown any capacity to manage or finance great operations.

This program in England has already gone far enough to demonstrate that if continued Great Britain faces ruin. The government in handling labor has shown all the cowardice of the opportunist and the weakness of the sentimentalist, conceding inalienable rights of the public to secure a peace that has been one for the moment only. Concessions to the coal miners have reduced production from 287 million tons before the war to only 200 millions, although there are 30,000 more miners at work now than in 1914. Coal costs 26s. ($6.32) at the mine per ton against 10s. ($2.43) in 1914. The miner gets his own fuel free of cost but the London householder pays $12.84 per ton. And coal is the very foundation upon which the entire superstructure of English industry and foreign trade rests. The proposal to nationalize the mines was rejected, perhaps as a dangerous precedent, but, as usual, Mr. George, like his American cotemporary, compromised by accepting the policy of "state purchase of mineral rights," which simply means that the royalties are lifted from the coal to the treasury without in any respect relieving the solvent tax-paying public of the burden. The traditional English common sense in business and government seems to have gone a glimmering under the benevolent George-Chamberlain regime. It is the "New Freedom" as it is being worked out in England. All Europe in fact is facing disaster in the coal situation, which is preventing a recovery of the producing ability of the people who are doing their best to destroy their own civilization by following their demagogues rather than the lead of men who might point the way to recovery as fast as it is humanly possible. The Premier at last gave in his speech last week tardy recognition of the fact that as events are occurring now, England is facing possible bankruptcy; but he gives not a hint that national expenditure should be reduced or that labor ought to do more by ceasing to prevent production. Government doles to the unemployed continue and the moral fiber of the people of the world is being destroyed. The further plan of the English protectionists under leadership of Mr. Chamberlain to revive that ancient privilege of the few by a post-war program of ultra protection to be worked out by the "new freedom" method of bureaucratic licenses controlled by the Board of Trade, to obviate difficulty of enacting anew the "corn laws," has, however, been abandoned, effective Sept. 1, although there will still be "effective measures to prevent dumping," a palpable subterfuge of special interests.

DUST IS DANGEROUS

NO elevator is immune from danger from dust and dirt. Yet the writer remembers going through one of the largest and most splendidly designed and equipped elevators on the continent, and before starting was provided with a linen duster to protect his clothing—the office kept a supply for

that purpose. The dust was quarter to half an inch deep everywhere. No comment was made, as it would hardly have been appropriate under the circumstances as a visitor. But the Port Colborne elevator explosion may have been due to a similar physical condition of the premises, although the superintendent insists that it was not. The visible and invisible dust both settle out of the atmosphere. While still in the atmosphere a spark of fire (there must always be a spark to act as detonator of dust, it does not explode without) in an atmosphere dust laden in proper proportions might have ignited the floating dust, then no construction is strong enough to resist the expansive force, as was shown at Port Colborne. There is only one known preventive—cleanliness and dust collectors working at all times. Other physical conditions not yet entirely understood may express themselves in disastrous explosions; they may have done so in this case; but it is a fair presumption that houses kept free from dust and its accumulations rarely are injured in this way.

THE METRIC SYSTEM

THERE is a very well organized movement in support of a bill in Congress to substitute the metric system for our present weights and measures. It is an old adventure. John Quincy Adams avocated this change at a time when France was putting the system into force and effect, and restless Americans have been at it ever since. The academic apology for the metric system may perhaps be conclusive, as certain other ideal conditions, the products of pure reason, may be ideally irresistible.

But the practical point of view is different. When the schoolmaster tells us that two-thirds of a pupil's mathematical school year might be saved by the use of the metric system, one may be impressed. When the professor of mathematics shows that most of the importing countries of the world, and all of the backward peoples, use that system, the business man may be aroused. But when one stops to think of the tremendous values of machinery and of machine tools and patterns that would have to be scrapped in this country, with the change of standards, common men are appalled. The French adopted the system in 1801 but so great were the difficulties encountered even then that it was not until 1837 that the system could actually be enforced to the exclusion of other standards. The intervening years were commercially and industrially unimportant. The Napoleonic wars and the recovery therefrom made weights and measures quite an insignificant problem in the face of want, and the loss by scrapping of materials and machinery in those days was of course a mere bagatelle in comparison with what would today have to go to the junk pile. Think of the loss that would be necessary to change the standards of the steel industry, the railway locomotive shops and a thousand other machine shops and industries. It would scrap every grain scale in the country, every power engine, and render duplication of parts impossible for a long period. It would entirely disorganize the present finalities of land mensuration and make necessary a rewriting and an entire change in the written descriptions and records of land holdings, etc. The losses would be tremendous, the confusion incalculable.

To what purpose? Our foreign trade is but a mere drop compared with the volume of domestic trade and both have grown to amazing proportions without inconvenience under the present system. Is it worth while to sacrifice so much for what is after all merely a schoolmaster's sentiment, the metric system (barring its decimal character which some high brow mathematicians say is itself a defect, a cycle of 12 instead of 10 being more scientific) is not by any means perfect? Admitting the system's theoretical perfection, the practical difficulties, adding cost of new patterns to loss by scrapping, appear insurmountable and hardly worth the effort.

THE Department of Agriculture is going to spend $20,000 to find out why hogs fed on acorn mast, peanuts, soya beans and other legumes are "soft." In Louisville and Cincinnati, where the "soft" hog has long been in evidence, this condition has been attributed to the unbalanced ration; and buyers in those markets have always advised less of these feeds in proportion to other ingredients of the ration.

BILL FOR NATIONAL FEED LAW

THE bill originally introduced in the last Congress by Senator Gore has been overhauled by the lawyers and doctors of the Agricultural Department and reintroduced in the House by Rep. Haugen of the Agricultural Committee. It has all the usual objectionable features of bills originating in the Agricultural Department, in that it would put the industry absolutely in the hands of the Department, compel a disclosure of all the private records of feed manufacturers as to their business incomes and profits, their formulas, their selling methods, etc.

The standards also are those of the schoolmaster and the bureaucratic scientist—theoretical and formularistic, which, as Goldberg, the cartoonist, puts it, mean nothing. As for example the use of the term cottonseed meal, as though that were a definite thing of fixed quality whereas there are half a dozen qualities, more or less, of cottonseed meal, while "protein" is nearly as indeterminate as a formula term as "cheese."

There are doubtless certain things that could be put into the form of law which might to a certain limited extent protect the buyer of feeds who himself has no knowledge of them, by forbidding use of worthless materials, but the ability of the law maker to protect the unsophisticated buyer against the sophisticator by definitions is so small that it is really negligible. The best protection to the buyer is a branded product which the feeder knows will give him the results he desires at a cost which is consistent.

But for the manufacturer to supply such a product he must be permitted a range of variation from time to time in his formula in order to use by-products of varying cost and make it possible to adjust the cost of the feeds to the necessities of the feeder—varying the materials of the formula as the market price for them suggests or compels variation, without, however, impairing the quality of the product as shown by results in the feed lot or the dairy output. These are conditions that no written law can wholly provide for, and yet unless they are permitted to influence the product and the cost, feedstuffs would certainly cost the feeder more than absence of law could possibly make damage to him possible. The intelligent feeder does not care two whoops in an empty lot for formula tags and few care to spend the time to understand them. The feeder wants results and his experience tells him what he gets with the feed he uses and when that is satisfactory he keeps on using it, tag or no tag.

WILL CONTROL EXPORTS

THE Constitution forbidding export duties presumably favors international trade. But that instrument does not forbid embargoes, which can be used to protect the domestic consumer in time of distress against the depletion of native stocks of commodities by foreign purchasers. The embargo has never been used as to foodstuffs because of domestic scarcity; indeed the history of American embargoes would probably show that it has been used as a weapon of offense rather than of defense; and since its use in that way caused more friction at home than harm abroad, the embargo has never been popular with the American people.

We have been steadily of the opinion that if the Administration had used its power of embargo during 1915-17, it could easily have held the price of foodstuffs to a more consistent level without resorting to the bureaucratic method that was substituted therefor, in the form of a fixed price, with the Food Administration merchandising, a plagiarized method imported from Europe, where supply conditions were exactly the opposite from our own, and which may have retroactive effects in the future h will make them a long-continuing plague.

At last, however, these and all other simila portunist devices, with unctuous appeals to the ple to be good and well-behaved, having demonst their utter failure to satisfy the hungry bl of the people, the Wheat Director on Aug. nounced the Administration's intention to us embargo as a means of self-defense. The Whea rector did not call it embargo. He said onl Director "is refusing proffered contracts" with fo buyers, etc. It amounts to the same thing; it i same thing. It may perhaps be distressing t people of Europe to know that hereafter their and other supplies from this country will consist of what this country can ship after its own p have been fed, clothed and warmed at a reaso price; but the embargo is the only effective w to reduce prices in this country that can be use used with quick effect. Nor is it unfair, self-p vation being the first law of nature, and moreo may be the means of bringing some crazy peo Europe to their senses. Already there has heard in England the old admonition of the Ap "If any will not work neither shall he eat." Hoover and the President had become so obs of the slogan, "The Relief of Europe." They completely forgotten the American people unti R. R. Brotherhood's edict of rebellion woke up ington to the thought that the "Stabilizing of Prices" is no longer popular.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures various statistical exhibits appearing weekly in det "The Price Current-Grain Reporter," these figures r senting the past week, the preceding week and c sponding time last year, here assembled for ready r ence:

	Aug. 23.	Aug. 16.	Aug. 2
Wheat—			
Primary receipts	17,447,000	13,317,000	18,4
Primary shipments	8,963,000	9,021,000	11,0
Receipts since July 1.	95,707,000	78,260,000	105,5

EDITORIALETTES

THE row of the Administration and Senator na's committee about wheat prices is a typical ple of the messiness of Government interfering trade in any way.

THE potato crop is not promising. There w shrinkage indicated by the condition returns million bushels in July to 350 millions compared the final estimate of 400 millions in 1918. Is tha reason all surplus stocks now must be sold a gain prices and eaten as quickly as possible?

The Price Current-Grain Reporter

Published every Wednesday by the
Price Current-Grain Reporter,
912 Webster Building.
327 So. La Salle St., Chicago, Ill.

J. CARVER STRONG,
Treasurer and Manager.
EATON G. OSMAN,

THREE DOLLARS a year in the United States and Mexico; $4.00 a year for Canada, $5.00 United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 10 cents.

LETTERS on subjects of interest to those engaged in the grain trade, news items, reports of crops, grain movement, new grain firms, new grain elevators, contemplated improvements and cars leaking grain in transit are solicited.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain elevator men is unquestioned. The character and number of advertisements in its columns tell its worth. If you would be classed with the leading firms catering to the grain trade, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

ADVERTISEMENTS of meritorious grain elevator machinery and supply houses and of responsible grain firms who seek to serve grain dealers are solicited.

CHICAGO, AUGUST 27, 1919.

GRAIN TRADE REVIEW

Agitation over a lowering of the cost of living continues to make itself felt in the grain and provision markets, and so far the producer has been the only one that felt the slightest effect from the campaign to legislate prosperity for a certain percentage of the population at the expense of the rest. Every prominent economist says that there will be low prices until production increases materially, and agricultural workers are not inclined to toil 12 hours per day or more in order to lower the cost of living for men who are demanding a 5-day week of six hours per day, with a 60 per cent increase in wages. This constant pyramiding of wages must in the end bring its own remedy, and the readjustment may be so extremely violent as to lead to unusual depression. This country has been suffering from too much prosperity. The trouble is mainly in the fact that every man wants to play gentleman and let the other man do the continuous hard labor necessary to feed him.

If the campaign for a lowering of the high cost of living is carried to extremes and grains and provisions affected much more, there may be drastic action taken by the producer in the way of a reduced acreage of grain. If the producer can secure as much for grain by raising short crops, as he could by laboring much harder to secure large ones at a lower price, he may become imbued with the former idea, which is the same plan that appears to have been adopted by labor. The same thing is witnessed throughout the world. Readjustment to a peace basis, thanks to the theorists, is not progressing as rapidly as it should. Many people have become obsessed with an idea of their own importance; and because their strength was in keen demand during the war they seem to think that that condition is to obtain hereafter. There was quite a war a few months ago, just to get that idea out of a certain nation's head, but the idea has been imported here.

There is no scarcity of food throughout the world, taking it as a whole. It is simply a matter of transportation and distribution. England has again taken control of the food, and France and Italy are expected to follow. This may result in concentrated purchases, instead of a steady volume, as would be the case were private individuals to do the buying. Consequently the price fluctuations are likely to be rather radical. The amount of wheat is ample for all requirements, but there is a scarcity of vessels to move it from Australia and Argentina, outside of North America the only exporters that need be considered. If Europe wants corn she must secure it from Argentina; if she wants oats, rye or barley, she must come to North America or go without.

No lowering of the price of flour to the consumer, except such as is made as the result of the law of supply and demand, plus the guaranteed figure is in sight. The quality of the spring wheat crop is so poor this year that considerable dark hard winter will be needed for mixing purposes. No change can be made in the guaranteed price, but it is hardly probable that the Grain Corporation will buy the poor wheat at more than its milling value.

The corn crop is coming along nicely in most of the leading sections, especially in Iowa and in northern and central Illinois, but parts of Kansas and the West and the Ohio Valley have suffered severely from drought. Texas has raised a bumper crop and is making fair sales in Northern markets, although at a big premium over the September and somewhat upsetting market conditions.

The domestic demand for oats has improved materially. The East suffered severely from blight earlier in the season and then from excessive rains, which materially reduced the crop, and it is expected that the demand will remain good for the season.

Grain Market Summary.

Receipts of wheat, corn and oats at primary points for the past week follow:

	Aug. 23, 1919.	Aug. 16, 1919.	Aug. 24, 1918.
Wheat	17,447,000	13,317,000	18,498,000
Corn	2,024,000	996,000	3,130,000
Oats	7,177,000	4,320,000	11,747,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	26,648,000	33,375,060
Preceding week	18,633,000	33,172,000
Since July 1	147,262,000	195,356,360

Corn prices had a range of 7½@9¼c the past week, breaking badly early, and then rallied sharply, only to react toward the close and finish with net losses of 2@3¼c, the latter on September. Sentiment was decidely mixed, and while it looked for a time as though short covering would carry prices up materially, the increasing offers of new crop Texas corn in Northern markets with some purchases made caused a selling wave toward the last that caused most of the early upturn to be lost. The situation is most perplexing. Sterling exchange broke to a new low record, and had some effect, but the subsequent rally failed to attract much attention. Crop news was also ignored to a great extent.

Trade in oats was rather light and mainly of a local character, with fluctuations a faint reflection of those in corn. Prices had a range of 3@3½c for the week and closed well toward the low point with net losses of 1@2⅜c, the latter on the December, and are now down to around last year's level despite the materially small supplies. The producer is not taking kindly to the decline and has been selling very slowly.

Milling demand for wheat has improved in sympathy with a better call for flour, and winters averaged slightly higher than the past week on the good kinds, while the lower grades of both winters and springs were somewhat lower. There is an abundance of lightweight and damaged grain this season, and dealers, large or small, who wish to handle wheat, whether fit for human consumption or not, must have a license. There is a closer adjustment between the world's supply and demand this season than was expected earlier in the year. The rush of domestic wheat to Europe is now under way and clearances have been averaging over 1,000,000 bus. per day. Prices for the week follow:

			Close		
	High.	Low.	Aug.23, 1919.	Aug.16, 1919.	Aug.24, 1918.
Corn—					
Sept.	$1.85¾	$1.76½	$1.78¾	$1.82	$1.58⅜
Dec.	1.47⅛	1.38⅞	1.41½	1.44	....
May	1.41¼	1.33¾	1.36⅞	1.38⅞	....
Oats—					
Sept.	$0.74	$0.71	$0.71¾	$0.73¾	$0.70⅞
Dec.	.76⅝	.73⅜	.74⅜	.75¾	.....
May	.79½	.76	.77¾	.78¾	.....

Oats in Primary Markets.

Receipts of oats in eleven primary grain markets from Aug. 1, 1919, with comparisons with 1918:

	1919-20.	1918-19.
Chicago	8,300,000	18,406,000
Milwaukee	2,181,000	4,815,000
Minneapolis	1,531,000	1,954,000
Duluth	202,000	23,000
St. Louis	1,548,000	2,871,000
Toledo	337,000	1,674,000
Detroit	133,000	502,000
Kansas City	805,000	2,039,000
Peoria	648,000	1,447,000
Omaha	704,000	1,518,000
Indianapolis	1,165,000	2,146,000
Total	17,554,000	37,395,000

Receipts of oats the past week at primary markets, compared with preceding week and corresponding week last year:

	Aug. 23, 1919.	Aug. 16, 1919.	Aug. 24, 1918.
Chicago	3,248,000	2,073,000	5,381,000
Milwaukee	1,047,000	395,000	1,351,000
Minneapolis	590,000	482,000	666,000
Duluth	41,000	77,000	6,000
St. Louis	754,000	302,000	623,000
Toledo	133,000	131,000	952,000
Detroit	49,000	53,000	272,000
Kansas City	279,000	237,000	897,000
Peoria	241,000	126,000	404,000
Omaha	346,000	112,000	560,000
Indianapolis	449,000	332,000	635,000
Total	7,177,000	4,320,000	11,747,000
Shipments	3,199,000	3,732,000	6,259,000

Wheat Stocks and Consumption.

Statement of the movement of wheat and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17
P. stocks at July 1	2,942,000	226,000	4,289,000
P. receipts to Aug. 23	95,707,000	105,496,000	28,757,000
P. shipments to Aug. 23	36,822,000	40,252,000	15,692,000
P. stocks on Aug. 23	27,288,000	29,064,000	1,798,000
P. consump'n to Aug. 23	34,539,000	36,316,000	15,556,000

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Aug. 1	13,185,000	4,048,000	539,000
P. receipts to Aug. 23	24,286,000	37,395,000	28,427,000
P. shipments to Aug. 23	14,846,020	18,859,000	15,208,000
P. stocks on Aug. 23	12,949,000	10,586,000	3,027,000
P. consump'n to Aug. 23	9,676,000	11,938,000	10,731,000

Corn in Primary Markets.

Receipts of corn in eleven primary grain markets from Nov. 1, 1918, to Aug. 23, with comparisons with 1917:

	1918-19.	1917-18.
Chicago	52,964,000	77,167,000
Milwaukee	4,953,000	11,201,000
Minneapolis	6,219,000	14,598,000
Duluth	25,000	163,000

Shipments	8,963,000	9,021,000	11,020,000

World's Wheat Exports.

Exports of wheat last week compared with previous week and year ago specially reported for this paper by George Broomhall's service:

	Aug. 23, 1919.	Aug. 16, 1919.	Aug. 24, 1918.
American	13,204,000	7,117,000	3,706,000
Indian	.....	.....	190,000
Argentine	3,071,000	4,103,000	4,281,000
Australian	1,624,000	74,000	640,000
Others	65,000	.....	34,000
Total	17,964,000	11,294,000	8,851,000

Exports of wheat since Aug. 1, 1919, commencement of European crop year, compared for three seasons:

	1919-20	1918-19.	1917-18.
American	37,583,000	11,863,000	27,502,000

FROM WASHINGTON

What the Farmers Want Done—Joint Committee Hearings—What Has Been Recommended to Be Enacted Into Law to Meet the Emergency—Packers Have a Hearing.

The House agricultural committee on Thursday last ordered out the Haugen bill and passed it on Friday to enable the President to do pretty much anything he pleases, under the food control act, now or at any time as regards foodstuffs and other necessaries of life, except that the act is not extended to peace times, as was requested by him. The bill embraces "wearing apparel, containers primarily designed or intended for food, feed, or fertilizers, etc.," which are brought under the drastic provisions of the Food Control act. Retailers doing a business of less than $100,000 a year, who were exempted from the profiteering clause in the original act, are included in the amendment, which carries a penalty of a fine of $5,000 a year, a two-year imprisonment, or both.

The committee (joint affair of Senate and House) had been hearing the malcontents and the panacea makers. All the idealists and doctors of sociology presuming to represent the farmers were present, A. M. Loomis being spokesman for the National Board of Farm Organizations, a conglomeration of farmers, boudoir socialists and dilettanti posing as farmers. As a result Mr. Loomis's recommendations were a characteristic medley of sense and nonsense. As it looks now the immediate future price of wheat will be high; hence he recommended that—

"Wheat price regulation and all price fixing on any primary food or clothing material to be abandoned at the end of the present crop season.

"All restrictions and regulations based on the war powers of Congress included in Food Administration activities to be terminated immediately, and at the same time a clear definition given of the constitutional powers of Congress to deal with hoarding, conspiracies and combinations to enhance prices and the waste or destruction of food and similar products under peace conditions.

"Revision of tariff schedules to afford protection for farm products equal to protection of manufactured products.

"Immediate revision of grading rules, especially on wheat, and adequate representation for actual producing farmers in the formulation and adoption of grade and discount to be adopted in future.

"Liberal appropriations and legislative authority to extend the activities of the Commerce Commission, the Federal Trade Commission, the Tariff Commission, and the Department of Justice on the basis of pre-war statutes.

"Recognition of organizations of producing farmers in making up the personnel of committees, boards or commissions to direct enforcement of existing or proposed laws.

"Enactment of laws to define the legality of collective bargaining among agricultural people.

"Enactment of laws for safeguarding purchasers of animal feeds, commercial fertilizers and farm seeds.

"Appointment of a special committee to prepare and issue official statements for the information of the public on the critical conditions affecting agricultural production for the coming year."

J. R. Howard, president of the Iowa Farm Bureau Federation, told the committee that the high prices were due to manipulation and extravagant profits of middlemen and the storage of farm products held by warehouse people against a season of short supply, and that the farmer was not making any great profit or receiving profiteering returns from present high prices. And then he wandered off into the usual demagogue mazes about "capitalistic monopoly," "profiteering," etc. "If," he said with the unction of an officeseeker, "If capitalistic monopoly wants enough food produced that it may be feasted, if organized labor wants food produced that it may be fed, if the do-nothing dawdlers want enough food produced so that they may occasionally eat, let them stand forth now at this time, when the farmer must determine his 1920 food production program, and declare by deeds—cutting out of profiteering in goods and wages, going honestly to the business of preparing and purveying the necessities of life, going honestly to the job of doing a full day's work for a full day's pay—their willingness to coöperate. Failure of these forces to do this now will be a boomerang that ere the next cycle of the seasons will effect a condition of living now undreamed of." In short, the H. C. L. is due to "extravagant profits of middlemen," failure of the American people to "practice even ordinary economy in public and private life," and industrial strikes. Exportation of food and clothing is no more a contributing cause than the heavy exports of manufactured goods and machinery, of which the farmer is a heavy purchaser.

A ROAR AT THE CORPORATION.

C. A. Turner, president of the California Bean Growers' Association, told the committee that California growers had suffered heavy losses through the Government's failure to purchase beans from them during the war. To which Mr. Turner added that the Food Administration last February conducted a secret investigation into the conduct of certain members of its bean-purchasing department in its New York office and forced two employes of the Grain Corporation to resign. More than $1,000,000 worth of Oriental beans were purchased, he said, although there was and is now no scarcity of beans in this country and there is now no reason for prevailing high prices.

And then of course came the coon from out the woodpile. J. D. Miller of Pennsylvania, representing the National Board of Farm Organizations, told the committee of prosecutions of farmer organizations in Ohio and Illinois under state anti-trust laws, which no one else seemed to know anything about, which he said indicated that there was a "veiled propaganda" throughout the country to place the blame for high prices upon the farmer. He urged that farm coöperative organizations engaged in making collective sales be exempted (of course) from the provisions of the food control act and be allowed to continue to operate without being subject to charges of engaging in a conspiracy. Always some kind of special favor at the expense of some one else.

WHAT THE JERSEY MAYORS WANT.

Then some fifteen Jersey mayors told the committee what they thought was needed, Mayor Gillan of Newark being spokesman, to-wit:

1. Creation of a Federal commission to regulate food exports.

2. Authorizing the Government to take over or control the operations of all cold storage warehouses.

3. Authorizing the Government to acquire possession of all refrigeration cars.

4. Providing that during the present emergency or any future emergencies of high living costs to undertake to sell direct to the public, not only food, but clothing and shoes.

5. Directing the Government to release to the public forthwith all remaining surplus of food and clothing.

Mayor Gillan accused "the packers" of controlling all Atlantic Coast fish markets. "Have you any proof that the big five packers control the New York combination?" asked Representative Anderson of Minnesota. "No proof, but a firm conviction exists in our community that this is a fact, and we are morally certain that an investigation would disclose it to be a fact," replied Mayor Gillan.

In Newark the retail price of milk, he said, was from 18 to 24 cents a quart, and the children of poor people are dying for the lack of milk. "We investigated the milk situation and found that a small group of dealers in Newark had contracted with the dairies for all their output at about 7½ cents a quart. The city of Newark went into the business and after "much difficulty" located some dairymen who were not tied up by the big dealers, and cut the price 2c."

A SENATORIAL VIEW.

In the meantime Senator Walsh of Massachusetts was letting himself out in the Senate. He said the time "has arrived when senators should not permit the desires of any group of people, such as the farmers, or organized labor, to swerve them from the support of legislation which would be for the best interests of the Nation as a whole."

Interrupted by Senator King of Utah, who wanted to obtain Mr. Walsh's view as to the most serious cause of the high living costs, the latter replied: "In my opinion the high prices are due primarily to the worst condition of criminal profiteering that any country has ever seen in recent years. I think when the evidence is made public as to the terrific amount of millions and millions of dollars of profit that has been made by the manufacturers and producers of foodstuffs in this country we will have all we can do to satisfy our people that they are living under a Government which will protect them and can protect them."

It appeared during the subsequent debate in the Senate that a committee of the Conference of Governors, then in session at Salt Lake City, Utah, might be sent to Washington to discuss the coördination of the Federal and state agencies. Senator Walsh expressed the hope that Congress would put itself in a position to aid administrative officers of the Nation in carrying out some such a program. "I sometimes think that we do not appreciate the depth of feeling in America today on this question." he said. "On a visit recently to my home state I was met with one query at every turn, 'What are you going to do with the League of Nations?' but not 'What are you going to do in Congress about the high cost of living?' "

RECOMMENDATION BY HAUGEN.

The Senate apparently balked at the proposition to give the President perpetual power over prices and profits, but is willing to go the limit until the "end of the war," that is to say, until peace is declared, which the President has said will not be due until the Peace Treaty shall have been ratified by the Senate.

THE BILL.

The bill amends Secs. 1 and 2 of the food production act to read as follows:

". . . to assure an adequate supply and equitable distribution, and to facilitate the movement of foods, feeds, wearing apparel, containers, primarily designed or intended for containing food, feed, or fertilizers; fuel, including fuel oil and natural gas and fertilizer and fertilizer ingredients, tools, utensils, implements, machinery and equipment required for the actual production of foods, feeds, and fuel, hereafter in this act called necessaries; to prevent, locally or generally, scarcity, monopolization, hoarding, injurious speculation, manipulation and private controls affecting such supply, distribution, and movement, and to establish and maintain governmental control of such necessaries during the war. For such purposes the instrumentalities, means, methods, powers, authorities, duties obligations and prohibitions hereinafter set forth are created, established, conferred and prescribed. The President is authorized to make such regulations and to issue such orders as are es ential effectively to carry out the provisions of this act."

That it is hereby made unlawful for any person willfully to destroy any necessaries for the purpose of enhancing the price or restricting the supply thereof; knowingly to commit waste or willfully to permit preventable deterioration of any necessaries in or in connection with their production, manufacture, or distribution; to hoard, as defined in Section 6 of this act, any necessaries; to monopolize or attempt to monopolize, either locally or generally, any necessaries; to engage in any discriminatory and unfair, or any deceptive or wasteful practice or device, or to make any unjust or unreasonable rate or charge in handling or dealing in or with any necessaries; to conspire, combine, agree, or arrange with any other persons (a) to limit the facilities for transporting, producing, harvesting, manufacturing, supplying, storing or dealing in any necessaries; (b) to restrict the supply of any necessaries; (c) to restrict distribution of any necessaries; (d) to prevent, limit, or lessen the manufacture or production of any necessaries in order to enhance the price thereof; or (e) to ex t excessive prices for any necessaries, or o aid or abet the doing of any act made u- lawful by this section. Any person viol- ing any of the provisions of this sect n upon conviction thereof shall be fined t exceeding $5,000 or be imprisoned for t more than two years, or both; provided t t this section shall not apply to any farm- gardener, horticulturist, vineyardist, pl- ter, ranchman, dairyman, stockman, r other agriculturist, with respect to e farm products produced or raised upon la owned, leased, or cultivated by him; ad provided further that nothing in this t shall be construed to forbid or make u- lawful collective bargaining by any co- erative association or other association f farmers, dairymen, gardeners, or ot r producers of farm products, with respt to the farm products produced or raised y its members upon land owned, leased, r cultivated by them.

Secs. 8 and 9 of original act are re- pealed.

GETTING AFTER THE PACKERS.

Hearings on the packer control b s began on Aug. 18 with Mr. Colver of e Trade Commission on the stand, vo repeated his well-worn misinformatn that "the five great packers control ll meat prices from the producer to e consumer, except those of the retaile"

"You say even the producers are t the mercy of these five?" asked Se- tor Kenyon, gently leading the witn s into pleasant paths. "I do," replied r. Colver. "That control is in twelve f the great markets. The smaller m- kets never get a quotation on pris until Kansas City or Chicago are hea from."

Senator Gronna, chairman of e committee, imitating the patric reformers of the railway brotherhoc, put himself on record as warn g "those in possession of great weal" that a revolution might come about f the corporations themselves did not d in solving the present difficult proble s of life, and they must do it quickly r have another "Boston tea party" n their hands—just like the Brotherhd sluggers. "Do you believe that cr- porations should keep on expand g and yet retain all their profits?" e asked Mr. Colver. "Would it not e possible to allow them to keep just o much, say not over $50,000, and h e the Government take the rest by tax- tion? That, it seems to me, would e a real remedy. If they keep on mak g profits, they may be stronger than e Government." "I don't think that ta- ing profits reduces prices; it usua y tends to increase them," replied r. Colver. "Books can also be kept n various ways, and subsidiary comp- nies can be formed, and more mo y can ultimately be taken out of the c- sumer." A beautiful duo of statesm truly—not highway robbers by i- stinct or education, only leaning in tit direction because they happen to b a part of the "Government" of this gr t Republic of freemen and to come fr m North Dakota and next door.

Senator France of Maryland e- pressed fear of the "licensing officer— he wanted an "open meeting." e does not have much confidence n Uncle Sam's representatives. "I th k it was a very dangerous thing for e representatives of packers and Gove- ment officials," said Senator Fran e, "to fix prices in secret conference. s far as giving too much power to a p- sible Government official is concern d, I would a thousand times rather se Mr. Ogden Armour make big profits n private life than to see some man n the Government service make the profits. And you know, there are pi- atory men."

On Wednesday, Aug. 20, the ire- pendent packers were heard, T. Dale Hill of Baltimore being spokesma. They challenged most of the stateme s of the Federal Trade Commission, n which proposals for stringent regu- tion of the five dominant concerns n the industry are based. They said th y themselves meet and furnish livy competition at both ends of the ind- try—in the purchase of live stock r their plants and in the sale of mea to the retailer. It was their opin n that the law of supply and dema d would serve sufficiently to protect e consumer if permitted to take s

ourse. "We are now passing through period of inflation," said Mr. Hill. Prices are abnormal, business is abormal. This is no time to regulate. Wait until we get through it, and have ir feet back on the ground, and then e what drastic measures are necesary."

Mr. Hill said he bought hogs in cometition with the big packers in Kansas ity and Chicago and was sure the big oncerns could not control prices. Solnon Greenwald, who said his house in altimore dealt only in beef, asserted e same was true of other live stock an hogs. H. C. Bertram, manager of independent concern with packing ants at Philadelphia, Wilmington and altimore, was asked if the big packers uld not establish a monopoly in foodffs. "There is a very delicate ques-on there," he said. "The packers, ith their more efficient organization, ight be able to distribute foodstuffs to e consumer cheaper than other men the specialized lines, I'll admit, and put them out of business. It's a estion of economic law."

These witnesses said their business d been very prosperous under Food dministration regulation during the ar. "If that was true when you were ing controlled, why do you object to ntrol now?" asked Chairman Gronna. cob Shafer of Baltimore responded at the packers endured the Food Adinistration control without question cause "it was only temporary."

On Aug. 21 Henry W. Lynch, repreating stock raisers and their associan, of California and Arizona, led the fense, while Louis H. Haney of Jackville, Fla., appearing for the Southn Wholesale Growers' Association, ade a direct and unqualified attack on e packers and all their activities. The ckers' growth and strength, Mr. aney asserted, was due not to their ciency, but to their financial power d control of refrigerator car service, hich gives them privileges of a comon carrier without a common carrier's sponsibility."

Senator Wadsworth, referring to testiony of independents, asked if they re "only permitted to live." "They've d us they were making money," Senaor Wadsworth observed. "Are they oled about their business?" "I don't low the conditions," Haney said. "The ant corporation controlling 85 per t of the business could drive the litt ones out of exerting their strength." nator Wadsworth wanted to know out the wholesalers' "propaganda" in or of the bill, and Mr. Haney, who cribed himself as "economist and blicity manager," said the wholesalhad tried to counteract the packers' mpaign against it.

Mr. Lynch simply said that "the packg industry represents the selling end our stock raisers' business. When you demoralize or hamper that—as this bill es—you hurt us."

PROTEST AGAINST THE BILL.

On August 21 an attack on the Governntal tendency toward assuming conl of business enterprises, with esial reference to proposed legislation supervision of the packing industry, s made by Senator Fernald of Maine, aking in the Senate. Stamping the nyon and Kendrick bills, providing regulating the packers and now er discussion, as examples of "stifling ottling legislation," he declared his osition to them, said they were exsions of the policy which had failed the transportation and communican industries, and predicted that the blic would suffer from higher costs a poorer service should they be ened. "I cannot believe the Senate of United States feels after the exience we have had with Government trol of railroads, telegraph, and telone lines, that the policy should be tinued. It would certainly lead to os and commercial bankruptcy. In alf of the business men of the country those who have had as much to with making our country great as other class of citizens. I want to est here and now against this proed legislation. It is filled with danto our institutions and our system of government. It is socialistic, it is un-American, and it should be defeated."

Defending the packers, Senator Fernald said their business had to be conducted in large units to be economical. Their development of refrigerator cars and ownership of stock yards, like their utilization of animal by-products, constituted valuable service. "One of the most notable results of by-product utilization is the fact that all the meat from a steer can be sold by the packer for much less than he pays for the live animal.

"To my way of thinking the discovery made by the packers that by-products that were thrown away could be utilized is one of the great achievements of modern times. When the proposition to curb the packing industry is viewed in its proper light, I think it will be found that the present organization of the industry really meets the needs of the situation in this country and results in efficiency."

He attacked the Federal Trade Commission for "questionable methods" in its investigation and report of the packers, and said that it had very largely lost sight of its function to aid and guide business. "The Commission," asserted the Senator, "failed to get any evidence of combination. It is only by unfair methods, by misinterpretation, and misstatement of facts that it was able to come to the conclusion that there is a combination in restraint of trade. This report, so far as I have been able to investigate it, contains no evidence of monopoly. I am reliably informed that the Commission in some instances actually used only such parts of telegrams taken from the files of the packers as appeared to bear out its case, omitting items from the same telegrams which were not useful evidence to the committee. So here we have an agency of the Government, constituting itself mainly as a prosecuting body, losing sight very largely of its function in the aid and guidance of business. The Federal Trade Commission, in place of cooperating and being of some assistance, is now badgering, barrying, and heckling American business interests. If there is any unfair competition or monopoly or any practices in trading that are not on the square, the Clayton antitrust law and the Federal Trade Commission law give ample power to suppress such illegal operations."

Australian Wheat Exports Controlled.

Trade Commissioner Ferrin, at Melbourne, has cabled the Department of Commerce that new methods of disposal and marketing of Australian wheat have been made by the Australian Wheat Board. A tendency having been shown to break away from the official scheme for the chartering of tonnage to remove wheat and flour, the effect of which was seen in the demands of ship owners for higher freights as the result of competition among the States, it is becoming increasingly difficult in obtaining freights at paying rates. The Commonwealth government has therefore decided that all overseas sales of wheat and flour shall be hereafter made by the Wheat Board alone.

PORT COLBORNE DISASTER.

The Canadian Department of Railways has charge of the salvage of the Port Colborne Elevator and most of the grain will be saved. The Minister of Railways has appointed a board of engineers to look into the causes of the disaster. This board is composed of Lieut.-Col. C. N. Monsarrat, consulting engineer to the Dominion government; A. St. Laurent, C. E., assistant deputy minister of the Department of Public Works; D. W. McLachlan, engineer in charge of the Port Nelson terminals of the Hudson Bay Railway, and John Murphy, electrical engineer of the Department of Railways and Canals. Besides investigating the cause of the accident, the board is requested to furnish a recommendation as to repairs and reconstruction, and has been given charge of salvaging the grain remaining in the bins.

As to the suggestion that grain and flour dust, when mixed with certain proportions of air and exposed to a spark, will explode, Manager Fawcett said he saw no chance of any spark coming from the barge; the elevator machinery was operated by electricity and there was no fire in the building. As to probability of an electric spark, he could not say. Regarding dust removers, Mr. Fawcett stated the elevator was completely equipped. "The dust collectors, however, are not run while boats are loading or grain is being weighed, although I believe it would be safer to do so."

SMALL SELF-CONTAINED DRIER.

The Ellis Drier Co., Chicago, recently placed a small self-contained grain drier on the market which is particularly adaptable to small mills, elevators and seed houses. The apparatus is built of the same material and gauges as the larger driers and is a practical machine in every respect. The entire apparatus occupies a height of only 14 feet 5½ inches, is 10 feet 8 inches long and 2 feet 9 inches wide. Two and one-half horsepower is needed to drive the fan and only five boiler horsepower of steam per hour is needed to heat the coils. The total weight of the machine is 6,000 lbs. The capacity of the drier is 30 bushels per hour. If further information is desired, write the Ellis Drier Co., Chicago, and they will be pleased to furnish full data in regard to this particular machine as well as the larger sizes which they manufacture.

THE ELLIS SMALL SELF-CONTAINED DRIER.

St. Paul Grain Exchange.

The following officers of the St. Paul Grain Exchange were elected at the recent annual meeting for the ensuing year: C. C. Gray, president; C. C. Chambers, vice-president; J. F. O'Meara, secretary; Benjamin Baer, treasurer. Directors are: W. J. Jameson, Jameson-Hevener Co.; W. E. Coles, Jr., Capital City Milling & Grain Co.; C. E. Griffith, Griffith Grain Co.; J. F. Drefenbach, St. Paul Milling Co.; J. G. Crites, Montana Grain Growers, Inc.; L. M. Abbey, Pioneer Grain Co.; L. R. Rolfe, Semola Milling Co., and Elmer Elvgren, Gopher Co.

THE H. C. L. PROBLEM ABROAD.

The mounting costs of living in England are of course alarming, and point to greater hardships next winter unless the people become more careful. The great problem is to restrain consumption. The Food Controller says that "apart from the profiteer," the chief causes of high foodstuffs are increased consumption and diminished production. Allowing for the increase in population arising from demobilization, the Controller, Mr. Roberts, says that the consumption has increased enormously, and gives the following examples in support of his claim: In November 1918 the consumption of beef and mutton was 64,000 tons; during the three months May, June, July it averaged 100,000 tons. The monthly consumption of tea went up from 12,000 to 14,000 tons; fish, from 46,000 to 54,000 tons; flour, from 420,000 to 436,000 tons; margarine, from 18,000 to 21,000 tons. He now announces that the controlled price of the best bacon must be raised to 60 cents a pound, which he believes will enable him to issue a lower figure for inferior cuts. The demand for bacon is slackening; and while the Controller does not anticipate that the price of this article will rise further, owing to the "free" quantities that are arriving in the country, he believes that the wholesale prices will keep up largely, owing to the rise in price of hogs and bacon in the United States.

The Controller does not agree, however, that prices are rising generally, but believes that the ordinary householder is buying much more food and, consequently, paying more for it. In confirmation of this statement, he referred to the reduction of 2 cents a pound on imported meat recently an-

nounced, and pointed out that this made a total reduction of 10 cents a pound on imported meat since the armistice and 4 cents on home killed.

The Controller said a month ago that he hoped it would not be necessary to restrict consumption by a revival of the coupon system, but registration would undoubtedly have to be maintained in the case of meat, sugar and butter at least. The degree of control, of course, varies with different foods. Control of prices alone is exercised in respect of at least 90 per cent of the principal foodstuffs. To what extent and in what manner it might be necessary to reimpose the various methods of control upon these articles with regard to which they had relaxed control he was not prepared to say, but he could give the most definite assurance that he should not hesitate to make control the real and vital thing it was during the war if by reimposing control he could hope to prevent prices from going higher than they otherwise would do.

AN AMERICAN EXPERT'S VIEW.

"The United States is the greatest country in the world and the people in Europe are looking at everything we do," said Charles J. Roberts, of Roberts of Oake, Chicago, who has been abroad representing the American Export Provision Co., a selling corporation of the packers outside of the "Big Five." "Ireland is the finest country in the world and the people there are better off and have more money than ever before.

"Conditions abroad are bad. Labor and liquor, particularly the latter, is the curse of the British Isles. Boats are lying in the Mersey River that cannot be unloaded because of a strike of the dock workers. Boats loaded with provisions have laid there 30 days without being unloaded and the chances are that much of the stuff is spoiled. There is a scarcity of coal, which has also aggravated the shipping situation. If England does not look out, Germany will beat them to it in the way of trade, as the workers there realize the situation and are ready to work ten hours a day to make up for lost time

"As to the provision situation, there is enough food in the world for all requirements, but it is a matter of transportation and protection of shipments. The slowness of unloading is a big factor and unless it is remedied, a great quantity of food will be spoiled. There is enough food on the other side to last until the first of the year, but they will have to buy freely after that time. England is again under food control and I understand that Italy and France are about to do the same. This means that they will send buyers to the United States.

"Between the labor situation and the unsettled condition of the foreign exchange market, it is difficult to do any business. Packers who had good profits in sales abroad are losing money and do not know where they are to get off. Sales made abroad may show a good profit, but it is absorbed in making remittances, owing to the low rate of exchange. Packers have made big profits and have paid them over to the Government. Business in July and August has been poor and there is a loss at present of $1.50 per hog in the packing business. Between the wild fluctuations in hogs and product and the constant menace and uncertainty in labor, a packer does not know where he stands. We would gladly turn over the business to the workers if they would guarantee us a certain profit. There is one thing certain, the packers cannot stand in the gap between the labor exchange and the Government attitude much longer. Hogs are high and should sell off to around $15. The farmer will have to absorb his percentage of the loss from present level of values, the same as other interests. At the same time, there is nothing to get real bearish over in the present situation, but when we get the new crop of hogs, which is expected to be a big one, and commence to move in October, values should work lower."

THE NEW LEGUME FODDERS

Industrial Community Progress as Affected by the Study and Use of Statistics—Investigation of the New Legume Hays —Their Potential Future

By DR. H. E. HORTON,[1]
Agricultural Commissioner, Am. Steel and Wire Co.

I won't hold you but a few moments because what I have to say on the subject of the legume hays will be good reading and it will not prove very good talking. Progress in every community is dependent on the progress in that community of men of financial ability. To be a man of financial ability means that your foresight must be as good as your hindsight. The business that has succeeded beyond all business. If you come to analyze its success you will probably find it is in the study of statistics, the proper presentation and study and then acting on what you find out. Take the two corporations we have today, the Standard Oil and the Steel Corporation, for example. They exemplify what I have said. If you should ask the general sales manager of either corporation today about the business he would say that the business of today was made by the work of ten years ago, and what we are today will bear fruit ten years from today, that every step that has been made has only been made after the most careful study of conditions.

In October we made up our minds the war was to end and we started to take account of the stock of the country as represented in agriculture. It happened to be my fortune to be in the Southern States during the winter. I was not in the South very long before I found the great part being played there by something of which we know practically nothing in the North—velvet beans, cow beans. I went all over and gathered all the information I could gather and I wish to say it didn't amount to very much. It wasn't the information that you could invest money in. I returned North and visited Washington and found that while they had an immense amount of materials, there was none that could be put in such shape that you could use it and make anything of it.

The first thing I investigated was cow pea hay; and after working several years with the best equipment, I had to admit so far as the Government publications was concerned I could learn nothing. I gathered all the statistical material, the technical materials and the map material that is available on the subject of these hays and I believe there is an opportunity for the National Hay Association to take up this material and study it to their advantage. Now, things have changed wonderfully in the last few years and we are fast approaching the time when we have to use the most mechanically perfect tool in our daily business. We have had hays of different sorts, principally timothy—and there is almost a timothy fetish. People think there is nothing but timothy. But timothy robs the soil; it doesn't produce a crop that has great nutritive elements, and why should we worship it. Now these crops I mention furnish the industry that will build up our farm industry and especially build up the dairy industry; and more than that, they enrich the farm so the farmer produces better and richer crops.

Now, one thought and I am through; and I will leave the rest for you to read and digest at your leisure. About 1909 some work was undertaken that meant a great deal for the world. You take timothy and analyze it and divide it up in carbohydrates and protein matter. The carbohydrates go to make up energy in a man and the protein goes to make up his strength. Our protein supply is growing more expensive. The legume hays gives this protein supply at a price we can afford to pay and at a price which is very attractive. For instance cow pea hay can be used at a price which is very attractive. It was discovered that peas had a protein value and various crops had a protein value. It was discovered that the protein in corn was not the valuable protein we had thought it; that corn was a weak staff on which to lean; that the protein in wheat was not what we had thought it. That led to the study of protein in different sources. The first experiment was made on calves, but these didn't extend very far. The experiments were then switched to white rats. It was possible in a short time to use the white rat and discover information of value. What was discovered? They found the protein from corn would not give the results expected; the protein from wheat would not; the protein from oats would not. It was discovered that with the addition of a slight amount of milk to the protein diet being fed to white mice the most wonderful results were secured. An animal might be reduced almost to death's door by the protein diet being fed him; then if a small amount of milk was added to this diet the animal was brought to robust health. It was found that a number of the diseases to which humans are heir are due to a deficiency contained in milk. One is vitamie; another is Soluble A. By the addition of this something to the diet we get something that will give us results.

This means we must develop our dairy industry if we are to continue a great people because the young ones require this milk more than the old ones. We cannot develop the dairy industry unless we develop our legume hays. We have reached 105,000,000 in our population and at the present time we are giving each one 105 gallons per year, but this is not being distributed in a way to benefit the people as a whole. When you have to pay 18c a quart for milk you have to shut out a great many people who should have milk. We should produce now eleven billions of gallons a year.

Now, the legume hays lend themselves to commerce in the same way as alfalfa and timothy and other hays with which you are familiar. I am not going to say more because the hour is late, but if you will take the trouble this winter to look over the figures I have collected and the maps I have brought together, I think you can find some way to use this material, so that you can make more money in the coming year.

[1]An address to the National Hay Ass'n convention at Detroit in July, 1919.

JULY FOREIGN TRADE.

Imports in July were the largest in the history of the country, while the exports were the lowest for any month of this year, according to a statement issued on Thursday last by the Bureau of Foreign and Domestic Commerce of the Department of Commerce. The July amounted to $570,000,000, nearly $350,000,000 less than in June, the high record month, but an increase over the $507,000,000 exports in July, 1918. For the seven months ending with July the exports were $4,618,000,000 in 1919, and $3,482,000,000 in 1918, an increase of nearly 33 per cent in one year.

July imports were valued at $345,000,000 as against $293,000,000 in June, 1919, and $242,000,000 in July, 1918. They are the largest monthly imports in the history of our foreign trade, exceeding by $16,000,000 the previous high record in May of this year. Imports for the seven months ending with July were $1,955,000,000 in 1919, against $1,788,000,000 in 1918—an increase in the last year of less than 10 per cent.

The excess of exports over imports was $225,000,000 in July, and $2,663,000,000 in the seven months of this year, $959,000,000 more than the excess in the seven months' period of 1918 of $1,694,000,000—an increase of 57 per cent.

The *Journal of Commerce* says no analysis has been attempted of the sudden drop in the volume of exports. It is known, however, that the largest reductions appear in the exportation of foodstuffs to Great Britain, where the restoration of domestic production and the resumption of trade with the smaller European countries have worked to effect a large displacement of American commodities. This will continue to be an increasingly greater phase of change in the monthly reports of our foreign trade, it is predicted, and, while the outgoing volume of foodstuffs will continue in very large amounts, they will go to other countries for a time until there, as in England, the former conditions are restored.

English Crops.

Despite the extraordinarily cold weather for the time of year the dry days have enabled the harvest to be started, and quite a fair area of winter barley, oats and rye had been cut up to Aug. 1. A few rubbed-out samples have been shown on Mark Lane, and they are plump and of good weight. They are soft beyond any experience of recent years, but buyers are ready enough to give them hospitality and wait for them drying. It is clear that without government interference all new crop produce would be fetching a guinea per cwt., and perhaps more; indeed, some new winter barley fit for malting has made 25s.

The new home wheat crop is of most uncertain promise, but a fortnight of really hot and dry weather is not an absolute impossibility for August, and would work wonders. The danger of the day is in the extraordinary softness and pulpiness of the grain. Ripening is most uneven, and the quantity of feed grain is likely to be 15 per cent at least as compared with 5 in a fresh, clean, dry season like 1911, and ½ per cent in a good average season like 1914. The yield per acre may reach 30 bushels, but there will be ugly gaps where the May-June drought was most serious. Barley of the spring sowing was also badly hit by the same spell of drought. Oats recovered from it with the June rains, and has been more suited by the cloudy July than either the wheat or barley.

Movement of Corn.

Following is a statement of the receipts and shipments of corn at the primary markets of the West for the weeks named:

Going Out of Business.

ce Current-Grain Reporter: We
your subscription bill for the year
ning Sept. 1. We wish to state
we are going out of business here,
g sold our property to Martin Bur-
of this place. The writer is going
the wholesale feed and flour busi-
in Augusta, Ga., under the firm
of C. E. Shumaker Flour Co. and
s your publication sent to this firm
. I intend being there by Sept. 1
eel that I have need of your val-
paper.—*C. Shumaker Sons, per C.
umaker, Altamont, Ill.*

Not Going Out of Business.

ce Current-Grain Reporter: The
t seems to be circulated that we
oing out of business, which is not
. We have simply sold a few of
ouses and the country houses we
left are also for sale when we can
easonable prices for them, which
e way, does not mean inflated val-
We expect to devote all of our
to track business and the opera-
of our cleaning house at Walcott.
Cloverdale house was sold to L.
racher & Co., and the house at
Rock was sold to our former man-
who is operating under the name
. C. Miller & Co.—*Stockdale &
k Co., Walcott, Ia.*

in North Central North Dakota

ce Current-Grain Reporter: You
e interested in the hay crops out
We are on the Mouse River, the
w bottoms of which are probably
eaviest producing fields of wild
be found. These bottoms usually
spring flooding, and as a result
ave a very good average produc-
f Red Top and Hollow stem hay.
s year's crop is above an average
antity and quality. An area ex-
g some 35 miles on both sides of
er will have considerable surplus
p. About 60% of the cut is now in
ack. Practically all haying will
npleted by Sept. 7 or 10. Present
average around $15 to $20 per
stack.

Grain crops are very poor. Dry hot weather was largely responsible. Rye and flax were badly damaged by grasshoppers. The corn crop is above an average in quality and is further advanced than usual.

Pastures are holding out well; recent rains have helped.—*J. C. Eaton, Denbigh, N. D.*

Grain Dealers' National Ass'n

Price Current-Grain Reporter: The twenty-third annual convention of the Grain Dealers' National Association, which will be held at the Planters Hotel, St. Louis, Mo., on Oct. 13, 14 and 15, gives every indication of being the largest meeting of grain men ever held in this country. An attendance of fully fifteen hundred is expected, exclusive of the ladies. The total attendance, therefore, ought to come close to the two thousand mark, as approximately four hundred of the fair sex are expected to be present.

The program for the convention is nearing completion and it will be the best ever prepared by the Association. This is said with the programs of the Baltimore, Buffalo and Milwaukee conventions in mind.

One of the speakers secured is Hon. David R. Francis, American ambassador to Russia. He will tell the grain trade all about the Revolution in the Muscovite Empire. Every grain man will want to hear this speech. Volumes have been written about Lenine and Trotsky, the Russian Red Guard, the reign of terror, and the efforts of the Bolsheviki to impose their crazy cult on one hundred and eighty million people.

Another speaker who will be at the convention is Julius H. Barnes, United States Wheat Director. Mr. Barnes will take this opportunity to discuss the grain situation not only with the members of the trade but with the whole world.

Hon. E. E. Clark, of the Interstate Commerce Commission, will be on the program and will have a message on the railroad situation. Nothing could be more timely than this address, when the whole country is discussing the Plumb plan to take over the railroads and run them in the interests of the brotherhoods.

Hon. James P. Goodrich, Governor of Indiana, and Chas. F. Curtiss, Dean and Director of the Iowa State College, at Ames, Iowa, will also be there. Governor Goodrich will discuss reconstruction problems, and Dean Curtiss will discourse on problems that are of vital interest to agriculture and the grain man. Prof. Curtiss is director of the Iowa Agricultural Experiment Station and president of the International Live Stock Exposition.

J. W. Shorthill, Secretary of the National Council of Farmers' Coöperative Associations, will also address the convention. Mr. Shorthill is one of the ablest men in the coöperative movement and his speech is sure to be both timely and interesting in view of the extreme radicalism that has developed in North Dakota and threatens to spread to other grain-producing states.

Several other speakers of national prominence will be on the program and their names will be announced shortly.

St. Louis is making great preparations for the convention. Marshall Hall is at the head of the executive or general arrangements committee. The entertainment provided will be elaborate and both the men and the ladies will be well taken care of.—*Chas. Quinn, Secretary.*

Crops in Hamilton County, Nebr.

Price Current-Grain Reporter: The crop conditions are a serious problem in this county as the wheat is making only from eight to fifteen bushels to the acre and will average only about twelve. The test weight is from 53 to 58 lbs.

Corn is a poor average—about 20 bus. per acre. It has been very dry for the last two months.

Hay is a fair crop. There have been two heavy cuttings of alfalfa hay but we will have no third cutting, or else it will be a seed crop. I think that there will be enough of seed to supply our home demand.

We had two nice showers in the last two weeks, which put the ground in fine shape for plowing. Threshing is about finished. Oats were good—30 to 40 bus. to the acre.—*E. G. Raymers. Marquette, Nebr.*

Corn on Monday.

Corn after ruling extremely erratic and displaying an easier tendency, rallied sharply and closed strong at an advance of practically 2c. Trade was of rather limited volume and devoid of any special feature. Lower hogs and moderate increase in movement and further talk of Texas offerings intensified bearish sentiment to such an extent that short-selling was ever extended. Railroad weekly reports were rather discouraging corn in Kansas, but elsewhere were quite favorable. There were numerous predictions regarding the Texas surplus requirements, etc., but as there are no statistics on which to base them, they were considered nothing more than a guess. The fact that bids were sent out Saturday of $1.80 f. o. b. Kansas City failed to bring any acceptances and that the Southwestern spot markets have not reflected the so-called heavy offerings of Texas corn rather makes it look as if present and prospective offerings from that state and their effects are being magnified. No question but that Texas has produced more than they can consume and that offerings from the above state will prove a considerable factor but until their offerings are reflected in the cash market, we believe that one should think twice before selling few crop futures at present discount. Texas corn as a bearish feature factor may prove as big a boomerang as the Argentina offering did in February, March and April when sentiment was intensely bearish in May on theory that imports of Argentina corn would be sufficient to force cash corn to a discount.—*Logan & Bryan, Chicago.*

As has so often happened in the past in a comparatively narrow market, the bearish news wore itself out and the market becoming oversold, when shorts tried to cover, they had to bid prices up. The Texas offerings were trotted out again with claims of a sale made to come here of 10 cars of white corn prompt shipment at 189. This proved a boomerang to short sellers, many of whom increased their lines on this transaction.—*Bartlett Frazier Co.*

It is stated here that Texas will probably move about 5 million bus. shortly. With the congested position of the Gulf ports and the fact that it must compete with Argentina corn in foreign markets, it is expected that much of that surplus will find the most profitable outlet in the markets in the Middle West. Business for shipment small at Chicago.—*Pope & Eckhardt Co.*

COUNTY BEHIND A TRUCK.

Sullivan County, Ind., one of the great agricultural counties of the state, has taken up a new industry in which the people seem to take quite as much interest as the farmers do in silos, blooded livestock and superlative farm products. Near the railroad station in Sullivan is a new brick building with a big sign reading, "Mutual: America's Greatest Truck," a building which recently was the scene of a christening quite out of the ordinary. The whole town, for instance, closed its doors for the afternoon—the banks and retail shops; and everybody thereupon formed a procession behind the local band, the conspicuous exhibit of said procession being the first Mutual Truck ever built, run by its purchaser, a flour miller who lives across the line in Illinois, who has been hauling grain and flour in said truck for about 13 months through all kinds of weather and over all kinds of country roads. Following the truck there were 300 automobiles of innumerable designs and makes, conveying the officers of the company, "orators of the day" and citizens in general. After winding its way through the principal streets of the town, the procession wound up at the truck factory, where seats had been provided for 1,500 people on the ground floor of the new building and then the program was gone through with. The town poet read an epic on "The New Enterprise." The local banker told the story of the financing of the enterprise; and then Robt. E. Petrie, its president and founder, gave the history of the conception of the enterprise before it got into the hands of the financiers who put it on its financial feet. Finally, the editor of the local daily newspaper painted a picture of the advantages of industrializing the county which had hitherto been largely agricultural only; and the advertising man told of the early struggles of other truck companies which now have developed into an enormous industry in various parts of the country.

It is not very often that an entire county backs up an industrial enterprise of this sort; but it is quite evident that Sullivan County stands behind the Mutual Truck. When a whole rich county like Sullivan, including its banks and bankers, get behind an enterprise after two years testing out the truck, the sincerity and judgment of the promoter makes the opening of the plant a holiday, a momentum is generated which should carry such industry to marked success as will undoubtedly be the case with the Mutual Truck.

Visible Supply of Wheat.

BARLEY MARKETS.

MILWAUKEE.—Prices for barley are widening out, due to the large percentage of light weight stuff on the new crop. The barley market closed 2@3c lower as receipts are increasing. Good heavy malting grades, especially old, are in brisk demand, particularly from brewers, and prices for this class are holding steady, while low qualities are difficult to place. Light weight stuff of the new crop is rapidly sliding downward to the oats basis, with by far the larger percentage in the feed class. The receipts for the week were 256 cars, against 99 cars a week ago and 75 cars in 1918.

Current quotations are: Good to choice, 48 to 50 lb. test, is quotable at $1.36@1.43; bright, $1.44@1.47; fair to good, 45 to 47 lb. test, $1.32@1.40; low, 41 to 44 lb. test, $1.25@1.32; feed, $1.18@1.30. Iowa quoted $1.25@1.43 for light to fancy; Wisconsin, $1.30@1.47; Minnesota, $1.25@1.43; Dakota, $1.25@1.43; feed and rejected, $1.18@1.30.

BUFFALO. — Maltsters wanted barley but would not pay the prices asked for desirable, fairly clean of black oats and shippers got tired of offering that quality. There was a good clearence of all the offerings here to outside buyers. Malting choice to fancy, $1.52@1.55; ordinary, $1.45@1.50; feed, $1.38@1.44, on track or to arrive.

DULUTH.—Trade in barley has dried up of late on this market and with a falling off in inquiry from the East that had been a feature up until recently prices dropped 7@12c during the week with the cash article at from $1.15 to $1.33. Receipts were small, amounting to 61 cars during the six days. Marketings of new barley from over the West are counted upon within the next few days in some volume.

CHICAGO, ILL. MILWAUKEE, WIS.

KANSAS CITY.—New crop offerings of barley made a good showing this week, coming chiefly from western and northwestern Kansas. Grading was mainly low because of light weight, but the grain had good color. Receipts were 64 cars, against 13 a week previous and 1 a year ago. Shippers were the best buyers, some barley going to feeders and some to the East, possibly for export. Prices broke sharply and a further recession is expected. At the close No. 3 sold at $1.30 a bushel, or 11@12c down; No. 4, $1.26@1.28, or 12@14c off. Manufacturers of ground feed say the demand for that product is held in abeyance, with the hope that feed will fall to the level of wheat shorts. Ground feed was quoted at $3 per cwt., or 1c cheaper, and this figure would have been shaded except for tendency in Minneapolis to hold prices up on account of the poor crop of barley in the Northwest. Stocks of barley in Kansas City increased 1,000 bus., to 7,000 bus., against 72,000 a year ago.

CHICAGO.—There was very little interest manifested in barley last week. Maltsters took a little of the better offerings but the malting trade is practically at a standstill, for the present at least. Apparently the near-beer brewers are loaded up and of course there is no indication as to when regular beer brewing may be resumed if at all. Feed dealers also took a little barley but on the whole their demands were decidedly weak and there was practically no export demand. Prices however for the week remained steady and unchanged until Saturday when the week closed with an average of about 2c lower. Pearling barley was in demand but very little of that quality was offered during the week. Some new barley was purchased by the feeders. The same dullness continued on Monday with all grades, except the very choicest, weak and from 1@3c lower, with a very scattering demand, none of which was at all urgent. The most dependable inquiry now is from the malting trade, but even that industry is doing very little and holding off, for lower prices, perhaps. The export demand also has continued light. The feature Monday was a sale of fancy new barley testing 49 lbs. at $1.43. Total sales for the day reported were 17 cars at a range of $1.33@1.43. All futures closed lower—Sept. at $1.23 after a

range of $1.22@1.24; Sept. new closed at $1.29½ after an opening of $1.31½. Dec. closed at $1.30, a ¼c below the high point of the day but 2c better than the low. No exports reported, visible supply shown elsewhere.

MINNEAPOLIS.—Lack of a shipping demand caused weakness in the barley market as receipts are picking up and pressure is increasing. Elevator companies have been more prominent on the selling than the buying side lately. Most of the new crop barley is showing very light weight and is in slack demand. Clean old crop barley is selling in fair shape. Cash prices follow the futures rather closely and the futures show a weak tone.

SAN FRANCISCO—The market is very dull. Sales are in small lots only and futures are the only live spot in the market. Values have declined during the week and the *Commercial Review* quotes $3.05@3.10 per cental according to quality. December futures are quoted at $3.20@3.25.

PORTLAND—The barley market has shown considerable more life than for some time past. The harvest is progressing rapidly; and the *Commercial Review* says that buyers are taking all offers from growers and in fact have representatives in the country buying wherever possible. There has been no particular pressure to sell but offerings are freely made on the Grain Exchange and a number of good sales are recorded. Prices are lower than some time ago and at present the markets generally are rather nervous over Government investigations and attacks on values. Any radical change is liable to result in disturbance. Competition for food barley is keen, and the North Pacific states have only a small crop of this quality but importations from California will supply all that is needed. The quality generally of the north barley is equal to that of former years. Prices during the week range for No. 2 Blue, $66.50, and for feed quality $65. Sales of feed were reported as high as even $66.50.

English Barley.

The English home-grown barley crop is still regarded as being a very poor one, though it improved considerably in the early part of July. Harvesting is in full swing in some of the early counties, and as the new crop is not under control by the authorities, fancy prices are being asked and for good qualities have been paid. Winter Barley is better in quality than quantity and is likely to fetch very high prices, notwithstanding the quantity of overseas sorts now arriving. Very little old crop remains on hand, but a few samples have been seen on country markets, and made full prices.—*London Grain & Seed Reporter.*

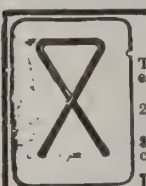
Last Week in Rye.



Fluctuations in the rye market week were within a narrow range w the close at a net decline of 2½c. present dullness may be expected to tinue until export buying is of gre volume. Meanwhile rye's value as feedingstuff should prevent any ha decline, more especially as it is selling about sixteen dollars p under corn. Flour values are ver —*Blodgett-Holmes Co., Janesville*

THE RECORDS of the Flour Mill and Grain Elevator Mutual Insurance Companies

show that 80 per cent of all fires in Mills or Elevators start in elevators. The installation of an automatic feeding device which will positively prevent an elevator choking from overfeeding and an automatic relief which will prevent an elevator choking from bin getting full or spout choking, will annually save millions of dollars in fire loss and add at least 50 per cent to efficiency of any stand of grain elevators. These devices are perfected and are available for mill and elevator owners, are very inexpensive and absolutely practical. Full particulars will be furnished, free of charge by this office, on request.
